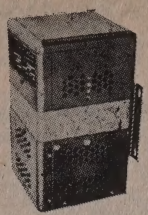
LINE VOLTAGE REGULATORS

SOLATRON® ±½% LINE VOLTAGE REGULATORS



Unique Solatron static-magnetic line voltage regulator combines in one compact unit, fast response, "tight" voltage regulation, adjustable output, remote sensing, high kVA capacity, using no moving parts. Withstands high inrush load currents and momentary overloads, therefore, making it unnecessary to oversize kVA ratings. Combines the ruggedness typical of transformers with the light weight of electronic control circuitry resulting in a regulator of remarkable compactness.

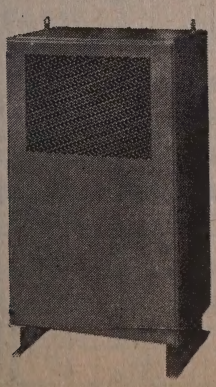
50 Hz UNITS AVAILABLE ON REQUEST



SOLATRON FOR COMPUTERS

Improved Solatron LVR for computers designed specifically to meet stringent requirements of E.D.P. equipment. **Voltage:** 208/230 V nom. Input: 3 phase, +10/−20% range. Output Regulation: ±1% for any combination of line, load, thermal drift, warm-up and frequency. Capable of remote sensing. **Frequency:** 57–63 Hz. **Output Voltage Adjustability:** Continuously adjustable from 208 to 230 volts. **Transient Response Time:** Starts immediately. Complete within 4572 cycles. **Power Efficiency:** 95% typical (watts). **VA Efficiency:** 85% typical. **Load Power Factor:** With little derating, .75 lagging to .95 leading. Without derating, .95 lagging to unity. **Regulation:** Line regulation, ±¼%; load regulation, ±¼%; line and load, ±½%. **Maximum Harmonics:** Balanced line and load, 35% maximum; unbalanced line and/or load, 6% maximum.

*Regulators consist of 3 cabinets. Size and weight specifications are for each cabinet.

CVS/CVN SERIES CONSTANT VOLTAGE TRANSFORMERS

Regulate voltage output within ±½% regardless of input voltage variations as great as ±15%. Ultra-fast regulating action—response time is 1.5 Hz or less. Provide fully automatic, continuous regulation with no manual adjustments needed. In tables, figure column indicates case structure: Fig. A, single housed unit with exposed core end housings and screw terminals in outlet box; Fig. B, same as A but duplex assembly; Fig. C, drawn case with integral capacitor; Fig. D, end bell unit with exposed core and separate capacitor.

CVS SERIES SINUSOIDAL TYPE

Less than 3% harmonic content. Excellent for equipment having elements sensitive to power frequencies harmonically related to fundamental. No filters employed.

*Cord/Receptacle Adapter Kits available; see table, left, for code explanation.

CORD/RECEPTACLE ADAPTER KITS

Provide convenience of input plug and output receptacle for most Series CVS and CVN single housed transformers (Fig. A). To determine the correct adapter kit for a given transformer, refer to Kit Code column in the CVS/CVN tables at right. Description column below indicates 2-wire or 3-wire input cord and output receptacle connections.

Kit Code	Sola Kit No.	Fig.	Description	Net Each
a	999-005	E	2-wire	$8.95
a	999-019	E	3-wire	8.95
b	999-009	E	2-wire	8.95
b	999-020	E	3-wire	8.95
c	999-104	F	2-wire	9.50
c	999-105	F	3-wire	9.50

CONTROL TRANSFORMERS (FIG. G)

Single phase control transformers for multiple usage with relays, solenoids, recording devices and similar applications. Available in triple voltage, dual frequency of 50/60 Hz at 240/480–120 volts, 230/460–115 volts, and 220/440–110 volts. All models have 55° C temperature rise.

THE STATE-OF-THE ART IN MODULAR POWER SUPPLIES: TOTALLY INTERCHANGEABLE, ZERO MAINTENANCE, LONG LIFE, FAIL-SAFE PERFORMANCE, AND LOW COST.

PREMIUM MODULAR POWER SUPPLIES (FIG. H)

High performance, IC regulated power supplies are completely protected from overvoltage, overtemperature, and short circuit. Convectionally cooled modular power supplies give 0.01% + line or load regulation. Power supplies with 0.01% RMS PARD, have integrated circuit for increased stability. Fully equipped with remote sensing and automatic current limiting.

Sola No.	Output Voltage Adjustment	Output Current Amps	Net Each*

OEM MODULAR POWER SUPPLIES (FIG. I)

Completely interchangeable series regulated power supplies come with remote sensing and short circuit protection. Convectionally cooled power supplies give a regulation of 0.05% +1 mV on line voltage or under full load. Constant voltage power supplies have 0.01% rms PARD. Built-in automatic current limiting. Can be operated on bench or rack mounted.

CVDC REGULATED DC POWER SUPPLIES WITH FIXED OUTPUT (FIG. K)

Static-magnetic devices with fixed regulated DC output. Rugged, simple and dependable; for computers, data processing, measurement, telemetering, and wherever isolation from line fluctuation is required. Consists of a constant voltage transformer, rectifier and filter circuit. Provides tight regulation, quick response, isolation and current limiting, high efficiency and reliability; no-maintenance operation. **Regulation:** Handles rough voltage inputs; holds output voltage of ±1% or less for input variations as great as ±15% of nominal input voltage. Rated input range is 100–130 V, 60 Hz. **Response Time:** Output voltage will return to regulation envelope within 25 msec. **Frequency:** Actual variation is linear over ±5% change in frequency from 60 Hz, approx. 1.4% voltage increase for 1% frequency increase. **Load Regulation:** Resistive loads (unity pF) within load rating will cause nominal output to drop from no load to full load. Inductive loads (lagging pF) cause nominal output to decrease with power factor. Leading pF similarly causes a voltage rise. **Efficiency:** 80–90% full load. Input power factor is approx. 0.8. **Ripple:** Total content does not exceed 1% rms. **Short Circuit Protection:** Automatic current limiting is inherent in transformer; limited to approx. 250% of rated value. **Operating Temperature:** 0° to 50° C ambient; output voltage will change approx. 1% for every 40° C change in temperature. **Multiple Operation:** Two or three units can be paralleled for higher output current rating, or connected in series for higher output voltage. **Three-Phase Operation:** Achieved by connecting inputs of three units of the same type to the line and connecting outputs in parallel. **Mounting:** Standard 19″ wide rack panel.

UNINTERRUPTIBLE AC POWER SOURCES (FIG. L)

An uninterruptible power source combines a rectifier charger, battery bank, solid-state inverter and a bypass switch to insure clean, continuous AC power to any critical load. The AC to DC converter simultaneously charges the battery and furnishes power to the inverter. If a loss of AC input power occurs, the inverter continues to draw power from the battery, thereby supplying power to the load. Since the battery is always connected to the inverter, there is no switchover time, hence no noticeable voltage fluctuations to the load. The AC output of the uninterruptible power source is synchronized with the AC input under normal conditions; however, during an input power failure the output frequency is determined by a stable internal oscillator. The output stage of the uninterruptible power source utilizes the CVS transformer design to provide good regulation and excellent power-line noise rejection.

STANDBY AC POWER SYSTEMS (FIG. L)

A unique standby AC power source that provides line voltage regulation and isolation even when the input AC power line has not failed. During normal line conditions, the transformer is providing transient and brownout protection for loads such as computers that are adversely affected by these typical power-line conditions. When the power-line voltage falls below a preset operating level, the bypass switch transfers the load and the regulator to a solid-state inverter. Power for the inverter is then supplied from a battery bank. There is a short time delay of power to the load during the transfer. If the load is so critical that the 200 msec transfer time loss cannot be tolerated, an Uninterruptible power source should be used.

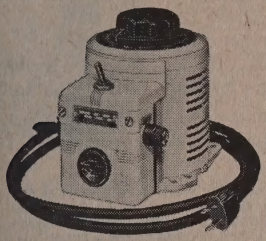
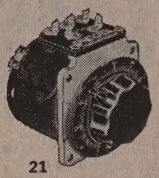
POWERSTAT® VARIABLE TRANSFORMERS WITH POWERKOTE® COILS

10B

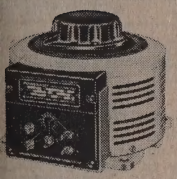
126



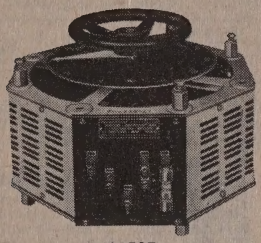
116B



21



136B



1256D

POWERSTAT Variable Transformers with POWERKOTE Coils give an average of 20% higher current ratings, 10:1 greater overload capability, longer life, greater resistance to fungus, salt spray and other contaminating atmospheres. POWERKOTE Coil commutator bars are embedded in place, preventing steady-state operating temperature and severe overloads from distorting the commutator. POWERSTAT Variable Transformers deliver continuously adjustable voltage from AC lines; feature rugged construction, precious metal-plated commutators, excellent regulation, high efficiency and conservative ratings. They introduce no waveform distortion. Manual and motorized single and ganged assemblies are offered in ratings from .13 to 244 kVA. For complete technical data request current POWERSTAT catalog.

ADJUSTABLE SPEED DRIVES

Motor-driven units in Series 116B-216B, 117B-217B, 126-226, 136B-236B and 146-246 are available with adjustable speed drives which permit full range output voltage to be controlled at any speed, 5 to 200 secs. **To Order:** Add prefix **AM** to type number and **$200.00** to the motor driven price. For adjustable speed control **BHP65455-G1,** add **$14.70** to price.

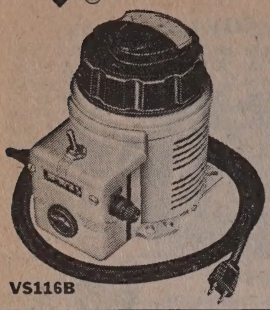
EXPLANATION OF FOOTNOTES

‡Letters in Part Numbers Indicate as Follows:
3PN—NEMA plug and receptacle.
Suffix letters and numbers (2, 2S, 4P, 6P, etc.), indicate ganged units. Numeral shows number of units in assembly.
U—Supplied without protective screening, terminal enclosure, input cord, output receptacle, fuse or switch.
*Add type number prefix from table below to Superior Powerstat No. for full-range travel motor speed desired; e.g., type **5M**21 is 5-sec No. 21 Powerstat, **15MC**126 is 15-sec No. 126 Powerstat, etc. Four-gang or larger types not available in 5-sec speed.

Superior Powerstat Series	Prefix for Full-Range Travel Motor Speed 5 Sec	15 Sec	30 Sec	60 Sec
21-22 116B-216B 117B-217B 146-246	5M	15M	30M	60M
1156D-1256D	5MB	15MB	30MB	60MB
126-226	5MC	15MC	30MC	60MC
136B-236B	5MD	15MD	30MD	60MD

†Also has terminals for operating at ½ this input voltage. ‡For parallel connection, order T5579B choke at **$63.53** extra. §Also available as 3PN type. #Metal panel mounted rating. See published derating for brackets and nonmetallic panels. ▲For parallel connection, order T5000B choke at **$33.08** extra. ■If the maximum output voltage is limited to the input voltage, the frequency range is 50–60 Hz. ♦For parallel connection, order T6053 choke at **$45.15** extra. ‡For parallel connection, order T6065 choke at **$79.28** extra.

•AVAILABLE OFF-THE-SHELF FROM STOCK.



VS116B

METERED KNOB POWERSTAT® VARIABLE TRANSFORMERS

Stationary, direct-reading voltmeter on knob has accuracy of *±3% FS. Voltmeter does not turn with knob; insensitive to stray magnetic fields. Saves panel space, wiring and installation costs. Series 21-22 thru 146-246 back-of-panel mounted types may be combined with metered knob assemblies. Existing models can be retrofitted also.

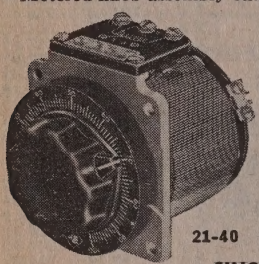
*Also available with cord-plugs shown in standard type chart. †Has terminals for operating at half input voltage. ‡Max.
Type VS150 (0–150 V Meter Scale) or **VS300** (0–300 V Meter Scale) —Metered knob assembly only. Price Each..... **$58.28**



21-40

40-VOLT POWERSTAT VARIABLE TRANSFORMERS

Meet the high current, low voltage requirements of low voltage power supplies and a wide range of transistor circuit applications. All types are open construction. Individual units in ganged assemblies have the same electrical ratings as single units of the corresponding type number.

SINGLE PHASE

Superior Type	Line Volts	Freq. Hz	Output Volts	Output Max. Amps	Output Max. kVA	Price Each Manual	Price Each Motor* Driven

*Add type number prefix for full range travel motor speed desired: **5M** for 5 sec.; **15M** for 15 sec.; **30M** for 30 sec.; **60M** for 60 sec. (for example, **15M**21-40). †Ratings given apply separately to each unit in assembly.

DOUBLE WOUND POWERSTAT VARIABLE TRANSFORMERS WITH ISOLATED SECONDARY

POWERSTAT type LW136B is a double wound assembly with an isolated secondary. When ordering (*) motor driven assemblies prefix type number with desired speed of either 5, 15, 30 or 60 seconds for full range travel and letters MD (for example, 5MDLW136B-3). Any of the ratings given below are possible simply by using the proper terminal connections. These are only a few of the many ratings that can be obtained. Data sheet on request.

*Current is maximum for constant-current load; kVA is maximu for constant-impedance load. †For single phase service.

●AVAILABLE OFF-THE-SHELF FROM STOCK

Superior

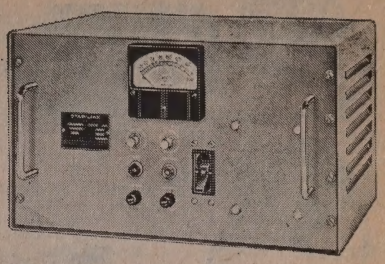
REGULATORS, CONTROL, OVERVOLTAGE DETECTOR

STABILINE® AUTOMATIC VOLTAGE REGULATORS

Maintain a constant output voltage regardless of line or load changes. Several series are available for requirements from 0.25 to 275 kVA. A complete line of Stabilines for use on frequencies of 400 Hz and higher also available. Bulletins giving complete data on all series are available on request.

ELECTRO-MECHANICAL TRANSISTORIZED SERIES

Type EMT: Utilize transistorized control circuits, motor-driven Powerstat® variable transformers and buck-boost transformers to regulate line voltage. Widely used in industrial applications or where constant output voltage is required with zero waveform distortion. EMT Series types are offered in ratings from 2.3 to 118 kVA. For heavier load requirements, models of the EMS Series (not listed) are offered in ratings from 25 to 275 kVA. **Type EMK:** Stabiline automatic voltage regulators offer an extremely fast correction rate. Rugged construction assures dependable performance with little or no maintenance. Efficiency, approx. 99%; rated accuracy, ±0.75% for all variations of line voltage or load current within the stated range of the unit.



TYPE EMT4106C

INSTANTANEOUS ELECTRONIC SOLID STATE SERIES

Highly accurate, fast-correcting units feature solid state circuitry which permits smaller and lighter units than comparable tube-type regulators. Other benefits include low distortion, high efficiency (up to 95%) and wide operating frequency range. Speed of correction can be considered instantaneous for most applications. Will maintain output voltage within 100 mV rms band for any combination of rated input voltage and/or load from 1.0 to 0 power factor lagging. With the exception of types IES9110, IES9115, IES9210 and IES9215, all models can be rack mounted by removing the cabinet feet.

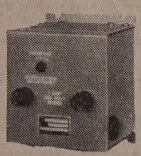
*At nominal output voltage; input voltage range shifts proportionally with output voltage setting. †Motor drive travel time in seconds divided by input range in volts. ‡Can also be operated with an input range of 105–125 volts, output rating of 40 amps, 4.6 kVA and correction rate of .15 sec/V. §Can also be operated with an input range of 95–135 volts, output rating of 57 amps, 6.6 kVA and correction rate of .075 sec/V. #60 Hz only. ▲Can also be operated with a nominal 208 volt output, input range of 177–230 volts and output range of 200–216 volts. ▲Can also be operated with a nominal 208 volt output, input range of 186–226 volts and output range of 200–216 volts. ■Also available as rack models (add suffix **R**); prices on request. ♦Three-phase types; all others single-phase. ▲Can also be operated on an input range of 95–135 volts with rating of 23 amps, 2.6 kVA and correction of .02 sec/V. *Units subject to setup charges available on inquiry.



OVK100 Overvoltage Detector

STABILINE OVERVOLTAGE DETECTOR

Solid state voltage level detector protects connected equipment used with Stabiline Automatic Voltage Regulators in the event of an overvoltage condition. When the voltage being monitored exceeds a preset level, the device actuates an SPDT relay that can be used to actuate protective equipment or a warning device. Relay contacts are rated 5 amps, resistive. Can be used in latching or nonlatching connection: In latching connection, the relay closes when an overvoltage condition exists and remains closed even when the overvoltage condition is removed; in nonlatching connection, it closes during overvoltage, but will automatically reset when overvoltage condition is removed. Trip level is adjustable, 110 to 150 volts. Operation at higher voltages is possible with use of an external stepdown transformer. Size: 4 7/16″ w. x 3 5/8″ d. x 5 1/16″ h. overall.

Superior Type OVK100 Overvoltage Detector—Net Each.....**$122.00**

FR501B Controller

STABILINE FULL-RANGE REGULATOR CONTROLLER

Designed for use with motor-driven Powerstat® variable transformers to maintain constant output voltage. Adjustable to any value within the full range of the Powerstat used. Regulates output from any motor-driven Powerstat rated 120 or 240 volts, 50/60 Hz, single-phase. Dependent on Powerstat used, unit may be used for 3-phase applications maintaining one line-to-neutral or one line-to-line voltage. Can also be used in 480 volts, 50/60 Hz, 3-phase, but an auxiliary step-down transformer is required for sensing line-to-line voltage. Voltage output remains within 4-volt band when used with 240 V types. Voltmeter on front panel monitors Powerstat output in 0–300 volt range. Other controls include voltage adjust, on-off switch, pilot indicating when unit is energized, motor damping control and three fuses. Size: 11″ h. x 6″ w. x 7″ d., overall. Mtg. centers 4½″ x 10¼″ maximum.

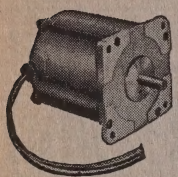
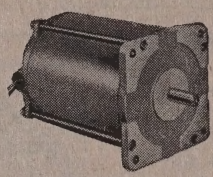
SS150, SS152, SS250, SS252



X1000



SS1800

Units may be used as DC stepping motors and start at full-rated torque. Slo-Syn synchronous motors are permanent magnet types (AC) having instant start, stop and reverse characteristics and a basic shaft speed of 72 rpm with 60 Hz applied. Adaptable for use as a DC stepping motor or incremental positioning device that can be stepped 200 times per revolution of the motor shaft. Negligible overshoot; no ratchets or detents are used. Single-pole, three-position switch gives complete forward, reverse and "off" control because motor has only three leads. Starts or stops in less than 0.025 second or, approximately 1.5 Hz. No need for mechanical or electrical braking; stops in less than 5° of motor shaft rotation. Starting and operating currents nearly identical; no excessive inrush current when motor is turned on. Lubricated-for-life, sealed ball-bearings. Types with **X** in number are explosion-proof and UL Approved for Class 1, Group D service.

SPECIAL DUTY TYPES available. Request latest SLO-SYN literature covering:

Double End: Have output shafts projecting from both ends. Types available in all cataloged torque ratings. Those with 50, 150, 250 and 400 oz.-in. ratings can also include planetary gear assemblies if desired.
200 RPM: Types TS25, TS50 and TS52 are similar to standard models, but operate at a synchronous speed of 200 rpm and take 5° steps when used for DC stepping.
28.8 RPM: Type LS50 runs at 28.8 rpm at 60 Hz without stepdown gearing. Makes 500 steps/rev as a DC stepping motor. Torque rating, 60 oz.-in. Stops with 25 msec.

PLANETARY GEAR ASSEMBLIES

Standard types of Slo-Syn synchronous/stepping motors with special gear planetary assemblies are available. Speed reduction assembly is completely enclosed in dustproof housing mounted on shaft end of motor. Load is evenly distributed over three special nylon gears. Planetary gear shaft is ball-bearing mounted; self lubricated nylon gears. To order, basic type number must be suffixed with the desired planetary gear assembly number For example, SS50-**P1.** See tables at right for specifications of planetary gear types and price schedule.

SLO-SYN® PRECISION STEPPING MOTORS

Designed for phase-switched DC stepping duty in applications requiring greater positioning speed and accuracy than possible with standard SLO-SYN motors. Make 200 steps per shaft revolution with each step 1.8°; accurate within ±3% noncumulative. They may be operated at speeds greater than 500 steps per second if accelerating and decelerating circuits are used. With proper circuitry, the motors may be operated at speeds of 1000 steps per second or higher without missing any steps. *Features **Viscous Damping,** a fluid system that approaches critical damping.

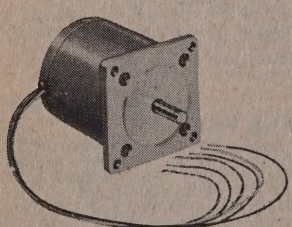
M SERIES SLO-SYN® STEPPING MOTORS



The M Series SLO-SYN motors represent the most advanced permanent magnet stepping motor design available. Offer the most complete range, both in torque ratings and in size configuration. Motors provide the highest torque per pound and torque to inertia ratios; can be driven at rates above 20,000 steps per second with a minimum of power input. Standard drives available for rates to 5,000 steps per second. Higher rates can be supplied on special order. Class B insulation; may be operated at an ambient temperature range of −40° C to +65° C. Continuous duty temperature rise is 65° C. Stepping increment is 1.8° with a choice of ±5% or precision ±3% accuracies available as standard. An eight-step input sequence gives a stepping increment of 0.9°.

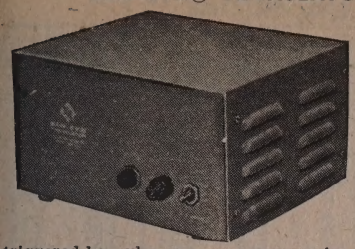
Superior Slo-Syn Motors, Drives

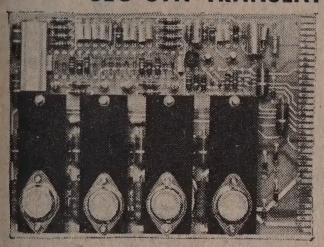
SLO-SYN® TRANSLATOR ST1800B



For pulse-to-step conversion of data to bifilar motors. Converts low-level signal pulses or square waves into the correct switching sequence needed to drive a SLO-SYN motor at the desired stepping rate to 500 steps/sec. Input is 105–125 volts AC, 1.5 amps. Signal input impedance is 500 ohms. Input may be triggered by pulse or square wave or by an external switch. Operates in ambients from 0° C to +40° C. Ideal for wide range of programmed positioning and indexing functions. Approx. shipping weight, 12 lbs. Use with 1.8° step angle motors M Series, HS-25, HS50, HS50L, SS25-1001, SS50-1008, SS150-1010, SS250-1027, SS400-1021, SS1800-1007, X250-1003 and X1500-1001; 0.72° step angle motors LS50-1005 and LS50-1006; and 5° step angle motors TS25-1008 and TS50-1001.

•Superior Type ST1800B—Net Each..... **$325.00**

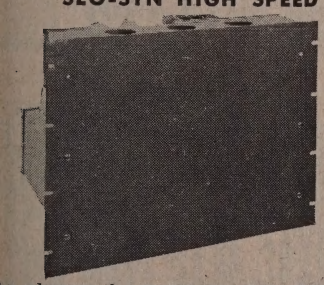
SLO-SYN TRANSLATOR MODULES



Plug-in printed circuit boards with logic capabilities for stepping SLO-SYN motors. STM1800 and STM1800C are basic translators capable of bidirectional operation of motors. Models with V suffix, i.e., STM1800V and STM1800CV, are similar but have built-in oscillators to provide triggering signals. Potentiometers are supplied with V-suffixed models for adjusting oscillator speed. STM1800 and STM1800V have speeds to 500 steps/second and are used with M Series, HS and bifilar motors. STM1800C and STM1800CV have speeds to 2000 steps/second and are used with M Series motors. Types STM1800 and STM1800V require 8 amps power supply transformer T5934-G2. Types STM1800C and STM1800CV require 10 amp power supply transformer T6382.

•Superior Type STM1800—Net Each..... **$79.00**
•Superior Type STM1800V—Net Each..... **89.00**
•Superior Type T5934-G2—8 Amp Power Supply Transformer. Use with same motors as ST1800. Net Each..... **$ 39.00**
•Superior Type STM1800C—Net Each..... **129.00**
•Superior Type STM1800CV—Net Each..... **139.00**
•Superior Type T6382—10 Amp Power Supply Transformer. Use with M Series motors M061-FC08, M061-FD08, M062-FC09, M062-FD09, M063-FC09, M063-FD09, M091-FC09, M091-FD09, M092-FC09, M092-FD09, M093-FC11, M093-FD11, M111-FD12 and M112-FJ12. Net Each..... **$39.00**

SLO-SYN HIGH SPEED TRANSLATORS



Used with certain precision models (with prefix HS) and M series (models with prefix M) motors to provide high stepping speeds. High speed translator HTR400 has 50 to 2000 step/sec speed; HTR103RT has 100 to 3000 step/sec speed, and HTR105RT has 100 to 5000 step/sec speed. Acceleration and deceleration is adjustable. Each pulse received from a built-in ocsillator or from an external source will cause the translator to advance the motor one step. Triggering pulses can be supplied by tape readers, computers, oscillators, etc. Ambient temperature, 0° C to 40° C, operating; −55° C to 85° C, storage. Rack mounted design with plug-in solid-state circuitry.

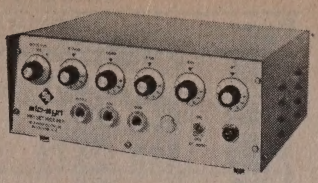
•Superior Type HTR400—Speeds up to 2000 steps/sec. Used with Motors HS25, HS50, HS50L and HS400B-1003. Net.. **$890.00**
•Superior Type HTR103RT—Speeds up to 3000 steps/sec. Use with M112-FJ25 motor. Net Each..... **$1230.00**
•Superior Type HTR105RT—Speeds up to 5000 steps/sec. Use with M Series motors M061-FC02, M061-FD02, M062-FC04, M062-FD04, M063-FC06, M063-FD06, M091-FC06, M091-FD06, M092-FC09, M092-FD09, M093-FC14, M093-FD14 and M111-FD16. Net Each..... **$1075.00**

SLO-SYN BUFFERED TRANSLATORS

Drives certain M Series (models with M prefix) motors in response to commands from computer, digital control or other device which operates at a fixed pulse rate. Acceleration and deceleration not required from pulse source. Translator stores incoming pulses and feeds them to the motor, automatically accelerating and decelerating at a rate compatible with the response characteristics of the motor. Acceleration and deceleration rates are approximately 5000 steps/sec² for BTR103RT and 15000 steps/sec² for BTR105RT. Motor is driven one step for each pulse received from control unit. BTR103RT has speed of 100 to 3000 steps/sec; BTR105RT has speed of 100 to 5000 steps/sec. Rack mounted only.

Superior Type BTR103RT—Speeds up to 300 steps/sec. Use with M112-FJ25 motor. Net Each..... **$1450.00**
Superior Type BTR105RT—Speeds up to 5000 steps/sec. Use with same motors as HTR105RT. Net Each..... **$1295.00**

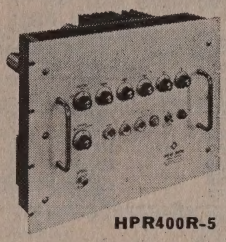
SLO-SYN PRESET INDEXER SP1800B-5



Controls indexing operations where bifilar motors are used for positioning. Automatically provides the correct switching sequence needed to drive motors the required number of steps. Has provision for actuating external equipment needed to perform related operations. Dials on control panel can be set to provide desired number of steps up to 99,999 counting range. Operates in ambients from 0° C to +40° C. Input current 1.25 amps. Also requires series dropping resistors. Approx. shipping weight, 19 lbs.

•Superior Type SP1800B-5—Speeds up to 500 steps/sec. Use with same motors as ST1800B. Net Each..... **$925.00**

SLO-SYN HIGH SPEED PRESET INDEXERS



HPR400R-5

Used with certain precision (models with HS prefix) and M Series (models with M prefix) motors in indexing and other positioning operations. HPR400R-5 has 50 to 2000 steps/sec speed; HPI 153RT has 100 to 3000 step/sec speed; and HPI 155RT has 100 to 5000 step/sec speed. Decade counter controls on front panel permit selecting positioning increments up to 99,999 counting range. On index command, unit drives the motor the prescribed number of steps and then actuates a relay which controls external equipment. Count can also be set by computer or external decade switches. Ambients: 0° C to 40° C operating; −55° C to 85° C storage. Rack mounted only.

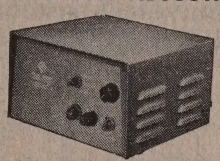
•Superior Type HPR400R-5—Speeds up to 2000 steps/sec. Use with motors HS25, HS50, HS50L and HS400B-1003. Net Each..... **$1400.00**
•Superior Type HPI 153RT—Speeds up to 3000 steps/sec. Use with M112-FJ25 motor. Net Each..... **$1825.00**
•Superior Type HPI 155RT—Speeds up to 5000 steps/sec. Use with same motors as High Speed Translator HTR105RT. Net Each..... **$1680.00**

BACKLASH TAKE-UP BOARDS

Cause motor to take additional steps when travel is in minus direction, then same number of steps in plus direction. Motor takes only the required steps when travel is in plus direction.

Superior Type BHM144134-G1—For use with HPR400R-5. Net Each..... **$95.00**
Superior Type BHM144087-G4—For use with HPI 153RT and HPI 155RT. Net Each..... **$95.00**

SLO-SYN ADJUSTABLE SPEED DRIVE ST1800BV



Essentially a translator with a built-in oscillator to supply triggering signals. The oscillator frequency can be adjusted to vary the speed from 4 steps/sec up to 500 steps/sec or the maximum permissible with the motor used. Have same other characteristics and applicable motors as SLO-SYN Translator ST1800B.

•Superior Type ST1800BV—Net Each..... **$395.00**

SERIES VC VOLTAGE CORRECTORS

Designed to eliminate low line voltage problems. Automatically boost line voltage by 12% when line drops to approximately 105 volts and cuts out automatically when line come up to approximately 110 volts (120 volt models). Offers advantages of comparatively light weight, low cost, no added harmonic distortion and attractive physical styling. Available in four models with 3-conductor NEMA standard cords and receptacles. Size: 10" w. x 6" d. x 5¼" h. overall.

PERIPHERAL COMPUTER ACCESSORY TRANSFORMERS

Designed for supplies delivering regulated positive and negative DC voltages for OP-AMPS and separate 5 to 6 volt regulated DC voltages for logic circuits. All transformer ratings are for continuous duty with a 105° C maximum operating temperature limit. Primary, 120 V, 50–60 Hz. Tested to 1500 V rms. All transformers have lug terminations.

TRANSISTOR POWER SUPPLY TRANSFORMERS

For transistor power supplies. Primary 117 VAC, 60 Hz. May be operated from a 400 Hz source with no change in output ratings. Lead wire termination. For rectifier circuits, for P-8193, P-8194, showing DC voltages and allowable DC current, write for Stancor Bulletin No. 587.

*Secondary is one tapped winding. †Secondary leads have lugs attached. ‡rms. §Solder lug termination. #May be operated from 117 V, 50/60 Hz at full rated load.

ESSEX STANCOR Power Transformers

POWER TRANSFORMERS FOR CAPACITOR INPUT SYSTEMS

Primary 117 V, 60 Hz; may be operated from a 400 Hz source with no change in output. Meets EIA requirements for electrical tolerances, dielectric strength, temperature rise and construction. Operating temperature 105° C max. All secondary AC voltages ±3%.

*With copper shorting band to reduce external magnetic field. §For voltage doubler circuits. #For half-wave circuits.

ISOLATION TRANSFORMERS

Electrostatic shields grounded to core. Primary 50/60 Hz, line cord. May be operated from a 400 Hz source with no change in output.

STRAIGHT ISOLATION

Secondary female receptacle, except P-6411, P6411A, P-6412, P-6413 and P-8622 have lead wires.

LOW CURRENT "VERSATILE" CONTROL/RECTIFIER TRANSFORMERS

Primary 117 V, 50/60 Hz. Three isolated 12-volt secondaries (one with a center tap) provide many combinations of voltage and current with series or parallel connections. Ideal for pilot lamps, miniature relays, low current-low voltage power supplies, etc. Mounting type S.

AUTOMATION CONTROL/RECTIFIER TRANSFORMERS

May be operated from a 400 Hz source with no change in output ratings. By connecting primaries in series (for 230 V) but using only 115 input, a series of half voltage output ratings becomes available at the full rated current from each secondary. Solder lug termination.

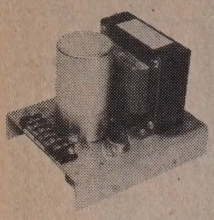
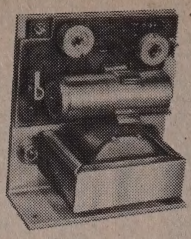
TELE-DYNAMICS D.C. Power Supplies

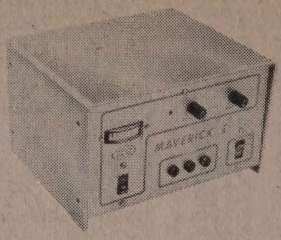
DIVISION OF AMBAC



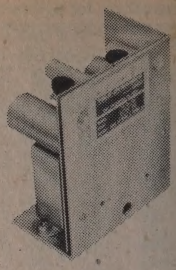
I-OEM



DPS



Maverick I



T12/15

I-OEM SERIES
60 WATT SUPPLIES

AC Input:
105–125 VAC, 47 to 63 Hz. (Derate output 10% at 50 Hz.)
DC Output:
Voltage: 5 to 28 volts, floating.
Current: 6 amps or 60 watts.
Regulation:
Line: ±1%
Load: ±1%
Ripple:
0.1% plus 10 mV rms max.
Overload Protection:
Adjustable foldback current limiting.
Overvoltage Protection:
Optional OVP-3.
Controls:
Output voltage adjust ±5% (±10% with derating in current).
Temperature:
0 to 50° C (to 70° C with derating per table).
Weight:
5.5 lbs.
Size:
6.00″ x 5.00″ x 5.50″

III-OEM SERIES
PRECISION REGULATED 60 WATT SUPPLY WITH OVP

AC Input:
105–125/210–250 VAC, 47 to 63 Hz. (Derate 10% at 50 Hz.)
DC Output:
Voltage: 5 to 28 volts, floating.
Current: 5 amps or 60 watts.
Regulation:
Line: ±0.1% or 10 mV.
Load: ±0.1% or 10 mV.
Ripple:
0.01% or 1 mV rms max.
Overload Protection:
Adjustable foldback current limiting.
Overvoltage Protection:
Adjustable crowbar type, set at factory at 120%.
Controls:
Output voltage adjust, ±2%.
Current limit adjust.
Overvoltage adjust.
Temperature:
0 to 50° C. (To 70° C with derating from 50° C.)
Weight:
5.5 lbs.
Size:
6.00″ x 5.50″ x 5.00″

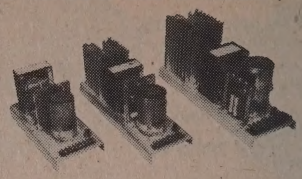
IC SERIES
FOR MOSFETS AND OP-AMPS



AC Input:
100–130 VAC, 47 to 63 Hz (Derate 10% at 50 Hz).
DC Output:
Voltage: 3.6 to 60 volts, floating.
Current: To 25 Amps.
Regulation:
Line: ±0.1% or 10 mV.
Load: ±0.1% or 10 mV.
Ripple:
5 mV rms max.
Overload Protection:
Adjustable foldback current limiting.
Overvoltage Protection:
Optional OVP crowbar.
Line Fuse:
Internally fused at 2.5, 5, or 10 amps slow blow.
Controls:
Output voltage adjust, ±5%.
Current limit adjust.
Response Time:
50 to 100 microseconds (varies with model).
Temperature:
0 to 45° C (to 70° C with 2%/°C derating above 45° C).

TW/CT SERIES MINIATURE ENCAPSULATED SUPPLIES

AC Input:
105–125 VAC, 50 to 400 Hz. (Add **$5.00** to unit price for 230 VAC input.)
DC Output:
Voltage: 3.6 to 28 volts, both single and dual outputs. Adjustable ±2%
Current: 25 to 2000 milliamperes.
Regulation:
See table.
Ripple:
See table.
Overvoltage Protection:
Crowbar protection on some models.
Temperature:
−25° C to +70° C without derating.
Size:
See table.

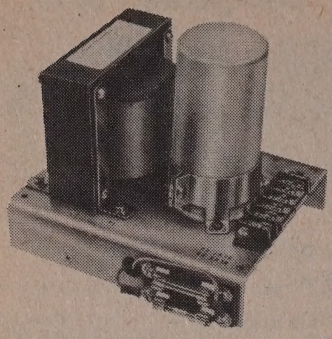
*With overvoltage crowbar protection, factory adjusted to trip at 6.2 volts, nominal.

C214 POWER SUPPLY FOR RELAYS AND INDUCTIVE LOADS



AC Input:
105–125/210–250 VAC, 47 to 63 Hz. (Derate output 10% at 50 Hz.)
DC Output
Voltage: 26 ±2 volts, floating.
Current: 2.5 amps. (Designed for pulsed loading of up to 4 amps when operated with 1 amp continuous load pulsed at 20 msec intervals.)
Regulation:
Line: ±2%
Load: ±2%
Ripple:
0.1% plus 10 mV rms max.
Overload Protection:
Line: 2 amp fuse.
Load: 3 amp, slow blow fuse.
Temperature:
0 to 40° C (to 70° C with 2%/°C derating above 40° C).
Weight:
5.5 lbs.
Size:
6.00″ x 5.50″ x 5.00″

Tele-Dynamics Model	Output		Net Each, Lots of

CVR-120 AC VOLTAGE REGULATOR

AC Input:
110–130 VAC, 47 to 420 Hz.
AC Output:
Voltage: 135 volts peak ±10% (270 volts peak to peak).
Power: 120 VA.
Regulation:
Line: ±1% for 10% line variations.
Load: ±1%
Response Time:
10–50 microseconds.
Efficiency:
75% at nominal line voltage and full load.
Controls:
Output voltage adjust ±10%.
Phase Shift:
None
Temperature:
0 to 40° C (to 70° C with 2%/°C derating above 40° C).
Weight:
10 oz.
Size:
4.50″ x 4.00″ x 1.62″

C3000 SERIES AC LINE REGULATOR
MODELS FROM 30 TO 1000 VA

CA Input:
100–125 VAC, 47 to 420 Hz.
AC Output:
Voltage: 117 volts adjustable ±3%.
Power: 30 to 100 VA
Regulation:
Line: ±0.5% (10% line change).
Load: ±0.5% (10% to full load).
Response Time:
10–50 microseconds.
Efficiency:
75% nominal, full load.
Protection:
Internally fused.
Controls:
Output voltage adjust ±3%.
Temperature:
−20° to +50° C.

†Williamson type circuit may be used. Taps on primary for proper screen operation. *70 V line autoformer.

TELEPHONE COUPLING TRANSFORMERS

Transformers specifically designed and manufactured to telephone company requirements for voice/data use over leased private lines or through the dial-up switched telephone network. Used for impedance matching, isolation, line balance, bridging, hybrid and holding-coil applications. All units in plug-in printed circuit construction. **Frequency Response:** 300–3500 Hz, ±0.5 dB. **Longitudinal Balance:** 45 dB min. **Return Loss:** 26 dB min. **Distortion:** 0.5% max. **Impedance Matching:** ±10%. **Power Level:** −45 dBm to +7 dBm.

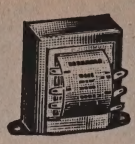
J



Z

LOW LEVEL AUDIO

Single-hole mounting, permits rotation for minimum hum pickup. Alloy shielding for a 40–60 dB reduction in hum pickup (60–80 dB on A-11J and A-12J); flexible leads. Units have a wide frequency range. Input units electrostatically and magnetically shielded. Circuit diagrams permanently affixed to case.

CRADLE® SERIES RELAYS

T154/T163 Cradle Series industrial relays with versatile mounting means including solder, PC board and socket options. Sensitivity selection to match applications ranging from 20 to 140 mW per pole. Contact selection to meet load switching requirements. UL recognized File #E-206041. Voltage relays adjusted for maximum pick-up at 75% of nominal voltage. Weight: 1 to 6 ozs.

SERIES E3 OPTO-ISOLATED, SOLID-STATE POWER RELAYS

All Series E3 power relays are designed for true zero voltage switching. Power is removed from and applied to the load at zero-current crossover. Units are guaranteed to withstand in-rush loads of 1000% of rated current. Tight-emitting diodes and photo detectors provide circuit isolation of 1560 VAC.

Allied Numbers Form A Contacts E3-	Form B Contacts E3-	Input Voltage Range	Net Each

VOLTAGE ADJUSTED SINGLE COIL DC RELAYS

T351/T362 Cradle Series bi-stable and magnetic latch industrial relays. Single or dual coil construction. Versatile mounting means including solder, PC board and socket options. Contact selection to meet load switching requirements. Input voltage from 6 to 110 VDC. UL recognized File #E-206041. **Weight:** 1.5 to 4.0 ozs.

SOLID-STATE TIMERS

The TD10 Series solid-state timers utilize the service-proved T154 Cradle® relay with a solid-state timing circuit to provide timing from 0.1 to 100 seconds with ±2% repeat accuracy. (Up to 300 seconds on special order.) Available as "interval" or "delay-on-operate" models with optional operating and mounting features.

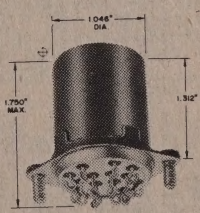
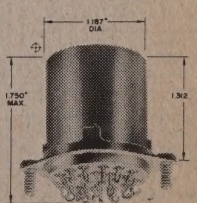
Series MH6

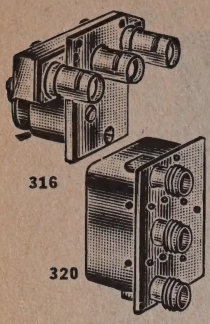


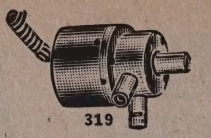
Series MH12

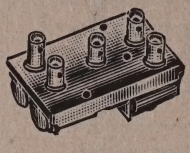


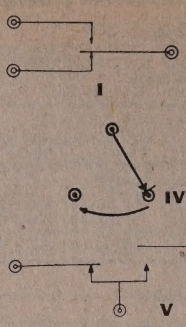
Series MH18

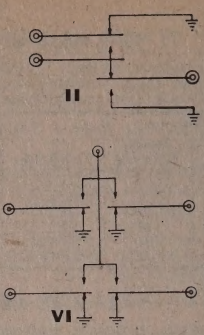
BUNKER RAMO AMPHENOL Coax Relay Switches

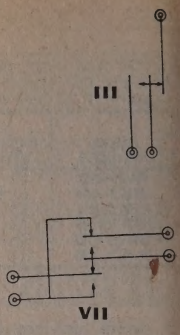












Amphenol coaxial switches, manufactured to the highest quality standards; operate and release in a max. time of 20 msec. or faster. Contacts are gold over fine silver plate. Switches rated at 100 watts RF power are supplied with 3/32" dia. contacts; switches rated at 500 watts use bifurcated contacts of 1/8" dia. Switches provide break-before-make operation. Terminations are jack type RF connectors of BNC, N, C, MB or UHF type. These DK coaxial switches meet applicable portions of MIL-S-3928B. Minimum expected life is 1,000,000 cycles at speeds of less than 10 cycles per second. Coils are vacuum impregnated to withstand high humidity and operate continuously over a temperature range of −65° C to +85° C. Coil input power at nominal voltage is as follows: DC operated 100 W RF switches, 2½ W; DC operated 500 W RF switches, 3¼ W; AC operated switches, all types, 6 VA.

315 Series—Small, compact, low cost switch with non-shorting termination of the disengaged connector. Connectors and actuator are mounted on a common plate. For DC remote operation only.

316 Series—Rugged, two-position switch with a break-before-make action. The disengaged connector is shorted to ground. Specifically designed for bulkhead mount with all three connectors on the opposite side from actuator.

317 Series—Highly reliable switch with the disengaged connector either resistor terminated or shorted to ground for better crosstalk. Designed for panel mount, the common or input connector is on one side with the two outputs and actuator on the other.

318 Series—Supplied as standard with either shorting, non-shorting or resistor terminations. Two-position type. Designed for flat mount with all three connectors and actuator on the same side.

319 Series—Standard rotary type switch in manual and remote operated versions. Non-shorting contacts. The ¼" dia. turn shaft of manual types bears a 1/4" mounting flat for control knob.

320 Series—High power (1 kW) switch utilizing twin contacts with double make and break action in each position. Designed for panel or bulkhead mount. All three connectors are on the same side. Standard unit is supplied with dust cover over actuator.

321 Series—Rugged, flat-mounting switch in manual or remote operated version. VSWR is low up to 100 MHz. Non-shorting contacts offer less circuit isolation and more crosstalk than shorting types.

322 Series—Small rotary switch for the inter-connection of the common output connector to any of four inputs. Manual operation with non-shorting contacts. Excellent crosstalk and VSWR.

323 Series—Individual actuator for each input. The actuator connects the associated input to the common output when energized. Any one or more inputs may be simultaneously connected to the common output, or any input may be connected to any other input through the common output. Supplied as standard with either shorting or non-shorting contacts, the former offering better crosstalk. Operating time, 10 msec.

325 Series—Compact monitoring switch. Energizing the actuator associated with each input connects this input to the common output. Any one or more inputs may be simultaneously connected to the common output, or any input may be connected to any other input through the common output. Crosstalk for non-shorting types averages about 20 dB. less than for shorting types. Operating time, 10 msec.

326 Series—Compact high density designed for complex switching. Four mounting studs allow flat mount. Shorting contacts. VSWR varies with position of inputs used with respect to common output. Operating time, 10 msec.

327 Series—Transfer or crossover switch for panel mount. Three connectors and actuator on one side, and the fourth connector on the opposite side. Circuits are connected through two isolated pairs. Energizing the actuator opens these circuits and provides a crossover to the opposite pairs.

328 Series—Transfer or crossover switch with all four connectors in the same plane for convenient panel mount. A dust cover protects balanced armature actuator. Circuits are connected through two isolated pairs. Energizing the actuator opens these circuits and provides a crossover to the opposite pairs.

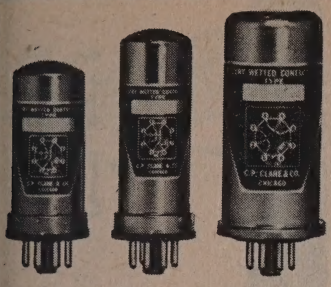
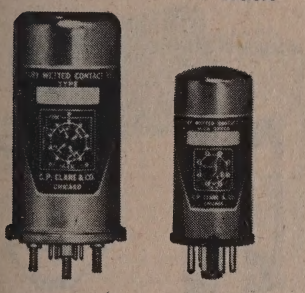
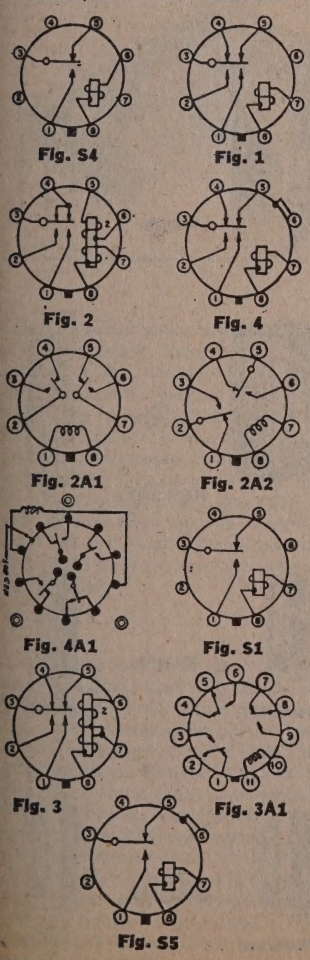
PLUG-IN MERCURY-WETTED CONTACT RELAYS





BASE/WIRING DIAGRAMS



HG SERIES PLUG-IN MERCURY-WETTED CONTACT RELAYS

Type HG relays have SPDT make-before-break form D contacts rated 5 amps, 500 V, 250 VA max.; operating time, 2 msec. **Type HG2A:** DPDT operation; 2 capsules; operating time, 2¼ msec. **Type HG3A:** 3PDT operation; 3 capsules; operating time, 2½ msec. **Type HG4A:** 4PDT operation; 4 capsules; operating time, 3¾ msec. Life, 22 x 10^9 at specified ratings. Octal plug-in base, except HG4A (10-pin glass-to-metal plug). Size (not including pins): HG, 1.105″ dia. x 2.636″ h.; HG2A and HG3A, $1^{17}/_{32}$″ dia. x $3^{27}/_{64}$″ h.; HG4A, $1^{1}/_{16}$″ dia. x $3^{3}/_{8}$″ h.

MODULAR MERCURY-WETTED CONTACT RELAYS

HGM SERIES MODULAR MERCURY-WETTED RELAYS

Consist of standard HG switch capsules in module form, with plated steel covers for excellent mechanical protection and magnetic shielding. Standard HG switch is not polarity sensitive. SPDT make-before-break contacts rated 5 amps, 500 volts, 250 VA maximum. Life expectancy, 22 x 10^9 at specified ratings. Size, ¾" x ¾" x 3 13/64".

HGSM SERIES PRINTED CIRCUIT MODULE RELAYS

Mercury-wetted relays for printed circuit board mounting. **HGSM-1000** series have SPDT make-before-break contacts; **HGSM-5000,** break-before-make. Contacts rated 2 amps, 500 volts, 100 VA max. at rated load. Max. dissipation, 2 watts continuous at 25° C. Temperature rise, 30° C per watt at 25° C ambient. Life expectancy, 22 x 10^9. Single side stable, except as indicated. Size, 5/8" x 5/8" x 2 1/16" max.

HGS2MT SERIES MERCURY-WETTED CONTACT RELAYS

Capable of handling input switching functions for any type of reasonable high speed, low level data acquisition system. Contacts rated 2 amps, 500 volts, 100 VA maximum DPDT, Form C break-before-make. Life expectancy, 22 x 10^9. Size, ¾" x 1 3/32" x 2 1/16" max.

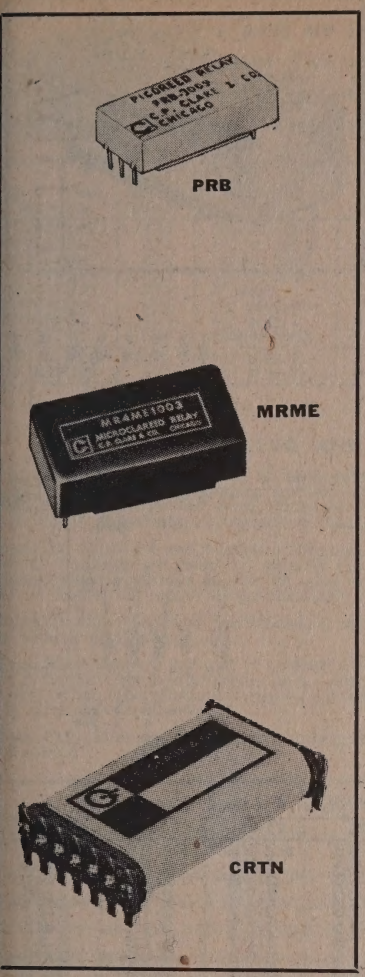
Reed Relays



SERIES PRB PICOREED® RELAYS

A state-of-the-art advancement in sealed contact reed relays; small in size, ultra-fast in operation. Response time, physical size, sensitivity and reliability characteristics combine to provide complete electrical and packaging compatibility with integrated circuit devices. Ideal for economical and reliable solid-state input-output isolation buffering applications. High speed operation, with operate time as low as 500 μsec., including bounce, at normal coil power. Contacts rated 0.5 amp max., 100 volts max., 10 VA max.; 1.0 amp maximum carry load. Life expectancy: 100 million operations at low-level loads; 5 million operations at 28 VDC, 0.125 amp. Series 3000 five-volt Picoreed relays are specially designed for compatibility with standard 5-volt DTL and TTL logic families; have must operate voltage value of 3.75 volts at 25° C. PRB low profile Series have straight pin terminals; permits PC board mounting on .375″ centers. Suffix **H** indicates high sensitivity units that allow .500″ mtg. centers; others are low-profile types. All types are .800″ long (width and height shown in table).

SERIES MRME MICRO-CLAREED RELAYS

Same high performance standards as regular Clareed relays (listed below), in only one fifth the size. Provide isolation between coil and contacts. Immune to false operation by the type of transients that affect solid state devices; insensitive to overload transients that would damage solid state devices. Offer switching speed as fast as 500 microseconds, fully compatible with other mechanics of process control. Designed for PC board use. Contacts are rated 15 VA max., ¼ amp max. In molded epoxy module.

SERIES CRTN CLAREED RELAYS

Ultra-reliable reed relays for printed circuit board mounting. Reed contacts are sealed in an inert gas atmosphere, within a glass tube. Coils are wound on molded bobbins capable of accepting up to six Clareed switch capsules. Standard Clareed relays have 1, 2, 4 and 6 Form A contacts rated 15 VA maximum, non-inductive; 1 amp maximum, 250 volts maximum; with carry load of 5 amps maximum (not switched). Life expectancy, over 20 million operations at rated load. Insulation resistance, 500K megohms minimum. Breakdown voltage, 500 V rms, 60 Hz minimum. Available for 5, 12, 24 or 48 volts.

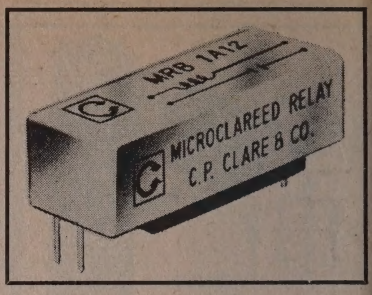
Dry Reed Relays

MRB SERIES MICROCLAREED® RELAYS



MRB microreed relays offer versatile signal level to 10 VA switching capabilities, total input/output isolation, 800 microsecond typical switching speeds in the miniature sized relay family. Operate with coil power requirements as low as 10 milliwatts. Ultra-reliable operation exceeds 100 million operations at signal level loads and 10 million operation at rated loads. Optional MRB relays are available in 3 or 5 Form A, 2 Form B, 3 or 4 Form C, 1A latching or 2A latching and 2A2B contact forms. UL versions in all but Form C are available as listed in UL File E43775. Relays have molded epoxy bases with stamped metal covers and convenient 1.000″ x 0.100″ grid mounting centers for printed circuit mounting. Low profile package mounts on 0.5″ PCB centers. Electrostatic shielding is available. **Contact Rating:** 10 VA max.; 200 VDC or peak AC max.; 0.75 amp max. switched (2.0 amps max. carry only). **Contact Resistance:** Initial 200 milliohms max., measured at 10 mA, 1000 Hz. **Life:** 100 million operations at signal level; 10 million operations at full rated load. **Operate Time:** Less than 800 μsec including bounce. **Breakdown Voltage:** 250 VAC rms, 60 Hz; 350 VDC max. **Insulation Resistance:** 10 G ohms min. at 100 VDC, +25° C, 40% RHD. **Size:** 1A, 1.135″ w. x .360″ d. x .350″ max. h; add to width .100″ for 2A, 1B, and 1C; .200″ for 1A1B and 2C; .300″ for 4A; .500″ for 6A. **Pins:** .023″ dia. x 1.25″ h. Pins are located .08″ from the ends and are on 1.00″ centers (.100″ apart).

PRME

- IC COMPATIBLE TO-116 DIP PACKAGE
- .100″ GRID TERMINAL SPACING
- .180″ MAXIMUM HEIGHT
- FAST—125 μSEC OPERATE TIME WITH PROPER COIL DRIVE

PRME SERIES PICOREED® RELAYS

Dual-in-line pkg. is ideal for mounting on board centers compatible with IC components. The PRME package permits automatic insertion equipment techniques for direct PCB mounting or standard DIP socket mtg. Molded epoxy body with Tintillate tinned pins. Contact resistance 200 milliohms max. initially measured with 6 VDC across open contacts and with 100 mA load current. Insulation resistance 10,000 megs min. Relay reliability 100 x 10^6 operations at 28 VDC, 0.125 amp with appropriate contact protection. Dielectric standoff voltage 200 VAC rms 60 Hz min. between all mutually insulated terminals. For optional features as listed, add suffix to no.: PRME-1A005**A**. Size, 0.770″ w. x 0.250″ d. x 0.180″ h.

TYPE F AND HF MILITARY-TYPE RELAYS

Full-size (Type F) and half-size (Type HF) military-type relays are unusually versatile; capable of reliable, long-life operation in adverse environments. Ideal for industrial applications, as well as airborne and aerospace. Rigid frame maintains permanent alignment of all elements. Meets MIL-R-5757/10 and 5757/29. Consists of two DPDT form C contacts, rated 2 amps. Size: RP series (Type F), .800″ x .875″ x .396″ max.; HF series, .810″ x .410″ x .410″ max.

TYPE 20, 26, 210 AND 211 STEPPING SWITCHES

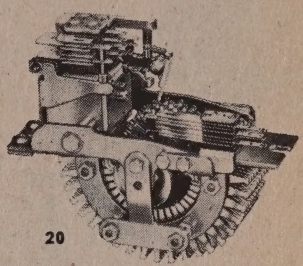
Clare stepping switches offer an economical alternative to solid state switching. Multiplexing, counting and sequence problems are easily solved by providing the most working capacity in the smallest space. Switches enable selection, interruption or change of connections in a succession of circuits in response to current pulses.

Type 20: Include 4 and 8 levels of 20 points with life expectancy of 180 million steps at 8 levels. Contacts are rated 0.1 amp at 115 VAC or 30 VDC resistive with 3 amp carry rating. Operate time is approx. 20 msec at 25° C and release time is approx. 10 msec at 25° C. Solder lug terminals are standard.

Type 26: Same electrical characteristics as type 20, but comes in 4 and 8 levels of 26 points or 6 levels of 52 points.

Type 210: Comes in 3, 6 and 12 levels of 10 points with life expectancy of 100 million steps at 12 levels. Contacts are rated at 0.1 amp at 115 VAC or 30 VDC resistive with 3 amp carry rating. Operate time is approx. 20 msec at 25° C and release time is 10 msec. Solder lug terminals are standard.

Type 211: Same electrical characteristics as type 210, but comes in 3, 6 and 12 levels of 11 points.



20

SPECIFICATIONS

Contact Ratings (Resistive Load): 0.1 amp at 115 VAC or 30 VDC switched, 3 amp carry only.

Contact Resistance (ON Impedance): 0.15 ohm typical.

Typical Operate Time: Approx. 20 msec at 25° C, release time approx. 10 msec.

Breakdown Voltage: 1000 VAC, 60 Hz across open contacts.

Insulation Resistance (OFF Impedance): 1000 G ohms at 500 VDC between levels.

Environmental: Vibration, 0.06″ d.a., 10–55 Hz; shock, 30G, 11 ±1 msec; temperature, −° C to +85° C.

All switches listed below have one bridging level with the remaining levels being non-bridging. 2C Off-Normal and 2C Interrupter contacts are standard.

LA SERIES MINIATURE TELEPHONE RELAYS

Miniature telephone type relay is an ideal component for military, industrial and commercial applications. Four Form C contacts have palladium with gold overlay on make-and-break contacts. Contacts rated 1.0 amp at 28 VDC, 10-million operations; 1.0 amp at 48 VDC, 750,000 operations; 2.0 amps at 28 VDC, 100,000 operations; 0.25 amp at 115 VAC, 60 Hz, 50-million operations; 0.5 amp at 115 VAC 60 Hz, 750,000 operations; resistive power load. Tinned nickel silver terminals for direct PCB insertion. Clear plastic dust cover with phenolic cover bottom plate. Size, 0.750″ w. x 1.07″ d. x 1.36″ h. overall.

LB SERIES MINIATURE TELEPHONE RELAYS

High quality miniature relay at a reasonable price. Offers extraordinary switching capacity and versatility for its size. 6PDT contacts are rated 2 amps, with life of 100 million operations (mechanical). LB series is for direct PC board mounting; LBP series mounts in socket (listed below). Size, 1.24″ x 1.00″ x 1.22″ max.

VP SERIES TELEPHONE RELAYS

Available with DPDT, 4PDT or 6PDT Form C contacts rated 1 amp, 100 volts, 30 watts DC resistive load. Operating time, 3–13 milliseconds. Operating temperature, −40° C to +80° C. Protected from dust and contamination with polycarbonate cover. Can be used for PC board mounting with sockets (below).

J AND JDP SERIES TELEPHONE RELAYS

Compact, industrial telephone-type relays for applications ranging from simple switching in alarm circuits to complex computer functions. Contacts rated 4 amps, 150 watts. Operate time, 5 milliseconds minimum. Mechanical life, 70 million operations. Series **J** is open type; series **JDP** has dust cover, comes complete with socket.

SERIES 354 GENERAL PURPOSE MINIATURE RELAY
4FORC, 4PDT

The Series 354 relay handles motor, lamp and solenoid switching requirements in everything from vending machines to disc drive applications. They also switch signal levels in intercoms, two-way radios and small telephone exchanges plus input multiplexing in control systems. The various options make all these uses possible. Contact ratings up to 5 Amps, AC or DC coils, plus solder lug/plug-in, taper tab or PCB terminals. The relays have UL recognition as magnetic motor controllers in industrial applications. Contacts: gold flashed silver button rated at 3 amps at 28 VDC or 120 VAC resistive; gold flashed silver cadmium oxide rated at 5 amps at 28 VDC or 120 VAC resistive. Coil power: DC types, 0.9 W nom.; AC types, 1.4 VA nom. Contact resistance: 50 milliohms. Weight: approx. 1.5 oz.

GP3 GENERAL PURPOSE RELAYS

GP3 (Lexan* dust cover) relays are designed to meet UL bulletin 508 requirements. Rugged AC or DC relays are available in SPDT, DPDT and 3PDT configurations. Contacts gold flashed silver cadmium oxide rated 10 amps at 28 VDC resistive or 120/130 VAC, 0.8 power factor. GP3 plain case models are available with matching molded nylon sockets for plug-in applications. GP3 bracket case model is available for direct chassis mounting only. Mechanical life expectancy is 100 million operations; electrical life is 100,000 operations minimum at rated load. The 0.197″ quick connect terminals are standard. Size, 1.531″ x 1.906″ x 1.406″, GP3 plain case. Many optional features available; complete data on request.
*Registered General Electric trademark.

GENERAL PURPOSE AND MERCURY-WETTED REED RELAYS

SERIES 511 LOW PROFILE TELEPHONE TYPE RELAYS

The new Series 511 telephone relays offer reliable low level to 2 amp switching capabilities in 2 and 4 Form C models. The low profile package is only 0.35″ high and allows PCB mounting on 0.5″ centers. The 511 Series relays feature a plastic dust cover and a molded base of thermosetting plastic. Contacts: 2 or 4 Form C is standard; Form C/D combinations are optional. Contact Rating: gold alloy over palladium contacts. 1 amp at 28 VDC res. (5,000,000 operations); 1 amp at 48 VDC res. (750,000 operations); 2 amps at 28 VDC res. (100,000 operations); 0.1 amp at 48 VDC res. (50,000,000 operations); 0.5 amp at 115 VAC res. (750,000 operations).

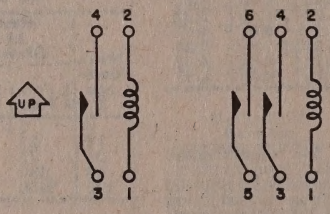
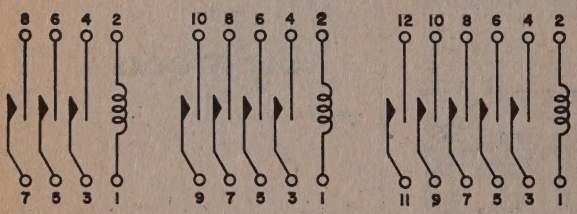
SERIES 861 MERCURY-WETTED REED RELAYS

861A05C3A



1A 2A



3A 4A 5A

Series 861 Mercury-Wetted Microclareed relays are superior compared to dry reed relays of the same size. The relay has a reliable reed capsule with a no-bounce mercury-wetted armature. These relays provide some of the mercury-wetted contact relay advantages at a slight price premium over dry reed relays.

SPECIFICATIONS

Contact Rating: Power, 35 VA max.; voltage, 500 VDC max.; current, 0.75 amp max. resistive load.

Contact Resistance (On Impedance): 50 milliohms max., initial, total circuit.

Insulation Resistance (Off Impedance): 1000 megohms min. at 100 VDC, +25° C, 50% RH.

Breakdown Voltage: 2000 VAC rms, 60 Hz min. across open contacts; 500 VDC, all other points.

Drain Time: 30 seconds max.

Operating Time: 3 msec max. (no bounce on closure).

Release Time: 3 msec max. with nominal clamping.

Operating Temperature Range: −38.8° C to +50° C.

Life: 20 million operations at rated load with proper contact protection.

Size: 0.355″ d. x 1.140″ h. x .465″, 1 Form A; .565″, 2 Form A; .765″, 3 Form A; .865″, 4 Form A; 1.065″ w., 5 Form A.

All values are at 25° C.

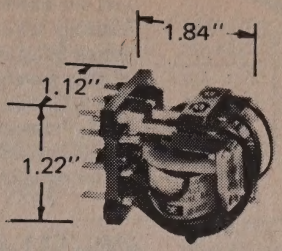
30 SERIES 10 AMP GENERAL PURPOSE



UL and CSA recognized for 10 amp at 120 VAC/28 VDC resistive and ¼ horsepower motors. Used in small motor control and automated industrial equipment applications. The 30 type is an open style with solder terminals. The 31 and 32 types are enclosed in shatterproof, clear polycarbonate cases and are plug-in types that mate with standard octal sockets, type 31 for 8-pin octal and the type 32 for 11-pin octal.

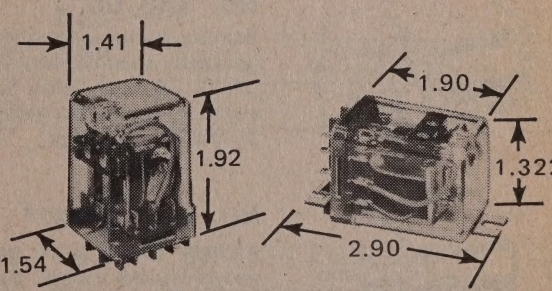
20 SERIES 10 AMP GENERAL PURPOSE



High reliability and versatility make this enclosed relay with combination terminals (solder lug/quick connect/plug-in) a popular device. All units are enclosed in a shatterproof polycarbonate housing. The 21 style is the plug-in style for socket mounting. The 22 style has 2 slotted flanges molded into the side for direct mounting. 10 amp at 120 VAC/28 VDC resistive. UL and CSA recognized.

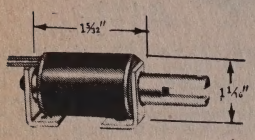
NEW UNI-GUARD® II LEADS

Lead wire adapters specifically designed for use with Guardian's new Uni-Guard® II coil construction which features QC lug termination. Each of these leads has a minimum overall length of 6" and is made of 22 gauge wire (U/L style 1015 with temperature rating of 105°C). Termination at one end is in a choice of .187" or .110" insulated female QC lug which mates with corresponding lug on the solenoid. Wire at opposite end is stripped ¼" minimum. Two lead wire adapters are required for easy conversion of each Uni-Guard® II solenoid from QC to lead termination.

Guardian No.	Lug Size	Package of 50	Package of 100
LW-22.187	.187"	$3.75	$7.50
LW-22.110	.110"	3.75	7.50

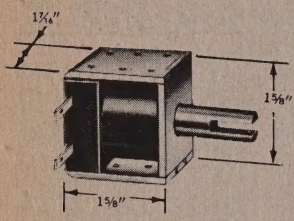


NO. 1A1 AC

Low cost modified U-frame solenoid in two pull type models. Insulation material: Class "A" (110°C). Coil finish: Acetate yarn, coalesced with acetone. Termination: External leads. Shipping weight: 4.5 oz.

PULL TYPE

Guardian No.	Duty	Coil Voltage	Ohms	LIFTS AND STROKES @ 25°C (Minimum)	(Maximum)	Net Ea. 1-24
1A1	Inter	120AC	300	8 oz. at ⅛"	2 oz. at ½"	$4.62
1A1	Cont	120AC	675	3 oz. at ⅛"	0.5 oz. at ⅜"	4.62



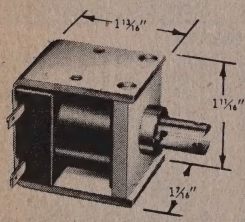
NO. 2 AC*

Box-frame solenoid in two pull type models. Insulation material: Class "A" (110°C). Coil construction: Uni-Guard® II molded bobbin and coil cover. Termination: .187" QC lugs. Shipping weight: 10 oz.

PULL TYPE

Guardian No.	Duty	Coil Voltage	Ohms	LIFTS AND STROKES @ 25°C (Minimum)	(Maximum)	Net Ea. 1-24
2	Inter	120AC	60	45 oz. at ⅛"	11 oz. at ⅞"	$5.96
2	Cont	120AC	166	14 oz. at ⅛"	3 oz. at ⅜"	6.04

See listing at top of page for lead wire adapters.



NO. 2HD AC or DC*

Heavy duty, long life box-frame solenoid in four pull type models. Insulation material: Class "A" (110°C). Coil construction: Uni-Guard® II molded bobbin and coil cover. Termination: .187" QC lugs.

PULL TYPE

Guardian No.	Duty	Coil Voltage	Ohms	LIFTS AND STROKES @ 25°C (Minimum)	(Maximum)	Net Ea. 1-24
2HD	Inter	120AC	36	70 oz. at ⅛"	16 oz. at ¾"	$10.21

MET SERIES — Time Delay on Operate or on Release

The MET Series of Time Delays are designed to replace many expensive units now on the market. They offer close tolerance repeatability at a low price. Designed for on-operate and on-release, with a range of .5 to 300 seconds, these low cost Time Delays provide a DPDT relay output of 10 amp resistive, 120 VAC, 50-60 Hz and operate on inputs of 120 VAC, 50-60 Hz, 24 VDC, 50-60 Hz or 24 VDC, polarity protected. These new Time Delays feature accuracy of ±10% of nominal setting over voltage and temperature range, repeatability to 1% within fixed conditions, a single turn potentiometer and time delays of .5 to 15, .5 to 100 and 100 to 300 seconds over a temperature range of 0°C to 55°C.

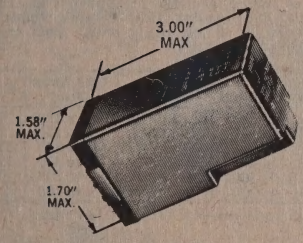
BDT SERIES — Time Delay on Operate

A Time Delay with unusual features which include operation on high or low line, repeatability, temperature stability and small size. The time Delay incorporates all silicon transistor circuits that operate over a wide input range of 75-125 VAC, 50-60 Hz and draw only 5 mA prior to time out. 24 VDC units also available. Enclosed in a standard relay housing, terminated with an octal plug (8 pin), they are available with time delay periods from 1-10 to 10-60 seconds adjustable. BDT Time Delays operate in the most severe industrial applications. The solid state circuit is immune to most transient noise found on commercial power lines. Voltage up to 2500 volts peak (short duration) can be tolerated. In the area of machine control, where large numbers of control cycles are expected, the solid state timing control has the minimum capabilityof 5 x 10⁷ operations under normal conditions with 5 amp. DPDT relay output.

Guardian No.	Volts	Delay Range (Sec.)	Net ea.
BDT-0-10-120A	120VAC	1 to 10	$24.62
BDT-0-60-120A	120VAC	10 to 60	26.21

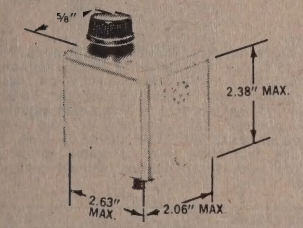
Guardian No.	Volts	Delay Range (Sec.)	Net ea.
BDT-0-10-24D	24VDC	1 to 10	$24.62
BDT-0-60-24D	24VDC	10 to 60	26.21



TD SERIES TIME DELAY

The most accurate, compact time-delay relay available from stock. Adjustable delays from 1 to 180 seconds. 15 turn potentiometer provides high adjustment resolution. Accurate to 5% of nominal setting over complete temp. and voltage range. Repeatability, 2% after line interruption of 50 MS. Delays on attract. 3PDT contacts rated at 10 amps resistive.

Guardian No.	Volts	Delay Range (Sec.)	Net ea.
TD-33C15-24D	24VDC	1 to 15	$26.68
TD-33C60-24D	24VDC	10 to 60	27.77
TD-33C180-24D	24VDC	50 to 180	35.37
TD-63C15-120A	120VAC	1 to 15	32.74
TD-63C60-120A	120VAC	10 to 60	33.14
TD-63C180-120A	120VAC	50 to 180	40.62



TDO SERIES TIME DELAY

Series TDO incorporates many features of more expensive units, but is most economical, offering contacts rated at 5 amps, DPDT, 120 VAC with adjustable delay of 0.5 to 30 seconds on attract with a ten turn potentiometer. Repeatability is within 5% after a line interruption of 100 milliseconds. Standard unit available is 120 VAC.

Guardian No.	Volts	Delay Range (Sec.)	Net ea.
TDO-62C30-120A	120VAC	.5 to 30	$19.43

TMP & TMT SERIES TIMING MODULES

Series TMP/TMT Time Delay Modules are available in "on operate" and "on release" configurations with two time delays and three standard input voltage ranges. Time delay is externally adjustable within two ranges from ½ to 100 seconds and 100 to 300 seconds. Repeatability is ±1% under normal conditions. Life expectancy is one million cycles. Standard input voltages are 24 VAC, 120 VAC and 24 VDC. TMP is terminated in an octal plug for quick mounting and remote control of relay and other switching devices. The TMT "Flat Pack" package was designed to accept Guardian relays mounted to it, or to allow stacking of modules for extension of timing periods, or direct installation into a printed circuit board.

PROTECTIVE SENSORS

A complete line of industrial sensors is available from Guardian including 3-phase (IR-AV2), Close Differential (IR-VS3), Over-Voltage (IR-VS1), Under-Voltage (IR-VS2), 4 wire Phase Sequence (IR-PR1), Adjustable Frequency (IR-FS1) and AC Current Sensors (CS1 Sensor with CT1 XFormer). These sensors are bi-products of designs for military application with solid state networks. The relay is 3PDT 10 amps resistive with 24 VDC, 24 VAC or 120 VAC, available. Mounting is by socket, chassis mount or directly into a printed circuit (110). Temperature range is from 0°C to +50°C. Life is 100,000 operations minimum and protection for transient voltages is to 600 volts for the 3 phase model, 2500 volts for all others. All units come with a dust cover enclosure except the CT1 series which is a transfer molded part.

Guardian No.	Nom. Input	Current Sensing Range	Net ea.

SERIES 6425 INLINE TIME DELAY

REPLACES SERIES GU INLINE TIME DELAY

Economical, totally solid state Inline Time Delay — in an ingenious new semi-cylinder configuration that combines the low cost of tubular design with a flattened bottom for quick, easy PC board installation. Available in low (12 to 48 VDC) and high (90 to 130 VDC) voltage versions in your choice of three externally-adjustable time ranges: .1 to 10 seconds, 5 to 120 seconds and 10 to 300 seconds. Accuracy and repeatability after first time out: Accuracy, ±10% of setting for combined variations of ambient temperature and power supply regulation: Repeatability, ±2% for fixed line input. Operating temperature range of −20°C to +55°C. Minimum operations 10^7. Termination in your choice of ¼" quick connect or solid lead. Delay on operate. Adjustment by 1 meg. ohm potentiometer.

Guardian No.	Volts	Time Range (Sec.)	Net ea.
6425-2L-10	12 to 48VDC	.1 to 10	$9.72
6435-2L-10	12 to 48VDC	.1 to 10	9.81

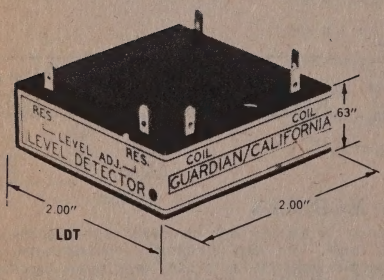
6435-2H-300	90 to 130VDC	10 to 300	12.15

6435 part number = 3/16" QC termination.



VOLTAGE LEVEL DETECTORS

Inexpensive Voltage Level Detector with unusual operating characteristics. These molded modules incorporate circuits comprised of silicon semiconductor devices to form a peak detecting voltage differential amplifier, signal amplifier and a solid state output switch suitable for driving a number of Guardian relays. The unit's sense level is adjustable (either fixed or variable) over ranges of 85-135 VAC, 50-60 Hz, 20-30 VAC, 50-60 Hz, 20-30 VDC, 180-250 VAC, 50-60 Hz by external resistance. This broad adjustment range permits operation as either an under or over level detector. Two units may be used to form band pass or pedestal level sensing. When used with Guardian Series TMT, TMP timing modules, they provide inexpensive time delayed voltage detection systems that allow them to ignore normal line fluctuations. Transient suppressed, they will withstand 2500V peak (short duration) without damage or malfunction. On DC units, transient protection is 600 volts.

SLS SOLID STATE LOGIC STEPPER

The SLS 100 Series Solid State Steppers are the only power solid state steppers to accept either high level or logic level inputs with high noise immunity for industrial applications. The output of each step is a 120 VAC 2½ amp switch. They are modularly constructed so that many configurations can be accomplished from stacked modules. Standard "off the shelf" models have ten or twenty steps. Units may be obtained with pulsers to make them self-stepping steppers. They can be cascaded or paralleled to perform complex switching and control functions. These versatile Guardian Steppers are built for operation on input power of 120 VAC, 50-60 Hz or 400 Hz and 24 VDC. All solid state construction offers the advantages of mechanical noise-free operation and, under proper operating conditions, practically unlimited life.

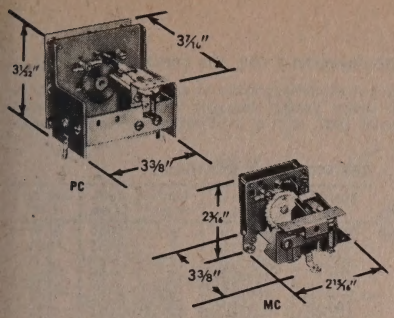
* Step advance by either mechanical switch closure or DC Pulse. † Self-stepping.
All units come with Molex connector terminations (3 sets required for 10 step unit).

GUARDIAN® STEPPERS



CONTINUOUS ROTATION

The circuit selection wiper on Continuous Rotation Steppers moves in one direction only, upon energization of the step coil. This type of stepper is available in standard 24 point (MC) or 40 point (PC). The Guardian MC Midget Continuous Rotation Stepper is particularly adaptable to repetitive sequence functions. The 24 bridging contact deck is evenly divisible by eight possible sequences. The PC stepper features self-stepping speeds up to 30 steps per second and mechanical life expectancy of over 4,000,000 steps.

Guardian No.	Watts	Volt Amperes	No. of Points	No. of Active Contacts	Max. Steps per Second	Shipping Weight Ounces	Net Ea. 1-24

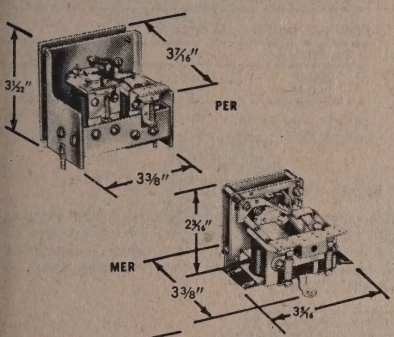
MC-120AC	17	30	24	24	20	9½	20.34



ELECTRICAL RESET

Type MER. A direct drive (steps on energization) with positive mechanical reset interlock actuated by the reset magnet and unlocked on the first energization of the step magnet. Assures positive reset on as short a pulse as one-hundredth of a second. By interconnecting two or more steppers, count can be increased to any desired total, counting by tens, or any convenient multiple. Will control a sequence of operation and then automatically reset to starting position. The circuit selecting wiper on Electrical Reset Steppers can be reset to zero or home from any desired position, by energization of the reset magnet. They are frequently employed to record counts by various numerical groups, then resetting automatically. **Type PER.** Operation same as MER but with up to 52 active contacts.

PER/40-120AC	35-7¶	60-10¶	40	36	20	22	$36.16

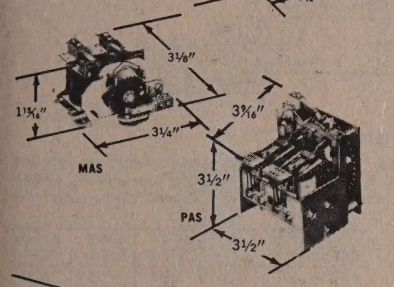
MER-24DC	20-8¶		24	22	20	11½	23.40



ADD AND SUBTRACT

Add and subtract steppers are basically continuous rotation types with the added feature of being able to reverse the movement of the selecting wiper when required.

Type MAS. A midget add and subtract stepper incorporating a cam actuated switch which operates at zero position. Used primarily to indicate a zero balance between pulses supplied to the "add" coil as compared to pulses received by the "subtract" coil.

Type PAS. Bi-directional steppers whereby the selector wiper moves either direction depending on which of the coils is energized. Supplied with .058" dia. AMP quick-connect terminals arranged in circle on deck, and also includes a form "C" cam switch.

SERIES 660 - 665 SEQUENCE

Intended to perform switching operations in a repetitive transfer sequence. Each electrical impulse moves the switch contacts to the opposite position in the sequence. Applications include lights, signs, motors, appliances and similar units. Contacts rated up to 15 amps at 120V, 60 Hz, non-inductive load. Shipping weight, 8 oz. Mounting: 4 holes 8-32 (NC-2B).

ROTOMITE STEPPER SERIES 705

An entirely new concept in stepper design, the Guardian "Rotomite" is first with maximum stepper control in minimum space. Offering high contact rating of 3 amps resistive, 1 amp inductive (50% PF). Featuring continuous duty operation with life well in excess of one million steps, the completely enclosed Rotomite is geared for continuous rotation of 12 positions. A few Rotomite applications presently include computers, business machines, lighting and vending controls, counting and sorting devices, and model trains. Shipping weight, 5 oz.

SERIES 840L - 845L ON/OFF RELAY

SINGLE COIL IMPULSE OPERATED MECHANICAL LATCHING RELAY

Compact AC or DC Latching Relay for positive on/off control of positioning devices, remote controls, lighting circuits and many additional applications. SPDT, DPDT or 4PDT contact combinations. Impulse as short as 20 MS energizes coil to reverse position of switches. Holds last position of switch with coil de-energized. Contacts rated for 10 amps at 120 VAC, 60 Hz non-inductive. Power requirement: 8.2 volt-amperes. Solder lug terminals for coils and contacts. Shipping weight, 5.2 oz. Mounting: Single mounting hole tapped 8-32 (NC-2B).
Recognized under the Component Program of Underwriters' Laboratories, Inc.

845L-4C-24D	24DC	4PDT	11.14

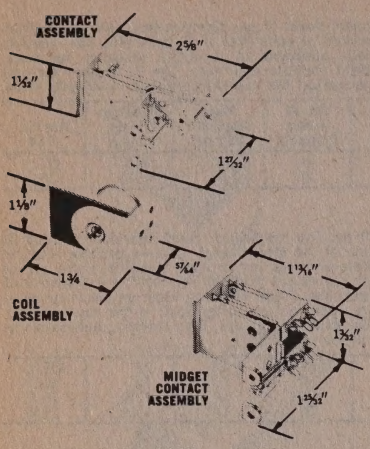
NOTES: All steppers except Series 705 are intermittent duty. All are direct-drive units with switching operation completed upon energization. All contact points are rated 1½ amps resistive at 120V, 60 Hz. Coil Voltage* are 120VAC, 60 Hz and 24DC.

* Steppers will operate satisfactorily at 15% below or 10% above rated voltage.

¶ Listings are for stepping coil and reset coil, respectively.

† Includes Zero (0) position.

‡ Zero (0) position switch only.



SERIES 200 RELAY WITH COMPLETELY INTERCHANGEABLE COIL AND CONTACT ASSEMBLIES

The coil consists of the coil and field piece; the contact assembly consists of switch blades, armature, return spring and mounting bracket. The Guardian Midget Contact Assembly is interchangeable with the standard Series 200 contact assembly. Available with SPDT, DPDT or 4PDT contact switch assemblies, each suitable for use with any AC or DC coil.

SERIES 900 - 905 / SERIES 910 - 915 10 AMP RELAY

- Designed with reduced number of parts for long, trouble-free service
- Has keyed and locked lifter

Series 910 is exactly the same as the 900 relay, both electrically and mechanically, but with ¾" quick disconnects instead of soldered termination.

Dependable, low cost, DPDT relay featuring new, trouble-free design that incorporates a minimum of parts. Contacts all rated 10 amps, 120 VAC resistive load. Has molded switches, one-piece mounting clip and return spring; molded bobbin and coil cover. Average shipping weight, 6 oz.

Recognized under the Component Program of Underwriters' Laboratories, Inc.

SERIES 1240 - 1245 NEW SMALL, EFFICIENT MEDIUM POWER RELAY — 10 AMPERE

Highly efficient relay for communications, automation, remote control switching circuits and laboratory applications. All terminals are solder lug type and molded in phenolic panel block for coils as well as contacts. Barriers in panel block raised to meet U/L over-surface spacing. Contacts rated 10 amps at 60 Hz, 120 VAC, non-inductive load. Mounting: Single mounting hole, 6-32 tap. Shipping weight, 2.5 oz.

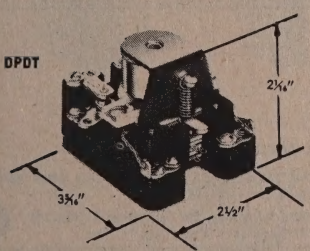
U-SHAPED BRACKET

INTERLOCK RELAYS
SERIES 1200/1200 / SERIES 1200/1200UB

Two interlocking AC relays in sturdy metal frame bracket. Used to maintain circuits continuously without coil power consumption. Units are electrically pulse operated with mechanical hold and electrical release. Contacts rated for 10 amps, at 60 Hz, 120 VAC, non-inductive load. Coil resistance is 1,100 ohms. Shipping weight, 5.5 oz.

Guardian No.	Cont. Comb.	Coil Voltage	Net ea. 1-24
1200/1200-4C-120A	4PDT	120AC	$13.96
1200/1200UB-4C-120A	4PDT	120AC	13.96



SERIES 2600U - 2605U 25 AMPERE POWER RELAY / Replaces Series 2100-2105 and Series 2300-2305

Power relays with double pole double throw contacts rated at 25 amps. Inverted coil construction protects armature and contacts from inadvertent mechanical damage or electrical shorting. Series 2600U-DPDT AC coils are rated for continuous duty at 240 VAC, with 75% power factor; operating power requirement is 9.5 volt amps, 60 Hz. Series 2600U and 2605U have easily accessible screw type terminals as pictured; also available are ¼ AMP QC as pictured on Series 2620U and 2625U. (Purchase 2600U-QC terminal kit for easy "do-it-yourself" conversion.) "Press to Test" armature lever makes for convenient manual circuit testing. Recessed SPDT auxiliary switch as illustrated is not included but is simple to mount and may be purchased separately if needed; auxiliary switch has solder lug blade tails and is rated for 10 amp operation. These new 25 amp power relays are very compact with a shipping weight of only 8 oz. For mounting there are two .196" diameter holes in the base; these are located on 1⅞" centers.

Recognized under the Component Program of Underwriters' Laboratories, Inc.

SERIES 2620U - 2625U 25 AMPERE POWER RELAY / Replaces Series 2110-2115

Compatible line of power relays with double pole single throw contacts (normally open). Same inverted coil construction as for 2600U and 2605U. Important note: Series 2620U and 2625U are manufactured with the easily accessible screw type terminals as pictured on Series 2600U and 2605U. The ¼ AMP QC terminals pictured here are available in the 2600U-QC terminal kit for easy "do-it-yourself" installation. Same "Press to Test" armature lever as for 2600U and 2605U. Auxiliary switch may be added if desired. Overall dimensions, shipping weight and mounting provisions are identical to the compatible DPDT units of the 2600U and 2605U Series.

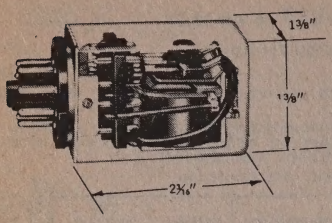
SERIES 1210 - 1215 ENCLOSED PLUG-IN RELAY — 10 AMPERE



A powerful and economical relay enclosed in a transparent, lightweight Lexan case which has high impact strength, is unaffected by weather, and is resistant to temperatures of 200°F. Relay available with 8 pin octal plug for DPDT and 11 pin for 3PDT. Contacts rated for 10 amps at 60 Hz, 120 VAC non-inductive load. Shipping weight, 3.5 oz.

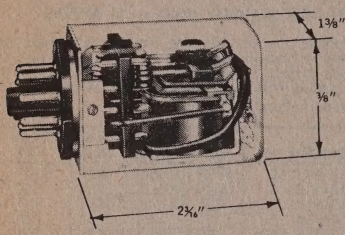
SERIES 1210N ENCLOSED PLUG-IN AC RELAY WITH BUILT-IN NEON LAMP TO INDICATE CIRCUIT FAULTS — 10 AMPERE



This plug-in relay utilizes a miniature neon lamp connected across coil terminals. The lamp lights each time the coil is energized, or indicates a circuit fault when lamp is "dark." Ideal for detecting circuit faults in relay banks, mass arrangements, or where relays are visibly located at intermediate switching points of the circuitry. Precludes the use of circuit testers. Available with 8 pin octal plug for DPDT and 11 pin for 3PDT.

Contacts rated 10 amps at 120 VAC, 60 Hz, non-inductive load. Shipping weight, 3.5 oz.

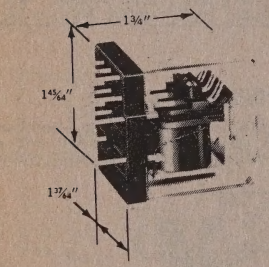
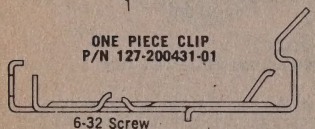
SERIES 1220 AC - 1225 DC





"Above Chassis" Snap Bracket accurately positions relay for quick connects or soldering.

"Above Chassis" Snap Bracket accurately positions relay for quick connects or soldering.

Modern design of this relay has become the standard of the industry. Series 1220 and 1225 are reduced in height and cost by eliminating the radio-type plug and all the wiring between the relay and the plug. These series use the terminal panel itself as the male plug. Famous "UNI-GUARD" continuous-loop moving blades eliminate soldered connections. Cover snap-locks in place with a flush fit that guards against shorting. Universal terminals function as solder-lug, .110" quick connect, or socket plug-in. Mounting bracket for above chassis installation included with each relay. Contacts will safely switch 10 amps at 120 VAC non-inductive in most applications and are U/L approved at 7 amps.

Recognized under the Component Program of Underwriters' Laboratories, Inc.

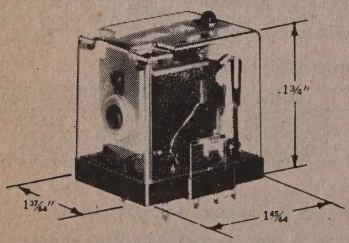
SERIES 1220M AC - 1225M DC MANUAL RESET RELAY



Basic size and cost advantages of the Series 1220 AC and 1225 DC are obtainable off-the-shelf in a manual reset version. Height and cost are reduced through the elimination of the radio-type octal plug and the wiring between the relay and the plug. Unit is built to meet U/L requirements and features the "UNI-GUARD" continuous-loop moving blades. Double pole double throw contacts transfer when coil is energized, locking in the transferred position without further coil energy. Lock is released and contacts re-transfer only when manual reset button is pressed.

Recognized under the Component Program of Underwriters' Laboratories, Inc.

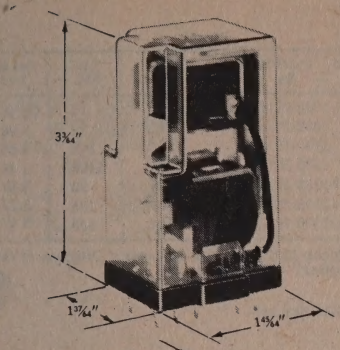
1220 SOCKETS

1-24 — Net 78¢ ea. 25 & up — Net 71¢ ea.

The 1220 snap-in socket has U/L component recognition when used with Guardian Relays. Socket terminal lugs can be soldered to or will accept AMP Series 110 quick connects.

Further savings available when purchased in bulk packs.



SERIES 1220/1220 ENCLOSED INTERLOCK

For an enclosed interlock or electrical reset relay the Guardian Series 1220/1220 has all the mounting and cost advantages of the Series 1220 and Series 1225. Double pole double throw contacts on relay transfer when relay coil is energized, locking in the transferred position without further coil energy. Lock is released and contacts retransfer **only** when interlock (reset) magnet is energized. Contacts are rated for 10 amps at 120 VAC non-inductive.

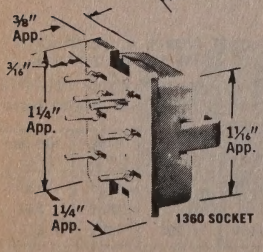
1365PC-2C-24D	24DC	4.13

Also available in SPDT and SPST configurations on special order.

Recognized under the Component Program of Underwriters' Laboratories, Inc.

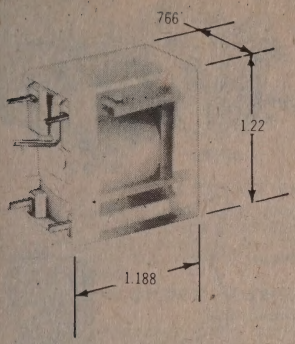


SERIES 1360 SOCKET

May be soldered directly to PC board or snapped through underside of chassis. Connections by wire wrapping may be made before or after insertion of socket into chassis. Panel cutout for socket should measure 1.265" x 1.078" with .015" radii at all four corners. .062" chassis thickness recommended.

1360-1 ..... 58¢ ea.

Recognized under the Component Program of Underwriters' Laboratories, Inc.



SERIES 1345

10 AMP RELAY IN YOUR CHOICE OF SPST-NO, SPST-NC, SPDT

Small in size . . . but built to take hard knocks. A tough little relay that measures just over a cubic inch small, yet is specifically designed for up to 50,000 miles of maintenance-free operation in automotive controls . . . or an equally amazing trouble-free life anywhere you need small size and long life at a low price. Contact ratings:

10 amps resistive at 12VDC
7 amps resistive at 30VDC
6 amps inductive at 30VDC
3.5 amps resistive at 120VAC
2.5 amps inductive at 120VAC

Heat resistant nylon cover. Weight: 1 oz.

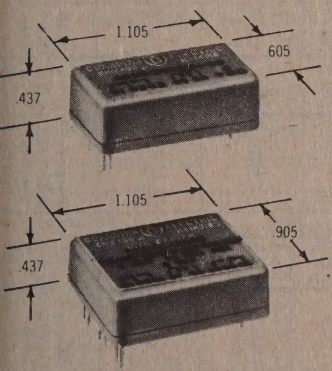
1390-2 PC Series Relay Socket (PRINTED CIRCUIT) ..... 75¢ ea.



SERIES 1475

LOW PROFILE ELECTROMECHANICAL RELAY IN A CHOICE OF SPDT OR DPDT

Specially designed for high density packaging . . . demanding operating requirements. "Flat-Pack" design features unique multiple convoluted contacting surfaces rated at up to 3 amps AC resistive. This type construction enables the 1475 relay to outperform similar relays under heavier load conditions. PC terminals on .1" grid spacing. Sealed thermoset housing and cover construction. Contacts rated 5 amps at 6 and 12VDC; 3 amps at 24 and 28VDC; 5 amps at 6, 12 and 24VAC; 1.5 amps at 120VAC. (AC loads are resistive.) Mechanical life in excess of 10^7 operations. Weight: 10 grams SPDT; 14 grams DPDT.

CLASS 67 ENCLOSED PLUG-IN RELAYS

VersaPac Class 67 miniature industrial relays are UL recognized (File No. E30741). Designed for applications requiring 2 to 8 Form C contacts where space, weight and low cost are of prime importance. Single and bifurcated, crossbar contacts of silver alloy gold flashed rated 3 to 5 amps at 28 VDC or 115 VAC resistive load. All plug-in relays feature plastic dust covers and combination solder plug-in terminals with 3-48 NC stud. Voltage specified relays pull in at 75% of nominal or less for DC relays and 85% of nominal or less for AC relays at 25° C. Resistance values ±10% measured at 25° C. Sensitive versions are also available in 2 or 4 Form C contacts rated 3 amps at 28 VDC or 115 VAC resistive load. **Size:** 2 Form C, 0.734″ x 0.938″ x 1.188″; 4 Form C, 0.734″ x 1.156″ x 1.188″; 6 Form C, 0.734″ x 1.375″ x 1.188″; 8 Form C, 0.734″ x 1.592″ x 1.188″.

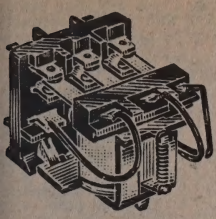
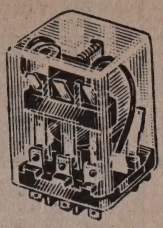
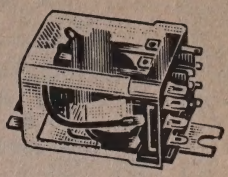
CLASS 388 GENERAL PURPOSE RELAYS
UL RECOGNIZED (FILE NO. E55458)



388 Open Type



388CP



388CQ

CONTACT RATING, ALL RELAYS THIS PAGE: SPDT-13A; DPDT-12A; 3PDT-11A.

Low cost, general purpose relay designed to meet UL and CSA standards. Coil bobbin skirt provides improved barrier of insulation between coil terminals and frame. Arc barriers between adjacent poles of the relay are molded internally and externally on the relay base.

CLASS 388 OPEN TYPE RELAYS, SPDT, DPDT, 3PDT (U.L. LISTED)

AC and DC operation. 3-way terminals, plug-in, solder, quick connect. SPDT, DPDT, 3PDT silver alloy, gold flashed contacts rated as shown at 28 VDC or 115 VAC resistive load. Dielectric withstanding voltage of 500 V rms between open contacts; 1500 V rms between all other elements. Nominal power for AC, 2.5 watts, approx.; for DC, 1.2 watts. Size, 1²³⁄₆₄″ x 1³⁄₃₂″ x 2¹⁄₆₄″, overall. Weight, 2.3 oz.

11-Pin 3PDT (3C)

CLASS 588 OPEN TYPE RELAYS

Class 588 UL Recognized (File No. E31481) continuous duty general purpose relays are designed for maximum efficiency and reliable performance at lowest cost. Contacts are silver alloy, gold flashed rated 5 or 10 amps at 28 VDC or 115 VAC resistive load. Open type relays have axial type solder lugs for easy wiring. Single 6-32 tapped mounting hole with locating boss for easy mounting. Voltage specified relays operate at 75% of nominal coil power (1.2 watts) or less for DC version and 85% of nominal coil power (2 VA) for AC versions. Size, 1 7/64" x 1 7/64" x 1 47/64".

CLASS 588CP ENCLOSED PLUG-IN RELAYS

Class 588CP low cost UL Recognized (rated to 8.5 amp) continuous duty, general purpose relays are similar to Class 588, but utilize plastic dust cover and plug-in base. SPDT and DPDT contacts have 8-pin octal plug-in bases and 3PDT types use 11-pin plug-in bases. Size, 1 13/32" x 1 13/32" x 2 1/8".

CLASS 88CP ENCLOSED, PLUG-IN 10-AMP, AC-DC RELAYS

Three-way protection against relay down time: 1) High reliability Class 88 relay described above; 2) Polycarbonate dust cover; 3) Plug-in mounting for quick change. "See-thru" enclosed design has 8-pin octal plug on SPDT and DPDT types; 11-pin plug on 3PDT types. Silver alloy contacts rated 10 amps. Size, 1⅜" x 1⅜" x 2⅛" h., above socket. 3 oz.

GENERAL PURPOSE AND LOW COST POWER RELAYS

CLASS 88L AC AND DC OPERATED 10-AMP LATCHING RELAYS

Two Class 88 relays with interlocking latch-in levers mounted on a common base. Each armature latches when pulled in. Energizing one armature releases (resets) the other. Each relay is complete with independent operating coil. Contacts silver alloy rated 10 amps. Relay coils designed for intermittent duty. Size, 3" lg. x 1¾" w. x 1 15/16" h., max. Weight, 6½ oz.

CLASS 88L AC AND DC 10-AMP ENCLOSED LATCHING RELAYS

Same operation and features as Class 88L above, but with enclosed dust cover plug-in construction. Clear, crackproof plastic case with molded 20-pin plug. 4PDT contacts rated 10 amps (2 Form "C" plus 2 Form "C"). Size, 2⅜" x 1¾" x 3 3/16" h. (not including plug). Mates with Amphenol 77-MIP-20 socket or equivalent. Weight, 8 oz.

CLASS 88K LOW COST AC AND DC 15-AMP POWER RELAYS

Heavy duty, silver cadmium oxide SPDT contacts are gold flashed and rated 15 amps at 115 VAC or 28 VDC resistive for power switching at low cost. Contacts assembled to glass melamine insulated terminal board for high dielectric strength. Flexible moving arm gives excellent contact wipe. Terminals can be solder connected or will accept AMP Faston (or equivalent) 250 Series receptacles on contacts, 110 Series on coil. Supplied on mounting base with base/chassis insulator. Contacts are 1 Form C, standard. Size, 2 5/16" lg. x 1 3/16" w. x 1¼" h., overall.

CLASS 88KD AC AND DC OPERATED 50-AMP POWER RELAYS

General purpose relays offer heavy duty silver alloy, gold flashed contacts for power switching. Contacts are SPST-NO, Form X, double-make; rated 50 amps at 115 VAC or 28 VDC resistive. Stationary contacts assembled to glass melamine insulated terminal board. Movable contacts and armature assembly on molded phenolic blade for excellent wipe, high reliability. Terminals can be soldered or accept AMP Faston 250 Series receptacles on contacts, 110 Series on coil. One 6-32 mtg. hole, locating boss. Size, 1 15/16" lg. x 1½" h. x 1 1/16" w., overall. Wt., 3 oz.

CLASS CP2, CP3 AND CP4 PLUG-IN RELAY ENCLOSURES

Tough see-through dust cover enclosures of crackproof polycarbonate resin with high impact strength and dimensionally stable characteristics. Available in three sizes, with 8-pin or 11-pin plugs. Plug keyways oriented toward side of enclosure. Suitable for electronic assemblies. Mates with Amphenol 77-MIP-8 or -11 socket or equiv. **Size:** CP2, 1⅜" sq. x 2⅛" above socket; CP3, 1¾" x 2⅜" x 2⅞"; CP4, 1¾" x 2⅜" x 3½". Weight: CP2, 2 oz.; CP3, 3 oz.; CP4, 4 oz.

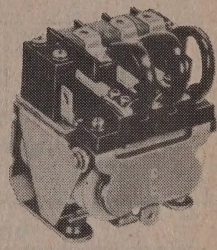
Also available with 600, 5600, and 13,400 ohm coils.



Class 27

CLASS 94 POWER RELAYS

ompact and positive-acting relays for either AC or DC operation, used wherever depend-ble circuit switching is necessary. Silver contacts (¼" dia.) are rated at 15 amps resistive, amps inductive at 115 VAC or 28 VDC. Large contact surfaces are kept clean by good iping action. Two tapped holes 6-32 NC-2 on 2" centers for easy mounting. **Size:** DPDT, ¾" x 2 23/32" x 1 29/32"; 4PDT, 3 1/16" x 2 19/32" x 1 29/32". Weight, 8 oz.

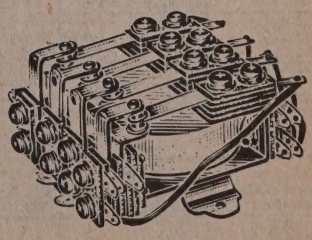
Class 94 DPDT



Class 94 4PDT

CLASS 97 ENCLOSED PLUG-IN OR STUD-MOUNTING 25 AMP POWER RELAYS—UL RECOGNIZED (FILE NO. E31481)

Class 97 is a low cost 25 amp relay for 1 or 2 pole, 120/240 VAC applications. Available with socket for plug-in applications or for use with standard quick-connect terminals for simplicity and ease in wiring. Class 97 relays offer high quality, dependable performance and long life. Ideal for use in appliances, automation equipment, motor starting and heater circuits, clock controlled systems, laundry equipment, vending machines, machine tools, furnace controls, panel boards and air conditioners. Holding circuit permits sustaining operation of the relay from momentary switches, without sacrificing one of the heavy duty load contacts where the coil voltage may be different from the load circuit voltage.

CLASS 96 GENERAL PURPOSE POWER RELAY

Continuous duty general purpose power relay available in AC or DC with DPDT (2C) and SPDT-DB-DM (1Z) contact arrangements. Excellent for general industrial power control circuits. Silver cadmium oxide contacts rated at 15 or 30 amps at 28 VDC or 115 VAC resistive. **Mounting Data:** 4 tapped holes 6-32 NC-2; ½" x 1 5/16" centers. **Size:** 1½" x 1 21/32" x 1⅞". Weight, 4.4 oz.

CLASS 93 20 AMP POWER RELAYS AC/DC OPERATION

Designed and constructed with a variety of features that contribute to the sensitivity and longevity of the relay. Contacts and terminals are mounted on molded phenolic blocks with integral barriers. Movable contact blades are made of spring temper phosphor bronze for high conductivity and long life. Adjusting screws on each blade permit close adjustment. Armature pivots on machined phosphor bronze bearing pins and pivot holes are precision reamed. **Mounting Data:** 4 tapped holes 6-32 NC-2, ½" x 1 5/16" centers. **Contacts:** ¼" dia. silver, 20 amps resistive at 115 VAC or 28 VDC. **Size:** 3PDT, 2" x 1 13/16" x 2 5/16"; 5PDT, 2" x 2 5/16" x 2 5/16".

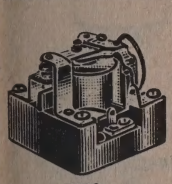
Magnecraft® Power Relays

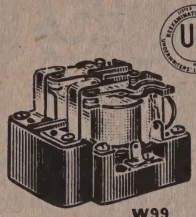
CLASS 99 HEAVY DUTY POWER RELAYS

UL LISTED FOR HEAVY DUTY INDUSTRIAL CONTROL

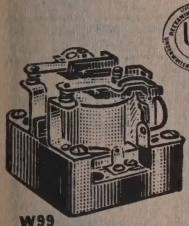
Relays illustrated with UL emblem are listed by Underwriters Laboratories under Motor Controller, Magnetic, Across The Line Starter: Open (File No. E43641). The only exception is W99AX-7, DPDT, 440 VAC relay, indicated by †.



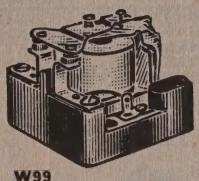
W99 SPDT



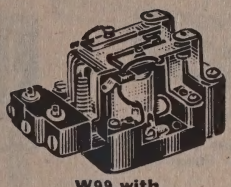
W99 DPDT



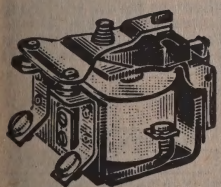
W99 DPST-NO



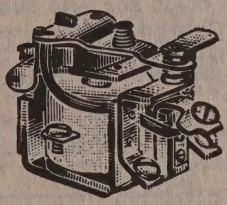
W99 SPST-NO-DM



W99 with Aux Snap Switch



W99SD SPST-NO-DM



W99S SPDT

Rugged, precision-built hinge pin armature bearings for extra long life. Lowest friction and maximum contact effectiveness. Dimensionally interchangeable with other power relays of the clapper type. Heavy duty plastic base and molded contact barrier mounted to armature for high insulation resistance. Positive contact wiping action. Heavy duty screw terminals. Molded coil bobbin. **Contacts:** Silver alloy, 5/16" dia., gold flashed. Choice of SPDT, DPDT, DPST-NO and SPST-NO double break. **Size:** SPDT 25-amp, 2 3/16" sq. x 2 1/2" h.; DPDT 25-amp, 3 3/16" w. x 2 1/2" d. x 2 3/8" h.; DPST-NO 25-amp, 2 1/2" sq. x 2 3/8" h.; SPST-NO-DM 50-amp, 2 1/2" sq. x 2 3/16" h.

Time Delay Plug-In

NEW CLASS 388 LOW COST SOLID STATE HYBRID, TIME DELAY RELAYS

Plug-in or flange-mount models. Immune to false operation. Repeatability, ±3% under fixed conditions, 25° C, 120 VAC; ±10% over voltage and temperature extremes. Contacts, 10 amp DPDT at 28 VDC or 115 VAC, res. Input voltage for Model Nos. W388ACPSOX-1, and -2, and W388ACQSOX-1, and -2, 120 VAC; W388CPSOX-1, and -2, and W388CQSOX-1, and -2, 24 VDC. Steady state current, 20 mA at 120 VAC, 60 mA at 24 VDC. Transient and polarity protection to twice input voltage for 8 ms. Reset and recycle time, less than 100 ms. Tough, crackproof dust cover. Size, Flange-Mount, 1 17/32″ w. x 1 13/32″ d. x 2 29/32″ h.; Plug-In, 1 17/32″ w. x 1 13/32″ d. x 1 29/32″ h., overall.

CLASS 211CP SOLID STATE PLUG-IN TIME DELAY RELAYS

Combines solid state circuitry for timing function, with Class 88 electromechanical relay for DPDT 10-amp output switching. Nylon dust cover, plug-in mounting. DC models are reverse polarity protected. Transient protection for twice the nominal input voltage, for a period not to exceed 8 msec. **Contacts:** DPDT, rated 10 amps. **Temperature Range:** Operate, −10° to +55° C; storage, −55° to +85° C. **Timing Repeatability:** ±5% of setting at nominal voltage at 25° C. **Size:** 1¾″ x 2⅜″ x 2⅞″ h. (not including knob). **Plug:** Operate types, 8-pin; release types, 11-pin.

CLASS 112 AIR DASHPOT TIME DELAY RELAYS

Electrically actuated, with rugged enclosure and few moving parts. Solenoid assembly added to air dashpot/snap switch combination initiates time switching function. Mechanical timing function unaffected by voltage variations. Time delay adjustable, 1–150 seconds, with knob or capped Allen screw. Time repeat accuracy, ±10%. Release delay without standby power. DPDT contacts rated 10 amps. Enclosure has grommet for feed-thru wires (internally wired by user to .187″ quick-connect terminals). Mounting by two 3/16″ dia. holes on 3″ centers. Size, 1¾″ x 3 3/16″ x 4 3/16″. Weight, 20 oz.

Class 112M (W112MASOX-1 to W112MASRX-2): Same as above, but in molded, high-impact plastic enclosure with built-in screw type terminals. Flange mounting, with six 3/16″ holes spaced ½″ on 4⅛″ centers. Factory wired. Size, 1½″ x 4½″ x 4½″. Wt., 14 oz.

CLASS 113C MANUALLY ACTIVATED TIME DELAY SWITCHES

Consists of Class 113 air dashpot time delay switch built with a non-aging, low-friction graphite, precision ground tempered glass air dashpot timer. Pushing the button instantly transfers the SPDT switch; releasing initiates the timing cycle. At the end of timing period, snap contacts are instantly reset. Knob-adjustable timing range, 1–180 seconds. Metal parts are corrosion-resistant. SPDT contacts rated 10 amps up to 32 VDC or 250 VAC resistive. Size, 2 1/16″ x 1 5/32″ x 3 3/8″. Mounts in single panel hole. Wt., 8 oz

Class 155

CLASS 155 RF RELAYS 15 AMP DPDT—1 KILOWATT

Class 155 relay is designed for heavy duty radio frequency transmitter antenna changeover and high voltage switching applications. RF relay is for fixed-station usage with conservative rating of 1 kW. Ideal for switching industrial loads because of ¼" dia. silver contacts and wide contact gap. Built for easy connection to antenna lines. Insulated with ceramic steatite. Excellent wiping action of contacts assures flow of most minute currents for receiving positions. **Mounting Data:** 4 holes .157" dia.; clearance for 6-32 screws. **Size:** $1^{21}/_{32}$" x $2^{25}/_{32}$" x $3^{13}/_{32}$".

Class 158

CLASS 158 HIGH VOLTAGE RELAYS (UP TO 5000 VOLTS)

Class 158 is developed especially for making or breaking high voltage circuits of low current capacities. System of levers operating the armature provides the necessary wide gap for high voltage switching, but keeps the size of relay to a minimum. Contact assembly is mounted on ceramic to insure high insulation plus strength and low energy loss. Specially designed contact assembly provides for minimum bounce. Silver cadmium oxide contacts (¼" dia.) break up to 5000 volts rms at 200 mA. **Size:** $1^{23}/_{32}$" x $3^{1}/_{16}$" x $2^{7}/_{32}$".

Class 62

CLASS 62 ULTRA-SENSITIVE RELAYS—1 AMP SPDT

Ultra-sensitive, durable, dustite and fully adjustable relays for use in any DC circuit restricted to a few thousandths of a watt power consumption. Counter-balanced armature design permits excellent operation in any position. Transparent, molded plastic cover guards against dust or dirt reaching the contacts or other working parts—yet allows immediate visual inspection. Sturdy molded Bakelite® base has both screw and solder terminal connectors and convenient means of mounting is provided. Sensitivity adjusted to 5 milliwatts. Field adjustments are easily made by using the vernier screws. Silver contacts and spring tension can be accurately and permanently set, yet easily changed. **Contacts:** 1 amp resistive at 115 VAC or 28 VDC. **Mounting Data:** 2 holes $^{9}/_{64}$" dia. **Size:** $2^{1}/_{16}$" x $1^{19}/_{16}$" x $2^{5}/_{8}$".

®Reg. Bakelite trademark.

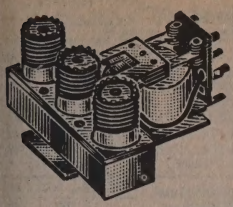
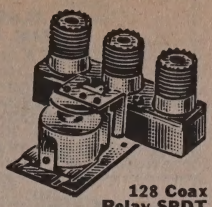
COAXIAL, HYBRID POWER SOLID STATE AND REED RELAYS

CLASS 120 AND CLASS 128 COAXIAL RELAYS FOR RF SWITCHING



128 SPDT with DPDT Auxiliary Contacts



128 Coax Relay SPDT

Class 120

Compact relays combine a heavy duty coaxial relay with Class 88 relay structure. Precision-built, hinge-pin armature bearings assure consistent pull-in power with maximum reliability over long life. Coaxial contact structure is enclosed in a heavy duty, precision machined brass cavity with removable plug for convenient inspection of contacts. SPDT RF switching contacts are silver alloy, gold flashed; rated 100 watts RF. VSWR, 1.25:1 maximum, 0–500 MHz. Matches 50-ohm cable using standard UHF connectors. Operate time, 25 msec maximum. Release time, 25 msec maximum. Size, 2⅝″ x 2⅞″ x 1⅞″.

STANDARD CLASS 128 SPDT COAXIAL RELAYS

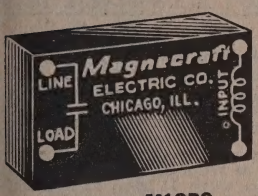
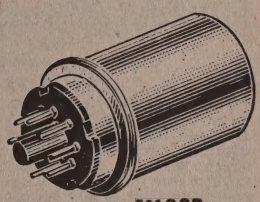
CLASS 501Q SOLID STATE HYBRID POWER RELAYS



501QPC



501QCP

Reed triggered triac assembly features the long life and isolation of a reed relay to trigger a triac capable of switching the high inrush currents of such devices as lamps, motors, capacitors and heaters. Available in printed circuit (Series 501QPC) or enclosed plug-in (Series 501QCP) versions. **Life:** Approx. 25 million operations. **Contacts:** SPST-NO (1 Form A). **Load Rating:** 3 amps (6 amps for series 501QCP) at 120 VAC rms or 200 VDC peak at 25° C. **Surge Rating:** 100 amps for 0.016 seconds. **Operate Time:** .003 seconds. **Size:** Series 501QPC, 2¼″ w. x ¾″ d. x 1¼″ h. (pins, .04″ dia. x ⅛″ h.); series 501QCP, 1 21/32″ overall dia. x 2 11/32″ height less pins. Weight, 2 oz. (3 oz. for series 501QCP).

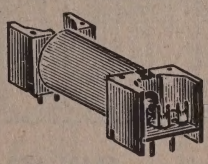
CLASS 101MPC AND CLASS 102MPC LOW-COST REED RELAYS

Class 101MPC



Class 102MPC

Low-cost reed relays provide optimum reliability, fast operation and low profile printed circuit mounting. One-piece, rugged reed support terminal pin is rigidly fastened to terminal board and soldered stress-free to the switch leads; assure performance and adjustment will not be affected by external stresses. **Miniature Class 101MPC:** SPST-NO (1 Form A) contacts rated 10 VA at 0.5 amp or 200 VDC max. non-inductive. Life, 5 million cycles at full load; 20 million at ½ load. Nominal power, 500 mW. Size, 1⅛″ x ⅜″ x ⅜″. Weight, approx. 1 oz.
Standard Class 102MPC: SPST-NO (1 Form A) contacts rated 15 VA at 1.0 amp or 250 VDC max. non-inductive. Life, 20 million cycles at full load; 100 million at ½ load. Nominal Power, 500 mW. Size, 2⅝″ x ⅝″ x 2 3/32″. Weight, approx. 1 oz.

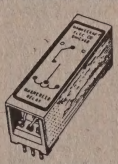
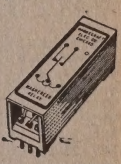
IC COMPATIBLE REED RELAYS

Class 101M (1 Form A)

Class 104M (1 Form C)



Class 101MPC (1 Form A)



Class 104MPC (1 Form C)

Provide the small size, low profile, printed circuit mounting and low operating power required for IC compatibility, typically 50 mW. Two package configurations available: Inline axial leads or PC mounting. **Life:** 5 million operations at rated load; longer at reduced load. **Size:** Inline axial-lead units, 1″ x 7/16″ x ½″. Printed circuit mounting types, 1⅛″ x ⅜″ x 1 3/32″.
Class 101M (Inline Axial Leads) **and 101MPC** (PC Mtg.)**:** SPST-NO (1 Form A) contacts rated 10 VA at 0.5 amp or 100 VDC max. resistive.
Class 104M (Inline Axial Leads) **and 104MPC** (PC Mtg.)**:** SPDT (1 Form C) contacts rated 3 VA at 0.25 amp or 28 VAC max. resistive.

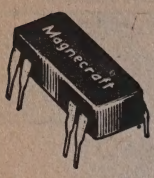
DUAL-INLINE-PACKAGED 8-PIN REED RELAYS



Epoxy-molded DIP (dual-inline package) 8-pin reed relays offer high quality at low cost, compatible with the standard packaging developed for integrated circuitry. Unique design provides the optimum in automated insertion and other economical installation techniques associated with printed circuit applications. Ideal for use in circuits where high density packaging is essential. The 5 VDC IC-compatible versions will operate directly from TTL or DTL circuits; also available in standard coil voltages of 6, 12 or 24 VDC. Class 107 and 118 relays are available with or without an internal clamping diode. **Size:** W107, .750″ x .187″ x .250″; W117 and W118, .750″ x .210″ x .260″; W171, W172 and W173, .750″ x .275″ x .260″.

CLASS 107 DIP, SPST-NO
1 FORM A (PROFILE HEIGHT .187″)

Contacts rated 3 VA at .110 amp max. or 28 VDC resistive, max. Operate time, 200 μsec, typical. Dielectric strength, 200 VDC minimum between contacts. Contact resistance, 200 milliohms, average. Life, 10 million operations typical; longer at reduced loads.

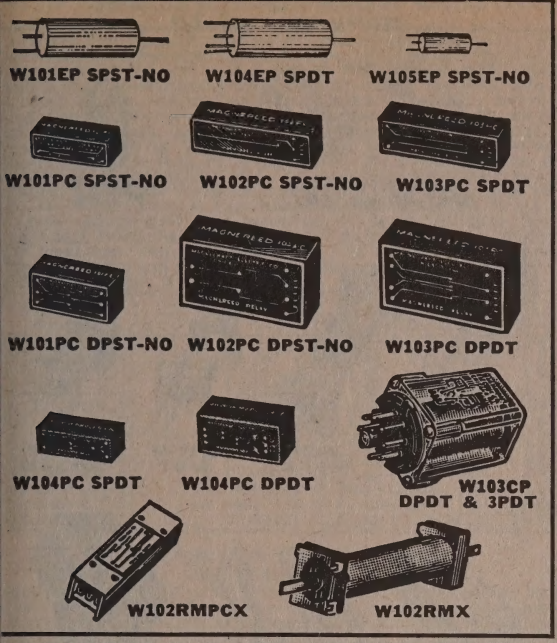
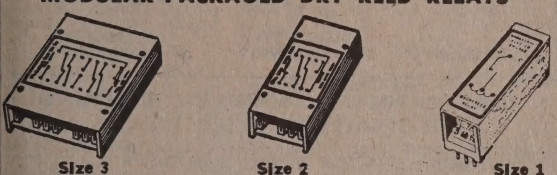
Magnecraft® Dry Reed Relays



MODULAR-PACKAGED DRY REED RELAYS



Modular-packaged dry reed relays ideal for printed circuit applications. Switching mechanism is hermetically sealed in glass with inert gas fill. Precious metal contacts. Unique mounting design prevents damaging stresses on reed elements. Nylon bobbin and integral mounting base mortised and rigidly riveted to epoxy resin terminal board. Snap-on metal cover provides magnetic shielding and mechanical protection. Fast acting: 2 or 3 msec, operating; 1 msec, release time. Long life: 20 million cycles at max. load; 100 million at low load. Available Form A or Form C: Form A rated 5 VA at 1 amp or 250 VAC max.; Form C rated 10 VA at ½ amp or 250 VAC max. Choice of three case sizes: **Size 1**, single Form A or C; 41/64" h. x ¾" w. x 2 5/8" lg.; requires 0.5 W DC power. **Size 2**, three Form A or two Form C; 41/64" h. x 1 5/16" w. x 2 5/8" lg.; requires .75 W DC power. **Size 3**, six Form A or four Form C; 41/64" h. x 81/64" w. x 2 5/8" lg.; requires 1.5 W DC power.

MAGNEREED (DRY REED) RELAYS

Stabilized contact resistance, high speed positive switching and sensitive operation; adaptable to complex logic circuits. All models have molded epoxy resin encapsulation. Pre-adjusted precious metal contacts in inert gas environment are actuated by coil around capsule. **Series W101:** 10 VA at .5 amp max. or 200 VDC max. resistive. Life, 5 million cycles at max. load; 20 million, ½-load. Cap., 1.0 pF between contacts. Size: W101EP, 1" x 7/16" dia. (Wt., 1 oz.); W101PC, SPST-NO, 1½" x ½" x 9/16" (Wt., 2 oz.); W101PC, DPST-NO, 1½" x 1 1/16" x 9/16" (Wt., 3 oz.). **Series W102:** 15 VA at 1 A max., or 250 VAC max. non-inductive. Life, 20 million cycles at max. load; 100 million ½-load. Cap., SPST, 1 pF; DPST, 1.2 pF. Size: W102PC, SPST-NO, 2¼" x 2 1/32" x 5/8" (Wt., 3 oz.); W102PC, DPST-NO, 2¼" x 1¼" x ¾" (Wt., 4 oz.). **Series W103:** 10 VA at ½ A, or 250 VAC max. non-inductive. Life, 25 million cycles at max. load; 50 million, ½-load. Cap., SPDT, 3 pF; DPDT 3.5 pF. Operation, SPDT break before make, single side stable. Size: W103PC, SPDT, 2¼" x 2 1/32" x 5/8" (Wt., 3 oz.); W103PC, DPDT, 2¼" x 1¼" x ¾" (Wt., 4 oz.). **Series W103CP:** Plug-in mounting type with non-metallic dust cover; has W103 relays with common operating coil. DPDT units are 8-pin; 3PDT units, 11-pin. Size, 1⅜" x 1⅜" x 2⅛" (Wt., 5 oz.). **Series W104:** 3 VA at .25 A max., or 28 V max. non-inductive. Life, 10 million cycles at rated load. No bias magnet. Size: W104EP, 1" x 7/16" dia. (Wt., 1 oz.); W104PC, SPDT, 1½" x ½" x 9/16" (Wt., 2 oz.); W104PC, DPDT, 1½" x 1 1/16" x 9/16" (Wt., 2 oz.). **Series W105:** 0.1 VA at 10 mA. Life, 10 million cycles at rated load. Size, 7/16" x ¼" dia. (Wt., ½ oz.).

3 AMP SPST-NO POWER DRY REED RELAYS

Low profile, printed circuit mounted relay with contact rating formerly available only in general purpose or telephone type relays. Housed in molded nylon bobbin with snap-on, steel cover for mechanical and magnetic shielding. Switch mechanism in hermetically-sealed glass capsule. **Contacts:** SPST-NO (Form A). **Rating:** 100 VA at 3 A or 250 V max. **Power:** 0.5 W nominal; 2 watts max. **Size:** 2 5/8" x 4 1/64" x ¾". Wt., 3 oz.

*COIL DATA

Current shown is pull-in at specified value or less. Voltage shown is nominal. Pull-in at 80% of nominal or less for DC relays; 85% of nominal for AC relays at 25° C. Resistance shown is ±10% at 25° C.

MINIATURE PC DRY REED RELAYS

Modular, printed circuit dry reed relays are fast, reliable and compact. Hermetically sealed in glass capsule filled with inert gas. Reed support terminals rigidly anchored to molded nylon bobbin; welded to switch leads for maximum insulation. Terminal pins spaced for .1" grid centers. Magnetically shielded and mechanically protected by snap-on steel cover. **Contact Resistance:** 150 milliohms avg. **Life:** W101, 5 million cycles at rated load; W104, 10 million cycles. **Rating:** W101, 10 VA, 500 mA max. or 200 VDC max., non-inductive; W104, 3 VA, 250 mA max. or 28 V max., non-inductive. **Size 1:** Single Form A or C, ⅜" h. x 13/32" w. x 1⅛" lg.; requires 500 mWDC power. Weight, 1 oz. **Size 2:** Three form A or two Form C, ⅝" h. x 39/64" w. x 1⅛" lg.; requires 700 mWDC power. Weight, 1 oz.

OPEN STYLE AXIAL LEAD DRY REED RELAYS

Low cost reed relays give optimum reliability and fast operation. Tinned leads are specially fastened to a molded nylon bobbin for stress relief on glass capsule during soldering. Rugged coil terminal inserts eliminate possibility of shorts. Contacts hermetically sealed with inert gas in glass capsule; free from dust contamination, moisture or tampering. Tinned terminals for circuit mounting. No. 16-265-6 clip available for clip mounting. Choice of 2 sizes; 2 contact arrangements. **Series W101MX:** Miniature; SPST-NO (1 Form A) contacts rated 10 VA max. at .5 A max. or 200 VDC max. resistive. Coil 600 mW nominal. Cap., 0.3 pF avg. between contacts. Life, 5 million operations typical. Size, 2¼" lg. x ½" w. x 1/16" h., including leads. **Series W102MX:** Standard size; SPST-NO (1 Form A) contacts rated 15 VA max. at 1 A max. or 250 VAC max. resistive. Coil, 300 mW nominal. Cap., 0.9 pF avg. between contacts. Life, 20 million operations typ. Size, 3¼" lg. (incl. leads) x 19/32" w. x ½" h. **Series W103MX:** Standard size; SPDT (1 Form C) contacts rated 10 VA max. at 0.5 A max. or 250 VAC max. resistive. Coil, 300 mW nominal. Cap., 3.0 pF avg. between contacts. Life, 25 million operations typ. Size, 3 7/16" lg. (incl. leads) x 19/32" w. x ½" h. **Series W104MX:** Miniature; SPDT (1 Form C) contacts rated 3 VA max. at 0.25 A max. or 28 VAC max. resistive. Coil, 600 mW nominal. Cap., 1.3 pF avg. across contacts. Life, 10 million operations typ. Size, 1" x 7/16" x ½" (not incl. leads).

CLASS W103LMPC MAGNETIC LATCHING (BI-STABLE) DRY REED RELAYS

Biased permanent magnet holds either contact position; no coil current required. Ideal for memory applications. Coil current polarity reversed for single wound coils; separate polarized windings on double-wound coils have individual input terminals. Modular construction and printed circuit terminals for rugged, dependable use. **Contacts:** SPDT (Form C, Bi-Stable) break-before-make. **Rating:** 10 VA, 200 V maximum or 0.2 amp maximum non-inductive. **Power:** 0.15 W nominal and 2 W max., single wound; 0.2 W nominal and 2 W max., double wound. **Average Time:** 2 msec operate and release. **Life:** Twenty-five million cycles at rated load. **Size:** 2 5/8" x 41/64" x ¾". Weight, 1 oz.

CLASS W103LCP PLUG-IN LATCHING (BI-STABLE) REED RELAYS

Magnetic latching action; requires no coil current to hold either of two latching positions. Single wound coil (Types W103LCPX-7 to -10) switching is achieved by reversing coil current polarity. Double wound coil (-11 to -14) has separate polarized winding; switching is achieved by use of dual input. Enclosed plug-in construction. **Contacts:** SPDT. **Contact Resistance:** 150 milliohms average. **Contact Load Rating:** 10 VA at 0.2 amp maximum or 200 VDC maximum, resistive. **Typical Life:** 25 million operations (longer at reduced loads). **Operate Time:** 2 milliseconds average. **Contact Bounce:** 2 milliseconds average. **Capacitance:** 4.0 pF average, across contacts. **Size:** 1⅜" x 1⅜" x 2⅛" high. Wt., 5 oz.

MERCURY-WETTED REED, HIGH VOLTAGE & LATCHING RELAYS

MODULAR PACKAGED MERCURY WETTED STANDARD SIZE RELAYS

Modular unit features nylon bobbin and integral base, epoxy resin terminal board, one piece tinned terminal supports and pins riveted into mortised position, steel cover and hermetically switch mechanism. High performance from mercury-wetted contacts: avoids contact erosion, welding, bounce and chatter. Capillary action in high pressure hydrogen atmosphere maintains mercury film on coil actuated contacts. Less than 10% variation of 50 milliohms maximum resistance for life; life exceeds one billion cycles. Operates upright, no more than 30° from vertical. No adjustments, no deterioration. Switches from 50 VA to extremely minute current and voltage. **Contacts:** Series 132, SPST-NO (Form A); Series 133, SPDT (Form C) Single Side Stable. **Rating:** Series 132, 50 VA at 3 amps max. or 400V max. noninductive; Series 133, same, but 2 amps max. **Power Requirements:** 0.5W nominal, 0.15W minimum, 2W maximum. **Temperature Range:** −38°F to +200°F. **Average Time:** Operate and release, 2 msec. **Dimensions:** 41/64″ h. x ¾″ w. x 2 5/8″ lg. Weight, 3 oz.

ENCAPSULATED MERCURY-WETTED MINIATURE RELAYS

Small, printed circuit relays. Plug-in terminal pins extending from epoxy mounting board, are soldered to rigid terminal posts; leads from capsule are soldered with capsule and coil in place to eliminate breakage, contact distortion and protect coil. Environment-proof housing provides protection from atmospheric conditions. Complete unit mounts quickly to circuit boards. No contact bounce or erosion. Operates upright, no more than 30° from vertical. **Contacts:** Series W131PCX8 thru 11, SPST-NO (Form A); Series W131PCX12 thru 15, DPST-NO (2 Form A). **Power Requirements:** Series W131PCX8 thru 11, 0.6W nominal; Series W131PCX12 thru 15, 0.9W nominal. **Temperature Range:** −38°F to +200°F. **Average Time:** Operate and release, 1 msec. **Life:** One hundred million cycles at rated load. **Dimensions:** Series W131PCX8 thru 11, ½″ h. x 5/16″ w. x 1 ½″ lg. (Wt., 2 oz.); Series W131PCX12 thru 15, 7/16″ h. x 11/16″ w. x 1 ½″ lg. (Wt., 3 oz.).

MINIATURE MODULAR, PRINTED CIRCUIT MERCURY-WETTED REED RELAYS

Modular design for printed circuit applications. Integral nylon bobbin and base for maximum electrical insulation. Steel cover for full mechanical protection and magnetic shielding. No contact bounce. Terminal pins spaced 0.1″ for rapid assembly to PC boards. Upright operating position, not more than 30° from vertical. **Contacts:** W131MPCX-2 thru -5, SPST-NO (1 Form A); -6 thru -9 DPST-NO (2 Form A). Rated 28 VA max. at 1.0 A max. or 100 VAC max. resistive. **Coil Power:** 500 mW nom., SPST types; 700 mW nom., DPST. **Capacitance:** 1.2 pF avg. across contacts. **Life:** 25 million operations typical; longer at reduced load. **Size:** W131MPCX-2 thru -5, 13/32″ w. x 1 1/8″ lg. x 5/8″ h.; -6 thru -9, 29/64″ w. x 1 1/8″ lg. x 5/8″ h.

MAGNETIC LATCHING MERCURY-WETTED REED RELAYS

Bi-stable relay requires no coil current to hold either of two latching positions. Armature contact remains in last operated position until coil polarity is reversed. Ideal for printed circuit memory applications, with stress-free mounting, rigid positioning and mechanical protection. With single-wound coils, switching is achieved by reversing coil polarity; double-wound coils have separate polarized windings, switched by two separate inputs. **Contacts:** SPDT (1 Form C) break-before-make, bi-stable. **Rating:** 50 VA at 2 amps max. or 400 VDC max., resistive. **Power:** 500 mW nominal. **Average Time:** 2 msec., operate and release. **Life:** 25 million operations, typical; longer at reduced load. **Size:** 2 5/8″ x ¾″ x 41/64″.

HIGH VOLTAGE DRY REED RELAYS

Contacts: SPST-NO (Form A), 50 VA at 3 A max. **Size:** 4½″ x 15/16″ x 7/8″. Wt., 3 oz.

Class 102V—5000 V in modular package. Contact and coil leads soldered to rigid terminal posts; widely spaced. Internally insulated. Operates in any position. **Rating:** 5 KVDC max. or 5 KVAC peak resistive. **Time:** Operate, 3.0 msec avg.; release, 0.5 msec. **Life:** 20 million cycles typical.

Class 102HV—10,000 V. Specially insulated. Contact and coil leads soldered to rigid terminal posts; widely spaced. Shock proof material. **Rating:** 10,000 V at 1 mA resistive. **Time:** Operate, 25 msec typical including bounce. **Life:** One million cycles typ.

Class 102UHV—20,000 V. Outside leads for coils. Specially insulated. **Rating:** 20,000 V peak at 1 mA resistive. **Time:** Operate, 25 msec typ. in. bounce. **Life:** One million cycles typical. Note: Observe switch polarity.

MINIATURE 1000-VOLT REED RELAYS

Switches up to 1000 volts, in miniature package with reed relay reliability. Class 101VM has in-line design with reed leads fastened to molded bobbin for stress relief. The nylon bobbin has rugged coil terminal inserts to eliminate shorts. Class 101VMPC has reed leads spaced 0.3″ from coil leads for high dielectric strength, elimination of shorts. **Contacts:** SPST-NO, Form A. **Rating:** 1000 VDC at .001 amp max., resistive. **Coil Power:** W101VM, 600 mW nominal; W101VMPC, 700 mW. **Average Time:** Operate, 1 msec.; release, 0.5 msec. **Life:** Greater than 1 million operations. **Size:** W101VM, 2¼″ x ½″ x 7/16″; W101VMPC, 1⅛″ x ⅜″ x 39/64″.

LOW PROFILE PC BOARD RELAYS

Extremely low profile of 0.4" allows efficient space utilization in communications systems, data processing equipment, and automatic control systems. The Class 65 power relay is also useful in heating systems and automotive and consumer electronics equipment. Terminals are spaced on standard 0.1" grid.

CLASS 63, DPDT

Contacts rated 1 Amp at 24 VDC or 300 mAmp at 115 V AC/DC resistive. Operate time, 8 msec. Dielectric strength, 500 V rms between winding and frame. Life, 6 x 10^6 operations, longer at reduced loads.

CLASS 388SS AMPLIFIER DRIVEN GENERAL PURPOSE RELAY

Solid state hybrid relay allows full 10 Amp switching with only 70 microwatt input power. Combines high input impedance amplifier with the proven reliability of our Class 388 relay. An input as low as 2.4 VDC will energize the relay. Dropout occurs at 1.5 VDC or less. Operating temperature range is −10° C to +55° C. Contacts are SPDT or DPDT gold flashed silver alloy rated at 10 Amps at 28 VDC/115 VAC, resistive. Available in plug-in style or surface mount.

TYPE 01 COMPUTER QUALITY LIGHTED PUSHBUTTON SWITCHES
(DISCOUNT SCHEDULE "B")

Switches with exclusive FROST GLO™ illumination to complement and enhance the front panel appearance of computer, computer peripheral, communications, test and measurement, office and medical electronic equipment. Switches feature solid or projected color lens caps, insertable legends, one-piece construction and front-of-panel mounting and relamping. Mounts in .855" x 1.095" cutout. Contacts are rated 10 amps, form Z, or 5 amps, form C, at 125/250VAC. Contacts are fine silver, or gold for low-level switching. Terminals mate with .110" quick-connectors. Unit accepts one T 1 3/4 flange base lamp which can be ordered separately. U.L. listed.

Value of external resistor required for maximum delay time.

CD SERIES GENERAL PURPOSE TYPES

Dependable, accurate and flexible solid state relays. Choice of knob-adjustable with relay in same enclosure (CD-38) or with an auxiliary relay (CD-21 and CD-45) and external resistor adjustable (CD-31). Delay on operate except CDB38-70012, CDB38-70014, CDB38-70015, CDD38-30008, CDD38-30012 and CDD38-30014 are delay on release when control circuit is de-energized (supply must be energized continuously; see Outline Dwg. C). Temp. range, −40° C to +55° C. Repeatability, ±2% (CD-38, ±1%). Polarity protection. Size: **CD-38,** 1.781″ x 2.875″ x 3.562″ h.; wt., 8 oz. **CD-21,** 1.406″ sq. x 2.562″ h.; wt., 4¼ oz. **CD-31,** .859″ x 1.109″ x 1.28″ h.; wt., 2 oz. **CD-45,** 2.5″ x 3″ x 2.75″ h.; wt., 9 oz.

CH SERIES LOW-COST TYPES

Engineered for a wide range of industrial applications where not-too-critical performance suffices and where economy is more important than precision timing accuracy. Enclosed in a molded white nylon dust cover. Knob-adjustable (except CHA38-70001, fixed delay and CHD38-30021 interval-on) and have plug-in octal terminals. Repeatability, ±2%. Reset time, 125 msec. Operating temp., −10° C to +55° C. Dial setting, reference scale. Polarity protection. Size, 1.781″ x 2.406″ x 3.562″ h., max. Weight, 4 oz.

CK SERIES

Available in three types: Fixed, resistor adjustable and knob adjustable for delay on operate applications. Enclosed in white nylon dust cover for compact and convenient assembly. Does not false operate and will time as low as 0.1 sec. For AC or DC applications where false operation cannot be tolerated. Knob adjustable except CKA, CKC, fixed delay; CKF, CKH, resistor adjustable. Equipped with plug-in octal type terminals. Polarity protection. Size, 2.875″ x 1.781″ x 3.562″ h. max. Weight, 4 oz.

CKA38-70010	A	10	120 VAC	a	$25.20

CKD38-20010	A	.1 to 10	12 VDC	a	25.25

Notes: a, Has internal relay with DPDT contacts rated at 10 amps, 120 VAC. **b,** Use with P&B Type KRP5AG, KRP11AG or KRP14AG, 120 VAC relays. **c,** Use with P&B Type KRP5DG, KRP11DG or KRP14DG, 24 VDC relays. **d,** Use with P&B Type KHP17D11, 24 VDC relay. **e,** As supplied, unit has fixed time delay of 180 secs; adjustable to 1.8 sec, with external resistor (not furnished). **f,** Use with P&B Type PR11AY, 120 VAC relay. **g,** Provides delay on release: all other types have delay on operate. **h,** Use 33K external resistor for ½ max. time. **i,** Use 200K external resistor for ½ max. time. **j,** Provides interval on operation. **k,** Use 400K resistor for ½ max. time. **l,** Use 750K resistor for max. time. **m,** Use P & B type KHP17A11-120 VAC relay. **n,** Use 1.6 meg resistor for ½ max. time.

See another P&B page for accessories.

★QUANTITY PRICES AVAILABLE ON REQUEST

SOLID STATE FIXED AND ADJUSTABLE TIME DELAY RELAYS

CL SERIES FIXED AND ADJUSTABLE RELAYS

For applications where false operation cannot be tolerated. Designed for delay on operate. Similar to CU Series except do not false operate when timing interval is interrupted. Includes internally mounted DPDT 10-amp relay enclosed in yellow polycarbonate dust cover. Available in fixed, resistor-adjustable or knob-adjustable types. Reset time 150 msec. Plug-in type terminals and various enclosure styles available. Types CLA and CLC, fixed; Types CLF and CLH, resistor adjustable; Type CLB, adjustable knob with reference scale. Size, 1.531″ x 1.406″ x 1.906″ max. except CLB style, 1.531″ x 1.406″ x 2.782″ max. including knob. Weight, 3.5 oz.

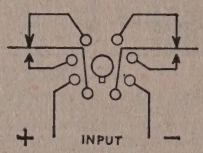
CUB SERIES KNOB-ADJUSTABLE RELAYS

Designed for delay on operate, DPDT relay and solid state delay circuit are assembled in a slightly taller case than other CU types. Timing intervals adjustable over 1 to 10 and 1 to 120 seconds. Repeatability ±3%. For 120 VAC operation. Size, 1.531″ x 1.406″ x 2.782″ max. including knob. Weight, 3.5 oz.

CUB51-70010	A	1 to 10	120 VAC	None	$18.75
CUB51-70120	A	1 to 120	120 VAC	None	20.55

*Value of external resistor required for maximum delay time.

CR SERIES
KNOB-ADJUSTABLE RECYCLE TIMER



CR series recycle timer has two independent control knobs for adjusting On and Off delays from 1.8 to 180 seconds. The recycling sequence is initiated by applying power to the terminals. **Size:** 2.375″ x 3.50″ x 1.750″.

P&B Number	Time Delay Seconds	Input Voltage	Net Each, Lots of 1-9	10-24	25-49	50-99

CS SERIES SOLID STATE VOLTAGE SENSORS

CS series voltage sensor is designed to energize and de-energize its internal relay at predetermined voltages. Desired values are either fixed or knob adjustable. Fixed sensors are factory set—cannot be changed; knob-adjustable versions allow the levels to be varied over a selected range. Voltage sensors consist of sensing circuit that turns on or off a solid state switch, energizing or de-energizing the internal relay. Both the solid state switch and DPDT relay are enclosed in molded nylon dust cover. Reverse polarity protection on DC types. Octal mounting plug. **Load Switching Relay:** 2 Form C (DPDT) rated 10 amps at 28 VDC resistive or 120 VAC resistive. **Temp. Range:** −10° C to +55° C. **Temp. Coefficient:** 0.16%/° C max. **Repeatability:** ±1% max. **Size:** 2.406″ x 1.781″ x 4.035″ (including knob and mounting plug). Weight, 8 oz. approx.

R12 SERIES VARIABLE TIME DELAY RELAYS

Small size DPDT with 5 amp contacts and silicon transistor circuitry. Delay time .1 to 120 seconds in three ranges; no false operation. Critical timing capacitor meets military specifications; high resolution 15-turn potentiometer. Size, 1.508″ x .735″ x 1.187″.

R13, 14, 15 & 16 FIXED AND ADJUSTABLE RELAYS

R13 SERIES
Fixed time delay relays available in 6 timing ranges from 1 to 300 seconds. Operate with 180 mW of DC power. Designed for delay on operate and fast recycle time. Shock rated at 10 g. operating and 25 g. mechanical.

R14 SERIES
Fixed or externally adjustable time delay relay available in 6 timing ranges from 0.25 to 600 seconds. The coil is polarity protected. Shock rated at 15 g. operating and 30 g. mechanical. R14A is an interval timer.

R15 SERIES
AC operated, fixed or externally adjustable time delay relay available in five timing ranges from 0.5 to 300 seconds. Shock rated at 15 g. operating and 30 g. mechanical. R15A is an interval timer.

R16 SERIES
Available in the timing range from 2 to 30 seconds. Relay and timing components are mounted on glass epoxy circuit board having quick-connect termination.

JR AND JRM SERIES DRY REED RELAYS

Fast response, reliable performance, high sensitivity and long life are characteristic of JR standard and JRM miniature relays. Specially suited for data processing applications, computer equipment, logic circuitry and various other sophisticated control circuits. Both JR and JRM relays have reed switches with either Form A (SPST-NO) or Form C (SPDT) contact configuration. Biasing with a permanent magnet changes Form A to a Form B (SPST-NC); arrangement requires that coil polarity is observed. Combining one Form A with one Form B results in a single Form C (SPDT) break-before-make. A "true" Form C (SPDT) uses a reed switch with two stationary and one movable contact (movable contact is normally closed until the coil is energized). **Size:** 2.718" l. x 0.656" h. max. (JR); 1.125" l. x 0.468" h. max. (JRM).

MINIATURE OPEN STYLE DRY REED RELAYS

JRC SERIES

PC terminals arranged on 0.100" x 1.00" grid layout. Rhodium contacts rated 10 watts max.; 0.5 amp max. and 125 V max. for DC resistive loads. Operate speed of 1 msec typ. including bounce for pick-up; 0.5 msec for drop-out. Contact protection is recommended to assure long operating life. **Size:** 1.14" l. x .360" h. max. Wt., 0.3 to 1.0 oz. approx.

JRL SERIES DRY REED LATCHING RELAYS

Reliable bi-stable relays designed for memory work. Single-wound coils switch contacts on polarity reversal. Needs no coil current to maintain contact in either position. Can be mounted on PC boards in any position; not position sensitive. **Contact Arrangement:** 1 Form A and 2 Form A rated 15 watts resistive. **Operate Time:** 1.0 msec at 25° C including bounce. **Size:** Same as JR standard series above. Weight, same as JR standard series above.

JM SERIES MERCURY-WETTED CONTACT RELAYS

JM1 119 11

JMS 5040 62

Reservoir of mercury and contact assembly are hermetically sealed under high pressure hydrogen atmosphere to do away with contact chatter and bounce. Make or break is positive every time. Capsule used in JMF, JMF2 (2 capsules), JML and JMS relays has a SPDT, break-before-make (Form C), non-bridging contact arrangement. Each capsule used in JM1–JM4, JMD and JMP relays has a SPDT, make-before-break (Form D), bridging contact arrangement. JMF, JMF2, JML, JMP and JMS series achieve a high rate of sensitivity by factory-adjusted magnet biasing. Upright mounting required, but deviation from upright up to 30° causes only minor deviation in operating characteristics. **Contact Ratings:** JMF, JMF2, JML and JMS 500 volts max. and 2 amps max., with contact protection unless in a low level circuit. Details of a simple protection circuit consisting of resistor and capacitor in series are included with each relay. JM1 thru JM4, JMD and JMP 500 volts max. and 5 amps max., 250 VA max. Octal style mounting except Fig. 41, 14-pin miniature plug; JMD, JMF, JMF2 and JMS are designed for printed circuit board mounting on 0.200″ grid spacing. Sizes given are overall.

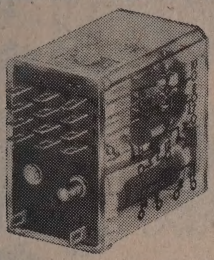
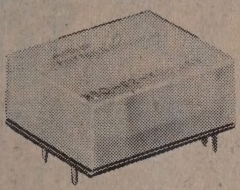
GENERAL PURPOSE RELAYS

R10S Series relays are very sensitive, current-actuated DC relays for direct drive by CMOS, DTL, TTL, ECL, and HTL. U.L. and CSA approvals are pending. Available in solder (E1) and PC board (E2) terminations. Weight is .8 to 1.4 oz.



R10-E6 Series is a standard R10-E1 (solder terminals) fitted with a bracket on the narrow side of the case for chassis mounting. The bracket has one #6-32 x .375″ stud and one locating tab on .437″ centers.

R50-Y1 and Y2 Series relays seat .425″ high for use on printed-circuit boards spaced as close as 0.6″ center-to-center. Pickup is at approximately 75% of rated coil voltage; dropout is 5% minimum. All models have a molded polyester case and gold-plated PC terminals spaced on a .1″ grid.



CG Series: Relays combined with a CMOS integrated circuit for delay on operate or interval on. Relay has DPDT contacts rated 10A at 120VAC or 5A at 240VAC resistive. Knob adjustable delay time provided by the IC network is not normally affected by voltage transients encountered in industrial applications. Contacts will not transfer if timing cycle is momentarily interrupted. Weight is approximately 8 oz. Measures 1.781″ x 2.406″ x 2.937″ h.

PRD Series relays are interchangeable with the PR Series relays. Same size and same mounting holes. Improved design allows use of power screwdrivers on terminals. All models are U.L. listed—CSA listing is pending. Two .188″ dia. mounting holes on 1.875″ centers. PRDA11AYA has auxiliary miniature snap-action switch with SPDT silver contacts rated 5A at 120VAC. See P&B accessory page for metal dust cover.

SENSITIVE RELAYS

PW Series: Precision, lightweight, hermetically sealed relay for aircraft, missile applications. Withstand 10G vibration to 500 Hz. Rated 2 amps. Sensitivity, 180 mW for voltage actuated, 40 mW for current actuated models. Standard 7-pin miniature tube base mounting. Size, $1^{11}/_{16}$" x .765" dia. Weight, 1 oz.

RS Series: Small, low cost, sensitive relay for radio-sonde, light dimmer and model uses. Voltage and current actuated (60 mW sensitivity) models. Two 4-40 mtg. holes on ¾" x ⅝" diagonal centers. Bar palladium contacts rated 2 amps. Size, 1" x $1^{11}/_{16}$" x $1^{5}/_{16}$". Weight, 1½ oz.

SS Series: Ultra-sensitive, precision relay has dual series-connected coils with balanced armature on needle-point bearings for low energy circuits. May be used as a differential relay by connecting the two coils in separate circuits. Sensitivity 10 mW. Silver contacts rated 2 amps. Two 6-32 mtg. holes on $2^{1}/_{8}$" centers. Size, $1^{5}/_{16}$" x 1¾" x $1^{11}/_{16}$". Weight, 3½ oz.

KCP Series: Low cost relay in clear polycarbonate case. Gold-flashed, silver contacts rated 2 amps. Sensitivity 125 mW for SP, 250 mW for DP and 375 mW for 3P models. Standard octal plug-in mount: 8-pin for KCP5 and KCP11; 11-pin for KCP14. Size, $1^{13}/_{32}$" x $1^{13}/_{32}$" x 2". Weight, 3 oz.

LB Series: Top performance, long life at low cost. Factory adjusted coil for minimum current. Silver contacts rated 5 amps. Sensitivity, 200 mW. Two 3/16" mtg. holes on $2^{7}/_{32}$" centers. Size, 1¼" x $2^{21}/_{32}$" x $1^{3}/_{8}$". Weight, 2 oz.

LM Series: Medium cost but high quality. Sensitivity 100 mW for SP, 200 mW for DP models. Tail spring adjusting screw for pull-in. Gold-flash silver contacts rated 5 amps. Two 6-32 mtg. holes on $1^{13}/_{16}$" centers. Size, $2^{3}/_{16}$" x $2^{3}/_{16}$" x 2¼". Weight, 5 oz.

AB Series: For appliance and general purpose usage where rugged construction, long life and quiet operation are required. UL recognized and CSA listed. Silver contacts rated 10 amps. Two 8-32 mtg. holes on 1¼" ctrs. Size, $1^{15}/_{16}$" x 3" x $1^{13}/_{32}$". Weight, 5 oz.

ABC Series: Medium duty relay. With dust cover; terminals fit snap-on connectors or may be used in printed circuits using dip soldering; snap-on screw adapters are supplied. UL recognized and CSA listed. Silver contacts rated 10 amps. One 8-32 mtg. stud, ⅜" lg. and locating tab on 9/16" centers. Size, $1^{15}/_{32}$" x $2^{25}/_{32}$" x $2^{3}/_{32}$", less terminals. Weight, 7 oz.

MR Series: Medium duty relay handles small motors, transmitters, etc. Silver contacts rated 8 amps, except SPST-NO-DM models rated 10 amps. Two 5/32" dia. holes on 2¼" ctrs. for MR3 and MR11; on 2⅝" ctrs. for MR5 and MR14. Size, $2^{31}/_{32}$" x 2" x $2^{3}/_{16}$". Weight, 4 oz.

PR Series: Heavy duty with industrial screw terminals. Carry UL (File #E22575) and CSA listing; PRA11AYA, UL Component Program recognition. Silver contacts rated 25 amps except 7AG and 11AG rated 30 amps. PRA11AYA has auxiliary snap-action switch with SPDT silver contacts rated 5 amps at 120 VAC; will not fit inside cover. Use only metal dust cover #35D013. Two .188" dia. mtg. holes on 1.875" centers. Size, 2.531" x 3.375" x 2.5". Wt., 11 oz. max.

PM Series: Compact, heavy duty 4PDT type for long, dependable polyphase and heavy switching use. Screw terminals staked to phenolic front section. Silver cadmium-oxide contacts rated 25 amps at 240 VAC, 50/60 Hz resistive; 1 hp per movable arm at 120 or 240 VAC, single phase. UL and CSA listed except 480 V. Front key-hole and 2 rear-channel slots for 8-32 screws on 2" x 2½" triangular ctrs. Size, $2^{21}/_{32}$" x $3^{23}/_{64}$" x $2^{23}/_{32}$". Weight, 14 oz.

SPECIAL PURPOSE RELAYS

KB (Open) and KBP (Enclosed) Series: Latching relay with release and trip coils at same voltage. One sets the latch and the other releases. Operates on momentary impulse to either coil. Silver contacts are rated 5 amps; suffix "G" indicates silver-cadmium contacts on movables rated at 10 amps. AC open relays with 5 amp contacts are recognized under UL Component Program and CSA listed. Type **KB** are open relays with two .156" dia. holes on 1.375" centers. Size, 1.812" x 3.22" x 2.13". Wt., 6 oz. **Type KBP** enclosed in polypropylene dust cover with 20-pin octal-type plugs for socket mounting. UL component recognition does not apply. Size, 1.781" x 2.406" x 3.56". Weight, 4 oz.

KM Series: Subminiature relay for use where size and weight are critical factors. Silver contacts rated 2 amps. Solder lug terminals. Has 2-56 tapped hole and locating half-punch for mtg. Size, 1 1/16" x 1 1/8" x 5 3/4". Weight, .58 oz.

KT Series: Antenna switching relay has glass base insulation for minimum RF loss to switch 300-ohm line. Gold-flashed silver contacts rated 5 amps. Single 6-32 mtg. stud. Size, 1 15/16" x 1 3/16" x 1 1/16". Wt., 1 1/2 oz.

KUL Series: Small magnetic latching relay; continuous duty for applications requiring memory stability such as machine tools, process controls, etc. Recognized under UL Component Program and CSA approved. Silver cadmium contacts rated 10 amps at 28 VDC resis. or 120 VAC, 80% PF. Use KU sockets for mtg. Size, 1.406" x 1.531" x 2.156". Weight, 3.4 oz.

PC Series: Single coil impulse latching relay for on-off and current reversal switching on alternate pulses. Gold-flashed silver cadmium oxide contacts rated 5.0 amps. Two 5/32" mtg. holes on 2 5/8" centers. Size, 2 3/64" x 2 1/16" x 2 31/32". Weight, 5 oz.

SERIES KHP, KHS (SEALED) AND KHU (ENCLOSED) TYPES

Small, rugged 4PDT, AC and DC relays. KHU, clear polycarbonate and KHP has nylon dust cover; KHS is hermetically sealed in metal enclosure. For data processing and computer applications. Contacts available: Suffix **11** denotes gold-flashed silver rated 3 amps, 30 VDC or 120 VAC, resistive; suffix **12** denotes silver-cadmium oxide rated 3 amps; suffix **13** gold alloy contacts for low level to 1.0 amp applications; suffix **16** gold overlay on silver, bifurcated contacts rated 1 amp at 30 VDC, resistive, or 120 VAC. Mount by solder terminals and 3-48 stud 5/16" lg. Adaptable to sockets (listed on another page). Type KHU is recognized under UL Component Program. KHS relays should not have frames grounded without consulting P & B.

See another P & B page for accessories.

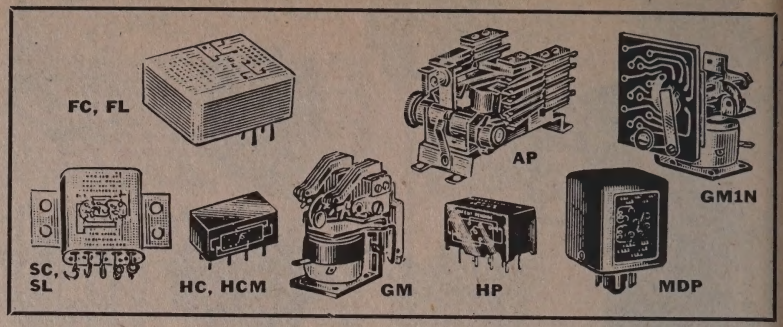
HIGH-RELIABILITY MINIATURE RELAYS

Temperature Range, −65° C to +125° C.

FC Series: Conventional, miniature relay lies flat on printed circuit board. Takes 150G shock, 400G linear acceleration, and 30G vibration to 2000 Hz. Hermetically welded; bifurcated contacts. Plug-in terminals on 0.2″ grid. Meets MIL-R-5757, and also MSFC-SPEC-339. Size, 1.1″ x .925″ x .485″ h. Contacts, 3 amps. Weight, .75 oz.

FL Series: Dual coil, miniature latching type. Same as above except in operation. Each coil pulses alternately (per polarity), or from a reversing (polarized) source connecting the coils in series. Stays latched without coil power to reduce drain.

SC Series: Miniature permanent magnet relay has high shock and vibration resistance. Features single coil action and conforms to standard min. coil operation except polarized connections because of magnetic circuit. Positive terminal marked with red dot. Contacts rated at 2 amps. Size, .795″ x .359″ x 1.1″. Mounting: —D, plug-in terminals for printed circuit or receptacle; —DA shoulder flanges with two .104″ x .136″ holes on 1.062″ ctrs.; —DB, welded bracket with four .125″ holes on 1.062″ x .281″ ctrs.; —DC, two 4-40 NC-2A threaded studs on .488″ x .220″ diagonal ctrs.; —DD, plain case. All except —D have hook-end solder terminal headers. SCG11D has plug-in terminals on .2″ grid. Wt., ¾ oz.



SL Series: Dual coil, miniature magnetic latching relay for low power, high shock and vibration resistance. Requires connections to both coils; may be connected in series for polar operation, reverse polarity to reset. Operates on 1 watt, 3 msec pulse to either coil. Size, .795″ x .359″ x 1.1″. Mtg. type and dimensions same as SC Series. Contacts rated at 2 amps. Weight, 2 oz.

HC Series: Miniature, non-polarized, non-latching relay hermetically welded in half-size crystal case. High-torque motor structure and bifurcated, gold-plated silver DPDT contacts offer positive performance in low-level applications. Contacts rated dry circuit to 2 amps at 28 VDC resistive. Meets or exceeds applicable sections of MIL-R-5757, and complies with MSFC-SPEC-339. HC11D has plug-in, plain case; HC11DA has hook-end solder terminals and shoulder brackets; HC11DB has hook-end solder terminals and flat mounting plate with two holes. Size (plain case), 0.8″ x 0.4″ sq., seated. Wt., ½ oz.

HCM Series: Military version of HC Series. Meets or exceeds appropriate sections of MIL-R-5757. Designed for hostile environments found in aircraft applications and for ground support equipment. Straight pins or hook solder terminals. Wt., ½ oz. without bracket.

HP Series: Non-polarized, non-latching half-size relay. Same structure, contact material as HC Series but enclosed in high impact dust cover. Terminals on .200″ grid for plug-in or PC board. Ideal for TV cameras, desk-top computers, dictating, etc. DPDT contacts rated low level to 2 amps. Continuous duty coils rated 5 msec operate, 3 msec release max. Size, .49″ x .88″ x .48″ max. Wt., 0.3 oz.

HPS Series: Hermetically sealed version of HP; uses standard HP socket. For reliable performance in logic circuit applications or where prolonged submersion of PC boards in cleaning solvents may be required. Size, .810″ x .410″ x .410″. Wt., ¼ oz.

SPECIAL PURPOSE RELAYS

AP Series: Ratchet, impulse relay for reliability in on-off or reversing action for alternate operations of the control lead. Positive ratchet at all speeds on impulses as short as 60 milliseconds. Intermittent operation only. Silver contacts rated 5 amps. Three ⅛″ mtg. holes on 3⅜″ x 1⅛″ triangular ctrs.; 2⅛″ x 3¾″ x 2¼″; 7 oz.

GM Series: Versatile impulse/sequencing relay for single-coil latching applications. The 2 Form C contact arrangement is switched alternately by cams. Positive switching is by indirect action during drop-out of the armature. Can also be furnished with additional 2 Form C auxiliary contacts, suffix "L", operated directly by the armature. Contacts rated at 3 amps. Available with AC or DC coils. AC version operates on a 50% coil duty cycle (5 min. max.). Mounting: 8-32 tapped core with a locating boss. Size, 1.437″ x 2.03″ x 2.07″ max. Wt., with aux contacts, 4¾ oz.; without, 4 oz.

GM1N Series: Relays employing basic structure of GM Series with unidirectional printed circuit boards in choice of 10 or 12 steps. Board is attached to ratchet shaft extension. Movable contact arm advances one position each time armature drops out. Contacts rated at .25 amp. Size, 1.875″ x 2″ x 2.312″. Wt., approx. 4 oz.

See another P & B page for accessories

T10 SERIES PC RELAY

Printed circuit board mounting on 0.5″ centers. Has permissive-made contacts for low bounce and long life. Operate and release times are 15ms, including bounce. Size: 1.52″ x 1.46″ x .375″ height. Weight: 1 oz. approx.

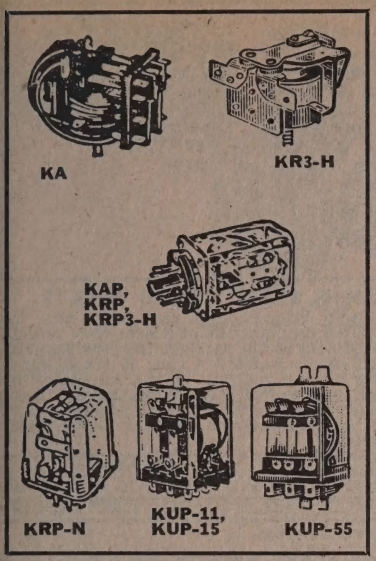
*At 30 VDC, resistive.



KA and KAP Series: Small, low cost, highly efficient relay for light power loads. All KA and KAP relays with "Y" suffix bear CSA listing and carry UL Component Recognition (File No. E22575). Continuous duty. Mechanical life 10 million operations. Contacts: Suffix **Y**, movable gold-flashed silver; stationary, silver overlay; rated 5 amps. Suffix **G**, movable contacts silver-cadmium-oxide rated 10 amps. Size and Mounting: KA, 1 15/32" x 1 11/16" x 1 27/32" with 6-32 thd. stud and locating tab on 7/16" ctrs.; wt., 2 oz. KAP, enclosed in clear polycarbonate dust cover 1 17/32" x 1 7/16" x 2 9/32" with 8- or 11-pin plug terminals; wt., 3 oz.

KR3-H Series: Small size, heavy-duty relay. Open only, SPST-NO-DM contacts. Movable carrier has twin silver-cadmium-oxide contacts rated 20 A, 120 VAC 60 Hz resis. or 28 VDC; 1 hp at 120/240 V 60 Hz. Terminals: 1/4" quick connect or solder for contacts; coil, solder only. One 6-32 mtg. stud on 7/16" ctr. Size, 1 39/64" x 1 43/64" x 1 33/64"; seated, 1 7/32" h. Weight, 2 oz.

KRP3-H Series: Same electrical specifications as KR3-H, but enclosed in clear, polycarbonate dust cover with octal plug-in base. Size, 1 17/32" x 1 7/16" x 2 9/32" h. above plug. Weight, approx. 3 oz.

KRP Series: Multi-contact arrangements in clear polycarbonate dust cover. Mounts by standard octal 8-pin plug on KRP5 and KRP11 models; 11-pin on KRP14. Gold-flashed silver contacts rated 5 amps. Size, 1 13/32" x 1 13/32" x 2" above plug. Wt., 3 oz. Suffix **G** means silver-cadmium oxide contacts on movables, rated 10 amps.

KRP-N Indicator Lamp Relay: General purpose, incorporating a lamp to indicate current or voltage in power circuit. Clear polycarbonate dust cover. Std. octal plug. Silver cadmium-oxide contacts, rated at 10 amps. Size, 1 13/32" x 1 13/32" x 2". Wt., 3 oz.

KUP Series with Suffix 15: Reliable 10-amp relay for industrial control applications. Has .187" quick connect/solder-type terminals. Enclosed in clear polycarbonate dust cover. Silver cadmium-oxide contacts assure long life. Continuous operation. Max. size, 1.531" x 1.406" x 1.906" h. seated; terminals, .316" lg.

KUP Series with Suffix 11: Same as 15 Series except silver contacts rated 5 amps.

KUP Series with Suffix 55: Same as 15 Series but has slotted flange case for direct-to-chassis mounting. Identical electrically and mechanically, except not suitable for socket mounting. Rated at 10 amps. Has .187" quick connect/solder-type terminals; .156" wide slots are on 2.90" max. mounting centers. Wt., 3 oz. All KUP Series are recognized under UL Component Program (File No. E22575).

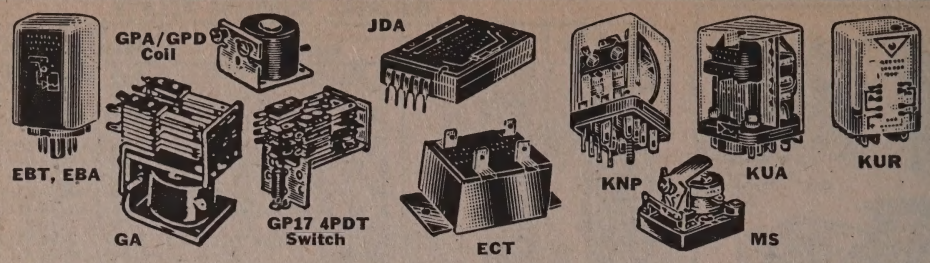
AMF | POTTER & BRUMFIELD Relays



GENERAL PURPOSE RELAYS

GA Series: Multiple-contact, voltage switching relay designed for industrial control applications. Silver contacts rated 5 A; tinned, pierced solder terminals. Mounts on 8-32 tapped core with locating boss. Size, 1.063″ x 1.719″ x 1.781″. Weight, 3½ oz.

KNP Series: Small relay designed for economizing chassis space. Recognized under UL Component Program and CSA listing for 1/10 hp at 120 VAC; 3 A at 32 VDC resistive or 3 A at 240 VAC, 80% PF. Fine silver cross bar contacts. Terminals are .110″ quick-connect/solder; sockets available separately. May be chassis mounted by 3-48 stud. In clear polycarbonate dust cover. Size, 0.980″ x 1.000″ x 1.450″ seated. Weight, 1.4 oz. approximate.

KUMP Series relays are U.L. recognized, and CSA listing is pending. The KUMP relays are identical to the KUP Series except that the contacts are silver-cadmium-oxide rated 15 A at 28 VDC or 277 VAC, 80% PF; ¼ HP, 120 VAC; ⅓ HP., 240 VAC.

POWER RELAYS

GF Series: Medium duty for industrial control applications. Similar to GA series except long contact arms have silver contacts rated 10 A at 120 VAC or 28 VDC resistive; excellent wipe or self-cleaning action. Tinned, pierced solder terminals; 8-32 tapped core with locating boss mtg. Size, 1.016″ x 2.531″ x 2.093″ max. Weight, 4.75 oz.

MOTOR STARTING

MS Series: For starting capacitor start, induction-run motors. Operates on back EMF of start winding. Armature gap can be altered to change pick-up. Recognized under UL Component Program. Two .156″ dia. mounting holes on 1.563″ centers. Contacts rated ¾ hp, fine silver; 3 hp, silver cadmium. Size, 2.063″ x 3.063″ x 2.125″. Weight, 5 oz. maximum.

SPECIAL PURPOSE

GP Series: Separate AC and DC coils to match with 2PDT or 4PDT switches. Silver contacts rated 5 amps.

EBT SERIES SOLID STATE HYBRID RELAYS

Combines the input/output isolation of a reed relay with the inrush switching capabilities and long life of a solid state switch. EBT relays switch 7 A, 60 Hz at 25° ambient temperature with nominal load voltage of 120 V. Rated 5 A rms, 60 Hz at 55° C ambient. Min. operating current, 200 mA, 60 Hz. Expected life, greater than 10 million bounce-free operations. Operate time, 2 msec max.; release time, 10 msec max. Typical "closed contact" voltage drop, 1.1 V. Octal terminals for standard 8-pin socket. Weight, approximately 5.5 oz.

P & B No.*	Nominal Voltage	Net Each, Lots of 1-9	10-24	25-49	50-99
EBT1DA52	12, 24 VDC	$17.50	$16.63	$15.75	$14.00

*Specify coil voltage when ordering.

EBA SOLID STATE HYBRID RELAY

Has all the output switching characteristics, package and mounting of EBT, but includes a control signal amplifier. Designed to operate from current source output mode of DTL and TTL logic circuits; 60 μW signal will switch a 7 A load. Must operate voltage, 2.4 VDC at approx. 25 μA with 24 VDC supply. Max. input, 30 VDC or 1 mA; releases when voltage is reduced to .5 VDC or less. Control voltage change rate must exceed 1 V/msec. Polarity protection provided for control input and supply voltage terminals.

P & B No.	Nominal Voltage	Operate Time	Net Each, Lots of 1-9	10-24	25-49	50-99
EBA1GA52	24 VDC	2 msec	$24.60	$23.37	$22.14	$19.68

ECT SOLID STATE HYBRID RELAYS

ECT series is a medium power triac controlled and isolated by a reed relay. Input power is 290 mW for a 120 VAC, 50/60 Hz line. Expected life is in excess of 10 million operations. Operate time is 2 msec max.; release time, 10 msec max. at 25° C. **Size:** 2.64″ x 1.50″ x 1.52″.

P & B Number	Contacts	Nom. Volts	Net Each, Lots of 1-9	10-24	25-49	50-99

ECT1DB44	SPST-NO	24	14.80	14.06	13.32	11.84

JDA AMPLIFIER-DRIVEN JDT REED RELAY

Sensitive reed relay features same design as JDT Series. Control signal is amplified by solid state driver circuit with 100 μW sensitivity. Control signals between 24 VDC and 30 VDC will operate JDA when specified supply voltage is applied. Releases when control signal is reduced to .5 VDC or less. Designed for control voltage change rate exceeding 1 V/msec. Contacts rated 10 watts max. resistive per contact, 50 VDC or .5 amp max. Terminals spaced on .1″ grid centers. Weight, 4 oz., approximate.

P & B No.	Contacts	Nominal Voltage	Net Each, Lots of 1-9	10-24	25-49	50-99
JDA7GB1	DPDT-NO	24 VDC	$11.65	$11.07	$10.49	$9.32

KUA SOLID STATE AMPLIFIER-DRIVEN RELAY

Amplifier driven KUP relay operates from low power signals associated with IC circuits. Input sensitivity of 60 μW. Control signal of 24 VDC at 25 μA approx. operates relay at specified voltage. Control signal 30 VDC or 1 mA max. Must release control voltage 0.5 VDC at specified supply voltage. Polarity protection. Gold-flashed fine silver contacts switch 5 A at 28 VDC resis. or 120 V, 60 Hz, 80% PF. Clear polycarbonate case; .187″ quick-connect/solder terminals fit KU sockets. Weight, 3.5 oz. approx.

P & B No.	Contacts	Nominal Voltage	Net Each, Lots of 1-9	10-24	25-49	50-99
KUA5G11	SPDT	24 VDC	$14.45	$13.73	$13.01	$11.56
KUA11G11	DPDT	24 VDC	14.90	14.16	13.41	11.92

KUR SERIES SOLID STATE HYBRID RELAYS

KUR direct action impulse relays for applications requiring on-off operation or alternate energizing of two loads. Solid state flip-flop circuit precedes permanent magnet latching relay; allows relay to remain latched during complete power loss. Requires 25 msec min. pulse width; up to 1200 pulses per minute repetition rate. Gold-flashed fine silver contacts rated 5 amps at 28 VDC or 120 VAC, 80% PF. Terminals are .187″ quick-connect/solder type and fit standard KU sockets. Yellow plastic cover. Weight, 3½ oz. approx.

KUR11D11	DPDT	24 VDC	$21.80	$20.71	$19.62	$16.35

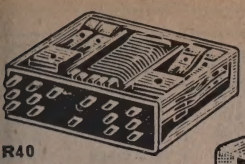
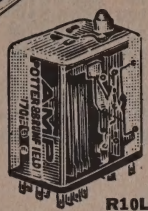
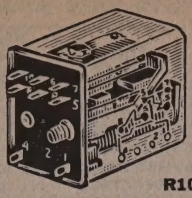
AMF | POTTER & BRUMFIELD Relays



R40



R10L



R10

R10 Series: Dependable and versatile, a fine choice for switching loads from dry circuit to 5 amps. Sensitivities to 20 mW/pole available. Operating temp., −55° C to +72° C. Transparent enclosure. Three styles of contacts available: UL File No. E42810. Type R10-**E1** has plug-in solder terminals and mounting stud (sockets optional, see P&B Accessory Page); R10-**E2** has printed circuit terminals, no stud mounting. Final suffix signifies coil ohms.
R10L Series: Has light emitting diode (LED) indicator; produces highly visible red light when relay coil is energized. Other operating characteristics same as standard R10 Series.
R40 Series Slimline® 4PDT Relays: For PC boards; allows .6″ board mtg. centers. Many contacts available with wide range of coil voltages; only .43″ thick for low profile designs. Switching range from true dry circuit to 5 A; pull-in power, 720 mW. Size, 1.20″ x 1.40″ x .43″. Final suffix signifies coil ohms. Type R40-**E1** has solder terminals or plug-in socket mtg.; R40-**E2** has PC pin for vertical mtg. less socket; R40-**E3** has PC pins for flat mtg. less socket.
R10 and R40 Series recognized under UL Component Program and CSA Component Program (File 32074) except R10-E1-X8-115VAC.

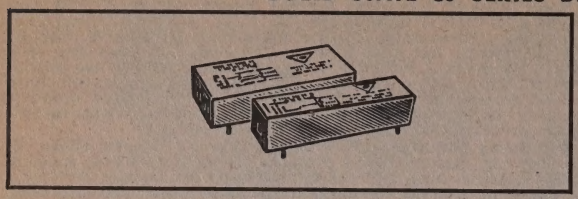
SOLID STATE CJ SERIES DRY REED TIME DELAY RELAYS



CJ Series time delay dry reed relays combine the basic timing characteristics of time delay relays with the long life and performance of miniature dry reed relays. **CJH** is external resistor-adjustable delay on operate. Pin terminations are for PC board mounting. **Time Delay Periods:** Choice of 0.1 to 10 sec, or 1 to 120 sec, adjustable to ±10% at nominal voltage at 25° C ambient temperature. **Operating Temperature:** −10° C to +55° C. **Contact Forms:** Up to 1C (A+B) in three cavities. **Size:** 2.718″ max. x 0.688″ to 1.094″ x 0.710″. Weight, 1½ oz. approx.

P&B Number	Time Delay, Seconds	Input Voltage	External Resistor Ohms*	Net Each 1-9*
CJH01-20010	0.1 to 10	12 VDC	750K	$22.75
CJH01-20120	1 to 120	12 VDC	1.8 megs	25.95
CJH01-30010	0.1 to 10	24 VDC	750K	22.75
CJH01-30120	1 to 120	24 VDC	1.8 megs	25.95
CJH03-20010	0.1 to 10	12 VDC	750K	24.95
CJH03-30010	0.1 to 10	24 VDC	750K	24.95

*Value of external resistor required for maximum delay time.

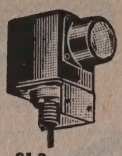
SIGMA PHOTOCONTROL SYSTEMS, OPTOELECTRONIC COMPONENTS

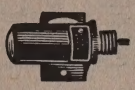
8P3, 8P8

8R



8L3

8P7



8P4

301R

301T1

SERIES 8 PHOTOCONTROL SYSTEMS

Low cost, compact systems for light-beam control of moving objects. Range from 12 in. to 25 ft.; speeds up to 1200 operations per minute. Integral and remote systems. Replaceable incandescent lamps operate at low voltage for maximum life.

INTEGRAL 2-PART SYSTEMS—SPDT AND DPDT

12-FT. RANGE—120 VAC—60 Hz

Receivers 8P8, 8P9, 8P10 High Speed Types and 8P3, 8P5, 8P6 General Purpose Types: Temperature range, +32° F to +112° F. Housing, NEMA Types 1 and 12. Mounting: 8P3, 8P8: Bracket, ½" conduit, AWG #18 leads 19" max.; 8P6 and 8P10: Bracket and 5-pin plug; 8P5 and 8P9: Bracket and 8-pin octal plug. Size, 1²⁹⁄₃₂" w. x 3⁷⁄₁₆" d. x 2½" h. Weight: 8P3, 8P8, 13 oz.; others, 9 oz.

Receivers 8R Miniature, Low-Cost Plug-In Types: Temperature range, −40° to +140° F. Housing, NEMA Types 1 and 12. Mounting, 5-pin plug. Min. Operations: Electrical, 1 million; mechanical, 1 billion. Requires 5 ft-candle to operate; 8RCO1A releases at 0.1 ft-candle, 8RCO2A at 0.5 ft-candle. 8RCO1A U/L and CSA Listed, 8RCO2A for high ambient light conditions. Size, 1⁹⁄₁₆" sq. x 2³²⁄₃₂" h. Wt., 3 oz.

Light Source 8L3: Used with all types. Lamp life, 10,000 hours. Mounting, bracket, ½" conduit, AWG #18 leads 19" max. Size. 1²⁹⁄₃₂" w. x 3⁷⁄₁₆" d. x 2½" h. Weight, 13 oz.

8L3-230	Light Source			28.40

*Source voltage 120 VAC, except -240 types (240 VAC). †DPDT; all others SPDT.

REMOTE 3-PART SYSTEMS—DPDT

Subminiature Receiver 8P7 and Light Source 8L7: Smallest units available. Range, 12"; 600 operations per minute. Lamp life, 4,000 hours. Polycarbonate housing. Mounting: Bracket, leads #22 AWG 10" min. Size, 5⁄16" dia. x 1½" l. Weight: 8P7, .32 oz., 8L7, .26 oz.

Miniature Receiver 8P4 and Light Source 8L4: Adjustable focus light source. Operates 25 feet from 5.5 V amplifier terminal with 4,000-hr. lamp life; 15 feet from 4.5 V amplifier terminal with 40,000-hr. lamp life. Operations per minute, 600. Black anodized aluminum housing. Mounting: Bracket, ⅜" conduit, leads #18 AWG 10" min. Size: 8P4, 1" dia. x 2⁷⁄₁₆" l.; 8L4, 1" dia. x 2¹⁄₁₆" l. Weight: 8P4, 2.9 oz.; 8L4, 2.7 oz.

Amplifiers 8A and 8A3: For use with 8P7–8L7 and 8P4–8L4. Solid state circuitry. DPDT output contacts. Temperature range, +32° F to +122° F. Weight, 2 lbs. **No. 8A** amplifier has plug-in replaceable relay rated for 10 million mechanical operations; contact rating, 5 amps at 28 VDC or 120/240 VAC. **No. 8A3** time delay amplifier has variable delay, 50 milliseconds to 20 seconds with ±10% repeatability; contact rating, 10 amps at 28 VDC or 120 VAC, 5 amps at 240 VAC.

Housing AT373-1: For use with 8A or 8A3 amplifier. JIC, oil-tight, weatherproof. Size, 10¹⁵⁄₁₆" w. x 4¼" d. x 11½" h. Weight, 9¼ lbs.

OPTO-ISOLATOR DEVICES

DATACEL® SERIES 301 SWITCHING DEVICES

1-, 2-, 4-POLE

Solid state switching for data processing input-output, automatic test and machine control equipment; electronic instrumentation; telephone switching; digital circuitry. Switching functions: Isolation interface, logic, data sampling, noiseless potentiometer, low signal level, automatic feedback. Input-output circuit isolation. Miniature lamp coupled optically to 1, 2 or 4 photoconductive cells, each functioning as bilateral switch. Input and output either AC or DC. Off or dark resistance, 10 megohms, min., except 301T2-6B1 and 301T2-12B1, 20 megohms min.; steady state low as 200 ohms; switching ratios in order of 10^5. Printed circuit mounting. Socket conversion to solder terminals. **Output Rating:** 250 V each cell, except 301T1-2A2, 100 V. **Temperature Range:** −40° C to +50° C. **Size:** 301R, 1" w. x ½" d. x ½" h., less terminals; 301T, 1⅜" w. x ⅜" d. x ¼" h.

REED RELAYS

SERIES 191 FORM A: SPST, DPST; FORM C: SPDT

Standard 14 pin, dual in-line packaged reed relays feature fast response, reliable performance, high sensitivity and isolation resistance. Best suited for test and computer peripheral equipment. **Operating Time:** 1.0 msec max. at rated voltage. **Isolation Resistance:** 10^9 ohms min. Internal diode, coil suppression, electromagnetic and electrostatic shielding optional.

OPTIONS

Diode Optional—For any of above relays. Add to net $0.55
Electrostatic Shielding for above relays. Add to net 55

SERIES 193

Choice of 20 combinations of contacts (SPST thru 6PST, SPDT thru 4PDT) in 4 standard case sizes. Form A capsules for single throw switching and patented Form C for double throw switching. Printed circuit type pin contacts are on 1.000″ x 0.100″ PC grid spacing. All cased relays are magnetically shielded for minimum interaction and housed in a molded plastic case. All units have standoffs. **Contact Rating:** 0.5 amp.

SERIES 194

Choice of 14 combinations of contacts (SPST thru 4PDT) in 3 standard case sizes. Meets MIL-R-5757/29 specifications. Form A for single throw switching and patented Form C for double throw switching. Printed circuit type pin contacts are .030″ in dia. and are on standard .100″ grid spacing. Relays are electrostatically and magnetically shielded to minimize the possibility of interaction or latching. Cases are made of tin-dipped steel. **Nom. Coil Voltage:** 26.5 VDC. **Contact Rating:** 0.5 amp.

SERIES 197

Pico size reed relay with straight terminal pins on standard 0.700″ x 0.100″ grid spacing for printed circuit board mounting. Permits use with high density IC packaging. Five volt versions are compatible with DTL and TTL gates. **Pick-up Coil Power:** 32 or 80 mW. **Min. Gap Breakdown Voltage:** 200 VDC.

MAGNETIC REED SWITCHES

Highly adaptable devices for control of low-power electric circuits. Faster than mechanically operated miniature snap-acting switches and less costly than solid-state switches. Highly sensitive and immune to contamination of contacts. **Min. Gap Breakdown Voltage:** 200 VDC. **Initial Contact Resistance:** 0.10 ohm max.

TIME DELAY RELAYS

SERIES 222 AC AND DC—DPDT

Solid state time delay relay with timing intervals from 1 to 120 seconds. Available in fixed time delay on operate, resistor adjustable and knob adjustable in either AC or DC. For use in automated and semi-automated industrial applications. **Life Rated:** 100,000 operations, min. electrical life; 10,000,000 operations, min. mechanical life. Reset time, 150 milliseconds, nom. Recycle time, 150 milliseconds, nom. **Operating Temperature Range:** +14° F to +122° F.

SENSITIVE RELAYS

SERIES 5 SPDT HIGH-SENSITIVITY DC RELAYS

An exceptionally versatile, rugged relay; highly sensitive, precise, stable. Unusually high contact forces at inputs as low as 1 mW (adjustment SS; 5 mW, S), gradually changing or on-off. Useful for overload-underload detection. Reacts without amplification to minute variations from normal. Withstands heavy voltage or current 30-to-1 overloads. Contact ratings, S, 1 amp; SS, .25 amp; both 28 VDC/120 VAC resistive. All types are UL and CSA Listed. Temperature range: S, −4° to +158° F; SS, +50° to +140° F. **5F:** Unenclosed, screw mounting, solder terminals. Size, 1⅜″ w. x 1¾″ d. x 1½″ h. Weight, 4¼ oz. **5JO:** Hermetically sealed; 8-pin plug. Size, 1⅝″ sq. x 2⅝″ h. Weight, 7¼ oz. **5R:** Dust cover; 5-pin plug, 5RO, 8-pin. Size, 1⅞″ sq. x 2³⁄₃₂″ h. Wt., 5¾ oz.

SERIES 41 SPDT INDUSTRIAL AC AND DC RELAYS

Rugged, versatile industrial relay. One-billion-operation mechanical life. Balanced design for coil overload capacity 4-6 times rated input; long contact life. Operates from on-off AC or DC signals, gradually changing DC signals. Pickup power: Adjustment S: 40 mW; ACS: .2 VA; ACG: .4 VA. Contact rating: ACG, 5 amps at 28 VDC/120 VAC; S, ACS: 2 amps. Temperature range, −67° to +185° F except plastic covers, to +158° F. All open and dust-covered types are UL and CSA Listed. **41F, 41FZ:** Unenclosed, screw mounting, solder terminals. Size, 1¹⁷⁄₆₄″ w. x 2³⁄₃₂″ d. x 1⁷⁄₁₆″ h. **41RO, 41ROZ:** Dust cover, 8-pin octal plug. Size, 1²¹⁄₆₄″ sq. x 2¹⁄₁₆″ h. **41RO6:** Plastic dust cover, 8-pin octal plug. Size, 1²³⁄₆₄″ sq. x 2⁷⁄₆₄″ h. **41JOZ:** Hermetically sealed, 8-pin octal plug. Size, 1⅝″ sq. x 2⅝″ h. **41R, 41RZ:** Dust cover, 5-pin plug. Size, 1³¹⁄₆₄″ sq. x 1²⁹⁄₃₂″ h. Weights: Enclosed, 5¼ oz. max.; unenclosed, 2½ oz.

SERIES 4 SPDT PLATE CIRCUIT DC RELAYS

Stable, precise, low cost. For vacuum tube and transistor drives, applications requiring high dropout or narrow differential, and operation from gradually changing or on-off signals. Ideal for circuits where energizing current does not drop to zero. Pickup power, 20 mW. Contact rating, 2 amps at 28 VDC/120 VAC resistive. Temperature range, +32° to +122° F. **4F:** Unenclosed, screw mounting, solder terminals. Size, 1¾″ w. x 1½″ d. x 1¹⁵⁄₃₂″ h. Weight, 2¼ oz. **4R:** UL and CSA Listed. Dust cover, 5-pin plug. SERIES 42 DPDT AC AND DC RELAYS

For general-purpose applications from alarm and control systems to demand meters and timing circuits. Combines sensitivity from 100 mW with rugged design for 1 billion operation mechanical life (1 million under load). Low power minimizes coil load in circuits with limited load-handling ability. Excellent stability, high circuit isolation; coil overload capacity 4 to 6 times rated input. High release for use in circuits with high idle current. Pickup power: Adjustment S: 100 mW; G: 200 mW; ACS: .3 VA; ACG; .5 VA. Contact ratings (at 28 VDC/120 VAC resistive): ACG, G: 5 A; ACS, S: 2 A. Dust-covered and open types UL and CSA Listed. Temperature range, −67° to +185° F except plastic covers, to +158° F. **42RO, 42ROZ:** Plastic dust cover, 8-pin octal plug. Size, 1²³⁄₆₄″ sq. x 2⁷⁄₆₄″ h. **42RO6, 42RO6Z:** Differ in wiring only. **42JOZ:** Hermetically sealed, 8-pin plug. Size, 1⅝″ sq. x 2⅝″ h. **42F:** Unenclosed, stud mounting, solder terminals. 1¹¹⁄₁₆″ w. x 1¹⁹⁄₃₂″ d. x 1¹³⁄₃₂″ h. Weight, 2½ to 5¼ oz.

GENERAL PURPOSE RELAYS

SERIES 48 SPDT LOW COST DC RELAYS

Excellent, low cost, sensitive relay for use in burglary, fire or police alarm systems requiring operation from 10 mW minimum input signal. Bridge-type contact structure. Solid contacts. Compliant armature for good contact wipe. Contact rating (at 28 VDC/120 VAC resistive): 2 amps. Temperature range, −4° to +158° F. **48F:** Unenclosed, screw mounting, solder terminals. Size, 1 17/64" w. x 2 1/2" d. x 1 7/8" h. Weight, 3 oz. **48RO:** Plastic dust cover, 8-pin octal plug. Size, 1 33/64" sq. x 2 1/64" h. Weight, 4 oz.

SERIES 11 SPDT SMALL, LOW-COST RELAYS

Rated for 1-amp switching at 28 VDC/120 VAC resistive. DC operation from sliding-current or on-off 50 mW signals; AC operation from .3 VA on-off signals. Good environmental capability. Temperature range, −40° to +122° F. UL and CSA Listed. Unenclosed. **Type 11FZ and 11F:** Screw mounting; 5 solder terminals. Size, 1 1/2" w. x 1 3/16" d. x 1 1/16" h. **Type 11F2:** Same, with insulated base. Size, 1 1/2" w. x 1 17/32" d. x 1 3/16" h. **Type 11FP:** Shoulder lug mounting; printed circuit terminals. Size, 1 7/32" sq. x 1 1/32" h. Weight, 1.2 oz. max.

SERIES 65 SPDT COMMERCIAL DC RELAYS

Small, low-cost commercial relay offering positive response to low-power signals. Excellent adjustment stability, sturdy construction, 5-million operation mechanical life. Typical applications: Remote TV channel selectors, vending machines, semi-automatic home slide projectors, automatic toys and games. Contact rating, 3 amp at 28 VDC/120 VAC resistive. Nominal power, 90 mW. Temperature range, +14° to +158° F. All unenclosed, screw mounting. **65F1A:** Solder terminals. Size, 1 1/16" w. x 1 3/16" d. x 63/64" h. **65FP1A:** Printed-circuit terminals. Size, 1 1/16" w. x 1 3/16" d. x 1 1/4" h. Weight, 1 oz. UL and CSA Listed.

LARGER DISCOUNTS AVAILABLE ON REQUEST

SERIES 50 SPDT, DPDT, 3PDT AC AND DC RELAYS

Highly efficient, compact, low-cost relay for switching of industrial loads of 5 amps to activate small solenoids or other relays. Mechanical life, 10 million operations. 50ROL types have indicating lamp which lights when coil is energized. UL and CSA Listed. Temperature range: 50F, +14° to +158° F; 50RO and 50ROL, to +131° F. **50F:** Unenclosed, screw mounting, solder terminals. Size, 1 11/64" sq. x 1 15/16" h. Weight, 2 oz. **50RO and 50ROL:** Plastic dust cover. Size, 1 3/8" sq. x 2 3/32" h. **50RO1 and 50RO2:** 8-pin octal plug; **50RO3,** standard 11-pin plug. Weight, 3 oz. **Note:** Silver-cadmium-oxide contacts, rated 10 amps at 28 VDC/120 VAC resistive, are available on all relays listed below. To order, add suffix **SCO** to number (e.g., 50F1-6AC-**SCO**); add **10c** to prices shown for SPDT types; **15c** to DPDT; **20c** to 3PDT.

SERIES 67 4PDT MINIATURE AC AND DC RELAYS

Miniature, rugged relays. Solder or printed-circuit terminal sockets for fast chassis top mounting and easy wiring. Relay and sockets interchangeable with comparable types. Plastic dust cover, stud mounting, 14-pin plug. **Contact Rating:** 5 amps at 28 VDC/120 VAC resistive. **Temperature Range:** −4° to +140° F. **Operations at Rated Load:** 100,000 min.; 100 million mechanical DC types; 50 million AC types. UL and CSA Listed. **Size:** 1 7/64" w. x 55/64" d. x 1 19/64" h. Weight, 1 1/4 oz.

GENERAL PURPOSE RELAYS

SERIES 62 DPDT, 4PDT, 6PDT UNIVERSAL-MOUNTING DC RELAYS...PLUS SOCKETS

Economical, low-level to 5-amp multiple circuit switching. Sockets designed for fast, easy connections. Available in choice of solder terminals or printed-circuit terminals. Interchangeable with similar commercial relays in communications, data processing, process control equipment. One million operations at max. load; 100 million mechanical. **Terminals:** DPDT type has 8-pin plug; 4PDT, 14-pin plug; 6PDT, 20-pin plug. **Temperature Range:** +14° to +158° F. Plastic dust cover, stud mounting. **Size:** All types: 1 17/64″ h. x 49/64″ d.; **62R2,** 61/64″ w.; **62R4,** 1 3/16″ w.; **62R6,** 1 23/64″ w. Weight, 1 oz.

SERIES 59 SPDT SNAP-SWITCH DC RELAYS

Dependable, low-cost relay for commercial applications where economy and size determine choice. Snap-switch contact assembly provides positive operation from on-off or slowly changing signals. Contact rating, 2 amps at 28 VDC/120 VAC resistive. Mechanical life, 1 million operations. Temperature range, +14° to +158° F. UL and CSA Listed. **Type 59F1D:** Unenclosed, screw mounting, solder terminals. Size, 1⅛″ w. x 29/32″ d. x 1 3/64″ h. Weight, .8 oz. **Type 59AO1D:** Metal dust cover, 8-pin octal plug. Size, 1 3/16″ dia. x 1 19/32″ h. Weight, 1.5 oz.

GENERAL PURPOSE RELAYS

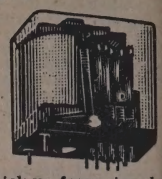
SERIES 70 DPDT, 4PDT, 6PDT DC RELAYS AND SOCKETS



Miniature industrial relay for low-level to 5-amp multiple circuit switching. Choice of solder or printed circuit terminal sockets for fast, easy connection. UL and CSA approved. Interchangeable with similar commercial relays in communications, data processing, process control equipment and recording devices. Choice of voltage adjusted (standard or bifurcated contacts) or current sensitive adjusted. Voltage adjusted with bifurcated contacts rated at 50 million operations. Sensitive current-adjusted pick up from signals as low as 85 mW. Mechanical life of both types is 100 million operations. **Temperature Range:** +14° to +158° F.

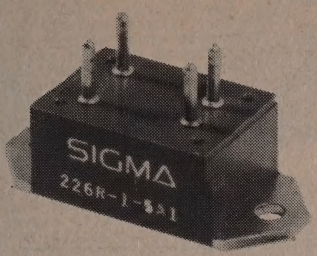
GENERAL PURPOSE, SOLID STATE AND HYBRID RELAYS

SOLID STATE RELAYS
SERIES 226 MINIATURE



ow cost solid state relay designed to switch low to medium irrent AC loads from low level logic signals. Can be PC board ounted, projecting less than 0.5". Can be chassis mounted and onnected with standard Molex slip-on connectors. Compatible ith TTL logic. Can be operated from AC or DC input. Unit is ompletely potted to resist shock and moisture effects. DC input ersions have LED activated opto-isolator input. AC input ersions have incandescent or neon activated opto-isolators. perate time, 8 msec typ. Release time, 30 msec typ. Dielectric rength, 2500 VAC rms from input to output and case. Size, 1.5" x 65" x 0.75" high for chassis version; 0.59" high for PC version.

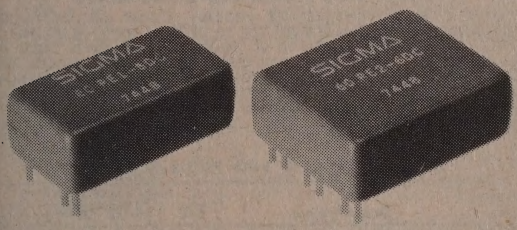
GENERAL PURPOSE RELAYS
SERIES 60 PRINTED CIRCUIT RELAYS



he installed height of 0.415" is ideal for high density PC board pplications. Ultrasonically welded case protects contacts from ontaminants and solvents. Rugged terminal pins, tightly anhored to the case, can be bent safely without affecting internal ontact adjustment. High contact force plus self-cleaning action ssure minimum contact resistance. Series 60 relays are available n both SPDT and DPDT models, with a choice of sensitive or tandard coils. Typical applications include: telephone switching quipment, alarm systems, business machines, control systems, ommunications equipment, and data processing equipment. Can e driven directly from TTL driver circuits. Operate time, 3 msec yp. Release time, 2 msec typ. Dielectric strength, 1500 VAC ms between contact and coil.

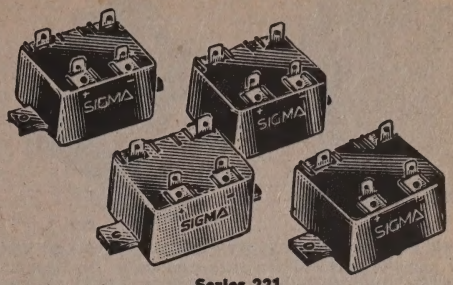
HYBRID RELAYS
SERIES 221—4 AND 10 AMP, 120 AND 240 VAC



Series 221

For use in photocopy equipment, process controls, machine tools, instrumentation and alarm devices. Utilizes reed relay to sense and provide gating to an AC semiconductor. Compatible with TTL logic and can be used to switch inductive, capacitive, tungsten or resistive loads. Operate time, 2 msec max., 60 Hz. Release time, 9 msec max., 60 Hz. Dielectric strength, V rms, between all insulated points, 1500 VAC rms. U.L. and CSA Listed.

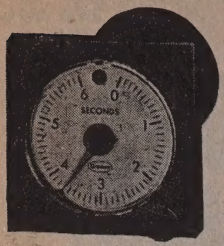
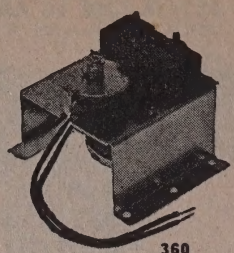
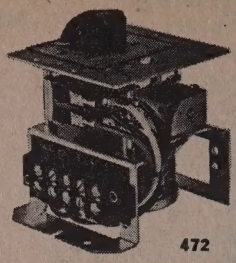
SERIES 360, 402 AND 472 RESET TIMERS



402



360



472

SERIES 360 LOW COST RESET TIMER

Automatic reset timer adjusts easily by moving setting arm around notched dial. Has flexibility of interval or delay timing. Two timers interconnected can provide repeat cycle timing. Uses Cramer synchronous inductor motor. Unique slip clutch prevents reset shock. Wiring connections are made directly to switch terminals and motor leads. Four time ranges. 5.5, 15 or 60 seconds, and 5.25 minutes. **Repeat Accuracy:** ¾ of 1% of full scale. **Motor Voltage:** 115 VAC, 60 Hz. **Load Switches:** SPDT, rated 20 amps resistive at 125/250 VAC, ½ amp at 125 VDC, ¼ amp at 250 VDC, ⅓ hp at 125 or 250 VAC. **Power Input:** 4.0 watts at 115 VAC, 60 Hz. **Size:** 3.312″ w. x 2.750″ d. x 2 1⁄16″ h., overall. Net Ea., Lots of 1–9, **$21.25**; 10–24, **$20.19**; 25–49, **$19.12**; 50–99, **$18.06.**

SERIES 402 PLUG-IN RESET TIMER WITH PILOT LIGHT

General purpose motor-driven timer plugs in for instant interchangeability and simplified maintenance. Easily adjusted, instantly read, provides accurate, adjustable interval or timing delay between the operation of a control circuit and the closing of load circuits. Applications include control of machine tools, induction heating equipment, injection molding machines and conveyor controls. Choice of 7 full scale time ranges. Load and instantaneous switches for wide wiring flexibility. **Repeat Accuracy:** Within ±0.4% of full scale. **Motor Voltage:** 115 VAC, 60 Hz. **Power Input:** 3.0 watts, motor; 5 watts, clutch at rated voltage. **Switches:** Load and instantaneous switches, snap-action SPDT, rated 10 amps resistive at 125/250 VAC, ½ amp at 250 VDC. ¼ amp at 250 VDC, ⅓ hp at 125/250 VAC. **Terminals:** Spring loaded connectors with #6-32 binding head screws to meet UL spacing. **Size:** 3⅞″ sq. x 4 5⁄32″ d. behind panel. Net Each, Lots of 1–9, **$58.25**; 10–24, **$55.34**; 25–49, **$52.43**; 50–99, **$49.51.**

SERIES 472 BRACKET MOUNT RESET TIMER

External clutch reset timers provide interval or delay timing with choice of momentary or sustained contact control. Individual load, motor and instantaneous switches allow wiring flexibility. Unique differential clutch assures reliable, long-life operation. Has eight-place terminal strip. Incorporates one load, one motor and one instantaneous switch. **Full-Scale Reset:** Within ½ sec. **Load Switches:** SPDT, rated 10 amps resistive at 125/250 VAC. **Power Input:** 115 VAC, 60 Hz. **Size:** 3 21⁄32″ w. x 2⅞″ d. x 3 27⁄32″ h. SERIES 561, 524 AND 540 CYCLE TIMERS

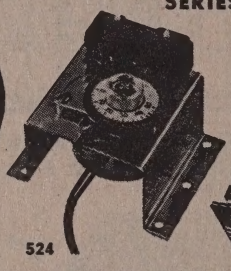
561



524

540

SERIES 561 PERCENTAGE TIMER

Fully adjustable, continuously repeating cycle timer. On or off time may be set at any portion of total cycle between 4% and 96%. A 100% full-on position is also provided for manual override. Utilizes Cramer dependable synchronous inductor motor. Short time cycles suitable for applications where maintenance of a desired parameter within very close limits is important, such as temperature in environmental test chambers. Longer time ranges indicated for cyclical control of equipment and systems such as pumps, filters, blowers, space heaters and automatic lubrication systems. **Repeat Accuracy:** Within 1% of full scale. **Load Switch:** Rated 20 amps at 115/220 VAC resistive. **Power Input:** 115 VAC, 60 Hz. **Size:** 3.750″ dia. x 3.093″ d., behind panel. UL Recognized. Net Each, Lots of 1–9, **$31.75**; 10–24, **$30.16**; 25–49, **$28.58**; 50–99, **$26.99.**

Cramer No.	Time Range	Cramer No.	Time Range
10179	15 sec	10181	60 sec
10180	30 sec	10182	5 min.

SERIES 524 SINGLE POLE CYCLE TIMER

Ideal for any applications where sequential operations are required, particularly where the sequence may need to be changed periodically, such as lighting displays, battery charging, etc. Complete timer consists of chassis incorporating baseplate, cam and switch plus motor and gear rack; selection of 16 gear racks and 12 motor speeds available. Cam is adjustable for operation from 2% to 98% of time cycle. **Repeat Accuracy:** ±0.9°. **Switch:** SPDT, rated 20 amps non-inductive at 125/250/480 VAC. **Power Input:** 115 VAC, 60 Hz. **Size:** 2¾″ w. x 3 5⁄16″ d. x 2 17⁄32″ h. UL Recognized.

SERIES 540 MULTIPOLE CYCLE TIMER

Controls 2 to 10 independent circuits. Cams are individually adjustable over approximately 2% to 98% of total cycle and can provide any desired sequence or program. Complete timer consists of chassis, motor and gear rack. Chassis incorporates baseplate, cams and switches. **Repeat Accuracy:** ±1.8°. **Load Switches:** SPDT, rated 15 amps non-inductive at 115 VAC. **Power Input:** 115 VAC, 60 Hz. **Overall Chassis Lengths:** 2-pole, 4 5⁄16″; 4-pole, 5 5⁄16″; 6-pole, 6 5⁄16″; 8-pole, 7 5⁄16″; 10-pole, 8 5⁄16″. UL Recognized.

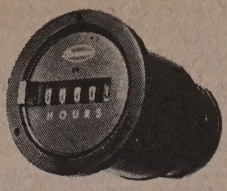
SERIES 635 AND 636 ELAPSED TIME INDICATORS

635K



636

Type 635—Compact, non-resettable indicators available in four case styles. Large 1" dia. number wheels provide excellent readability. Quick start and stop induction motor gives higher accuracy than hysteresis motors at no extra cost; four time ranges available on six-digit register. **Mounting Size:** 3½" units mount in 2.82" dia. panel cutout; 2½" models mount in 2.22" dia. panel cutout. **Total Count:** 99,999.9 minutes, 999,999 minutes, 99,999.9 hrs. or 999,999 hrs. **Power Input:** 115 VAC, 60 Hz. **Type 636**—Similar to type 635 above except with five-digit resettable register; has unique pushbutton reset without danger of overshoot. **Total Count:** 9,999.9 sec, 9,999.9 minutes or 9,999.9 hrs. Both types UL Recognized. To order, specify Cramer No.; for prices, see Cramer Type price table, below.

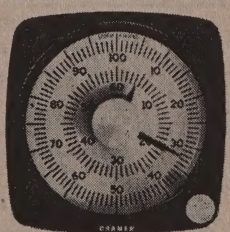
10170	60 Hz	39.00	37.05	35.10	33.15

SERIES 691E ELECTRIC STOP CLOCK



Precision time totalizer is an electrical stop clock capable of measuring elapsed time to an accuracy of .02 second. Built-in pushbutton or remote control 1/10-sec reset. Available in 60 sec and 60 min. time ranges. Normally operated with motor running continuously. Timing is initiated by closing the circuit to the electromechanically actuated clutch which engages the pointer mechanism with the drive motor. On completion of timing, clutch circuit opens, instantly stopping the pointer. Completely enclosed industrial case. Dial face has black pointers and graduations on white background. Optically clear glass dome, ⅛" thick. **Reset Solenoid Duty Cycle:** 20% on, 80% off, maximum 5 seconds on. **Accuracy:** AC accuracy at 60 Hz is within .02 sec on 60 second units, .02 min. on 60 minute timers. **Power Input:** 115 VAC, 60 Hz. **Size:** 3 1/32" w. x 3 1/32" h. x 4 7/32" d. behind panel.

Cramer No.	Time Range	Net Each, Lots of

*With minute and seconds dial.

SERIES 241 INTERVAL TIMERS

Automatic reset interval timer has push-button start, automatic shut-off, instant reset. Controls electrically operated equipment such as operating mixers, ovens; copy machines, tumbling and plating machines, insulation testing machines. Set knob permits rapid setting changes while unit is running. High visibility dial with 300° scale protected by plastic dome. **Repeat Accuracy:** Within ±¼ of 1% of full scale. **Power Required:** 115 VAC, 60 Hz. **Contacts:** Rated 15 amps at 125 VAC; 10 amps at 250 VAC, non-inductive load. SPDT snap action load contacts are silver-cadmium oxide. **Terminals:** Screw lugs, rear connected. **Size:** 3¾" dia. x 3⅛" d. behind panel. Net Each, Lots of 1-9, **$37.00**; 10-24, **$35.15**; 25-49, **$33.30**; 50-99, **$31.45.**

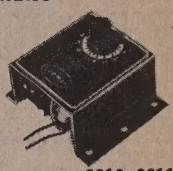
SOLID STATE TIMERS

3800, 3801



3810, 3811

SERIES 3800 SOLID STATE TIME DELAY RELAY

Compact, adjustable solid state timer plugs into standard octal socket. All solid state timing circuit activates DPDT relay output contacts at end of set time and resets when control power is removed. Compact enclosure equipped with octal plug-in base is dust and moisture resistant. High grade components are mounted on rigid printed circuit boards. **Repeat Accuracy:** Within 2% under normal conditions. **Recycle Time:** 150 msec nom. **Contact Rating:** DPDT, 10 amps with resistive load. **Power Input:** 115 VAC, 50/60 Hz. Net Each, Lots of 1-9, **$25.50**; 10-24, **$24.23**; 25-49, **$22.95**; 50-99, **$21.68.**

10098	10 sec	10100	60 sec		

SERIES 3801 SOLID STATE INTERVAL TIMER

Compact solid state interval timer adapts easily to a wide range of timing applications. Provides control of a load during the timed interval. Application of a momentary start signal transfers the load contacts and initiates timing. Contacts retransfer and timer resets automatically at end of set time. Equipped with 11-pin plug-in base. **Repeat Accuracy:** Within 2% under normal conditions. **Recycle Time:** 50 msec, nom. **Contact Rating:** DPDT, 10 amps with resitive load. **Power Input:** 115 VAC, 50/60 Hz. Net Each, Lots of 1-9, **$29.75**; 10-24, **$28.26**; 25-49, **$26.78**; 50-99, **$25.29.**

SERIES 3810 BRACKET-MOUNT SOLID STATE TIME DELAY RELAY

Low-cost bracket-mount time delay relay is interchangeable with several commonly used electromechanical timers. Sustained control signal initiates time; contacts transfer at end of time delay and timer resets upon removal of control voltage. Resists shock and vibration. **Repeat Accuracy:** Within 4% under normal conditions. **Recycle Time:** 150 msec nom. **Output Contacts:** DPDT rated 10 amps, resistive. **Temperature Range:** +10° C to +50° C. **Power Input:** 115 VAC, 50/60 Hz. **Size:** 3.312" w. x 2.750" d. x 2.125" h., overall. Net Each, Lots of 1-9, **$25.50**; 10-24, **$24.23**; 25-49, **$22.95**; 50-99, **$21.68.**

SERIES 3811 BRACKET-MOUNT SOLID STATE INTERVAL TIMER

Adapts to wide range of timing applications. Provides control of a load during a timed interval. Application of a momentary start signal transfers the load contacts and initiates timing. Contacts retransfer and timer resets automatically at end of set time. **Repeat Accuracy:** Within 4% under normal conditions. **Recycle Time:** 50 msec nominal. **Contacts:** DPDT rated 10 amps resistive. **Power Input:** 115 VAC, 50/60 Hz. **Size:** 3.312" w. x 2.750" d. x 2.125" h., overall. Net Each, Lots of 1-9, **$29.75**; 10-24, **$28.26**; 25-49, **$26.78**; 50-99, **$25.29.**

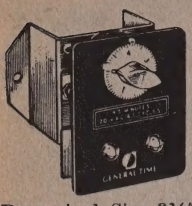
SERIES DA TIME-DELAY TIMERS

REAR MOUNTING



Type DA11: Manually adjustable by knob. Apply wherever delay, interval or repeat cycle timing functions are required (repeat cycle requires two units). Internal clutch engages and disengages when motor is energized and de-energized. Resets to start position when power is removed. SPDT switch rated 20 amps at 125 or 250 VAC resistive; solder lug terminals. Min. setting, 0 sec. Repeat accuracy, ±¾ of 1% of total time range. Timing motor rated 5 watts max. at 120 VAC, 60 Hz. UL Recognized. Size, 3⅜″ w. x 2 1⅜₁₆″ d. x 3⅛″ h. Weight, 1 lb.

Type DA21: Same as DA11 but with locknut adjustment to eliminate tampering. UL Recognized.

When ordering, specify model number, voltage, and frequency.

Model Number		Max.	Max.
Manual Adj.	Locknut Adj.	Time Setting	Reset Time

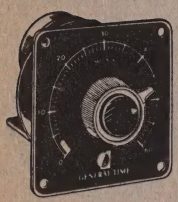
SERIES DP11 RESET TIMERS

PANEL MOUNTING



Adjustable time range by simple pointer knob. Apply wherever delay, interval or repeat cycle timing are needed (repeat cycle requires two timers). Readout of elapsed time by pointer in center of knob. Unit resets to start position when power is removed. SPDT switch rated 10 amps at 125 or 250 VAC resistive. Timing motor rated 5 watts max. at 120 VAC, 60 Hz. Repeat accuracy, ±1% of total time range. Screw terminals. Size, 3⅝₁₆″ sq. x 3½″ deep, behind panel. Requires 3⅛₁₆″ dia. mounting hole cut. **When ordering, specify model number, voltage, and frequency.**

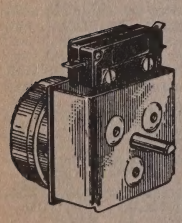
SERIES AB HAND-SET INTERVAL TIMERS



Rotation energizes the load and timing motor, which are de-energized on release; when motor drives timer to zero. Setting can be changed during cycle without damage. Mount behind panel, using three equally spaced .180″ dia. tapped holes on .562″ radius. Setting shaft, ¼″ dia. flatted to .156″ for ½″. Flat is located 180° from "0" time. SPDT switch rated 25 amps at 125 or 250 VAC resistive. Timing motor rated 3.5 watts at 120 VAC, 60 Hz. Spade terminals, ¼″. Size, 2½″ w. x 3 3⁄16″ d. x 3″ h. UL Recognized. Weight, 1 lb. **When ordering, specify model number, voltage and frequency.**

SERIES BN ADJUSTABLE RESET TIMERS

Rear mounting delay timer has built-in relay and adjustable time range. Dial and setting knob with readout of elapsed time by pointer in center of knob. SPDT relay rated 10 amps at 125/250 VAC. Motor rating, 5 W max. at 120 VAC. Repeat accuracy, ¾ of 1% of total time range. Locknut setting adjustment, where only occasional time period changes are required. UL Recognized. Size, 3.375″ w. x 4.202″ h. x 3.750″ d.

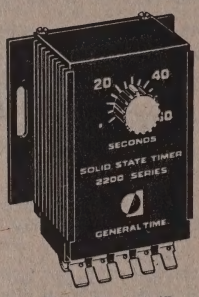
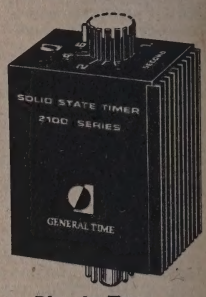
SOLID STATE TIMERS



Rear Mount Type



Plug-in Type

Solid state timers meet the broadest range of applications. Plug-in or rear mount types; standard timers for delay, interval or D.O.D. (delay on de-energization). AC/DC input; relay (DPDT); low operating temperature and no first cycle effect. UL Recognized. Repeat accuracy of ±2%. Resistive load of 10 amps at 117 VAC or 28 VDC. Minimum reset time, 300 msec for lower third of time band on type 2111; 100 msec, all others. **When ordering,** add time range suffix to series: e.g., **2211-1PF-001** for 1/.10 sec max./min. time setting.

TIME RANGES

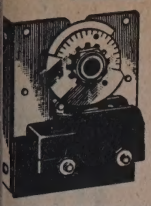
SERIES RG21 REPEAT-CYCLE TIMERS



Cam-actuated, single switch timers for rear mounting. Run continuously, repeating a set cycle of make-break switching operations as long as motor is energized. Also operates a single time cycle. Cam adjustable from 7° min. to 169° max. (±3%). SPDT switch rated 20 amps resistive. Timing motor rated 3.7 watts max. at 120 VAC, 60 Hz. Solder lug terminals. 6″ leads. UL Recognized. Size, 2 5/16″ w. x 2 1/2″ d. x 3 1/8″ h. Weight, 1 lb.

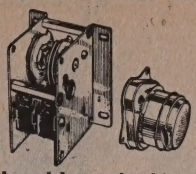
SERIES RE62 REPEAT CYCLE MULTI-CAM TIMERS



Same specifications as RG21, except 2 to 6 switches may be actuated during cycle. Run continuously, repeating set cycles of multiple switching operations as long as motor is energized. Complete unit requires one motor and one or more switch stacks. Spanner wrench included to adjust cams. Two-switch unit size, 2 5/16″ h. x 3 3/32″ w. x 3 3/16″ d.; add 1 1/16″ to depth for each additional switch. UL Recognized. **When ordering, specify switch stack model number, drive motor type number, voltage, and frequency.**

MST MINIATURE TOGGLE SWITCHES

Slim, bat handle toggle switches for miniature applications with limited back-of-panel clearance. Terminals and contacts are solid silver (center terminal, copper with silver plate). Case material, black phenolic resin; ¼-40 threaded bushing. Rated 6 amps at 125 VAC. Offering high capacity for small size. SPDT and DPDT types have life cycle of over 80,000 on-off operations; 3PDT and 4PDT, over 20,000. High voltage barriers between terminals and contacts; 1 piece body.

GREEN SERIES MINIATURE TOGGLE SWITCHES

All ALCO Green Series miniature switches have molded-in terminals which prevent solder, flux and other contaminants from entering the contact area. All contacts are fine silver. Contacts and terminals have gold finish to inhibit oxidation, prolong shelf life, and facilitate soldering. Green diallyl phthalate case withstands high temperatures. All toggle types are U.L. listed and have anti-push-in lever captivation to prevent accidental damage. All types have ¼"-40 high torque bushings, except MTG series; MTG types have 15/32"-32 bushings. Rated 6 amps at 125 VAC, 3 amps at 250 VAC.

GREEN SERIES MINIATURE TOGGLE SWITCHES WITH PC AND WIRE WRAP TERMINALS

PC terminals are 0.250" long; WW types have 0.031" x 0.050" x 0.740" long terminals.

MINIATURE ROTARY SWITCHES

MRB adjustable stop switches are rated 150 ma @ 115 VAC. The MRB-( )-S series is a 36° rotary switch with adjustable stops from two to ten positions and is also available with 30° detent. It can be adjusted to stop from two to twelve positions. The suffix "S" indicates long shaft and the suffix "PC" indicates printed circuit mounting. The suffix "C" indicates continuous rotation.

To identify the switch being ordered, it is necessary to specify colors by adding the appropriate code number suffix shown below:
00—Black body, Black actuator.
02—Black body, Red actuator.
09—Black body, White actuator.
90—White body, Black actuator.
92—White body, Red actuator.

For lighted models, add lens code number: **2**—Red; **4**—Amber; **9**—Clear.
Special colors considered for volume orders.

SAFETY KEYSWITCHES

Compact, high quality keyswitches for safety where unintentional switching could be hazardous. Keys removable from any position. Mount in ⅜" hole in panels up to ¼" thick. Anti-rotation device prevents movement after mounting. Available with 6 or 10 Amp switches.

CONVERSION UNIT FOR ROTARY OPERATION

Incorporates unique method of ganging miniature toggle switches to control multiple circuits simultaneously. Operating as a 2 or 3-position rotary switch, unit can gang up to five toggle switches. Consumes minimum of behind-panel space. Also offers advantages of completely enclosed contacts and heavier current capabilities. Accommodates most miniature bat handle switches having ¼" bushings, and any number of pole configurations. Serves as 3-position rotary switch when used with center-off or on-on-on toggles, or as 2-position rotary when used with single or double-throw toggles.

MAGNETIC REED PUSHBUTTON SWITCHES

SPST momentary for data processing equipment; ceramic magnets eliminate springs. Light and snappy touch with little change in pressure over very long periods of service. Contacts are glass-encapsulated reeds for long life; plunger is keyed and non-rotating; metal case withstands abuse and serves as a shield. Rated 100 mA at 50 VDC; resistance, 100 milliohms. Contact bounce, 1 msec; plunger travel, 5/64″. Oper. force, 2 oz. Life, 10 million cycles.

8631

8632, 8633

SPST momentary contact pushbutton switches available NO with or without overtravel and NC. **Model 8631:** NO; total travel, 0.040 ±0.015; actuation force, 5 oz. ±3. Coin silver contacts rated ½ amp resistive load at 115 VAC or 28 VDC; ¼ amp at 250 VAC. Electric life, one million make-and-break cycles. Size, 0.251″ dia. x 0.635″ h. overall. **Model 8632:** NO with .015 min. overtravel; total travel, 0.080 ±0.025; actuation force, 5 oz. ±3. Coin silver contacts rated ½ amp resistive load at 115 VAC or 28 VDC; ¼ amp at 250 VAC. Electric life, 100,000 make-and-break cycles. Size, 0.251″ dia. x 0.755″ h. overall. **Model 8633:** NC; total travel, 0.040 ±0.015; actuation force, 5 oz. ±3. Coin silver contacts rated ¼ amp resistive load at 115 VAC or 28 VDC; ⅛ amp at 250 VAC. Electric life, 250,000 make-and-break cycles. Size, 0.251″ dia. x 0.745″ h. overall. **Insulation Resistance:** 10,000 megohms min. **Dielectric Strength:** 500 V rms at sea level. **Initial Contact Resistance:** 10 milliohms max. **Materials and Finishes:** Red phenolic base with black phenolic pushbutton (red pushbutton available, specify). Coin silver solder terminals. Brass cadmium plated mounting bushing; brass nickel plated hex nut supplied. Require 1¼″ dia. mounting hole. **NOTE:** Button caps soon to be available for 8600 Series pushbutton switches.

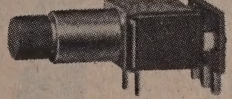
MINIATURE MOMENTARY PUSHBUTTON SWITCHES

P8121



P8121R

Double-throw, momentary pushbutton switches available in a choice of one, two, three or four poles. Single pole switch available as right angle mounting; has PC mounting terminal support of half-hard brass electrotin plated; PC board is G10 epoxy with 1 oz. electrotin plated copper; projecting fingers, only have copper both sides; circuit on PC board has copper outside only. Gold contact surfaces on copper alloy terminals with epoxy sealed terminals. Designed for use in dry (very low energy) circuits. Stainless steel housing on red phenolic case for good appearance and rugged, long lasting construction. **Contact Rating:** 1 amp resistive load at 115 VAC or 28 VDC. **Insulation Resistance:** 1,000 megohms min. **Dielectric Strength:** 1,000 V rms at sea level. **Electric Life:** 60,000 cycles min. at full load. **Mechanical Life:** 100,000 make-and-break cycles min. **Plunger Force:** 10 lbs. max. allowable. **Mounting Bushing:** Cadmium plated with clear chromate over brass; high torque to withstand 12 in.-lb. with no distortion or loosening of parts. **Pushbutton:** White nylon. White nylon press fit cap 0.200″ dia. x 0.155″ h. normally supplied. If specified, 0.200″ dia. x 0.155″ h. or 0.375″ dia. x 0.250″ h. press fit caps in black, red, orange, yellow, green, blue, brown or gray available at no extra cost. **Standard Hardware:** Complete with 2 hex mounting nuts, 1 internal tooth lockwasher and 1 locking ring. Dress nuts available on request. **Size:** P8121 SPDT, 0.500″ w. x 0.270″ d. x 1 3/32″ h. overall; P8121R SPDT, 0.500″ w. x 0.284″ h. x 1.046″ lg. overall; P8221 DPDT, 0.500″ w. x 0.450″ d. x 1 3/32″ h. overall; P8321 3PDT, 0.500″ w. x 0.650″ d. x 1 5/32″ h. overall; P8421 4PDT, 0.500″ w. x 0.850″ d. x 1 5/32″ h. overall.

Following options available; add desired suffix to Model No. Example: P8121**C**.

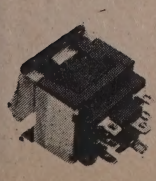
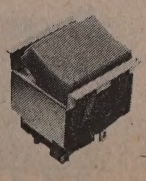
SPDT AND DPDT ILLUMINATED ROCKER SWITCHES





Illuminated rocker switches in SPDT and DPDT versions. Both snap into .750″ sq. hole in front or sub-panels and protrude into equipment space less than 1″ (for Z-type solder terminations). Uses popular T-1½ and T-1¾ size bulbs. Snap-off actuator/lenses in red, green, amber and white colors. Trim bezel PN7888 in all popular colors of nylon is also available at **$0.05** ea. Lamps not supplied.

C&K SUBMINIATURE TOGGLE, ROCKER AND PADDLE HANDLE SWITCHES

Subminiature toggle, rocker and paddle handle switches combine maximum performance with minimum size. Stainless steel housing on general purpose red phenolic case. Basic models available with UL Listing. **Contact Ratings:** Coin silver contacts rated 5 amps resistive load at 115 VAC or 28 VDC; 2 amps at 250 VAC. Brass contacts plated with 100 millionths gold over nickel rated 0.4 volt-amp at 20 volts max. AC/DC. Coin silver plated with 100 millionths gold over nickel rated at 0.4 VA at 20 volts max. AC/DC or 5 amps resistive load at 115 VAC or 28 VDC; 2 amps at 250 VAC. **Electric Life:** 100,000 make-and-break cycles minimum on all models ending in 01 only; all other models 40,000 cycles. **Initial Contact Resistance For Silver:** 10 milliohms max. at 2–4 VDC, 1 amp. **Insulation Resistance:** 1,000 megohms min. **Dielectric Strength:** 1,000 V rms at sea level. **Mounting Bushing:** Cadmium plated with clear chromate over brass. **Operating Lever:** Bright chrome plated brass. **Standard Hardware:** Complete with 2 hex mounting nuts; 1 internal tooth lockwasher and 1 locking ring. Dress nuts available on request. Available with long or standard vinyl color caps at no extra cost. Specify length, standard or long; color, black, brown, red, orange, yellow, green, blue, gray or white. **Size:** SPDT, 0.500″ w. x 0.270″ d. x 1.265″ h. overall; DPDT, 0.500″ w. x 0.450″ d. x 1.265″ h. overall; 3PDT, 0.500″ w. x 0.650″ d. x 1.331″ h. overall; 4PDT, 0.500″ w. x 0.850″ d. x 1.331″ h. overall. Bushing ¼-40NS-2A-THD; keyway 0.040″ w.

HOW TO ORDER: Specify toggle switch Part No.; add option suffixes required. Options shown at extra cost are in lots of 1–999; 1,000 Up on request; add to toggle switch price.

① ② ③ ④ ⑤ ⑥ ⑦

① **Model Number:** 7101 SPDT on-none-on.

② **Toggles: M,** .200″ short; **S,** .410″ standard; **L,** .840″ long standard; **L1,** .640″ long; **L2,** .550″ long; **P3,** .450″ flatted; **P1,** .840″ flatted. Add .070″ if used in conjunction with **D** bushing. **P3** and **P1** add **50c** per switch to basic price.

③ **Bushings: Y,** .350″ standard; **Y1,** .378″ long pinned; **D,** .280″ short; **H,** .296″ high torque; **U,** .350″ with .173″ thread length. **Y1,** add **50c** per switch to basic price.

④ **Pinning: P,** for antirotation of toggle. Available for all toggle and bushing combinations. Add **50c** per switch to basic price.

⑤ **Terminals: Z,** .156″ standard; **C,** .250″ printed ckt.; **W,** .750″ wire wrap; **W1,** .964″ wire wrap. **C** add **10c** per pole to basic price. W and **W1** add **25c** per pole to basic price.

⑥ **Terminal Material: B,** gold plate over brass; **G,** gold plate over silver; **Q,** coin silver (90% Ag, 10% Cu); **WG*,** gold plate over silver printed ckt.; **WQ*,** coin silver (90% Ag, 10% Cu) printed ckt. **G,** add **25c** per pole; **WG,** add **75c** per pole; **WQ,** add **50c** per pole to basic price.

⑦ **Seal: E,** epoxy terminal seal; **I,** epoxy potted base. **E,** add **10c** per pole; **I,** add **25c** per pole to basic price.

*Configuration of special printed ckt. terminals **WG** and **WQ** is same as **W.** See Item 5.

SPECIAL CONFIGURATION OPTIONS: Following are available as listed.

Splashproof: CKW prefix; special "O" ring sealing around toggle and bushing for tight panel seal. **Right Angle Mounting: A** (horizontal) or **AV** (vertical). For printed circuit terminals **R** (horizontal) or **VW** (vertical) mounting. Terminal support is half-hard brass electrotin plated. Contacts and terminal supplied are brass with 100 millionths gold plate. Non-threaded bushing is standard; available with toggle and bushing options except **H, U** and **Y1.** Printed circuit **R** and **VW** only: PC board is G10 epoxy with 1 oz. electrotin plated copper. Projecting fingers only have copper both sides. Circuit on PC board has copper outside only. **15/32″ Bushing with Large Toggle: T,** bright chrome plated toggle. **Lever Lock: K,** all models except 08. Supplied with natural aluminum cap; anodized red, blue or black available on request. **Rocker Switches: J1** rocker switch; **J3** large rocker switch and **J10** special large rocker. **Paddle Handles: J2** paddle handle and **J4** large paddle handle. Unless otherwise specified, black nylon rocker and paddle is supplied. Other rocker and paddle colors available at no extra charge. Specify red, blue, white, green, orange or yellow. Special colors molded to order also available on request at additional cost. **Bezel:** For **J1** rocker switch and **J2** paddle handles. Accommodates panel thicknesses from .062″ to .125″. **Add** appropriate price below to desired toggle switch price and prefix or suffix to number.

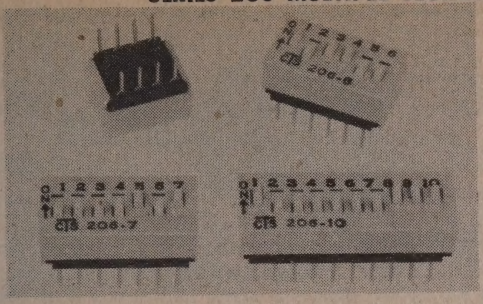
CTS Programmable DIP Switches

SERIES 206 MULTIPLE SECTION SPST PROGRAMMABLE DIP SWITCHES



Programmable DIP switch designed for automatic insertion has standard .100″ x .300″ DIP centers. Offers 4 through 10 SPST slide switches per DIP switch. Suitable for flow soldering on PC boards or mounting with standard DIP sockets. Gold plated contact arms provide long term contact corrosion resistance. **Initial Contact Resistance:** 25 milliohms. **Maximum Contact Resistance:** 50 milliohms after 10,000 cycles switching 50 mA at 24 VDC. **Maximum Non-Switching Rating:** 100 mA at 50 VDC. **Insulation Resistance:** Across open switch, or between adjacent closed switches, 1 x 10^9 ohms. **Dielectric Breakdown:** Between adjacent switches, 500 VDC min. **Switch Capacitance:** Between adjacent switches, 5.0 pF max. **Size:** body height, .320″; terminal length, .187″. See table for overall body lengths.

CTS Rotary Selector Switches

SERIES 212 INDUSTRIAL 1 1/16" DIAM. ROTARY SELECTOR SWITCHES

Standard, compact industrial rotary selector switches. Machine molded-in terminals for exact, immovable and permanent position in stator. Molded stator rugged for long life. Soldering heat can't loosen terminals; natural design barrier prevents solder flow into circuit elements. Long life contacts evenly silvered. Double wiping, self-cleaning rotor contacts. Stator contacts integral with terminals. Space saving design. **Detents:** Index plate 30° between positions with one fixed and one adjustable stop. **Finish:** 50-hour salt spray. **Size:** 1 1/16" dia. x 35/64" th. body through one section; add 1/4" space and 3/16" section thickness for each additional section. Shaft, 1 7/8" l. (from bushing) x 1/4" dia. Bushing 3/8"-32 thread, 3/8" long. Mtg. hardware supplied. Glass reinforced alkyd stator and glass reinforced nylon rotor. Contacts laminated silver movable type. Terminals and stator are silver-plated brass. Operating temperature, 85° C. **Voltage and Current Ratings:** 1 amp at 28 VDC (shorting type only), 3/4 amp at 125 VAC. **Contact Life:** 25,000 cycles thru 12 positions and return. **Detent and Detent Rotational Life:** Standard, balanced, double-bump formed spring, in a hill and valley type detent providing a minimum of 25,000 cycles thru 12 positions and return.

SHAFT AND 30° DETENT ASSEMBLIES

Standard Units: As described in general data. **Starwheel Units:** Has starwheel detent for extremely long life and minimum turning torque variation. Double lever arm controls torque in both directions of rotation with practically no change in torque during 100,000 cycles of operation through 12 positions and return.

Standard Unit No.	Total No. Positions	Suggested No. Secs.	Rear Shaft Lgth.	Starwheel Unit No.

ATTACHABLE POWER SWITCHES

Reliable AC power switches for use with selector switches. Mount on rear frame of the selector switch, or between wafers using a specially designed bracket. Rated 3 amps, 125 VAC. **No. GC-21:** SPST. **No. VF-21:** SPDT. **No. WF-21:** DPST.

SEALED SWITCH KITS

CTS No. SSK-1—Enclosed detent construction seals both the wafer sections and the detent mechanism of the switch against dust, dirt and moisture.

CTS No. DSWK-1—Open detent construction seals, protects wafer sections of selector switch against dust and dirt.

SHIELDS AND MOUNTING BRACKETS

Shields provide shielding of switch sections from each other. Various size mounting brackets handle all mounting requirements.

Stock Shields: CTS Number	Stock Shields: Description	Hardware: CTS Number	Hardware: Description

SERIES 223 INDUSTRIAL/COMMERCIAL 13/16" DIA. ROTARY SELECTOR SWITCH

Voltage and Current Ratings: 1/2 amp at 28 VDC, 1/4 amp at 125 VAC. **Indexing:** 30° with adjustable stop. **Torque Range:** 5"–25" ounce. **Shaft:** 1 1/4" length from mounting, round by 1/4" dia. **Bushing:** 3/8"-32 UNEF-2A thread 3/8" long. **Size:** 6 1/64" dia. x 39/64" th. body through one section; add 15/64" wafer thickness for each additional section. **Contact Life:** 50,000 cycles thru 12 positions and return. **Detent and Detent Rotational Life:** Double ball detent for crisp switching action thru 25,000 cycles (12 positions and return at 10 cycles per minute). **Insulation:** Molded thermoset plastic stator, molded thermoplastic rotor. Detent is cadmium iridite plated steel. Contacts and terminal lug material is silver plated brass. Integral molded rib design eliminates radial shifting of the contacts and insures high insulation resistance between adjacent contacts. **Operating Temperature:** +85° C. **Stop Strength:** 15 inch pounds.

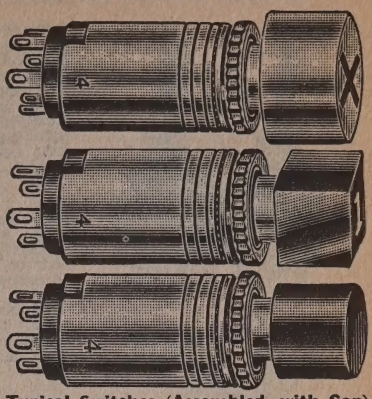
DIALIGHT Lighted Pushbutton Switches & Indicator Lights

DIALCO®

SINGLE-HOLE MOUNTING PUSHBUTTON SWITCHES AND MATCHING INDICATOR LIGHTS

Convenient, modular design allows assembly of an illuminated switch to meet your particular requirement. **Three Switch Assemblies:** Choice of NO, NC or 2-Circuit arrangements in two styles: One to accommodate screw-in type caps; another for friction-fit caps. Switch contacts rated 3 amps resistive at 125 VAC or 30 VDC. UL Listed. **Caps:** Choice of screw-in and friction fit (rotatable or keyed) styles in ½", ⅝" or ¾" sizes, round or square shape, and a choice of colors. **Matching Indicator Lights:** Available in two sizes to match your indicating switches. Simply select the indicator base assembly size desired, and add the cap of your choice (the same caps used with switches).



Typical Switches (Assembled, with Cap)

SWITCH BASE ASSEMBLIES

Single-hole mounting; fit panels up to 3/16" thick. Size, .650" dia. x 1 15/32" lg.

Switch Circuit	For Friction-Fit Caps Either ½" or ¾" Cap Size	For Screw-In Caps Only ½" mtg.	For Screw-In Caps Only 1 15/32" mtg.	Net Each, Lots of 1-9	10-24	25-99*

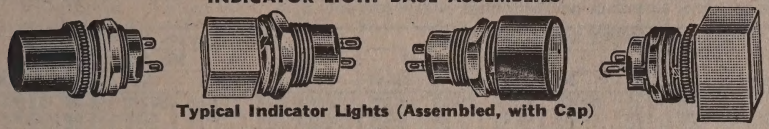
*One circuit NO, one circuit NC.

INDICATOR LIGHT BASE ASSEMBLIES



Typical Indicator Lights (Assembled, with Cap)

Accommodate T-1¾ incandescent lamp from 1.35 to 28 V. Accept friction-fit caps, keyed or rotatable, ½" or ¾" size. Length, 27/32" max.

Dialco Number	Description	Net Each, Lots of 1-9	10-24	25-99*
183-9730-14-602	For 1 15/32" hole, front mounting (.549" dia.)	$1.52	$1.29	$1.21
183-9830-14-604	For ½" hole, front or rear mount (.560" dia.)	1.52	1.29	1.21

COLOR OF LENS FACE

Indicated by last figure in Dialco number. For simplicity, all numbers listed use suffix "1" to indicate the lens face is **Red.** When a color other than red is required, change the last figure per following list:

Last Figure in No.	Lens Face Color
1	Red (as listed)
2	Green
3	Amber (yellow)
4	Blue
5	White (translucent)
6	Light yellow
8	Ivory

Examples: 183-1472 (Green)
300-1874 (Blue)

CAPS FOR SWITCH BASE ASSEMBLIES OR INDICATOR LIGHT

Friction-fit caps are available in round or square shapes; choice of keyed (non-rotatable) or rotatable style; ½" or ¾" size. Screw-in caps fit only the switch base assemblies designated for them; come only in ½" round configuration. **Colors:** All items listed are red as indicated by **1**, the last digit in the ordering number (e.g., 183-1471). **For other colors, see color table;** same prices. Legends may be hot-stamped or engraved; pricing on request.

SNAP-IN MOUNTING PUSHBUTTON SWITCHES AND MATCHING INDICATOR LIGHTS

SWITCH BASE ASSEMBLIES

Snap-in mounting for panels up to 3/16" thick. Includes bezel, clip and spanner ring. Momentary non-snap action switches have contacts rated 3 amps resistive at 125 VAC or 30 VDC. Life at rated load, 100,000 operations. UL listed. Suffix **001** in Dialco number indicates black bezel; to specify gray bezel, change 001 to **002** (e.g., 513-0106-**002**). Other bezel colors available on special order. Rectangular bezel units interchangeable with most 4-lamp displays.

JMT-100

JMT-200 WITH COLOR CAP

SERIES JMT SUBMINIATURE TOGGLE SWITCHES

Combine drastic reduction in size and weight with trouble-free construction. Ideal for manually-controlled, low current, solid state devices and miniaturized circuitry. Used in computers, aircraft, electronic instruments, geophysical and portable equipment of all kinds. Mount in single hole with ¼″-40NS-2A bushing .352″ lg. with keyway. Solder terminals firmly staked to withstand repeated soldering; electrical continuity of terminal is to opposite throw of lever. Distinctive green phenolic body. Bat handle .400″ lg. **Series JMT-100:** SPDT action. Body .500″ x .260″ x .505″ deep behind panel (including terminals). Wt., 0.19 oz. **Series JMT-200:** DPDT action. Body .500″ x .450″ x .505″ deep behind panel (incl. terminals). Wt., 0.23 oz. **Series JMT-300:** 3PDT action. Body .652″ x .500″ x .571″ deep behind panel (including terminals). Wt., 0.28 oz. **Series JMT-400:** 4PDT action. Body .843″ x .500″ x .571″ deep behind panel (including terminals). Wt., 0.32 oz.

SPECIFICATIONS

Electrical Characteristics: Rated 5 amps nom. resistive, 125 VAC and 24 VDC. Initial contact resistance, 5 milliohms max., at 3 VDC, 100 mA. Insulation resistance, 10,000 megohms min. Dielectric strength, 1 kV rms at sea level. Life, 100,000 make-and-break, min. for suffix -23 models; all others 60,000, under load. **Physical Characteristics:** Coin silver switching contacts and rockers. Bright, chrome-plated brass bat handle. Phenolic case and cradle. Bushing, locking ring (1 supplied) and hex nuts (2 supplied) are nickel-plated brass. Clamp and internal-tooth lockwasher chromate treated or stainless steel. **Circuitry:** As indicated in table, below. However, they may also be used as ST (single throw) by wiring only to applicable terminals. Example: JMT-123 connects as an On-Off switch by using center terminals and terminals on one end only.

VARIATIONS OF SERIES JMT SUBMINIATURE TOGGLE SWITCHES*

Series LFH—with Flat Handle: Identical to JMT series above, except for flat handle (paddle) lever, permanently pinned for proper alignment in operating plane. Handle is satin chrome finish with matching dress nut construction and ratings same as JMT series. Available in all circuit configurations of JMT series, including 3PDT and 4PDT, and with MPC type printed circuit terminals.

LL

Series LL—Locking-Lever Switches: Identical to JMT series above, except for locking lever. To prevent accidental or unintentional switching, the spring-loaded locking mechanism must be released by pulling out the top of the lever against spring tension. Available with anodized natural aluminum cap and in anodized red, blue, gold, black and green.

PB

Series PB—Pushbutton Switches: SPDT pushbutton-actuated subminiature switches with 100,000 cycles average life under load—5 amps at 125 VAC. Coin silver contacts and rocker; silver plated center terminal. Bushing and plunger are nickel-plated brass. High-strength plastic body with ⅜″ diam. threaded molded knob. Standard black, available red or white. Also available anodized aluminum in natural, red, blue, gold, black or green. Mount in ¼″ D-hole. **Series PBI** same as PB, except smaller shaft and .200″ diam. push-on knob. Standard black, available red or white.

Series MR1—Rocker Switches: Same nominal rating as JMT Series, and dimensionally same below mounting bracket. Built-in extra strength in support column prevents wobbling and provides always-perfect alignment. Green body molded of glass-filled diallyl phthalate. Mounted by standoffs. Rockers are black molded nylon; red and white rockers also available. These switches also available with printed circuit, fast-on, and Wire-Wrap™ terminals. Available also in 3PDT and 4PDT configurations.

Series MP1—Paddle Lever Switches: Identical to subminiature Series MR1 rocker switches, but paddle lever type.

J-B-T® MIL and JAN Toggle Switches

HEAVY DUTY TOGGLE SWITCHES SINGLE, DOUBLE AND 4-POLE

For use in DC circuits; or, AC circuits in frequencies up to 1600 Hz. Rugged, positive action. Built for extra long life to meet government, industrial and commercial requirements for high reliability. Metal top eliminates spring holes; encloses switch behind panel. **Features:** Aircraft lubricant for operation in temperatures −85° F to +185° F. Withstand high humidity. Meets 100-hour salt-spray test QQ-M-151a. No momentary make or break or mechanical damage under stringent shake tests and 75 G drop test. Tested to make and break at 50% overload for brief periods due to size, solid coin silver contacts and rocker arms. Contact resistance, under 0.005 ohm. Dielectric exceeds 1,000 V rms, 60 Hz at sea level. Screw terminals and solder lugs withstand 30 lb. pull test. **Series MS35058, MS35059:** With lever seal for sand, dust and 15 ft. water submersion tests. Screw terminals; solderable finish. Meets MIL-S-3950A specifications. **Series ST40, 42, 50, 52:** Heavy-duty type; solder and screw terminals. Meet JAN-S-23 specifications. **Series MS25068:** Extra heavy duty terminals, 4-pole construction for single hole mounting. Silicone rubber bushing seals. Surpass rigorous electrical endurance requirements. Molded, hi-arc resistant bodies. MIL-S-3950A for models with suffix -21 or higher.
Nominal Ratings: 20 amps at 125 VAC; 10 amps at 250 VAC. **Switch Movement:** Opposite to that of the lever. **Finish:** Dull finish nickel-plating to government specifications. **Hardware:** Two hex nuts, one internal-tooth lockwasher and locking ring (not supplied in bulk shipments).

MEDIUM DUTY TOGGLE SWITCHES (INCLUDING MS25098 AND MS25100)

Single-hole, flush-mounting switches for DC or AC circuits up to 1600 Hz. Molded bodies fully enclosed. Rugged, positive action built for extra long life. **Features:** Aircraft lubricant to withstand temperatures −85° F to +185° F. Withstand tropical humidity. Meet 100-hour salt-spray test QQ-M-151a. No momentary make or break or mechanical damage during shake tests or 75 G drop test. Silver-plated stationary contacts; phosphor-bronze movable contacts; meet 50% overload for brief periods. Dielectric exceeds 1,000 V rms, 60 Hz at sea level. Contact resistance well under 0.01 ohm military requirement. Terminals withstand 5-lb. pull. **Nominal Ratings:** 6 amps at 125 VAC; 3 amps at 250 VAC. **Switch Movement:** Same direction as that of the lever. **Finish:** Dull nickel-plate. **Hardware:** Two hex nuts, one internal tooth lockwasher and locking ring (not supplied in bulk shipments). **Series MS25098 and MS25100:** Unique internal design results in surpassing MIL-S-3950A endurance tests. Sand and dust bushing seal; case to terminal seal. Bushing, 15/16" lg. **Series ST12 thru ST27:** Meet JAN-S-23 specs. Double-grip, self-wiping contacts; threaded bushings, 15/16" or ¼" lg.; rear or side solder terminals.

LICON Switches

TYPE 06 LIGHTED PUSHBUTTON SWITCHES
(DISCOUNT SCHEDULE "B")

Patented butterfly switching action with the versatility of one or two lamp illumination and in excess of 200 display options. Available in SPST-DB NO form X, SPDT form C, and SPDT-DB form Z. Terminals are either .110" Quick Connect or printed circuit type. Switches are available with either one or two lamps using standard T 1¾ flange base lamps replaceable from the front. Maximum lamp wattage is 2.4 watts. Wide assortment of lens caps must be ordered separately. Switches snap-mount in .700" x .920" cutout. Switches are available with gold contacts rated at .100 amp at 10 VDC; silver contacts rated 250VAC or 28VDC at 10 amps for form X or 5 amps for form C or Z. U.L. listed.

TYPE 10 BASIC SWITCHES
(DISCOUNT SCHEDULE "A")

Type 10—Highly sensitive switch utilizes one-piece mechanism. Assures long life with excellent repeatability and positive snap action. Wide choice of actuators. Rated 15 amps, 125, 250, 460 VAC; ½ amp, 125 VDC. ⅓ hp, 125 VAC; ½ hp, 250 VAC. Size, 2" x 1" x 1 1/16"; 1" mtg. centers. UL Listed; CSA Approved.

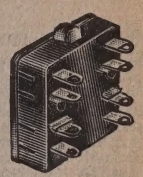
TYPE 26 DOUBLE POLE SUBMINIATURE SWITCHES

(DISCOUNT SCHEDULE "A")



Type 26—Subminiature double pole switch utilizes two Licon Butterfly® double-break mechanisms. Simultaneity of operation of both poles insured by special linkage between mechanisms. Switch eliminates need for dual components and actuating mechanism; requires less space than two single pole miniature switches. Type 76 actuators fit type 26 switches. Pushbutton and toggle actuators fit 26-800 switch series only. Rated 8 amps, 125/250 VAC; 8 amps resistive, 5 amps inductive, 28 VDC. Size, 2 5/32" x .761" x 1/4". UL Listed.

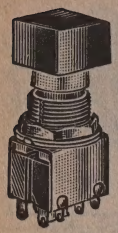
LICON Switches

TYPE 01 LIGHTED PUSHBUTTON SWITCH WITH SINGLE LAMP INDICATOR

(DISCOUNT SCHEDULE "B")



Type 01 pushbutton switch combines single bulb panel indicator with multi-pole pushbutton switch. For original equipment or replacement of toggles with color-lit or legend-coded button. Provides a visual reminder that a circuit is on or off at a glance. Available in red, white, yellow, green, or blue pushbutton, ⅝" and ¾" round or square, and 1⅛" diameter round lens caps; solid or projected color illumination. **Order lens cap separately.** Available in one and two-pole form C or form Z contact arrangement. Switch rated at 10 amps, 250 VAC or 30 VDC. Momentary, maintained, solenoid held and indicator models. One hole mounting with choice of 15/32" or ⅝" bushing. Uses T-1¾ lamp with screw or flange base (not included in price). Overall size: 1 23/32" x ⅝" x 2 5/32". UL Listed.

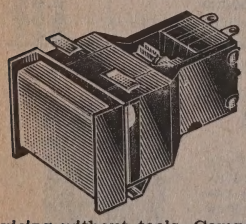
TYPE 01-800 SNAP-IN ILLUMINATED MATRIX MOUNTING SWITCH—WITH SINGLE LAMP INDICATOR

(DISCOUNT SCHEDULE "B")



Type 01-800 single-lamp lighted pushbutton switch offers time-saving snap-in front mounting on panels. Combination bezel-barrier eliminates misguided actuation. Choice of screen colors with solid or projected illumination. Choice of momentary or maintained contact types in Form C (SPDT) and Form Z (SPDT, double break); or, indicator-only units. Switch rated 10 amps, 125/250 VAC; UL Listed. Uses T-1¾ flange bulbs (not included in price); simple front-panel lamp servicing without tools. Compact 1⅛" x ⅞" lens cap gives ample space for engraving or hot stamping.

TYPE 05 LIGHTED PUSHBUTTON SWITCHES (DISCOUNT SCHEDULE "D")

An economical lighted pushbutton switch for office machines, appliances, and home entertainment equipment. Also available in a non-lighted version as well as an indicator only, series 05 mounts in a .625″ x .625″ cutout in panels from ½₂″ to ³²⁄₃₂″ thick. Snap-in bezel mounting assures rigid retention and permanent alignment. Lamp is accomplished from the front of the panel. The wedge-base T1¾ lamp is used. Available as a single pole, single throw switch with normally open contacts or double-pole, single throw normally open. Contacts are bifurcated with silver plate. Rating is .25 amps at 125 VAC max. U.L. listed. Terminals mate with .110″ quick-connectors, or are available with P.C. terminals.

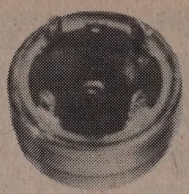
For desired lens color, substitute one of the following numbers in place of the **X** in the Licon No.: White **1**; Red, **2**; Green, **3**; Amber, **6**.

SONALERT® ELECTRONIC SIGNALS



A major advance in the audible signal warning devices. Produces a penetrating sound of 2900, 3500 or 4500 Hz by utilizing the piezoelectric principle. All circuitry is solid state for maximum efficiency, lowest current requirement and high reliability. Silicon transistor oscillator drives piezoelectric transducer to produce the desired output tone. The physical characteristics of the transducer determines the output frequency; and, this cannot be altered by external means. Output intensity is directly proportional to input voltage and ranges from 68 dB at min. to 80 dB at max. C. Draws only 16 mA max. (less than an indicator lamp), there are no mechanical points to arc and require maintenance, and there is no RF field generated. The Sonalert will operate in ambient temperatures from −30° C to +65° C; and, because of its solid state design, it is reliable, with a life expectancy of 10,000 hours. Used in computer systems in which stray RF could cause false readouts; in portable mine detectors in which ruggedness, minimum current and maximum reliability are prime considerations; also in aerospace projects requiring maximum efficiency and reliability. Sonalert is also used in volatile atmospheres where high density gas vapor could cause explosion. All have special silicon transistors and nylon case. Screw can be removed and solder or arkless quick-connect connections can be made. Max. panel thk. ¼". No detailed MIL spec but widely used in military and aerospace applications; ask for Bulletin 9-398 for additional details. For a 48-page booklet on Sonalert uses, request Mallory Form 9-406.

MINIATURE TOGGLE SWITCHES

Ultra-small toggle switch combines high current capacity and long life in a miniature package. Ideally suited for miniaturized equipment with front and rear panel space limitations. Toggle switches rated 5 amps at 115 VAC and employ solid state silver contacts (center terminal copper with silver plate) with well spaced terminals for easy soldering. **Current Rating:** 5 amps at 115 VAC or 28 VDC. **Initial Contact Resistance:** Less than 20 milliohms at 2–4 VDC, 1 amp. **Insulating Resistance:** Greater than 1000 megohms between terminals and case ground at 500 VDC. **Operating Force:** Less than 3.3 lbs. **Life Cycle:** 80,000 cycles (SPDT); 50,000 (DPDT); 25,000 (3PDT, 4PDT) on/off operations, switching actions at rated current. **Voltage Breakdown:** 1000 VAC between terminals and case ground for one minute. **Case Material:** Black phenolic resin. **Contact and Terminals:** Solid silver (center terminal copper with silver plate). **Bushing Size:** Standard ¼-40 nut with keyway. **Overall Size:** SPDT, 1.353″ (1.278″ for 105D) x 0.492″; DPDT, 1.353″ (1.278″ for 205N) x 0.492″; 3PDT or 4PDT, 1.383″ x 0.492″.

PUSHBUTTON SWITCHES

Momentary contact pushbutton switches available in both snap action "feel" and butt contact styles. Contacts on "P" style are gold on brass rated at 1 amp resistive load at 120 VAC. Designed for use in low energy circuits. Contacts on "MP" style are coin silver rated at 1 amp resistive load at 120 VAC. "P" style can be wired as normally open or normally closed. Nylon snap-on caps for "P" series available in white, black, red, orange, yellow, green, blue, brown or gray; black supplied unless otherwise specified.

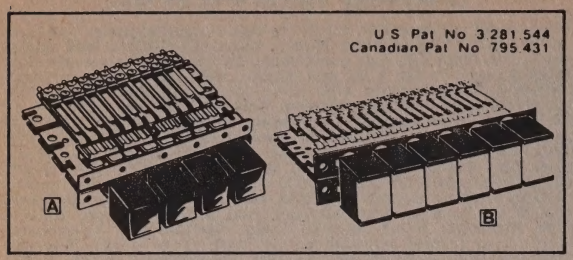
LITTEL "MULTI-SWITCH"® SWITCHES



Compact, versatile high-quality, multiple station pushbutton switches. Standard functions available: **Interlock**—actuating a pushbutton automatically restores to normal the pushbutton previously actuated. **Lock-Out**—prevents operation of more than one pushbutton at a time. This feature is included on all interlock frames. **Push-Lock/Push-Release**—pushbuttons locks when depressed and is released when again depressed. Buttons on $^{5}/_{8}$" centers.

SERIES 35000 NON-ILLUMINATED SWITCHES

A Switches mount on panels up to $^{1}/_{8}$" thick. Provides 6PDT switching in .6 sq. in. Narrow rectangular silhouette permits stacking in parallel rows on $^{3}/_{4}$" centers. Only $2^{5}/_{16}$" depth behind panel. End brackets have four 6-32 tapped mounting holes. A square black pushbutton is furnished for each station. Plungers made from .050" x .187" steel will accept std. push-on pushbuttons as well as Switchcraft pushbuttons, Series 590, A-590, C-590, D-590, E-590, 600 and "Glo-Button" pushbuttons Series X, Y, and Z. On **2-C PER STATION** switches, each station includes two No. 83P switch stacks. On **4-C PER STATION** switches, each station includes four No. 83P switch stacks. The following part numbers cover completely assembled and factory tested switches.

Part Numbers/2-C PER STATION

SERIES 37000 SINGLE LAMP ILLUMINATED SWITCHES

B Identical in switching functions and characteristics as non-illuminated Series 35000, but features large rectangular shaped pushbuttons which serve as a color or legend coded panel indicator light which actuates up to 6PDT switching. Switches mount in parallel rows from 1" centers and up. Depth behind panel $2^{5}/_{16}$". Pushbuttons with large transparent clear display screen and white legend insert, can be hot stamped or engraved, are furnished for switching and release stations. On **2-C PER STATION** switches, each station includes two Nos. 83P switch stacks, one No. H-83P lighting stack and one No. H (convenience) lighting spring. Lighting arrangements such as "L"—pushbuttons light in "IN" position; "M"—pushbuttons light in "OUT" position; and "N"—pushbuttons light in both "IN" and "OUT" positions, can be effected by wiring direct to the No. H-83; and No. H lighting stacks. A single 6V or 28V lamp can be used at each station, not furnished with switch. The following part numbers cover completely assembled and factory tested switches.

Part Number/2-C PER STATION						
Interlock with Lock-Out	Push-Lock/ Push-Release	No. of Stations	Ea. 1-9	10-24	25-49	50-99

DW "MULTI-SWITCH"® SWITCHES

New, economy multiple station pushbutton switch. Max. switching per station is 4-C (D.P.D.T.). Each station utilizes specially designed switching modules with U-shaped, high reliable bifurcated contactors rated at 3 amps, A.C.; 0.5 amp, D.C., 125 V, non-inductive load. DW "Multi-Switch"® switches are available in 5 series: 65000, 67000. All provide standard functions: **Interlock**—actuating a pushbutton automatically restores to normal the pushbutton previously actuated. **Lock-Out**—prevents operation of more than one pushbutton at a time. This feature is included on all interlock switches. **All-Lock**—all pushbuttons, except release, lock when depressed. All pushbuttons restored to normal by actuating (momentary) release pushbutton. **Push-Lock/Push-Release**—pushbuttons lock when depressed and release when again depressed. **All Series**—pushbuttons on $^{5}/_{8}$" centers.

SERIES 65000

Series 65000 switches are completely assembled and tested at the factory. All standard assemblies have 2-C and or 4-C switch modules with solder-lug terminals. Integral black pushbutton-actuators at each station. Eliminates possible pushbutton loss. Mount with only two No. 6 screws (not furnished). Depth behind panel—2-C assemblies—$1^{1}/_{16}$"; 4-C assemblies—$1^{13}/_{16}$". Overall switch height is $^{27}/_{32}$". The following part numbers cover a completed switch assembly. Only the most commonly used switch assemblies are listed here:

SERIES 67000

A New illuminated (Series 67000) DW "Multi-Switch"® switches retain all quality construction and reliable switching of Series 65000. Series 67000 has large square pushbutton, B providing brilliant, evenly-diffused lighting. Standard white pushbuttons easily snap-off actuators for simple front-of-panel relamping. Lamp sockets, at each station, accept a single 6V, and/or 28V lamp. Lamp socket terminals separate from switching terminals. Series 67000 mount with only two #6-32 machine screws (not furnished). Two #6-32 tapped studs ("stand offs") are integral with the frame and are used to provide proper positioning of the switches. Depth behind panel $1^{1}/_{2}$" (2-C switching); $2^{1}/_{8}$" (4-C switching). Series 67000 is $1^{1}/_{16}$" high.

SERIES 38000 TWIN LAMP ILLUMINATED SWITCHES

B Same compact assembly and versatility as Series 37000, except features twin lamp illumination at each station for redundant or two color, split-face (alternate) lighting. On **2-C PER STATION** switches, each station includes three No. H-83P lighting switch stacks and one No. H lighting spring. This arrangement provides up to 3PDT circuitry. One pole is needed for lighting lamps. Series 38000 accepts standard industry No. 718 flange base lamp. Two at each station. Lamps are not furnished with switch. The following part numbers cover completely assembled and factory tested switches.

Part Numbers/2-C PER STATION						
Interlock with Lock-Out	Push-Lock/ Push-Release	No. of Stations	Ea. 1-9	10-24	25-49	50-99

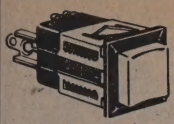
U.S. Pat. No. 3,446,467



"UNISWITCH" SWITCH

New, low cost momentary action pushbutton switches. Only 1 1/16" sq. and mount in a single panel cutout, .615" sq. from front of panel. Contacts rated at 250 ma., 30 watts max., A.C. non-inductive load. **Series US** non-illuminated. **Series LUS** illuminated. Use one 6V, 1/2 watt, T-1 3/4 bi-pin lamp. (Not supplied with switch.). Lamps replaced from front of panel. Both switches incorporate a special "Adjusto-Clip" which allows simple, "snap-lock" mounting. The "Uniswitch" switches mount in panels 1 3/16" min. to 1/64" max. thick in .615" sq. holes. Depth behind panel only 15/16" max. "Uniswitch" switches available in 1-A circuit (SPST n.o.).

"TINY-SWITCH" PUSHBUTTON SWITCHES

Series 950, red button, and Series 960, black button, sub-miniature pushbutton switches for limited space applications. Integral contacts suitable for low level circuits where contact resistance is not important. Mounts in 1/4" hole in panels up to 3/32" thick; depth behind panel 3/8".

"BOX SWITCH" SERIES BXR

Miniature non-illuminated momentary pushbutton switch offers broad switching capabilities in minimum panel space. 11/16" square switch mounts in panels up to 9/32" thick and occupies only 17/32" maximum behind panel space. (17/32" less panel thickness.) Molded plastic body protects against dust and dirt; prevents bending/disfiguring of contacts caused by excessive handling. Attractive bezel frames pushbutton and acts as built-in escutcheon plate. Unique "Adjusto-Clip" mounting; provides snap-in, front of panel mounting in panels from 3/64" to 9/32" thick in .615" square holes. Red, black, green, or white pushbuttons with 7/64" button stroke. Integral slide contacts of special spring tempered phosphor bronze, silver-plated, rated at 250 ma., 30 watts max., A.C., non-inductive load. Choose solder lug, quick connect (AMP FASTON Series 110) or P.C. terminals.

UNIPUSH SWITCHES, SERIES UP

Low-cost, single-station, pushbutton switches with gold alloy contacts to provide up to 10 million operations (1-10 ma., 4-14 vdc, resistive). Fig. A **Series UP-100:** momentary action, front-of-panel mounting, solder lug quick connect terminals. **Series UP-200:** same as Series UP-100 except P.C. Terminals; 1-A and 2-A switching only. **Series UP-500:** push-lock, push release function, front mounting, solder lug quick connect terminals.

SERIES PL "PUSH-LITE" SWITCHES

"Push-Lite" switch is the first completely enclosed, lighted pushbutton switch which features long-life, highly-reliable leaf-spring switching. Available in **momentary** or **push-lock/push-release** functions; single or twin lamps; with or without barriers; full or split-face display; 1-C to 4-C switching; black switch housing. Standard pushbutton color is **white.** Molded crossbar palladium contacts rated at 2 amps, 200 watts, max., A.C., non-inductive load are standard. Mount with clamp-type bracket, no screws, washers or nuts needed. H **Flange** mounting requires 1" x .875" panel cutout; J **barrier** mounting requires 1 3/16" x .875" panel cutout. Can be mounted in vertical or horizontal rows and in matrixes. Depth behind panel only 1 1/4". "Push-Lite" switch accepts standard T-1 3/4 flange base lamps (not furnished with switch) in either 6V or 28V. Specify one lamp for single lamp type or two lamps of twin-lamp type when redundant or split-face lighting is required. Barriers optional.

SERIES PL-9000 "PL" INDICATORS

Designed as perfect match for front panel appearance of "Push-Lite" switches—but functions only as a lighted indicator. Create unlimited combinations of rows and/or matrix arrays with or without "Push-Lite" switches. Mounts same as "Push-Lite"; behind panel depth 1 25/64" max. Uses same lamps, color filter snap inserts, light divider, and optional mounting barriers as "Push-Lite" switches.

Part No.	Description	1-9	10-24	25-49	50-99	100-249
PL-9105	Black housing; uses 1 or 2 lamps. White screen.	2.24	1.68	1.54	1.40	1.06

PUSHBUTTONS/INDICATOR SCREENS

Series PL-500 Pushbutton/Indicator Screens are available separately for use with "Push-Lite" or "PL" Indicators for in-the-field substitution and or replacement.

Part No.	Color	1-9	10-24	25-49	50-99	100-249
PL-512	Clear	.20	.15	.138	.125	.10

LIGHT DIVIDER

Light divider for use in standard "Push-Lite" switch pushbuttons and "PL" Indicator screens to separate lighting from twin-lamps. Order a light divider for each switch or indicator specified where split-face lighting is desired.

Switchcraft No.	Ea. 1-9	10 -24	25 -49	50 -99	100 -249
PL-551	.08	.06	.055	.05	.04

OPTIONAL MOUNTING BARRIERS

Barriers, molded of plastic, can be used to separate "Push-Lite" switches, "PL" Indicators, or combinations of "Push-Lite" switches and "PL" Indicators and prevent accidental operation of adjacent switches. **Series PL-100** is an end barrier. One is required when switches are adjacently mounted; two are required when switches are individually mounted. **Series PL-200** is a center barrier. Two are required between switches when adjacently mounted. "Push-Lite" switch J (above) is shown with two. Part No. PL-102 end barriers installed.

Part No.	Description	1-9	10-24	25-49	50-99	100-249

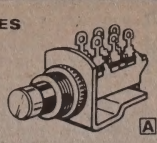
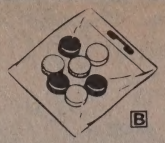
Pushbutton, Lever Switches

DVR SWITCH SERIES DVR-2000





Recognition of individual switch positions occurs quickly, even from a distance, with this single station non-illuminated pushbutton switch. With plunger in the "out" position, a black recognition color band contrasts with the recognition cap color. With plunger set to the "in" position, only the colored recognition cap is visible. Special copper alloy, silver plated, U-shaped contactors assure uniform tension. Contactors are rated at 0.5 amp, D.C., 3 amps, A.C., 125 volts, non-inductive load. Threaded bushing mounts in a single-hole .468" ($^{15}/_{32}$") diameter in panels up to $^{1}/_{4}$" thick. Mounting centers are $^{1}/_{4}$" minimum. If non-turn mounting is required, bushing has machined slot to mate with keyed panel hole. Nickel plated copper alloy mounting nut is supplied. [A] Series DVR-2000: 1-C or 2-C circuitry: requires $^{15}/_{32}$" behind panel; 3-C or 4-C circuitry requires $^{21}/_{32}$" behind panel. Solder lug terminals have $^{3}/_{64}$" diameter hole and wrap-around wiring notches. Order Recognition Color Cap Kits for custom color coding according to your individual requirements.

"LITTEL-SWITCH" SWITCHES

Series 100, 200, tiny momentary contact pushbutton switches. Rugged, dependable action. All contacts insulated from panel bushing with interlocking phenolic washers. Series 100 and 200, springs are of nickel silver, recommended only for low level circuits where contact resistance is unimportant. One-piece plastic button and shaft in red or black. Mounts in $^{7}/_{16}$" hole in panels up to $^{1}/_{4}$".

Part Nos. Red Button	Part Nos. Black Button	Action	Schem.	Ea. 1-9	10-24	25-49	50-99	100-249

"BUTTON-SWITCH" SWITCHES

Series 903, 923. Usually small, momentary action pushbutton switches. Enclosed in metal housing; black or red plastic button. Series 903, Fig. F, back panel mounting; $^{15}/_{32}$" hole, mounts in panels up to $^{19}/_{64}$" thick. Series 923, Fig. G, front panel mounting; $^{1}/_{4}$" hole, mounts in panels up to $^{3}/_{32}$" thick. Both rated at 250 mils, A.C., non-inductive load, 30 watts max.

NON-LOCKING FLAT FRAME SWITCHES

NF Switches, Series 4000, ideal for mounting in ultra-compact equipment. Only $^{1}/_{2}$" W., $1^{1}/_{8}$" L., mounts in $^{3}/_{8}$" hole in panels up to $^{1}/_{16}$" thick. Flat frame construction provides multiple pole switching with minimum depth behind panel. Fine silver contacts rated at 3 amps, 300 watts max., A.C., non-inductive load. One-piece black button and shaft $^{3}/_{16}$" diameter threaded shank.

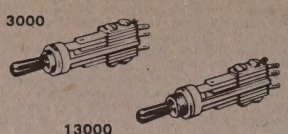
"LEV-R" SWITCHES



Small lever action switches in two and three position types, locking and non-locking action. Requires half the space usually needed for a lever switch; frame bushing and shaft nickel plated brass. Supplied with locknut and screw-on black knob. Fine silver contacts rated at 3 amps, 300 watts, max., A.C., non-inductive load. Non-locking types have spring return. Series 3000 mounts in panels up to $^{3}/_{32}$" thick; Series 13000 mounts in panels up to $^{1}/_{4}$" thick. Both Series are $^{7}/_{8}$" wide; requires $2^{1}/_{4}$" behind panel; mounts in single $^{1}/_{2}$" dia. hole. *Add suffix letter "L" to Part No. to indicate locking type.

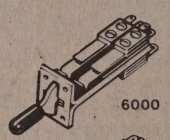
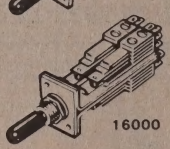
"TELEVER" SWITCHES





Series 6000 and 16000. Rugged telephone type lever switches featuring "T-Beam" frame construction which results in a relatively light construction with sturdiness of a structural "T-Beam". Available in two and three positions, locking and non-locking types. Nylon rollers on the lever actuate the special nickel silver springs, providing smooth action; assures long dependable spring life. Welded crossbar palladium contacts are standard, rated at 2 amps, 200 watts max., A.C., non-inductive load. Series 6000 mounts with four No. 3-48 machine screws. Mounting centers $^{17}/_{32}$" x $^{13}/_{16}$", mounts in panels up to $^{1}/_{4}$" thick. Series 16000 features single hole mounting; $^{15}/_{32}$"-32 threaded bushing. Mounts in $^{1}/_{2}$" dia. hole in panels up to $^{1}/_{4}$" thick. Part No. 545, "Stop Plate" provides positive "stops" for two position action. Both Series switches supplied with black insulated knob. All have tinned solder-lug terminals. *Add suffix letter "L" to Part No. to indicate locking type. Series 16000 non-locking type can be converted to locking type by removing "Stop Plate".

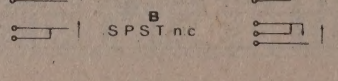
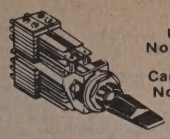
BASIC SCHEMATIC CIRCUITS

Switch circuitry can be described as combinations of basic schematic circuits as shown below. N.O. means normally open; N.C. means normally closed.



"LT SWITCH"



U.S. Pat. No. 3,433,906

Canadian Pat. No. 850,234

Series 41000. Smallest, high-quality, telephone type lever switch available. Two or three position types with positive locking and/or non-locking action. Special damping block guards against transient leaf bounce. "Can't-Cheat" detent guide prevents accidental actuator by-pass of switching positions. Switch has rigid "U"-shaped, twin girder frame. Its parallel steel members terminate in an interlocked box where spring combinations are mounted. The special long life, nickel-silver springs can be individually fastened to any one of the frame's four switch stacks mounting positions. Welded crossbar palladium contacts rated at 2 amps, 200 watts max., A.C., non-inductive load are standard. Series 41000 mounts on $^{23}/_{32}$" centers in a $^{15}/_{32}$" dia. hole in panels up to $^{1}/_{4}$" thick. Requires only $2\,^{1}/_{8}$" depth behind panel. The bushing includes a keyway to accept the non-turn ring which prevents switch turning or twisting in panel. *Add suffix "L" to Part No. to indicate locking type.

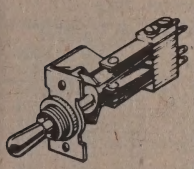
"FEATHER-LEVER" SWITCHES



Miniature lever switches, lightweight, compact, mount on $^{7}/_{16}$" centers. Available in 2 and 3 position, locking and non-locking types. Actuator designed with nylon roller for smoother, easy lever operation over entire life of switch. Rugged steel frame withstands rough usage, shock and vibration. Nickel silver springs with fine silver contacts, rated at 2 amperes, 200 watts, max., A.C. non-inductive load. Supplied with black plastic push-on knob. Series 29000, with bushing, mounts in $^{9}/_{16}$" O.D. panel hole. Supplied with locknut. Require only $^{19}/_{32}$" depth behind panel, mount in panels up to $^{1}/_{8}$" thick.

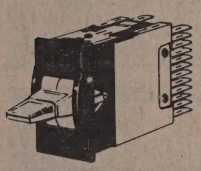
"LEVER-LITE" III* SWITCHES SERIES 84000



"Lever-Lite" III, Series 84000, is the third generation illuminated lever switches which embody the most modern electrical, mechanical, and human factors design concepts. Available in 2- and 3-position types with locking, non-locking, and talk-listen functions. Contact springs are silver plated phosphor bronze. Contacts are welded crossbar palladium rated at 2 amps, 200 watts max., A.C., non-inductive load.

Lever illumination is multi-color, i.e., 2-position switches have AMBER color (NEUTRAL position) and GREEN (DOWN position); 3-position switches have RED (UP position), AMBER (NEUTRAL), and GREEN (DOWN position). Switch uses one, standard T-$1\,^{3}/_{4}$ flange base lamp (not supplied).

"Lever-Lite" III is mounted, relamped (without tools), terminated, and removed from front of panel. Color filters changeable from front. Terminals are solder lug type, which also accept AMP 110 FASTON.

Mounting hole is $^{7}/_{8}$" x $1\,^{1}/_{2}$". Behind panel dimensions are $1\,^{3}/_{8}$" H. x $^{3}/_{4}$" W. x $1\,^{13}/_{16}$" D. maximum.

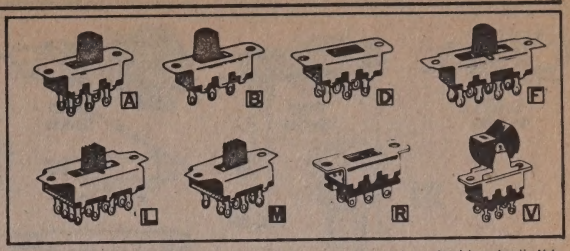
*Add suffix "L" to part number to indicate locking type.



Series 46000R, 49000, 50000, 51000R, low-cost, precision "double-wipe" slide switches. Switches use special U-shaped, bifurcated sliders to assure continuous wiping action. Contacts rated at 0.5 amp, D.C., 3 amps, A.C., 125 volts, non-inductive load. Standard solder lug terminals have a $^{3}/_{64}$" dia. center hole and wrap-around notch for wiring ease. Most switches furnished with black $^{11}/_{32}$" knob and .140" ($^{9}/_{64}$") dia. mounting holes. Nos. 46206LFR, 46256LFR flush screwdriver actuated knob. All slide and rocker switches are U.L. approved unless otherwise noted.

New Phase III Switches, Series 46000E, high performance switches, feature glass filled nylon terminal boards, allowing excellent mechanical stability, high leakage resistance, the ability to withstand high temperatures, flame retardance, and self extinguishing characteristics. Standard knob color is black. Terminal holes in solder lug are .070" x .085" and accept wires as large as #14 AWG. Series 46000E, are U.L. and C.S.A. listed.

SERIES 46000R AND 46000E
2 AND 3 POSITION GENERAL PURPOSE TYPE

Series 46000R rated at 3 amps, A.C., 0.5 amp, D.C., 125 volts, non-inductive load. Nos. 46206LFR and 46256LFR feature a flush screwdriver slotted knob. All Series 46000R U.L. listed. Series 46000E, 2 position types with locking or momentary functions. U.L. and C.S.A. listed. Rated at 0.5 amp, D.C., 3 amps, A.C., 125 volts, non-inductive load. Unless otherwise indicated, switches have non-shorting contacts and black nylon knob with serrated crown. Nos. 46256LFE have flush actuators.

Three position types with positive center detent action. All have shutter type dust cover to prevent dirt and dust from contaminating switch contacts. Series 46300LDR type—locking in all positions.

SERIES 51000R
2 POSITION ROCKER SWITCHES

Compact rocker switches offer same quality and dependability as standard slide switches. Rocker pivot mounting allows free actuation of switch mechanism. Black rocker knobs. Series 51000R has rugged rocker bracket, precision welded to standard flush switch housing. U.L. listed. Black nylon rocker knobs have legend areas and serrations on operating faces. U.L. and C.S.A. listed.

NEON PILOT LIGHT ASSEMBLIES

BNE Series—Compact lens assembly protrudes slightly above panel; mounts with single 5/16"-32 nut. Operates from 75 VDC without resistor, 115 VAC with resistor (150K for standard intensity, 33K for high intensity); resistor not supplied unless otherwise indicated. Temperature range, −10° C to +70° C. **BNF Series**—Similar to BNE, but with long lens assembly extending further beyond panel for brighter illumination. **BND Series**—Similar to above series, but with square lens assembly; mounts in 3/8" hole. Specify red, amber, clear or white for all models.

Alco No.				Net Each, Lots of

*Solder tin dipped, hi-temp leads, 24 AWG wire.

PANEL MOUNTED ASSEMBLIES

Model PLN-100 incorporates the crater electrode T-1 3/8 MNE-4L in a black phenolic case. Model PL-105 is ultraminiature in size, a mate to PLN-100. With 10" insulated leads, mt. in 1/4" hole.

PLN-100A	Neon lamp	$0.99	$0.67	$0.59	$0.50
PL-105	Incandescent lamp	.89	.61	.53	.45

EXTRA LONG NEON LAMP

Replaces readout tubes in "overrange" position of digital voltmeters; also usable as "+" or "−" display or where a longer light source than a conventional NE-2 is needed. Bare leads. **Breakdown:** 90 VDC. **Maintained Voltage:** 65 VDC. **Design Current:** 1.3 mA. **Life:** 2,000–8,000 hours.

NE-211	11 mm glow	$0.49	$0.33	$0.29	$0.25
NE-214	14 mm glow	.69	.47	.41	.35

HIGH INTENSITY NEON LAMP

High intensity lamp with lens end magnification. Ignition voltage, 60 VAC or 67 VDC. Recommended 33K ohms ballast resistor at 115 VAC.

NE-1H	With short bare leads	$0.69	$0.47	$0.41	$0.35
NE-1-HL	With 10" insulated leads	.79	.54	.47	.40

SNAP-FIT 110-125 V NEON LIGHT INDICATORS

Unit snapfits into 5/16" mounting hole. Has built-in 30K resistor. Leads, approx. 6" long with heavy insulation, withstand temperatures up to 105° C. Models BIM-1, BIM-1B lenses extend only .075" from panel front. Models BIM-4C, BIM-4E have elongated lens for better side illumination, extend .338" from panel front. Acrylic lens, nylon body. Specify color: Red, amber, clear. UL Listed.

BIM-1	**Long body, White trim**	$0.79	$0.54	$0.47	$0.40
BIM-1B	**Long body, Black trim**	.79	.54	.47	.40
BIM-4C	**Long body, Chrome trim**	.84	.57	.50	.42
BIM-4E	**Short body, Chrome trim**	.84	.57	.50	.42
BIM-W	**Ring fastener**	.....	.....	2.50/c	2.00/c

MINIATURE T-1 1/8 NEON LAMPS

Alco's smallest neon lamp is unique for its size and brilliance. Ignition voltage, 75 VAC or 95 VDC; current should be limited to 800 μA; 150K series resistor recommended for 115 V operation, 180K for 220 V operation. Light output variations possible with changes in voltage or series resistance, with resultant changes in life expectancy of 10,000 hours. Bare leads.

Alco No.	Description	Net Each, Lots of 1-24	25-99	100-499	500-999
MNE-3	Standard intensity	$0.59	$0.40	$0.35	$0.30

NEON LAMP HOLDERS

Low-cost snap type holders for miniature neon lamps such as NE-2; available in five different sizes for particular panel thicknesses; write for details. Specify red, amber or clear; supplied less lamps.

BNG-51, 52, 53, 54, 55	Snap-type neon lamp holder	$0.25	$0.17	$0.15	$0.13

INCANDESCENT LAMP HOLDERS

Relampable miniature holders have 3/8" dia. lens. **MCM-100** is .7" long and mounts with 5/16"-32 nut; for use with No. 685, 718, 1112 or 856 lamp, below. **MCM-175** is 1" long and mounts with 3/8"-32 nut; for use with No. 815, 381, 330, 382, 327 or 387 lamp, below. Specify red, green, amber, blue or white lens.

MCM-100T	Subminiature flange holder	$1.49	$1.01	$0.89	$0.74
MCM-175T	Miniature flange holder	1.69	1.15	1.01	.85

INCANDESCENT LAMP ASSEMBLY

Relampable assembly comes with #680 T-1 lamp (see below); lens unscrews to expose lamp. Specify red, green, blue, yellow or white lens.

BFK-5	Incandescent assembly	$1.79	$1.22	$1.07	$0.90

INCANDESCENT LAMPS

Designed for applications where space is at a premium and long life is required. Current ratings are ±10%.

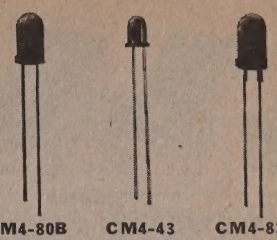
LED Indicators



CM4-7000, CM4-8000 SERIES RED T-1¾ SOLID STATE SUBMINIATURE LED INDICATORS

CM4-7 Series bi-pin and CM4-8 Series midget flange LED indicators interchangeable with industry standard T-1¾ incandescent lamps. Available with clear or red, transparent or translucent (diffused) epoxy lens. Bi-pin base has nylon shell, gold-plated nickel pins. Midget flange base has nickel-plated brass shell, phenolic insulator and solder contact. **Luminous Intensity:** 2.0 mcd at 20 mA. **Wavelength:** 660 nM at peak. **Size, CM4-7000 Bi-pin:** .230″ dia. max. x .625″ long, plus two .25″, .020″ dia. gold plated leads. **CM4-8000 Midget Flange:** .245″ dia. lens, .285″ dia. flange, .625″ long.

CM44 SERIES SOLID-STATE LED CARTRIDGE INDICATORS RED-AMBER-GREEN

LED cartridge indicators in red, amber and green have two transparent cap styles (short cylindrical or round capt) utilizing an internal fresnel ring pattern for optimum visibility. Red GaAsP LED provides typical peak wavelength of 660 nM, Yellow GaP LED—600 nM, Green GaP—560 nM. CM44 available in variety of brightness, color and cap styles; rated voltages available in 10 and 20 mA, although only 20 mA is listed in table. Black anodized aluminum housing, black nylon insulator, stainless steel pins. Further information available on request. Size: .330″ dia. x 1.140″ long, max.

†CML Nos. listed are for short cylindrical cap style. To order round cap, change first digit after 44 from 1 to 2 (e.g., **CM44-210011: Round cap, red transparent**). *Requires external current limiting resistor.

CM4-20, CM4-21, CM4-22, CM4-23 RED

Each unit supplied with snap-in mounting clip for panel mounting. Rigid terminals allow device to be connected in a variety of ways, soldered, welded or wire-wrapped, as well as being pluggable. Tin-plated leads. Choice of clear and red lenses, transparent or translucent. **Power Dissipation:** 180 mW (derate 2.0 mW/° C above 25° C). **Forward Voltage:** 1.6 volts typical at 20 mA, 2.0 volts max. **Reverse Voltage:** 3 volts. **Storage and Operating Temperature:** −55° C to +100° C. **Wavelength** 660 nM at peak. **Turn On and Turn Off Time:** 50 ns. **Soldering Time at 260° C:** 5 seconds. **Size:** .190″ dia. x .340″ length, plus two .55″ leads. **Hole for mounting clip:** ¼″ dia. **Max. Panel Thk.:** ⅛″.

CML No.	Lens Tint	Lens Diffusion	Luminous Int. @ I_F = 20 mA Typical	Viewing Angle Typical

100–999 ..... **$0.35**; 1000–Up ..... **.32**

CM4-43B RED

The red diffused lens and T-1 size make the CM4-43B the perfect choice for high-density array and indicator applications. **Luminous Intensity:** 1.0 mcd at 20 mA. **Peak Wavelength:** 660 nM. **Power Dissipation:** 100 mW (derate 1.3 mW/°C above 25° C). **Forward Voltage:** 1.6 volts typical at 20 mA., 2.0 volts max. **Reverse Voltage:** 5.0 volts. **Turn On and Turn Off Time:** 50nS. **Size:** 0.120″ dia. max. x 0.2″ length, plus two 1.00″ min. leads.
No. CM4-43B—Net Each, Lots of: 1–99 ..... **$0.58**
100–999 ..... **$0.38**; 1000–Up ..... **.35**

CM4-50 SERIES RED

Small size, gallium arsenide phosphide light-emitting diode packaged in a planer configuration for use on circuit boards or where size and low cost are major considerations. Clear epoxy lens for uniform brightness. Tin-plated leads can be bent at a right angle and inserted through the holes of a PC board for dip or wave soldering. **Power Dissipation:** 80 mW (derate 1.0 mW/°C for CM4-50; 1.6 mW/°C for CM4-53). **Forward Voltage:** 1.6 volts typical at 20 mA, 2.0 volts max. **Reverse Voltage:** 3 volts. **Storage/Operating Temperature:** −55° C to +100° C. **Wavelength:** 660 nM at peak. **Turn On/Turn Off Time:** 50 ns. **Soldering Time at 260° C:** 5 sec. **Size:** .100″ dia. x .100″ h. Length, including leads, .6″ min.

CML No.	Lens Tint	Lens Diffusion	Luminous Int. at I_F = 20 mA Typical	Net Each, Lots of 1-99	100-999	1000-Up

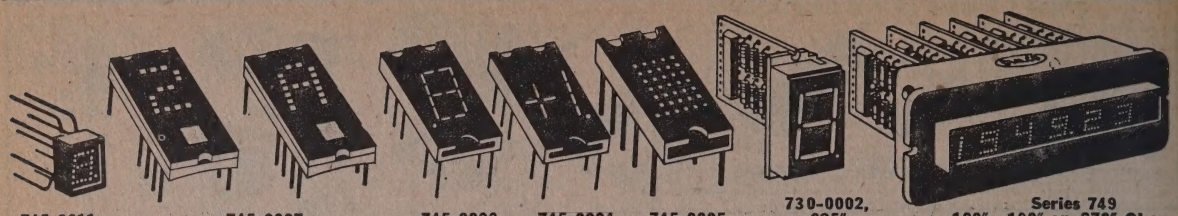
100–999 ..... **$0.23**; 1000–Up ..... **.21**

DIALIGHT LED READOUTS AND ACCESSORIES

DIALCO®



745-0011 745-0007 745-0006 745-0004 745-0005 730-0002, .625" Series 749 .100", .190" or .270" Char.

MODEL 745-0011 DIODE-LITE® READOUT
(CHARACTER HEIGHT .100")

Single digit readout module designed for use in hand operated; portable or desk top instruments such as calculators, data terminals, test equipment and status indicators. Solid state, extremely long life and high reliability. Highly legible bright red characters read at 3 to 5 ft.; wide 140° viewing angle. Fully encapsulated, withstands rough production handling and user environments. Variable brightness; compact, 12 digits in less than 3" panel width; IC compatible. **Forward Voltage:** 1.65 volts at 5 mA. **Peak Wavelength:** 660 nM bright red. **Reverse Voltage:** 3 V. **Operating Temperature Range:** −20° C to +100° C. **Size:** Overall, .220" w. x .125" d. x .270" h.; digit, .090" w. x .125" h. **Characters:** 0 to 9 with decimal point.

SERIES 745 READOUTS, HEXADECIMAL DISPLAY
(CHARACTER HEIGHT .270")

Compatible with most TTL and DTL circuits. Standard 14 or 16 pin DIP. Gallium arsenide phosphide light source, single-plane wide angle visibility. Available with left or right decimal. **Reverse Voltage at 25° C Ambient:** 6 volts, each segment; 3 volts, decimal point. **Peak Forward Current:** 75 mA. **Continuous Forward Current:** Each segment or decimal point, 30 mA; total for 745-0006, 240 mA; total for 745-0004, 150 mA. **Luminance:** 550 fL. typical. **Wavelength at Peak Emission:** 6500° A. **Static Forward Voltage:** 3.2 V typ. **Ambient Temperature Range:** 0° to 70° C. **Size:** 745-0006, overall, .400" w. x .120" d. x .740" h.; digit, .187" w. x .270" h. 745-0004, overall, .400" w. x .120" d. x .740" h.; digit, .270" h.; plus sign, .130" w. x .170" h. **Characters:** 745-0006, 0 to 9, five special functions and blank (total 16); 745-0006 has decimal point to left. 745-0004, plus-minus one with a decimal point. Model 745-0007 has hexadecimal display with left and right hand decimals. Model 745-0008 has numeric display with left hand decimal including latch. Model 745-0009 has numeric display, left hand decimal, plus counter and latch.

MODEL 745-0005 ALPHA-NUMERIC DISPLAY
(CHARACTER HEIGHT .300")

Gallium arsenide phosphide display mounted on a 14 pin dual inline substrate and cast within an electrically non-conductive transparent epoxy. High brightness, low power requirements, single-plane wide-angle visibility, compatible with USASCII and EBCDIC codes. Complete alpha-numeric and symbol capability, 35 dot matrix. 5 x 7 array with X-Y select and decimal point. **Reverse Voltage at 25° C Ambient:** 3 volts. **Peak Forward Current:** Each diode, 100 mA. **Continuous Forward Current:** Each diode, 20 mA; total, 400 mA. **Luminance:** 300 fL typical. **Wavelength at Peak Emission:** 6500° A typ. **Static Forward Voltage:** 1.6 V typ. **Ambient Temperature Range:** 0° to 70° C. **Size:** Overall, .400" w. x .120" d. x .740" h. **Characters:** Alpha-numeric with decimal point.

SERIES 730 DIODE-LITE READOUTS
(CHARACTER HEIGHT .625")

Unique lens design in seven segment format results in bright highly legible red characters with lowest cost per character for comparable size. Available in green on special request. **Model 730-0002:** Decoder/driver requires four lines or bits of information in a 8421 BDC code for each character in display. Terminals are brought out on PC board where user has the option of wiring directly to it or using an edge connector, automatic blanking of leading and/or trailing edge zeros, resulting in easily readable displays. Display malfunction can be checked by built-in lamp-test. Model 730-0002 includes decimal point. **Models 730-0004 and 730-0005:** These units require a resistor for each LED. Resistor value is 180 ohms ¼ watt for 5 volts operation. 730-0004 includes decimal point, 730-0005 is plus-minus one module with decimal point. **Model 730-0011:** Plus-minus one module with decimal point with resistors. **Model 730-1002:** Readout with decoder/driver. **Model 730-1005:** Plus-minus. **Model 730-1011:** Plus-minus with PC board. SPECIFICATIONS: **Supply Voltage per Character (Typical):** 730-0002, 5 V at 175 mA; 730-0004, 5V at 120 mA; 730-0005 and 730-0011, 5V at 105 mA; 730-1002, 5 V at 281 mA; 730-1005, 5 V at 175 mA; 730-1011, 5 V at 175 mA. **Logical Inputs:** Four lines of BCD per character. **Logic "1":** 2.4–5.5 volts. **Logic "0":** 0–.8 volt sink mA. **Operating Temperature:** 0–70° C. **Size:** .688" w. x .473" d. x 1.375" h. all models; Model 730-0002 with 1.589" x 1.062" h., decoder/driver; Model 730-0011 with 1.589" x 1.062" h. resistors card.

SERIES 730 FOR BEZEL ASSEMBLY MOUNTING

Same as Series 730 above, but mounts in Series 733 bezel assembly.

730-0007—Same as 730-0002. **730-1007**—Same as 730-1002.

SERIES 749 READOUT ASSEMBLIES
(CHARACTER HEIGHT .100", .190", .270" & .300")

The 749 Series displays are supplied with a stylish black bezel for simplified panel mounting of multi-digit groupings. The displays feature bright, highly legible characters in a 7-segment format, .100", .190", and .270" in height. The alphanumeric display is a 5 x 7 dot matrix, with a .300" high character. When supplied with decoder/drivers, latch and counters, all components are either mounted on a PC board, or provided as an integral MSI chip, with terminations provided for automatic blanking of leading and/or trailing edge zeros and for intensity control. The user has the option of hard wiring to the board or using edge card connectors.

249 SERIES ULTRAMINIATURE INDICATOR LIGHTS WITH RED, GREEN OR YELLOW DIODE-LITES (LED)

Complete solid state indicator package consisting of light source, housing and lens, ready for permanent panel mounting. Light source is a solid state (LED) lamp that provides the advantages of low power with extremely long life measured in years. Compatible with IC's (can be driven directly by RTL, DTL and TTL logic). Unique lens design uses an internal fresnel ring to assure maximum distribution of the light output. Positive terminal is marked "+" for proper installation. Mounting bushing and flange ring are black anodized aluminum; terminals are low carbon steel, solder plated; lens is high strength plastic. Size: 7/8" behind panel (including 3/16" terminals); 3/8"-32 threaded body with 1/2" hex nut; fits panels to 5/16" thick. Lens, 9/32" dia. x 3/16".

507 SERIES DATALAMP CARTRIDGES WITH RED, GREEN OR YELLOW SOLID STATE DIODE-LITES

Light source is a solid state lamp that provides the advantages of low power with extremely long life and reliability. IC compatible; interchangeable with standard incandescent cartridges. Oper. temperature, −55° to +60° C. For operation directly from RTL, DTL or TTL logic, the 10 mA cartridge is recommended; for optimum brightness, the 20 mA cartridge is recommended. Unique lens design features an internal fresnel ring to assure maximum distribution of light output. Polarity is marked on housing; terminal base is keyed. Housing is black anodized aluminum for high contrast; connections are stainless steel pins mounted in nylon insulated header, offset for polarization; lens is high strength plastic, permanently attached. Cartridge may be mounted with Datalamp Holder or cartridge connector with speed clip (listed below). Size, .284" dia. x 1.140" max. overall (including .203" terminals).

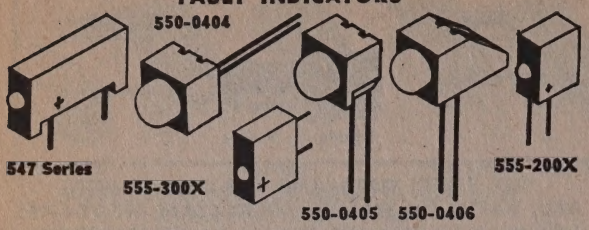
DIODE-LITE® LED LOGIC/STATE FAULT INDICATORS



SERIES 547 FAULT INDICATOR

Compact, versatile unit may be used as a fault indicator for trouble shooting complex printed circuit cards, as logic/state indicator, or indicator light. Binary data display permits stacking so multiple functions can be displayed. Features gallium arsenide phosphide LED; identified polarity; built-in series resistor. Can be driven directly from DTL and TTL logic. Gold plated leads. Size, .094″–.098″ w. x .540″ d. overall x .248″ h. Pin length, .150″.

SERIES 550 SOLID STATE LED RED, GREEN, YELLOW DIFFUSED LIGHT SOURCE

Ideal for indicator light, panel illumination, logic/state indicator, binary data display. Allows for high density packaging. Polarity identified. Model 550-0x06 designed for installations where a more rigid assembly is required. V_F: 1.8 volts typical at 50 mA, 2.3 volts max. I_F: 50 mA max. V_R: 3 volts max. BV_R: 3.0 volts min. at 10 μA, 8.0 volts typical. **Power Dissipation:** 100 mW (derate 1.3 mW/° C above 25° C). **Storage Operating Temp.:** −40° to +100° C. **Solder Temp.:** 250° C at 0.1″ from seating plane for 5 seconds. **Luminous Intensity:** 2.0 mcd at 20 mA. **Wavelength:** Red 650 nM, Green, 560 nM, Yellow 580 nM at peak. **Rise and Fall Time:** 10 ns for 10–90% of light.

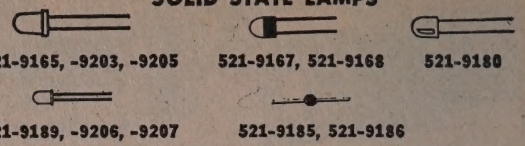
*Requires external resistor. Maximum DC forward current, 50 mA. Typical operating current, 20 mA. †For higher brightness, can be operated at 6 V at 20 mA.

SERIES 521 DIODE-LITES® SOLID STATE LAMPS



High luminance light sources offer longer lamp life, lower current at low cost. For applications requiring direct mounting through a panel. IC compatible; vibration and shock resistant; wide viewing angle. Solid state reliability, with life measured in years. Consist of a light emitting diode, completely encapsulated, with clear or diffused lens. Light source for Nos. 521-9167 and 521-9168 is contained in a black case, giving excellent contrast when "On", yet appearing black when "Off". The 521-9165 base has a flat on one side which gives the device an antirotation feature as well as indicating which lead is the cathode. Leads are flexible enough for bending and rigid enough for direct mounting to a PC board. **Forward Voltage:** 1.8 volts typical at 50 mA, 2.3 volts max. **Forward DC Current:** 50 mA max. **Reverse Voltage:** 3 volts max. **Reverse Breakdown Voltage:** 3.0 volts minimum at 10 μA, 8.0 volts typical. **Power Dissipation:** 100 mW (derate 1.3 mW/° C above 25° C). **Storage/Operating Temperature:** −40° to +100° C. **Relative Humidity:** 98% at 65° C. **Solder Temperature:** 250° C at 0.1″ from seating plane for 5 seconds. **Luminous Intensity:** 2.0 mcd at 20 mA, except 521-9167, 521-9168, 1.0 mcd; 521-9189, 1.35 mlumen. **Wavelength:** red, 650 nM; green, 560 nM; yellow, 580 nM. **Spectral Line Width:** 25 nM. **Rise and Fall Time:** 10 ns for 10–90% of light intensity for step change in current. **Angle of Half Intensity:** 35°. **Angle of 0.1 Intensity:** 85°.

*Non-diffused, balance diffused. †Rated 5 V with integral resistor.

SERIES 558 AND 559 DIODE-LITES®

Snap-in mounting design requires no additional hardware and provides quick positive insertion in panels from .031″ through .062″. The black housing enhances the contrast ratio of the high brightness LED. Available with and without integral current-limiting resistors. **Mounting Hole Size:** Series 558, .156″ dia.; Series 559, .250″ dia. **Mounting Centers:** Series 558, 0.2″; Series 559, 0.3″. **Terminals:** .020″ sq. pins for wire wrap or solder.

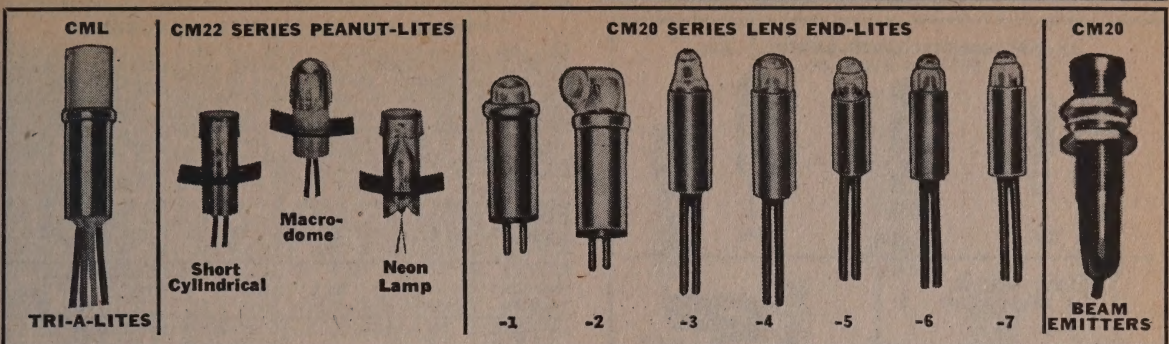
Panel Indicators



CML SERIES TRI-A-LITES

A unique indicator device that appears white in the off position and turns red, green, or yellow when an input voltage is applied to one of the color coded lead wires. Uses type T-¾ lamps rated at 5V, .115A/lamp, 15,000 hours average life. Unit mounts in a 1⁹⁄₆₄″ clearance hole with 10380 mounting clip (supplied). Housed in clear anodized aluminum with translucent polycarbonate cap. Terminates in 24 AWG stranded wire, color coded, end stripped leads. CML 9501-RGY has flush style white cap; CML 9601-RGY has a short cylindrical style white cap. Optional features are other color combinations, different lead length, hot stamped legends, and black anodized housings.

CML Number CML-	Net Each, Lots of* 1-9	10-24	25-99	100-249	250-499	500-999
9501 or 9601-RGY	$7.06	$6.48	$6.02	$5.33	$4.83	$4.28

CM22 SERIES PEANUT-LITES

Versatile, low-cost indicator assemblies with incandescent or neon lamps. Ideal for stereo amplifiers, mobile equipment, instrumentation, computer and display panels, etc. Incandescent types have high-temperature polycarbonate shells with T-1¾ lamps and 6″ wire leads, permanently potted in place for strain relief. Available in two cap styles, macrodome (Type CM22-1) or short cylindrical (Type CM22-2). Type CM22-1000 Peanut-Lites include T-2 neon lamps which snap into place in butyrate shells. All types include speed clips for mounting.

HOW TO ORDER: Insert two digits in CML number, replacing **XX**, to indicate cap color: **01**, clear transparent; **02**, red transparent; **03**, amber transparent; **04**, green transparent (incandescent types only); or **05**, white translucent. CM22-1000-01-A1A (NE-2) has clear transparent short cylindrical cap with NE-2 neon lamp.

WITH T-1¾ INCANDESCENT LAMP

Size: .340″ dia. x .800″ long; #24 AWG wire leads, 6″ long. Type B lead insulation per MIL-W-16878. Semi-resilient thermosetting resin encapsulant. Numbers shown are for macrodome cap; for short cylindrical cap, change **1** in CML number to **2**; e.g., CM22-**2**-XX-15; prices are the same.

*See How To Order information above and insert two digits in CML no. as indicated. †At 5 volts.

CM20 SERIES SUBMINIATURE LENS END-LITES

Subminiature end-lites produce axially centered spots for minimal adjustment problems and easy lamp replacement. Ideal for close proximity use with photo sensors, where an intense spot of luminous and infrared energy is required. Typical applications include encoders, tape sensors, card readers and optical scanners. Types CM20-1, -2, -17 and -19 have clear anodized aluminum cartridge body; stainless steel terminals (CM20-19 #24 AWG stranded wire leads); nylon insulation. Types CM20-3 thru -7 and -20 have gold anodized aluminum shell; #24 AWG stranded wire leads; Type B insulation per MIL-W-16878; semi-resilient thermosetting resin encapsulation. Types CM20-5 thru CM20-7 are small enough to be mounted on .250″ centers for card reader applications. **Spot Specifications:** CM20-1, -19: When projected ⅜″ from end of bulb, spot covers ⅛″ dia. target, concentric with long axis at minimum intensity of 750 ft.-candles. CM20-2: When projected 1″ from end of bulb, spot covers 1″ dia. target with minimum of 350 ft.-candles. CM20-3: When projected ¾″ from end of bulb, spot covers 1⁄16″ dia. target concentric with sleeve; intensity ⅜″ from bulb is minimum of 750 ft.-candles; spot is narrow elliptical. CM20-4: Same as CM20-3 except covers ⅛″ dia. target; spot is "round" elliptical. CM20-5 thru -7, -20 have no spot specifications, but have axially aligned lamp; CM20-17 spot is axially aligned with housing.

CM20 SERIES BEAM EMITTERS

Compact assemblies designed to project narrow cones of infrared and luminous energies over distances of 3″ to 20″. Spots produced are round, varying from ⅜″ to 1¼″. Infrared outputs are approximately 75% of input power, ideal for integration with silicon type sensors. Low power consumption (782 mW), axially aligned spots, easy mounting and long life. **Volts:** 2.3. **Current:** .340 amps, ±10%. **Average Life:** 10,000 hours. **Construction:** Anodized aluminum housing, #24 AWG wire leads, semi-resilient thermosetting resin encapsulation. **Size:** .475″ dia.; CM20-8-01, 1.33″ long; CM20-9-01, 2.08″ long.

CM39 SERIES LAMP FILTERS (Not Illus.)

Slip-on filters are translucent, precision molded silicone rubber caps; for subminiature and miniature lamps. They assume basic lamp contours, are impervious to color shift. Replaceable and reusable. Temperature range, −62° to +225° C. **TO ORDER:** Add suffix to CML Number to indicate color: **-1**, red; **-2**, blue/white; **-3**, clear; **-4**, amber; **-5**, green; **-6**, blue; **-7**, yellow.

CM21 SERIES SOCKETS FOR BI-PIN LAMPS

Pushfit Teflon® sockets accept all CM7 Bi-Pin lamps listed above. Snap directly into panels, brackets or PC boards. Type CM21-1 has beryllium copper contacts with .050″ pin centers, for T-1 lamps. CM21-2 has phosphor bronze contacts with gold over silver plating, with .125″ pin centers for T-1¼ and T-1¾.

®Registered DuPont trademark.

CM26 SERIES T-1 PEANUT-LITES

Low cost commercial substitutes for MS25446 and MS90308 indicators. Each T-1 Peanut-Lite contains a subminiature lamp sealed in a high-temperature polycarbonate housing. Lamps range from 3 to 28 volts. Can be mounted with spring mounting clips (CM26-1012) which are provided with T-1 Peanut-Lites. Type 10384 clip for circuit board mounting is also available. Three types of terminal material are available—CM26-1 has .750″ tinned wire leads; CM26-2 has .312″ long .020″ nickel pins; CM26-3 has #26 AWG stranded wire, 6″ long. White, red, amber, green, and blue caps are standard; other colors available. Also available are special length and type pins and leads. Write for information. **HOW TO ORDER:** For cap color, substitute for **XX** in CML number: **05,** white; **07,** red; **09,** amber; **10,** green; **11,** blue. Example: CM26-1-07-19 is the wire lead version with red cap and 5V, .06A lamp.

*See How To Order information above and insert two digits in CML no. as indicated.

CM25 SERIES T-1 INDICATORS

Subminiature T-1 indicators which meet MS-90308. Unbased T-1 lamp is inserted into housing and cap is snapped on to hold lamp and provide color identification. Features include dimpled terminals (patent pending) for positive electrical contact and internally flared lead guides for easy wire-terminal lamp insertion. Hot-stamped legends can be provided with new cylindrical cap style. Units are small enough to mount on .250″ centers and still allow adequate wiring room and space to replace lamp. Base and cap are polycarbonate. **HOW TO ORDER:** For **base style,** substitute for first **X** in CML number: **5,** panel mount; **6,** PC mount. For **cap style,** substitute for second **X** in CML number: **7,** round; **8,** lens; **9,** square. For **cap color,** substitute for final **XX** in CML number; **01,** clear transparent; **02,** red transparent; **03,** yellow transparent; **04,** green transparent; **05,** white translucent; **06,** blue transparent; **07,** red translucent; **08,** yellow translucent; **09,** green translucent; **10,** blue translucent; **11,** amber translucent. Final number is lamp number; to order less lamp, omit lamp number. **Example:** CM25-5-706-715 is panel mounted with a round, blue transparent cap and a 5 V, .115 A lamp. CM25-5-706 is the same thing without the lamp. Also available as MS90308-X (**2,** red; **4,** yellow; **5,** green; **6,** blue; **9,** clear) -XXX (lamp number 680, 683, or 715). Requires .190″/.186″ dia. round mounting hole.

CML SERIES CARTRIDGE INDICATORS

Cartridge housings with incandescent or neon lamps; cool operating temperatures for long life. Mount in cartridge holder, or panel mounting with speed clip (not included). Clear anodized aluminum housings, nylon insulation, transparent or translucent polycarbonate or butyrate (color matched to industrial standards) caps. Meet requirements of MIL-L-3661. Stainless steel pins are located off-center for polarization. Stainless steel pin terminals, or #24 AWG wire leads. Available with hot stamped legends; write for prices. **Body Size:** .284" dia. x .634" long.

HOW TO ORDER: Insert two interfixes in CML number, replacing **XX** shown in tables below. First interfix indicates cap style and terminal configuration: **1,** flush cap with wire leads; **2,** short cylindrical cap with wire leads; **3,** long cylindrical cap with wire leads; **4,** macrodome cap with wire leads; **5,** flush cap with pin terminals; **6,** short cylindrical cap with pin terminals; **7,** macrodome cap with pin terminals; **8,** long cylindrical cap with pin terminals. Second interfix indicates cap type: **1,** butyrate, transparent; **2,** butyrate, translucent; **3,** polycarbonate, transparent; or **4,** polycarbonate, translucent.

Also replace final **X** in CML no., to indicate cap color: **1,** red; **2,** green; **3,** amber; **4,** blue; **5,** white; **6,** yellow; or **7,** clear. Examples: CML-530077 has clear transparent flush cap, pin terminals, and 10 V, 14 mA lamp. CML-140431 has red translucent flush cap, wire lead terminals, and 3.0 V, 15 mA lamp. CML-830012 has green transparent long cylindrical cap, pin terminals and 0.3 mA, 1/25 watt neon lamp.

CML SERIES HIDE-A-LITES

Electrical and mechanical specifications identical to CML Series Cartridge Indicators except all indicators appear **white** in off position and take on color only when activated. Colors available: Red, green, blue, amber. Translucent cap only. **HOW TO ORDER:** Replace **XX** in CML number with 50, 60, 70, or 80 to indicate cap style and terminal configuration—**50,** flush, pin; **60,** short cylindrical, pin; **70,** long cylindrical, pin; **80,** macrodome, pin. Replace final suffix **X** with R, G, B, or A for activated color—**R,** red; **G,** green; **B,** blue; **A,** amber. Example: CML 50406 W/R—Flush, translucent cap, 6 volt, .20A, white (red when activated).

CML SERIES CARTRIDGE HOLDERS

Panel mounting holders for T-1¾ or T-2 lamps. Body, collar and facing nut are black anodized aluminum. Molded phenolic insulation. Turret terminals are spring brass, gold over nickel plate; solder cup terminals are spring brass, tintilate plate. Types 10202-1 and 10203-1 have 9/32" thick knurled collar nut. Mount in round or "D" hole, .375" dia., in panels to 15/32" thick (when not using collar nut). Terminal pins are polarized.

This is a partial listing of miniature and subminiature lamps. Miniature lamps are most commonly used in numerous applications for panel indicators, aircraft, flashlight and radio or TV pilot lights. The subminiature lamps were specifically designed for modern, up-to-date special equipment such as computers, miniature switches, medical electronic equipment, aircraft, aerospace, etc. Many other uses are met where the ultimate in precision miniature lamp techniques is demanded. Engineered to military specifications, they are used as standards on many classified government projects and business machines. Lamps listed herein are the most popular types available from Chicago Miniature. If your application requires a special lamp or one not shown, send us your application needs. We will be pleased to submit our recommendations.

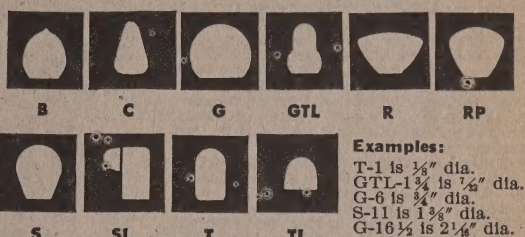
BULB SHAPES AND SIZES

The bulb is the glass envelope which houses the lamp filament assembly, and contains the vacuum or gas seal. A letter and number identifies bulb shape and approximate bulb diameter in eighths of an inch. Popular bulb shapes are:



Examples:
T-1 is ⅛″ dia.
GTL-1¾ is ⅛″ dia.
G-6 is ¾″ dia.
S-11 is 1⅜″ dia.
G-16½ is 2⅛″ dia.

NEON GLOW LAMPS

Cold-cathode gas discharge type lamps. Neon gas ionizes and glows when voltage is applied. Lamp 83(5AH) is a circuit glow lamp; all others are neon indicator lamps.

NEON SERIES 95-0408, 52-0408, & SERIES 135-0408

Now also available with new High Brightness B2A Neon Glow Lamp. Have Patented Built-in Resistor.

Series 95—Two types available: Series 95-0408 enclosed neon indicator light has 56K-ohm, ⅓-watt resistor built-in for use with the regular B1A neon lamp on 105–125 volt circuit. Series 95-0463 has built-in 22K-ohm resistor for use with new B2A high brightness neon lamp on 110–125 VAC circuits. Rugged design; resistor fully insulated in molded phenolic. Plastic head gives 180° light spread. Mounting bushing is black nickel plated. Solder terminals. Size: 2⅛" long, 1⅝" O.D.; mounts in 1 1/16" hole in panels up to ⅜" thick. UL and CSA Listed. Meets requirements of MIL-L-3661A. **Series 52-0408** same as 95-0408 and **52-0463** same as 95-0463, but with internally fluted stovepipe lens. **Series 135-0408** same as 95-0408 and **135-0463** same as 95-0463, but with cylindrical (screw-in) lens. Shpg. Wt., 3 oz. Less lamp.

INCANDESCENT SERIES 81-0410 SERIES 95-0410, 52-0410

Series 81-0410—For use with T-3¼ bulb, miniature bayonet base incandescent, for 2–55 V circuits. Replaceable from front of panel. Aviation type assembly with socket shell encased in molded phenolic. Smooth face lenses in ½" brass lens holder. Black nickel bushing on all assemblies. Also black nickel holder on 81-Series. Solder terminals. Size: 2¼" lg., 1⅝" O.D.; mounts in 1 1/16" hole in panels up to ⅜" thick. UL and CSA Listed. Meets MIL-L-3661A requirements.

DIALCO DATALITES®

Ultra-miniature indicator lights for computers, data processing equipment, automation, etc. Mount in 3/8" hole. "Datalites" are made in two basic styles—with Dialco's lamp cartridges, which are replaceable, and with built-in neon lamps which are permanent not replaceable.

SINGLE LAMP HOLDER

Use with Dialco's lamp cartridge, removable from front. Size, 1 13/16" long, 1/2" O.D. Mounts in 3/8" hole. Two insulated terminals offset for correct polarity when replacing cartridges in DC circuits. Conform to applicable MIL specs. Collar, flange ring, mounting bushing of black anodized aluminum. With mounting hardware, less cartridge.

Dialco No. 508-7538-504—Solder cup terminals.
Dialco No. 508-8738-504—Turret terminals.
Dialco No. 508-7545-504—Solder cup terminals, 5/64" longer to accommodate neon cartridge 507-4537 and high brightness type 507-4538.
Dialco No. 508-8745-504—Same as 508-7545-504, but with turret terminals.
Any Model—Net Each, 1–9 ..... **$1.82**
Net Each, 10–24 ..... **$1.52**; 25–99 ..... **1.38**

NEW PANEL-MOUNTING DATALAMP HOLDERS

Similar to 508 Series single lampholder, less collar. Collar utilized when conditions demand plug-in datalamp cartridge be very securely retained. Black, anodized alum. mtg. bushing, collar and flange nut. Brass, white nickel finish mounting nut. Internal-tooth lockwasher of phosphor bronze with white nickel finish. Phosphor bronze, gold-plated terminals. Choice of turret or solder cup terminals. Max. projection back of panel, 1 1/2". Max. panel thickness, 5/32". Collar and knurled flange nut, 3 3/64" dia.
Dialco Nos. 250-8738-14-504, 250-8745-14-504—With turret terminals; **Nos. 250-7538-14-504, 250-7545-14-504**—Same, but with solder cup terminals.
Net Each, 1–9 .... **$1.65**; 10–24 .... **$1.37**; 25–99 .... **$1.25**

NEON LAMP CARTRIDGES

For use with 508-8738-504, or 508-7538-504, and 250-7538-14-504, or 250-8738-14-504. Consists of NE-2E neon bulb, 1/25 watt with starting 65 VAC and 90 VDC; mounted in aluminum sleeve, capped with plastic stovepipe lens. Requires 1/3-watt ballast resistor. Size, 1 21/64" long, 1/3" O.D. Lens is transparent. **Lens Color:** Specify by changing 11th digit of part no. to: **1**, red, as listed; **3**, amber; **5**, white; **6**, yellow; **7**, clear (e.g., 507-3835-0933-600, amber lens). AC/DC models, standard brightness; AC models, high brightness.

Dialco No. 507-3835-0931-600—AC/DC, stovepipe lens.
Dialco No. 507-3835-1531-600—AC/DC, long cylindrical lens.
Dialco No. 507-3836-0931-600—AC, stovepipe lens.
Dialco No. 507-3836-1531-600—AC, long cylindrical lens.
Any Model—Net Each, 1–9 ..... **$1.32**
Net Each, 10–24 ..... **$1.10**; 25–99 ..... **1.00**

NEON CARTRIDGES

High brightness and standard brightness. Similar to Series 507-3835 and 507-3836 cartridges at left, but 1/8" longer. Built-in resistor.

WATER-TIGHT INCANDESCENT LIGHTS

Complete assemblies incandescent indicator lights in translucent colors. Water-tight, oil-tight, dust-tight on face of panel. With retained O-ring seals. Black, anodized aluminum mounting bushing. Internal-tooth lockwasher and mounting nut of cadmium-plated steel. Fully insulated brass terminals with elongated slots. Meet MIL-L-6723 and MIL-L-3661B. Max. projection back of panel, ⅝". Max. panel thickness, 3/16". Mount in 15/32" clearance hole front of panel with fixed flange. Size, O.D., 37/64".
Dialco Nos. 177-8430-0971-503 (Red), **177-8430-0972-503** (Green), **177-8430-0973-503** (Amber), **177-8430-0974-503** (Blue), **177-8430-0975-503** (White, translucent), **177-8430-0976-503** (Light Yellow). Net Each, 1–9 . . . . **$2.34**; 10–24 . . . . **$1.97**; 25–99 . . . . **$1.81**

PRESS-TO-TEST ASSEMBLIES

Meets requirements of MIL-L-7961B

A slight pressure on the face of the unit "breaks" the normal circuit and "makes" a test circuit. If lamp lights up when pressed in, it is satisfactory. If it fails to light, the lamp is defective. Equipped with three terminals: Two for "normal" circuit, the third for "test" circuit.

SERIES 804/803 (MS25331)

Mount from back in ⅝" clearance hole. Accommodates T-3¼ lamp with miniature bayonet base. Overall size, ⅞" x 2¼". Shpg. Wt., 1½ oz. Less lamp.

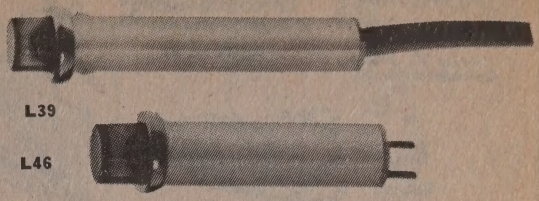
SOLID-STATE LED INDICATORS



L39

L46

Gallium phosphide LED's in red, green and yellow for optimum light output and long life. Mount in 5/16″ dia hole. Series L45R and L46R are friction fit; speed nut is furnished for maximum security. Series L39U is snap-in type, also available with tabs. Available lenses include plastic hi-hat or flush, both transparent. Bezels are supplied on hi-hat lenses, optional on flat lenses. Connections are by 6″ wire leads for Series L39 and L41, 3/16″ male tabs for Series L45 and .040″ male pins for Series L46.

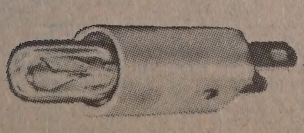
LAMPHOLDERS FOR T-1 3/4 SUBMINIATURE WEDGE-BASE LAMPS



52-07

Series 52-00 Wedge-Base Lampholder—Ultra-compact lampholder minimizes space requirements. Lamps can be inserted or removed without tools. Lamps seat firmly in socket and will not freeze nor shake loose. A variety of mounting styles are optional including horizontal and vertical brackets for PC boards. Any number of sockets can be mounted on a strip, or wired to customer specifications. **No. 52-07:** With 7/16″ male tab terminals that fit female quick-connect terminals. **No. 52-207:** With built-in wire leads 6″ long, stripped 1/2″ at ends, UL rated at 80° C, black.

ANNUNCIATOR LAMPS AND COLOR CAPS

Long life annunciator lamps are designed for use in elevator panels, pushbutton stations, indirect decorative lighting and general signalling applications where a relatively high candlepower miniature light source is necessary. A high degree of light control is made possible by a self-contained aluminized reflector. Unique lighting and signalling effects are attainable using pyrex color caps shown in the chart. Ordering Data: For clear lamps, specify lamp number. For colored lamps, specify color as follows: 6RB/Red, etc. Caps are cemented to lamps when ordered in this manner. Caps may also be ordered separately.

Used by major computer manufacturers and other leaders in the electronic field. **Life:** 5,000 to 15,000 hrs. **Construction:** Slide base and ruggedized construction resist extreme shock and vibration. **Molded Glass Mount:** Provides greater filament stability. **Unique Flat-Top:** For maximum light output. **Operating Temperature Range:** −70° F to +375° F, base insulator. **Contacts:** Nickel-plated, meet MS-33586 specs. Other features include: Dumet lead wire, nickel-iron alloy core, copper sleeve with same coefficient of expansion as glass. Lead length (unbased lamp), ⅞". **Size:** Based—.875" lg. x .240"–.275" dia., unbased—.670" lg. plus .875" leads.

PANEL MOUNT LAMP SOCKETS FOR SLIDE-BASE LAMPS

Contacts have nickel plated brass to comply with Military Standard MS-33586. Socket No. 30151-0 is ½" x ¾" so that it can be rotated in the panel to fit either the ½" or ¾" spacing of the Strip Sockets. One push-on speed nut furnished with each socket. A standard AMP receptacle #42197-2 may be used to make electrical connection to the sockets, or leads may be soldered to the socket contacts.

END COLOR CAPS FOR 30150 AND 30151 SOCKETS

Both Pyrex and Profax type color caps in five standard colors. Profax cap is desirable in applications in which aesthetic value and illumination of the cap is important. Use with lamps rated up to 24 volts or 1.2 watts. Pyrex cap for use with lamps above 28 volts or 1.2 watts. Also available with any single letter or digit stamped on the cap. Size: Small Profax caps, .200" x .310" dia.; Large Profax caps, .303" x .325"dia.; Pyrex caps, 300" x .350" dia. May be used with round sockets (30150-0), rectangular sockets (30151-0), or with Strip Sockets.

MACHINED ALUMINUM CONCENTRIC KNOB SETS

Matched knob sets for concentric shaft controls consist of two separate knobs—upper knob for inner control shaft, 1/8" dia., lower knob for outer control shaft, 1/4" dia. With four 6-32 set screws.

K-5700	1/8 & 1/4	1/2 & 3/4	A/B	$2.05	$1.85	$1.75	$1.64
K-7906	1/8 & 1/4	3/4 & 15/16	A/B	2.40	2.16	2.04	1.92

MINIATURE MACHINED ALUMINUM KNOBS

For miniature switches and controls having 1/8" diameter shaft. Model KC knobs designed for rotary series Alcoswitch, but usable with other components. Model KCVS knobs provide the need for setting a predetermined stop position on controls or rotary switches. Model KC-500-10 knobs have engraved numerals. Natural aluminum or black.

KC-500	1/8	1/2	A/B	$1.50	$1.35	$1.28	$1.20

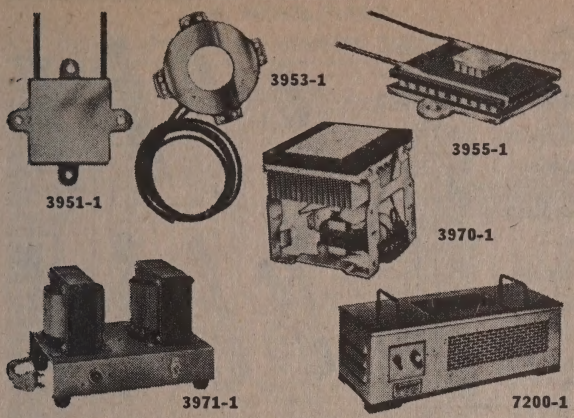
THERMOELECTRICS—PANEL, CHASSIS HARDWARE

THERMOELECTRICS



CAMBION TE components (modules) and 40-watt assemblies, listed below, may be operated by using the following **standard parts** to assemble a simple variable DC power supply: (1) auto-transformer; (2) input transformer; (3) filter choke; (4) 2 silicon rectifiers; (5) rectifier heat sink. Operating instructions, power supply schematic and mounting recommendations are supplied with each component module and assembly.

COMPONENTS

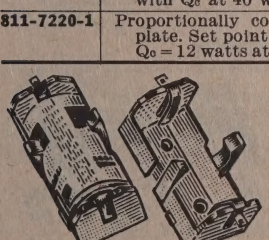
Cambion Type No.	Description	Net Each
800-3950-1	6.5 ampere module; 2.3 VDC; 6.8 watts with Ts at 27° C	$ 59.60
800-3951-1	6.5 ampere module; 5.7 VDC; 20 watts with Ts at 27° C	79.40
800-3953-1	6.5 ampere annular ring; 5.7 VDC; 20 watts with Ts at 27° C	79.40
801-3960-1	6.5 ampere module; 2.0 VDC; 7 watts with Ts at 27° C	37.60
800-3955-1	5.2 ampere Cascade module; 5.7 VDC; 1 watt at 60° CΔT with atmospheric pressure, at Ts = 27° C	228.70
801-3958-1	Ceramic high performance unit; 3.6 VDC at 9.0 amps; 19.5 watts pumping capacity with Ts at 27° C	90.30

ASSEMBLIES

Cambion Type No.	Description	Net Each
802-3970-1	6.5 ampere assembly (two 3951's in series); 12 VDC; 40 watts with Ts at 35° C. With heat sink, bracket and fan assembly (115 V, 60 Hz AC)	$384.20
802-3971-1	Fixed output, non-regulated DC power supply for 3970-1 assembly. Other power supplies available for all modules.	124.60

INSTRUMENTS

Cambion Type No.	Description	Net Each
811-7200-1	Package cold plate unit for plug-in operation (110/120 VAC, 60 Hz at approx. 1 A). Cold plate temperatures to −15° C with Q_c at 40 watts	445.90
811-7210-1	Variable controlled cold plate; cold plate temperatures adjustable to −10° C with Q_c at 40 watts	524.80
811-7220-1	Proportionally controlled cold or warm plate. Set point range of 0° C to 40° C. Q_c = 12 watts at cold plate temp. of 0° C	787.40



BATTERY HOLDERS

For mercury ("C" size) and zinc nickel-plated ("D" size) batteries. Snap-in holders with locking strap to hold mercury batteries under extreme vibration and shock. Body material phosphor bronze.

New 2800-01, 2801-01 and 2801-02—Low cost, glass-filled nylon molded holders. Holders interlock with each other to form single unit assemblies for any number of batteries required.

Cambion Type No. 400-	For Battery		Net Ea., Lots 10-99	100-499
	Type	Size, Inches		
2475-01-02	Mercury	.655 dia. x 1.960 h.	$1.53	$1.31

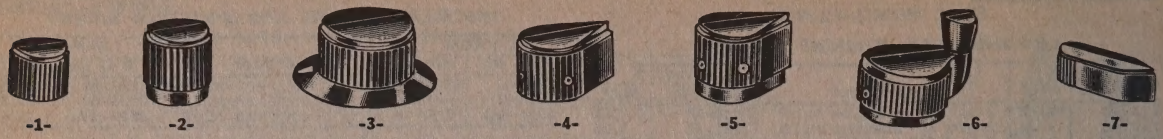
RAYTHEON Raytheon Control Knobs

MS91528 (STANDARD) AND DESIGNER SERIES CONTROL KNOBS



-1- -2- -3- -4- -5- -6- -7-

Approved types per MS91528, Rev. C; cross reference (MIL No. to Raytheon No.) available on request. Eight standard knob types in six basic sizes to meet your every requirement. **Order by complete Catalog Number:** E.g., G 70-3BL-2G indicates **Gray** color knob; approx. diameter of knob in hundredths of inches is **70** (.70″); description of knob is **-3** (see table below); knob is back lighted (**BL**); shaft size is **-2** (see table below); finish is **G** (matte).

Prefix (Color)		1st Number (Size)	2nd Number (Description)	3rd Number (Shaft Size)		Suffix (Finish)
No prefix	Black	50	*	-1	1/8″	†
DS	Alum. cap	70	7/10″	-2	1/4″	†
G‡	Gray	90	9/10″	-3	3/16″	
R‡	Red	125	1 1/4″	-4	.267″	
		175	1 3/4″			
		225	2 1/4″			

***Description:** **-1,** round no skirt; **-2,** round plain skirt; **-3,** round dial skirt; **-4,** pointer no skirt; **-5,** pointer plain skirt; **-6,** crank (spinner); **-7,** bar pointer, no skirt; **-8,** bar pointer, dial skirt with pointer mark. **BD,** black dot; **BL,** back lighted dial skirt; **CB,** concentric base for outer shaft has no cap, shaft hole drilled through; **LK,** knob lock pointer used with knob lock; **NP,** no pointer; **WD,** 1/8″ white dot on cap; **WL,** white line. †**Finish:** No suffix, mirror finish; suffix G, matte (dull) finish. ‡Not applicable to all types listed, write for complete information on colored knobs.

FIVE-WAY BINDING POSTS

Available in two models: Accepting standard banana plug; or, standard .080 test prod. Four other connections include: Wire through center hole; prod through center hole; wire coiled around post and clamped; turret terminal for solder connection. Nylon body with tin-plated metal parts to withstand 50-hour salt spray test; 250-hour 95% humidity test. Rated 30 amps.

SELF-LOCKING PUSH-TO ENGAGE KNOBS

Designed for maintaining control settings under shock and vibration. Knobs have zero backlash allowing for infinite resolution. Sturdy polycarbonate plastic construction. Available in mirror or matte finish. Custom variations available; complete information on request. **Model Number Description: PTE,** push-to-engage; **G,** gray (omit for black) color; **70,** ¼" dia.; **2,** skirted round or **3,** dial skirted round; **1,** ⅛" shaft hole, **2,** ¼" shaft hole; **G,** matte finish (omit for mirror finish).

KNOB LOCKS

Use with standard control knobs for a dependable means of holding precise or critical control settings under shock or vibration conditions. Very little larger than the knob itself. An eighth-turn locks the knob firmly. Mounts directly on threaded bushing of the control.

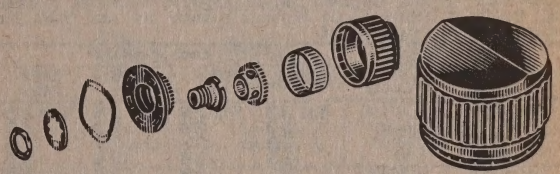
MICROVERNIER® CONTROLS



Unique control utilizes principle of harmonic drive to provide high-resolution tuning or precise zero setting. Offers high 40:1 tuning ratio, and instantaneous 1:1 ratio for fast sluing by pushing in on control. Entire mechanism contained in front panel knob. Eliminates need for expensive gear assemblies. Tested to 500,000 cycles minimum rotational life. Temperature range, –55° C to +85° C. Available in three sizes and manufactured to meet requirements of MIL-K-3926 and MS91528. Glossy or matte finish. **Size:** Prefix **MV** indicates Microvernier; **125,** 1¼" dia.; **175,** 1¾" dia.; **225,** 2¼" dia. **Dial Skirt:** Following number indicates: **2,** without dial skirt; **3,** with dial skirt. (Dial skirt not available with MV125 controls.) **Type:** Following letter indicates: **A,** through-the-panel mounting type; **B,** potentiometer mounting type. **Color:** Standard color is black lustre finish, last letter **G,** indicates black matte finish.

TEST JACKS

Extra reliability assured through use of finest materials: Nylon insulators; beryllium copper spring pin contacts; gold over silver-plated contact sleeves; convenient color-coding.

STANDARD TYPES PER MS39024/10 (FIG. A)

Meets MS39024/10 requirements. Units have nickel-plated brass sleeve for mounting; beryllium copper spring pin contact. With nickel-plated brass and lockwasher; nylon or white Teflon® insulators. **Terminal Type:** TJ101Y thru TJ110V turret; all others spade. ®Registered DuPont trademark.

CAPTIVE HARDWARE (FIG. E)

Standard line of stainless steel fastening hardware meets MIL-E-16400 (SHIPS) requirements; will meet MIL-E-5400 and MIL-P-11268 (Sig. C) when painted or dulled in accordance to those specifications. Slotted-head thumb screw, insert bushings, floating nut assembly, gasket and retainer make complete assembly. All exposed parts are stainless steel. Nut is cadmium-plated brass; nut bracket cadmium-plated steel. Nut is entirely captivated by the bracket. Gasket is neoprene rubber. **Write for full data.**

242	A	Same, but with nickel-plated beryllium copper spring	.41
262	A	Same, but with silver-plated beryllium copper spring	.44
211	B	Solderless with nickel-plated phosphor bronze spring; 1" handle	.30
261	B	Same, but with silver-plated spring	.33
271	B	Same, but with nickel-plated beryllium copper spring	.35
281	B	Same, but with silver-plated beryllium copper spring	.39
295	C	Screw-term. solderless; nickel-plated phos. bronze spring; 1" handle	.42
296	C	Same, but with silver-plated spring	.46
297	C	Same, but with nickel-plated beryllium copper spring	.48
298	C	Same, but with silver-plated beryllium copper spring	.51
236	D	Same, but cross-drilled hole in spacer for solderless connection	.62
204	E	Set-screw solderless; nickel-plated phosphor bronze spring; 1" handle	.30
254	E	Same, but nickel-plated beryllium copper spring	.35
213	F	Split type with side screw; cross-slotted for spring tension	.28
253	G	Soldered or solderless with internal stud; cross-slotted; 1" handle	.32
291	H	Stud-soldered midget plug with ⅝" machined butyrate handle; 1 3/32" plug with nickel-plated phos. bronze spring; specify red or black	.30
292	H	Same, but silver-plated spring	.33
293	H	Same, but nickel-plated beryllium copper spring	.35
294	H	Same, but silver-plated beryllium copper spring	.39
214	I	Adapts tip plug to banana plug; molded butyrate handle with jack for tip plug; nickel-plated phosphor bronze spring; red or black	.55
1511	J	Solderless banana plug; banana plugs in top and side of machined butyrate handle for unlimited, multiple circuits; phosphor bronze nickel-plated spring; specify red, black, yellow or green	.65
1512	J	Same, but beryllium copper spring	.73
255	K	Meter plug with 4-leaved nickel-plated phosphor bronze spring; specify red or black	.48
285	L	Giant type with machined phenolic plastic handle, deep solder well; 6-leaved phosphor bronze nickel-plated spring; specify red or black	1.30
476	M	Molded nylon plug; soldered or solderless; phosphor bronze nickel-plated spring; specify color†	.31
477	M	Same, but silver-plated phosphor bronze spring; specify color†	.34
478	M	Same, but nickel-plated beryllium copper spring; specify color†	.37
479	M	Same, but silver-plated beryllium copper spring; specify color†	.40
494	N	Solderless split-type plug with molded nylon handle; specify color†	.28
426	O	Midget version of No. 476; specify color†	.28
427	O	Midget version of No. 477; specify color†	.31
428	O	Midget version of No. 478; specify color†	.33
429	O	Midget version of No. 479; specify color†	.37
455	P	Solderless wrap-around version of No. 476; specify color†	.31
456	P	Solderless wrap-around version of No. 477; specify color†	.34
457	P	Solderless wrap-around version of No. 478; specify color†	.37
458	P	Solderless wrap-around version of No. 479; specify color†	.40

INSULATED TIP PLUGS*

200	Q	Solderless threaded type; 1" handle; 2⅛" long	$0.25
201	Q	Same, but slightly smaller; 1" handle; 1 9/32" long	.25
237	S	Easy-solder hollow tip; ⅝" molded butyrate handle, red or black	.10
229	T	Heavy duty, easy solder connection; 1" handle, 2⅛" long	.26
203	U	Short tip plug inserts flush to handle; 1" handle; 1½" long	.22
283	V	Same as above, but solderless connection	.22
270	W	Subminiature tip with 1" fiber handle; specify red or black	.30
216	X	Phono needle tip with removable chuck; 1" handle; 1⅞" long	.34
215	Y	Std. tip plug with jack for banana plug; ¾" molded butyrate handle; specify red or black	.26
235	Z	Meter tip plug molded in two halves; specify red or black	.35
493	AA	Removable chuck type with molded nylon handle and phono needle; specify color†	.35
490	BB	Solderless type with molded nylon handle; specify color†	.25
492	CC	Short version of above without knurled collar; specify color†	.23
491	DD	Short tip plug; inserts flush to nylon handle; specify color†	.23

INSULATED JACKS‡

1501	EE	Nylon tip jack with metal shell; wrap-around type; specify color†	$0.36
1502	FF	Same, but spade terminal type; specify color†	.50
1503	GG	Same, but feed-thru type; specify color†	.47
1505	EE	Same as 1501 but all-nylon construction; specify color†	.27
1506	FF	Spade terminal version of 1505; specify color†	.36
1507	GG	Feed-thru version of 1505; specify color†	.34
202	HH	Molded thermosetting plastic head; phone tip; mounted in 5/16" hole	.24
240	II	Molded nylon tip jack rated 5,000 VAC, 60 Hz; specify color§	.25
206	JJ	Molded thermosetting plastic head combo jack takes standard phone or banana plugs	.32
282	KK	Molded thermosetting plastic head meter type; specify color§	.35
241	LL	Molded nylon head; insulated from panel; specify color§	.38
219	MM	Molded thermosetting plastic head banana jack; recessed body	.28
221	NN	Nylon head and washer; insulated from panel; for standard banana plugs; specify color§	.38
205	OO	Molded thermosetting plastic head banana jack	.20
256	PP	Molded thermosetting plastic head banana jack; turret terminal	.27
279	QQ	Phone tip jack with dished lockwasher "speedi-mount"; molded thermosetting plastic body; 1 3/32" dia. head	.10
299	RR	Same as 279 except ½" dia. head	.10
286	SS	Giant banana jack; fits ½" hole; panel to ¾"; tinned copper lug; machined butyrate head; specify red or black	.95
287	TT	Same as 286 except brass tinned lug	.95

*Molded thermosetting plastic handle unless otherwise noted. Standard colors: red, black, yellow, green, blue or white except as otherwise noted. †For colors add suffix: **-101**, white; **-102**, red; **-103**, black; **-104**, green; **-105**, blue; **-106**, orange; **-107**, yellow; **-108**, brown; **-112**, purple; **-113**, gray. ‡Standard colors: Red, black, yellow, green, blue or white except as otherwise noted. §Specify red, black, yellow, green or blue.

JACKS, PLUGS, TEST LEADS AND BINDING POSTS

NON-INSULATED BANANA PLUGS AND JACKS

H. H. S. No.	Fig.	Description	Net Each *
102	A	3/8" threaded stud; hex brass body; nickel-plated phos. bronze spring	$0.34
103	B	1/2" threaded stud; hex brass body; nickel-plated phos. bronze spring	.29
100	C	Screw-on type; hex brass body; nickel-plated phos. bronze spring	.33
190	C	Same, but with beryllium copper spring	.40
104	D	1/2" threaded stud; hex brass body; split type banana plug	.22
121	E	Midget rivet type; silver-pl. brass body; phos. bronze silvered spring	.22
145	F	Soldered or solderless type with hex body; phos. bronze spring	.34
135	F	Same, but beryllium copper spring	.40
431*	G	6-32 x 3/8" stud type; hex body; phos. bronze spring nickel-plated; 1 3/16" h.	.34
432*	G	Same, but 6-32 x 1/2" stud; 1 5/16" h.	.37
433*	G	Same, but 6-32 x 3/4" stud; 1 5/16" h.	.40
434*	G	Same, but 8-32 x 3/8" stud; 1 3/16" h.	.34
435*	G	Same, but 8-32 x 1/2" stud; 1 5/16" h.	.37
436*	G	Same, but 8-32 x 3/4" stud; 1 5/16" h.	.40
401†	H	6-32 x 3/8" stud type; hex body; phos. bronze spring nickel-plated; 1 5/32" h.	.28
403*	H	Same, but 6-32 x 1/2" stud; 1 5/32" h.	.29
404*	H	Same, but 6-32 x 3/4" stud; 1 17/32" h.	.33
405*	H	Same, but 8-32 x 3/8" stud; 1 5/32" h.	.28
406*	H	Same, but 8-32 x 1/2" stud; 1 5/32" h.	.29
407*	H	Same, but 8-32 x 3/4" stud; 1 17/32" h.	.33
460‡	I	Midget 4-40 x 3/8" stud; nickel-plated phos. bronze spring; 15/16" h.	.29
461‡	I	Same, but 4-40 x 1/2" stud; 1 1/16" h.	.29
462‡	I	Same, but 6-32 x 3/8" stud; 15/16" h.	.29
463‡	I	Same, but 6-32 x 1/2" stud; 1 1/16" h.	.29
111	J	Midget cross-slotted body type; 10-32 x 2 1/64" stud; 2 3/32" h	.17
191	L	Submin. rivet type plug; silver-plated beryl. copper spring; 37/64" h.	.21
192	M	Submin. 2-56 stud type plug similar to No. 191	.30
193	N	Submin. jack rivets direct to chassis or PC board	.15
194	O	Submin. jack rivets direct to chassis or PC (Package of 100)	.20
101	P	Hex body jack with recessed head; fits 1/4" hole; panels to 5/16" thick	.19
109	Q	Std. hex head banana jack fits 1/4" hole; panels to 3/8" thick	.19
185	R	Giant plug with deep solder well; 6-leaved phos. bronze spring	.90
186	S	Same, but screw fit instead of stud	.80
188	T	Same as No. 186 but slimmer base	.65
187	U	Giant banana jack fits 3/8" hole; panels to 1/2" thick	.60

Note: The following types are also available as specified. For silver-plated phosphor bronze spring: Add **3c** to price and *add **6** to number (431 becomes 437); †add **7** to number; ‡add **4** to number. For nickel-plated beryllium copper spring: Add **4c** to price and *add **12** to number; †add **13** to number; ‡add **3c** to price and add **8** to number. For silver-plated beryllium copper spring: Add **7c** to price and *add **18** to number; †add **19** to number; ‡add **6c** to price and add **12** to number.

NON-INSULATED TIP PLUGS AND JACKS

105	V	Solderless with knurled collar force fit; 1 29/64" h.	$0.21
106	W	Smaller version of above; 1 3/16" h.	.21
156	X	Heavy-duty force fit type; large soldering well; accepts standard banana plugs; 1 13/32" h.	.21
108	Y	Standard solder type; 1" long (Package of 100)	**
123	Y	Large I.D. solder type; 1" long (Package of 100)	††
158	Z	Drawn (all-hollow) solder type; 15/16" long (Package of 100)	‡‡
124	AA	Threaded solderless type; knurled collar; will fit plastic handle; 17/16" h.	.21
127	BB	Smaller version of above; 1 3/16" h.	.21
125	CC	Heavy duty threaded type; extra large solder well; 1 3/8" h.	.21
128	DD	Needle tip with removable chuck; 1 5/32" h.	.30
107	EE	Phone tip jack with hex nut; fits 1/4" hole; panels to 3/8" thick	.28
147	FF	Headless version of above used with plastic cases	.17

Net per package of 100: **$5.50; ††$6.50; ‡‡$2.00.

TEST LEAD ACCESSORIES

218	GG	Plastic handle spade lug; accepts banana plug; specify red or black	$0.10
249	HH	Phone tip to space lug adapter; plastic handle; specify red or black	.44
245	II	Banana plug splice of plastic; specify red, black, yellow or green	.28
246	JJ	Phone tip plug splice of plastic; specify red, black, yellow or green	.33
248	KK	Inline phone tip jack of plastic; specify red, black, yellow or green	.23
251	LL	Inline banana jack of plastic; specify red, black, yellow or green	.23

BINDING POSTS

257	MM	Multi-purpose with banana plug receptacle, wire hole, washer hole, production punch and non-removable nylon head. For 1/16"–1/4" panels. Rated 30 amps, 2000 VAC rms test. Specify red, black, yellow, blue, green, white	$0.65
220	NN	5-way grounding type, red or black plastic, captive head; 8-32 thd.	.34
230	NN	Same, but 6-32 threaded stud	.34
264	NN	Same as No. 230 with nickel-plated brass insert in head	.49
260	OO	All insulated version of No. 220; red or black plastic, captive head	.55
259	OO	Same, but 6-32 threaded stud	.55
290	OO	Same as No. 260 with nickel-plated brass insert in head	.75
231	OO	Same as No. 259 with nickel-plated brass insert in head	.75
137	PP	Metal 5-way post has captive hex nickel-plated brass head	.50
208	QQ	Same as No. 137 but with wrap-around terminal	.65
377	RR	Molded nylon grd. type with nickel-plated brass insert; red or black	.60
378	SS	Same, but with Bakelite washer to insulate from chassis; red or black	.60
379	TT	Molded nylon grounding type; nickel-plated brass insert; red or black	.55
265	UU	Molded plastic post; brass threaded insert; specify red or black	.30
266	VV	Molded plastic post; brass threaded insert; specify red or black	.30
136	WW	Nickel-plated brass post for phone tips or banana plugs	.35
110	UU	Nickel-plated brass post with screw and lockwasher	.35
209	XX	Dual assembly; metal heads; molded black styrene insul. cross-slotted for forward or sideways phone tip insertion	1.35
224BB	YY	Dual assembly; black plastic heads; styrene washer cross-slotted	.95
224RR	YY	Same, both heads red	.95
224RB	YY	Same, one red and one black head	.95
263BB	YY	Same as 224 but with nickel-plated brass insert in head; black	1.25
263RR	YY	Same, both heads red	1.25
263RB	YY	Same, one red and one black head	1.25
269BB	ZZ	Same as No. 263, but heads are molded nylon; both heads black	1.15
269RR	ZZ	Same, both heads red	1.15
269RB	ZZ	Same, one red and one black head	1.15
284BB	AB	Same as No. 263, but heads are molded nylon; both heads black	.95
284RR	AB	Same, both heads red	.95
284RB	AB	Same, one red and one black head	.95

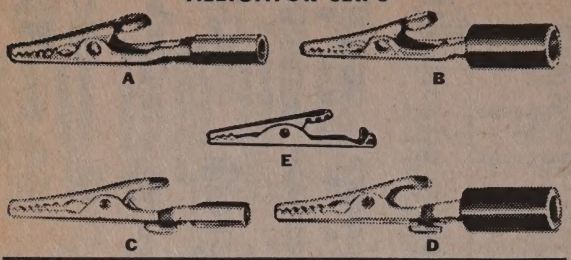
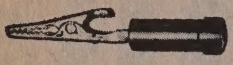
H. H. Smith Components

ALLIGATOR CLIPS



H. H. Smith No.	Fig.	Description	Net
300	A	Steel, cadmium plated	$0.07
380	A	Solid Copper	.10
301	B	Red or Black Insulated, Steel	.10
381	B	Insulated Solid Copper	.12
350	C	Steel with screw	.08
351	D	Red or Black Insulated, Steel	.11
360	C	Copper with screw	.12
361	D	Insulated Copper, Red or Black	.16
338	E	3/16" jaw, cadmium-plated steel	.06
367	E	3/16" jaw, copper	.07



ALLIGATOR CLIP COMBINATION JACKS

Insulated alligator clip with combination jack in rear of handle. Jack will accommodate standard phone tip plugs or banana plugs. Handle 1 1/8" long, overall length 2 7/8". Available in black and red colors. Specify color.

H. H. Smith No. 305—With steel clip. Net Each..... $0.47
H. H. Smith No. 335—With copper clip. Net Each..... .51

ALLIGATOR CLIP PHONE TIP JACKS

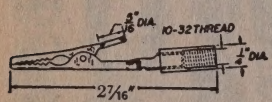
Insulated alligator clip with phone tip jack in rear of handle. The jack portion will accommodate all standard phone tip plugs. Handle 1 1/8" long, overall length 2 7/8". Available in black and red colors. Specify color.

H. H. Smith No. 304—With steel clip. Net Each..... $0.40
H. H. Smith No. 334—With copper clip. Net Each..... .44

ALL-INSULATED ALLIGATOR ADAPTER CLIPS

Phone tip jack in rear of handle. All metal parts fully insulated with molded butyrate; insures against shock, grounding. Adapts to standard phone tip plugs. Cadmium plated steel clip; brass body; phosphor bronze contact. Specify red or black color.

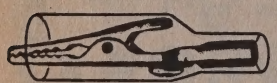
H. H. Smith No. 336—Rated 5 amps. Net Each..... $0.43
H. H. Smith No. 337—Same, but rated 10 amps; solder connection. Net Each..... $0.29



ALLIGATOR CLIP ADAPTER

Adapts standard solderless tips to alligator clips. Max. opening 1/2".

H. H. S. No. 310—Net.... $0.25



ALLIGATOR CLIP BOOTS

Molded vinyl plastic fully insulates clip while allowing maximum jaw opening. Specify red or black color.

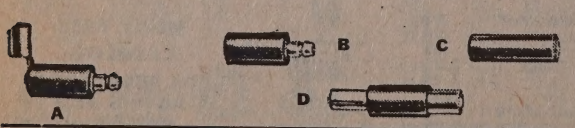
H. H. Smith No. 331—Net Each..... $0.04
H. H. Smith No. 389—Midget version for use on No. 338 or 367 clips. Net Each..... $0.03

BATTERY TEST CLIPS

Electroplated steel construction.

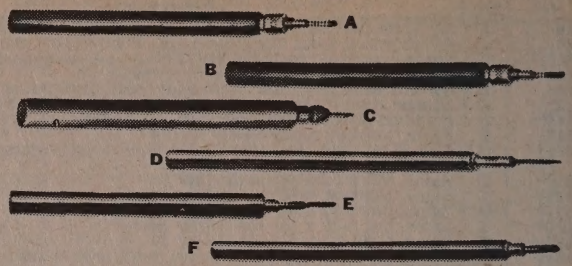
H.H.S. No.	Jaw Spread	Length	Cap., Amps	Spring, Lbs.	Net Each
365	3/8"	1 5/8"	5	7	$0.11
366	9/16"	2"	10	10	.11

AUTO RADIO IGNITION SUPPRESSORS



H. H. Smith No.	Fig.	Description	Net Each
805	A	Snap-on type	$0.55
806	B	Universal; double thread	.50
809	D	Distributor plug-in	.60
810	C	Double screw	.35

TEST PRODS



Specify red or black when ordering.

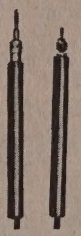
H.H.S. No.	Fig.	Description	Net Each
302	A	5 1/4" threaded solderless tip with chuck	$0.33
303	A	6 3/4" threaded solderless tip with chuck	.36
323	B	Fiber version of No. 302	.39
317	C	4 13/16" phono needle prod; thrd. chuck & collar	.36
318	C	6 5/16" version of No. 317	.42
313	D	Double Bakelite handles; phono needle tip; stud for solderless connection; 7 1/2"	.90
319	E	5 3/16" heavy duty phono tip prod; threaded	.33
329	E	6 1/16" version of No. 319	.36
322	F	For subminiature equipment; bone fiber handle; 1/4" O.D. x 4 3/4" long	.39

METER TIP TEST LEADS

Test Leads with 50" rubber covered kinkless test lead wire. Molded plastic finger-grip tips on one end and 4" plastic test prod handles on other end. Supplied in two types, solderless tip or needle tip prod handles.

H. H. Smith No.	Type	Net Price per Pair
625	Solderless prods	$1.80
626	Needle tip prods	1.80

SOLDERLESS TIP TEST LEADS



Plastic handles colored red and black, 4" long x 3/8" diameter. Flexible rubber covered wire leads 50" long also colored red and black.

H. H. Smith No.	Type	Net Price per Pair
600	Phone tips	$1.25
601	Spade lugs	1.25
602	Alligator clips	1.30

PHONO NEEDLE TEST LEADS

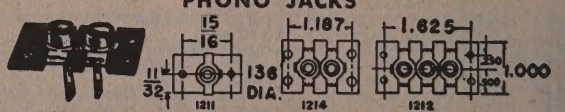
613	Phone tips	$1.25
614	Spade lugs	1.25
615	Alligator clips	1.30

PHONO PLUGS

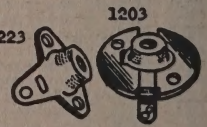
RCA Type phono plugs. For use with record players, recording and reproducing equipment, etc. Extra large hole in cap (.175") for coaxial cable.

H. H. S. No. 1201—Long Pin (1" overall). Net.. $0.08
H. H. S. No. 1202—Short Pin (1 3/16" overall). Net .08

PHONO JACKS

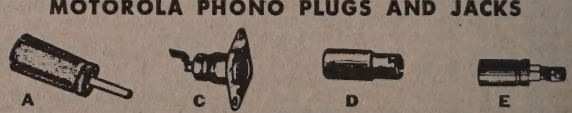


H. H. Smith No.	Description	Net Each
1203*	Single Jack	$0.09
1223	Single Jack	.09
1211	Single Jack	.12
1214	Double Jack	.15
1212	Triple Jack	.20



*On 1/16" Bakelite®, 1 1/16" centers.
®Registered Bakelite Corp. trademark.

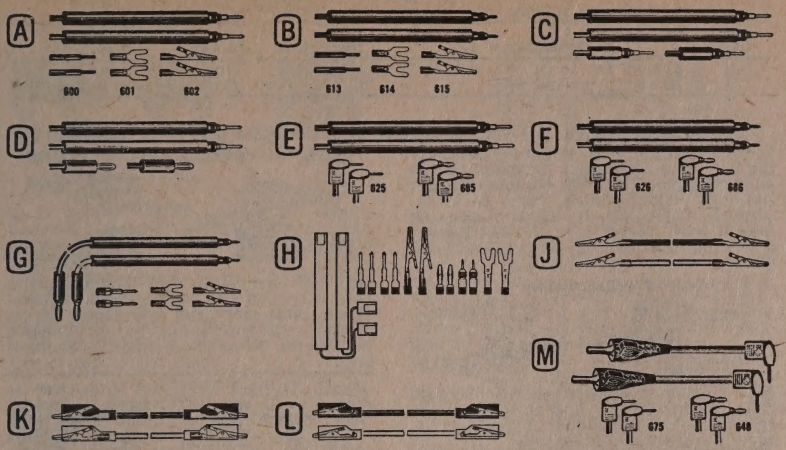
MOTOROLA PHONO PLUGS AND JACKS



H. H. Smith No.	Fig.	Description	Net Each
1200	A	Motorola type plug	$0.12
1207	C	Motorola jack	.20
1204	D	Lead-in adapter	.09
1235	E	Jack without flange	.10

H. H. Smith Test Leads & Prods

TEST LEADS



SOLDERLESS TIP TEST LEADS (FIG. A)

Molded butyrate handles per Fed. Spec. L-P349A, Type 3, Class MS; red and black. Solderless tip of nickel-plated brass. 4″ long x ⅜″ diameter. Flexible rubber covered wire leads 50″ long, also colored red and black.

H.H.S. No.	Meter End	Net Price per Pair
600	Phone tips	$1.25
601	Spade lugs	1.25
602	Alligator clips	1.30

PHONO NEEDLE TEST LEADS (FIG. B)

Molded butyrate handles per Fed. Spec. L-P349A, Type 3, Class MS; red and black. Nickel-plated brass body. Nickel-plated steel needle tips. Flexible rubber covered wire leads 50″ long, red and black.

H.H.S. No.	Meter End	Net Price per Pair
613	Phone tips	$1.25
614	Spade lugs	1.25
615	Alligator clips	1.30

ALL SOLDERLESS TEST LEADS (FIG. C)

Molded butyrate handles per Fed. Spec. L-P349A, Type 3, Class MS; red and black. Molded thermosetting plastic plug in red and black, per MIL-M-14 CFG. Solderless tip of nickel-plated brass.
H. H. Smith No. 603—Net/Pair...**$1.60**

BANANA PLUG TEST LEADS (FIG. D)

Molded butyrate handles per Fed. Spec. L-P349A, Type 3, Class MS; red and black. Plug is molded phenolic; red and black. Solderless tip plug of nickel-plated brass. Nickel-plated brass body. Nickel-plated, four-leaved phosphor bronze spring.
H. H. Smith No. 623—Net/Pair...**$1.80**

SOLDERLESS PROD METER TEST LEADS (FIG. E)

Molded butyrate handles per Fed. Spec. L-P349A, Type 3, Class MS; red and black. Solderless tip of nickel-plated brass. Elbow of molded thermosetting plastic, per MIL-M-14 CFG; red and black. Nickel-plated brass body. Nickel-plated, four-leaved phosphor bronze spring. 50″ rubber covered kinkless test lead wire.

H.H.S. No.	Meter End	Net Price per Pair
625	Phone tips	$1.80
685	Banana plugs	2.05

NEEDLE PROD METER TEST LEADS (FIG. F)

Molded butyrate handles per Fed. Spec. L-P349A, Type 3, Class MS; red and black. Nickel-plated steel needle prod. Elbow of molded phenolic plastic, in red and black. Nickel-plated brass body. Nickel-plated, four-leaved phosphor bronze spring. Rubber covered 50″ kinkless test lead wire.

H.H.S. No.	Meter End	Net Price per Pair
626	Phone tips	$1.80
686	Banana plugs	2.05

TEST LEAD KIT (FIG. G)

Includes one pair of test leads in red and black, with test prods on one end and banana plugs on the other; plus two phone tips, two alligator clips and two spade lugs.

H.H.S. No.	Prod Type	Net Each
610	Solderless	$2.50
611	Needle tip	2.50

UNIVERSAL TEST LEADS (FIG. H)

Fifty leads in one—completely interchangeable. One lead can make any required test lead combination. All parts adapt into prod handle or tip handle. Includes 5 kV rubber covered wire, 26 strands #34 copper, #20 AWG, insulated to .125″ O.D. With plastic kit.
H. H. Smith No. 699—Net Each..**$5.00**

MINIATURE UNIVERSAL TEST LEADS (FIG. H)

With miniature tips, clips, banana plugs and spade tips. One lead set makes any required test lead combination. All parts adapt into prod handle or meter tip. Includes 5 kV rubber covered wire, 26 strands #34 copper, #20 AWG, insulated to .125″ O.D. With plastic kit.
H. H. Smith No. 679—Net Each..**$5.00**

ALLIGATOR CLIP TEST LEADS (FIG. J)

Cadmium-plated steel clips.

H.H.S. No.	Wire Length	Net Price per Pair
604	12 inches	$1.00
605	24 inches	1.05
606	36 inches	1.10
607	48 inches	1.15

ALLIGATOR CLIP TEST LEADS WITH BOOTS (FIG. K)

Cadmium-plated steel clips. Vinyl plastic boots in red and black.

CROCODILE CLIP TEST LEADS (FIG. M)

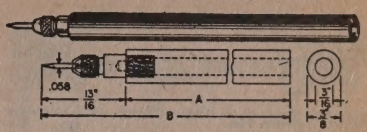
Cadmium-plated steel clips. Vinyl plastic boots in red and black. Molded phenolic plastic elbows in red and black. Nickel-plated brass tips. Nickel-plated, four-leaved phosphor bronze spring.
H. H. Smith No. 648—Net/Pair...**$1.60**

CROCODILE CLIP TEST LEADS (FIG. M)

Cadmium-plated steel clips. Vinyl plastic boots in red and black. Molded phenolic plastic elbows in red and black. Nickel-plated brass tips. Nickel-plated, four-leaved phosphor bronze spring.
H. H. Smith No. 675—Net/Pair...**$1.50**

TEST PRODS

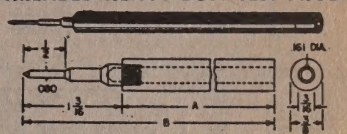
PHONO NEEDLE TEST PROD



Removable chuck for easy replacement of broken needles. Needle pierces corrosion or plating for positive meter readings. Rated 12 amps AC for 10° C temperature rise, continuous duty. Handle is molded butyrate per Fed. Spec. L-P349A, Type 3, Class MS; specify color, red or black. Plug is nickel-plated brass.

H.H.S. No.	Handle (A)	Overall (B)	Net per C
317	4″	4 13/16″	$36.00
318	5½″	6 5/16″	42.00

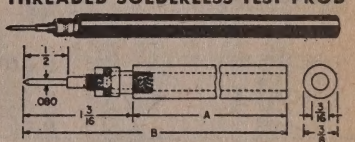
THREADED HEAVY DUTY TEST PROD



Large diameter well permits soldering of heavy duty wire directly into plug. Fits standard phone tip jacks. Rated 12 amps AC for 10° C temperature rise, continuous duty. Molded butyrate handle per Fed. Spec. L-P349A, Type 3, Class MS. Specify color, red, black. Nickel-plated brass plug.

319	4″	5 3/16″	$33.00
329	5½″	6 11/16″	36.00

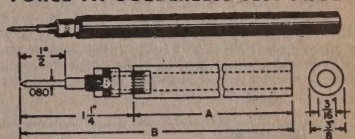
THREADED SOLDERLESS TEST PROD



Solderless type; wire fits through handle and body of plug, then is wrapped around screw portion and tightened with knurled collar. Rated 12 amps AC for 10° C temperature rise, continuous duty. Molded butyrate handle per Fed. Spec. L-P349A, Type 3, Class MS. Specify handle color: red or black. Nickel-plated brass plug.

302	4″	5¼″	$33.00
303	5½″	6¼″	36.00

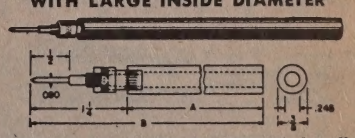
FORCE FIT SOLDERLESS TEST PROD



Solderless type; wire fits through handle and body of plug, then is wrapped around screw portion and tightened with knurled collar. Rated 12 amps AC for 10° C temp. rise, continuous duty. Molded butyrate handle per Fed. Spec. L-P349A, Type 3, Class MS. Specify handle color: red or black. Nickel-plated brass plug.

382	4″	5¼″	$33.00
383	5½″	6¼″	36.00

FORCE FIT SOLDERLESS TEST PROD WITH LARGE INSIDE DIAMETER



Solderless type; wire fits through handle and body of plug, then is wrapped around screw portion and tightened with knurled collar. Extra large inside diameter for heavy duty wire. Rated 12 amps AC for 10° C temp. rise, continuous duty. Handle is molded butyrate per Fed. Spec. L-P349A, Type 3, Class MS. Specify handle color: red or black. Nickel-plated brass plug.

352	4″	5¼″	$33.00
353	5½″	6¼″	36.00

CABLE MOUNT DUAL BANANA PLUGS

1675 1676 1787

H. H. Smith No. 1675 Set-Screw Plug—Rear has 7/32" dia. cable guide, dual banana jacks on 3/4" centers. Front has dual banana plugs on 3/4" centers. Set-screws secure leads to conductors. Specify red or black. Net Each.....**75c**

H. H. Smith No. 1676 Turret-Terminal Plug—Same as above, but with turret terminals for permanent solder connection. Red or black. Net Each.....**85c**

H. H. Smith No. 1787 Shielded Plug—Rear has mounting screw and locating boss, inline cable entry with flush cable guide. Front has dual banana plugs on 3/4" centers. Turret terminals for permanent solder connection. Aluminum shield electrically connected to ground conductor; fully enclosed plug and mating binding posts to reduce noise pickup. Net..**$2.25**

COMPONENT MOUNT DUAL PLUGS

1677 1694 1696

1678 1693 1770

H. H. Smith No. 1677 Set-Screw Plug—Rear has dual banana jacks on 3/4" centers for stacking. Front has dual banana jacks on 3/4" centers. Set-screws secure component leads to conductors. Specify red or black. Net Each.....**75c**

H. H. Smith No. 1694 Set-Screw Phone Tip Plug—Rear has dual banana jacks on 3/4" centers for stacking. Front has dual .080" phone tips on 3/4" centers. Set-screws secure component leads to conductors. Specify red or black. Net Each.....**75c**

H. H. Smith No. 1696 Four-Terminal Isolation Type Plug—Rear has dual banana jacks on 3/4" centers for stacking. Center has turret-terminal connections to isolated front and rear conductors in both Ground and Hot circuits for insertion of matching pad or other 4-terminal networks in input circuits of instruments. Front has dual banana plugs on 3/4" centers. Specify red or black. Net Each.....**$3.25**

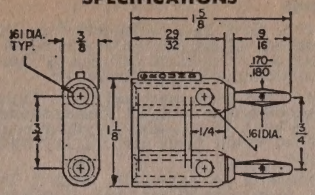
H. H. Smith No. 1678 Turret-Terminal Plug—Rear has dual banana jacks on 3/4" centers for stacking. Front has dual banana jacks on 3/4" centers. Turret terminals. Specify red or black. Net Each.....**85c**

H. H. Smith No. 1693 Phone Tip Plug—Rear has dual phone tip jacks on 3/4" centers for stacking. Front has dual .080" phone tips on 3/4" centers. Turret terminal. Specify red or black. Net Each.....**85c**

H. H. Smith No. 1770 Three-Terminal Isolation Plug—Rear has dual banana jacks on 3/4" centers for stacking. Center has turret-terminal connections to isolated front and rear conductors in Hot circuit, straight-thru connection of Ground circuit, with terminal, for insertion of "T" and "P" networks in input-output circuits in instruments. Front has dual banana plugs on 3/4" centers. Specify red or black. Net Each.....**$2.50**

SHORTING TYPE PLUGS

SPECIFICATIONS



Materials: Body is molded butyrate per Fed. Spec. L-P349A, Type 3, Class MS; black color unless otherwise specified. Brass conductor per QQ-B-626 Comp. 22, 1/2 hard. Four-leaved beryllium copper spring, heat treated. Molded nylon head per MIL-P-20693A. Drawn aluminum shield. Cadmium-plated steel screws. **Finishes:** Conductor and spring, nickel-plate per QQ-N-290, Class I, Type VII. Gold-washed terminal. Non-tarnish connector. Black anodized shield. **Ratings:** 15 amps AC for 10° C temp. rise, continuous duty; 5000 VAC, 60 Hz continuous working voltage; except where limited by coaxial connectors. Capacity, 1.0 pF nominal between 3/4" spaced connectors. Resistance, 1 milliohm or less per conductor.

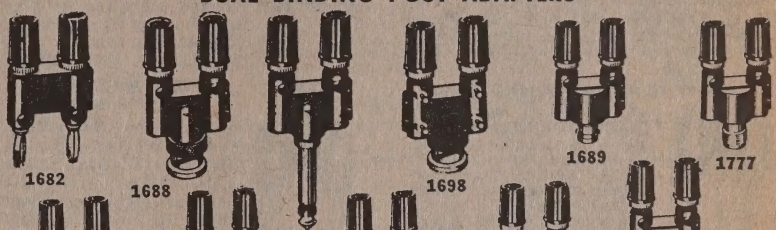
1516 1683 1692

H. H. Smith No. 1516 Dual Banana Plug—Rear has dual banana jacks on 3/4" centers for stacking. Front has dual banana plugs on 3/4" centers; banana jack holes for side stacking. Busbar shorted across line. Specify red or black. Net Each...**$1.20**

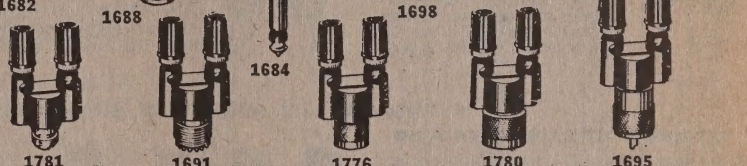
H. H. Smith No. 1683 Metal Shorting Bar Plug—Rear has 3/32" thick brass busbar; 15 amps continuous duty. Front has dual banana plugs on 3/4" centers. Unit sits flush to panel. Net Each.....**75c**

H. H. Smith No. 1692 Phone Tip Plug—Rear has dual banana jacks on 3/4" centers for stacking. Front has dual .080" phone tips on 3/4" centers; banana jack holes for side stacking. Busbar shorted across line. Specify red or black. Net Each...**$1.00**

DUAL BINDING POST ADAPTERS



1682 1688 1684 1698 1689 1777



1781 1691 1776 1780 1695

Reoar f each adapter has insulated, dual 5-way binding posts, with red and black heads on 3/4" centers. Banana jack holes for side stacking (except No. 1698). Front has plug or jack as indicated.

H. H. Smith No. 1682 Binding Posts to Dual Banana Plugs—Front has dual banana plugs on 3/4" centers. Net..**$2.25**

H. H. Smith No. 1684 Binding Posts to 2-Circuit Phone Plug—Front has standard 1/4" two-circuit phone plug. Net..**$4.60**

H. H. Smith No. 1688 Binding Posts to BNC Male—Front has BNC series coaxial plug. Net Each.....**$4.60**

H. H. Smith No. 1698 Binding Posts to Isolated BNC Male—Front has BNC coaxial plug. Center has turret-terminal connections to isolated front and rear conductors in both Ground and Hot circuits for insertion of matching pad or other 4-term. networks in input. Net..**$10.00**

H. H. Smith No. 1689 Binding Posts to BNC Female—Front has BNC series female coaxial jack. Net Each.....**$4.60**

H. H. Smith No. 1776 Binding Posts to TNC Male—Front has TNC series coaxial plug. Net Each.....**$7.00**

H. H. Smith No. 1777 Binding Posts to TNC Female—Front has TNC series coaxial jack. Net Each.....**$6.00**

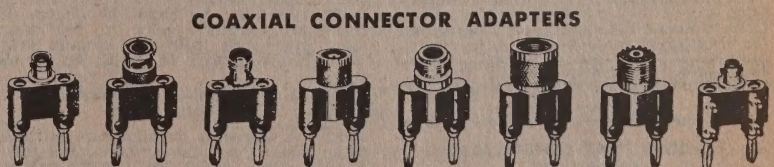
H. H. Smith No. 1780 Binding Posts to Type N Male—Front has Type N coaxial plug. Net Each.....**$7.00**

H. H. Smith No. 1781 Binding Posts to Type N Female—Front has Type N coaxial jack. Net Each.....**$6.00**

H. H. Smith No. 1695 Binding Posts to UHF Male—Front has UHF series coaxial jack. Net Each.....**$5.00**

H. H. Smith No. 1691 Binding Posts to UHF Female—Front has UHF series coaxial jack. Net Each.....**$5.25**

COAXIAL CONNECTOR ADAPTERS



1686 1687 1774 1775 1778 1779 1790 1697

Front of each adapter has dual banana plugs on 3/4" centers. Banana jack holes for side stacking (except No. 1697). Rear has coaxial connector as indicated.

H. H. Smith No. 1686 BNC Female to Banana Plugs—Rear has BNC series coaxial jack. Net Each.....**$2.60**

H. H. Smith No. 1687 BNC Male to Banana Plugs—Rear has BNC series coaxial plug. Net Each.....**$3.60**

H. H. Smith No. 1774 TNC Female to Banana Plugs—Rear has TNC series coaxial jack. Net Each.....**$5.25**

H. H. Smith No. 1775 TNC Male to Banana Plugs—Rear has TNC series coaxial plug. Net Each.....**$6.00**

H. H. Smith No. 1778 Type N Female to Banana Plugs—Rear has Type N coaxial jack. Net Each.....**$5.25**

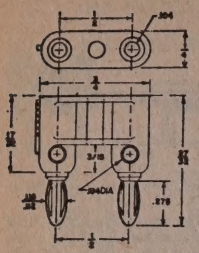
H. H. Smith No. 1779 Type N Male to Banana Plugs—Rear has Type N coaxial plug. Net Each.....**$6.00**

H. H. Smith No. 1690 UHF Female to Banana Plugs—Rear has UHF series coaxial jack. Net Each.....**$4.60**

H. H. Smith No. 1697 BNC Female to Isolated Dual Banana Plugs—Rear has BNC series coaxial jack. Center has turret-terminal connections to isolated front and rear conductors in both Ground and Hot circuits for insertion of matching pad or other 4-terminal networks in input circuits. Net Each.....**$9.00**

H. H. Smith Test Adapters

MINIATURE DUAL TEST ADAPTERS



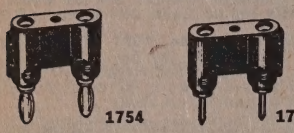
SPECIFICATIONS

Ratings: 5 amps AC for 10° C temp. rise, continuous duty; 2000 VAC, 60 Hz continuous working voltage; except where limited by coaxial connectors. Capacity, 3.0 pF nominal between ½" spaced conductors. Resistance, 1 milliohm or less per conductor.

Materials: Molded butyrate body, Fed. Spec. L-P349A, Type 3, Class MS; black color unless otherwise specified. Brass conductor per QQ-B-626, Comp. 22, ½ hard. Four-leaded beryllium copper spring, heat treated. Molded nylon head per MIL-P-20693A. Cadmium-plated steel screws.

Finishes: Nickel-plated conductor per QQ-N-290, Class I, Type VII. Nickel-plated spring. Gold washed terminal. Non-tarnish plate connector.

SET SCREW CONNECTION



Rear has dual banana jacks on ½" centers for stacking. Front has set-screws that secure component leads to conductors.

H. H. Smith No. 1749 Banana Plugs—Front has dual banana plugs on ½" centers. Specify red or black. Net Each..**75c**

H. H. Smith No. 1754 with .080" Phone Tips—Front has dual .080" phone tips on ½" centers. Specify red, black. Net...**75c**

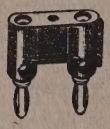
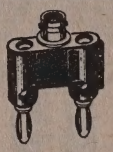
PHONE TIP ADAPTER



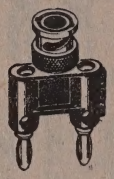
H. H. Smith No. 1751—Rear has dual .080" phone tip jacks on ½" centers for stacking. Front has dual banana plugs on ½" centers. Specify red or black. Net Each.....**85c**

BNC FEMALE TO BANANA PLUGS



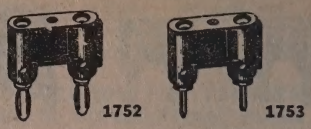
H. H. Smith No. 1758—Rear has BNC series coaxial jack; banana jack holes for stacking. Front has dual banana plugs on ½" centers; banana jack holes for side stacking. Black. Net Each.....**$3.00**

BNC MALE TO BANANA PLUGS



H. H. Smith No. 1759—Rear has BNC series coaxial plug. Front has dual banana plugs on ½" centers; banana jack holes for side stacking. Black. Net Each...**$3.95**

MOLDED-IN SHORTING ADAPTERS



Rear has dual banana jacks on ½" centers for stacking. Busbar shorted across line.

H. H. Smith No. 1752 with Banana Plugs—Front has dual banana plugs on ½" centers; banana jack holes for side stacking. Specify red or black. Net Each.....**75c**

H. H. Smith No. 1753 with Phone Tips—Front has dual .080" phone tips on ½" centers. Banana jack holes for side stacking. Specify red or black. Net Each..**75c**

BINDING POST ADAPTERS

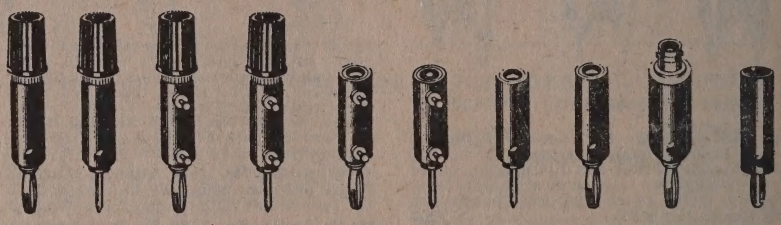
Rear has insulated, dual 5-way binding posts, with red and black heads on ½" centers. Banana jack holes for side stacking.

H. H. Smith No. 1755 Binding Posts to Dual Banana Plugs—Front has dual banana plugs on ½" centers. Black color. Net Each.....**$2.25**

H. H. Smith No. 1756 Binding Posts to BNC Male—Front has BNC coaxial plug. Black. Net Each.....**$4.60**

H. H. Smith No. 1757 Binding Posts to BNC Female—Front has BNC coaxial jack. Black. Net Each.....**$4.60**

STANDARD AND MINIATURE SINGLE TEST ADAPTERS



Ratings: Standard types rated 15 amps continuous duty, 5000 VAC continuous working, except where limited by coaxial connector; miniature types rated 5 amps and 2000 VAC. Resistance, 1 milliohm or less when seated in proper mating connectors. **Materials:** Butyrate body per MIL-P-10408A, Type 1, Class 2; black or red color. Brass conductors per QQ-B-626, Comp. 22, half hard. Four-leaved beryllium copper springs (heat treated). Molded nylon heads per MIL-P-20693A. Cadmium-plated steel screws. **Finishes:** Conductors and springs are nickel plated per QQ-N-296, Class I, Type VII. Terminals are gold washed. **Size:** Standard Adapters: phone tip, .080" dia. x ½" long; banana plug, .180"/.170" dia. x 9/16" long; phone jack, .080" dia.; banana jack, .161" dia., body, ⅜" dia. Miniature Adapters: phone tip, .080" dia. x ⅜" long; banana plug, .118"/.112" dia. x 9/32" long; phone jack, .080" dia.; banana jack, .104" dia.; body, ¼" dia. **Color Code Suffix:** Add suffix **-103** to H. H. Smith No. for black body; suffix **-102** for red body.

BINDING POST TO BANANA PLUG

Rear has insulated 5-way binding post. Front has standard or miniature banana plug. Banana jack hole for side stacking.

H.H.S. No.	Description	Net Ea.
5025	Standard Adapter	$1.10
5035	Miniature Adapter	1.10

BINDING POST TO PHONE TIP

Rear has insulated 5-way binding post. Front has standard .080" phone tip. Banana jack hole for side stacking.

H.H.S. No.	Description	Net Ea.
5026	Standard Adapter	$1.00
5036	Miniature Adapter	1.00

BINDING POST TO ISOLATED BANANA PLUG

Rear has insulated 5-way binding post. Front has standard or miniature banana plug. Center has turret-terminal connections to isolated front and rear conductors for insertion of component in series input.

H.H.S. No.	Description	Net Ea.
5027	Standard Adapter	$1.10
5037	Miniature Adapter	1.10

BINDING POST TO ISOLATED PHONE TIP

Same as above, but with standard .080" phone tip at front.

H.H.S. No.	Description	Net Ea.
5028	Standard Adapter	$1.00
5038	Miniature Adapter	1.00

TIP JACK TO ISOLATED PHONE TIP

Rear has standard .080" tip jack. Front has .080" phone tip. Center has turret-terminal connections to isolated front and rear conductors for insertion of component in series input circuit.

H.H.S. No.	Description	Net Ea.
5030	Standard Adapter	$0.95
5040	Miniature Adapter	.95

BANANA JACK TO ISOLATED BANANA PLUG

Rear has standard or miniature banana jack. Front has standard or miniature banana plug. Center has turret-terminal connection to isolated front and rear conductors for insertion of component in series input.

H.H.S. No.	Description	Net Ea.
5029	Standard Adapter	$1.00
5039	Miniature Adapter	1.00

STACKING SOLDERLESS PHONE TIP

Rear has standard or miniature banana jack for stacking. Front has .080" phone tip. Side has wire lead hole that secures test lead with internal set-screw.

H.H.S. No.	Description	Net Ea.
5031	Standard Adapter	$0.70
5041	Miniature Adapter	.70

STACKING SOLDERLESS MINIATURE BANANA PLUG

Rear has miniature banana jack for stacking. Front has miniature banana plug. Side has wire lead hole that secures test lead with internal set-screw.

H. H. Smith No. 5042—Net Each...**65c**

BNC JACK TO BANANA PLUG

Rear has BNC series coaxial jack. Front has standard banana plug. Side banana jack hole for side stacking. Std. adapter.

H. H. Smith No. 5032—Net Each.**$2.00**

TIP JACK TO BANANA PLUG

Rear has standard .080" phone tip jack. Front has standard or miniature banana plug. Banana jack hole for side stacking.

H.H.S. No.	Description	Net/100.
214	Standard Adapter	$55.00
5033	Miniature Adapter	50.00

PRINTED CIRCUIT TEST JACKS

MILITARY TYPE (MEETS MIL-C-39024/11)

Double entry design; probes inserts from either end of jack. Closed entry construction will not accept probes larger than .084", will contact probes down to .074". Closed bottom design keeps jack from fouling with solder or flux. Locking ears keep jack firmly in board until soldered. Precise dimensions allow for automated assembly on boards. **Ratings:** Operating voltage, 1500 V at 60 Hz rms, sea level; 350 V, 60 Hz rms at 50,000 feet. Maximum current rating, 5 amps AC. Contact resistance, 20 mV drop max. at specified current, at 25° C. **Mechanical Data:** Thermal shock, vibration, humidity, insulation resistance, salt spray per MIL-STD-202B. All mechanical tests per applicable section of MIL-C-39024. Insertion force, 30 oz. maximum; withdrawal force, 3 oz. minimum with .080" probe. **Body:** Molded nylon per MIL-P-17091. Available in 10 colors, as indicated below. **Spring:** Beryllium copper per QQ-C-533. **Finish:** Gold plate per MIL-G-45204, Class I, Type 2. Nickel underplate per QQ-N-290, Class I, Type 7, .0002" thick. **Mounting:** Mounts in .052" dia. holes on .400" centers; board thickness as specified below. Can be spaced side-by-side .160" on centers minimum.

H. H. Smith No. 325—"L" dimension, 0.156"; for boards up to 1/16" thick. Meets MIL-C-39024/11-01 through -10. Net per 100 ..... **$15.00**

H. H. Smith No. 321—"L" dimension, 0.219" for boards up to 1/8" thick. MIL-C-39024/11-21 through -30. Net per 100 ... **$15.00**

COMMERCIAL TYPE

Mechanical Data: Thermal shock, vibration, humidtiy, insulation resistance and salt spray tests per MIL-STD-202B. Solderability per MIL-S-6872. Insertion and withdrawal force, 8 oz. min., 5 lbs. max. with .080" (±.001") dia. probe. **Ratings:** 5 amps AC for 10° C temp. rise, continuous duty. 1.5 kV, 60 Hz AC continuous working voltage. Contact resistance, 5 milliohms max. at rated current. Capacitance, less than 5 MHz at 1 pF. **Finish:** Silver underplate, .0002" minimum per QQ-S-365, Type I, with .00003" gold overplate per MIL-F-14072, M-310. **Mounting:** Mounts in .052" dia. holes, on .400" centers, in boards up to 3/16" thick. Can be spaced side-by-side .160" on centers min.

LOW PROFILE IC SOCKETS

Provided with removable cover for closed entry and contact replacement, polarity guide for assembly alignment. Made of glass filled black nylon, phosphor bronze (QQ 13-750 Comp. A) contacts, 10–20 microinches gold over 30–100 microinches silver. Available in 14 and 16 pin, wire wrap and solder tab terminals. Standard package of 50.

POWER TRANSISTOR SOCKET

For use with transistors having a TO-3 case. Body of general purpose phenolic with contacts of phosphor bronze, gold over silver plated. Mounting plate with 6-32 tapped holes. Standard package of 100.

H.H.S. No. 6266 Power Transistor Socket—Net per C ... **$30.00**

H. H. SMITH (GREENLEE) CHASSIS PUNCHES FOR RADIO, TV AND ELECTRONICS

Complete line of chassis hole punches for swiftly cutting clean, accurately located holes in chassis and panels. An assortment of round, square, "D", and keyed holes can be punched by inserting in drilled pilot hole, and turning with wrench. Finished hole is smooth, accurately sized with burrs. Round punches are provided with center-line markings for enlarging holes larger than pilot hole. Individually packed.

ADJUSTABLE PRINTED CIRCUIT CARD RACK

Universally adjustable, economical support system for printed circuit cards. Adjusts up-and-down for card widths from 2 3/8″ to 4 3/4″; adjusts front-to-back for card lengths from 3 1/2″ to 7 1/4″. Card spacing is adjustable in .400″ increments. Adjustable, calibrated slide racks for fast, precise adjustment to any card size. Adjustable locking bar holds cards securely against rear connectors; adjustable for various PC connector sizes. Fits standard 19″ racks.

SPECIFICATIONS

Card Capacity: Up to 39 cards (.400″ minimum centers). **Card Sizes:** With locking bar: 4 3/4″ maximum width, 6 1/2″ maximum length, 2 3/8″ minimum width, 4 3/8″ minimum length. Without front card lock: 7 1/4″ maximum length, 3 1/2″ minimum length. **Card Guides:** Precision molded plastic. Four guides provided for each card to insure location accuracy. **Connector Spacing:** Accommodates card-edge connectors with mounting centers from 0.936″ to 4.437″. **Locking Bar:** Held in place with captive screws for rapid card change. Card identification marking available on front of locking bar.

DACRON* LACING CORD

Conforms to physical requirements of MIL-T-713A. Offers greater tensile strength with minimal stretch than nylon. Fungus, acid and abrasion resistant. Natural color. Supplied in 1-lb. tubes.

*Reg. DuPont trademark.

H.H.S. No.	Class	Test	Yardage	Net Each
722	1	78 lb.	750	$11.60
724	3	37 lb.	1500	12.70

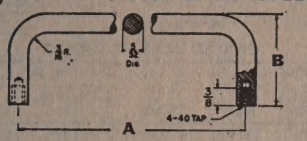
MATERIAL AND FINISH

Material and finish specifications are met by all panel handles, ferrules and hardware where applicable.

Materials: Brass—in accordance with Federal Spec. QQ-B-626, Composition 22, ½ hard. Aluminum—in accordance with Federal Spec. QQ-A-365, Composition A, Type 3. Steel—cold-rolled, in accordance with QQ-S-633b, Grade FS-1010.

Finishes: Nickel plate—polished, in accordance with Federal Spec. QQ-N-290, Class I, Type VI. Black oxide—in accordance with MIL-F-495A. Satin etch—commercial finish. Black anodize—in accordance with MIL-A-8625A. Optical black—color in accordance with Fed. Std. 595, type 37038; paint complies with Fed. Spec. TT-E-527.

5/32" DIA. PANEL HANDLES



5/32" dia. with internal 4-40 thread, 3/8" deep. Brass or aluminum.

NYLON AND BUTYRATE CABLE CLAMPS

Nylon Clamps: Ideal for temperatures below 300° F (150° C). Meet MIL-P-17091A, Amend. 2, MIL-P-17091B/MIL-P-20693, Type 1, MIL-STD-242A and B (Ships)/MS-39014 (Ord). Mtg. hole .167" dia. for 3/8" wide types; 13/64", others.

Butyrate Clamps: For indoor or ethyl cellulose replacement. Material approved per MIL Spec. L-P-349a, Type III, Class MH. Ultra-violet stabilized for weather extremes. Mtg. hole 13/64" dia.

SOLDERLESS TERMINALS AND CONNECTORS

Solderless terminals constructed of the finest materials; annealed electrolytic copper and electro-tin plated. One-piece design is internally serrated, has strength gussets and chamfered edge. S-1000 Series non-insulated terminals make positive connections, save labor, provide uniformly reliable connection. T-2000 Series has all advantages of S-1000 Series terminals plus permanently attached, rigid vinyl plastic insulating sleeve. 26-24 wire-range terminals have 1/8" length barrel. All others shown have standard 1/4" barrel. Also available with short barrel, 3/32" length. For short barrel add prefix letter S to part number; e.g., SS-1925, or ST-2099. Same prices prevail. Terminals also available with brazed barrel, copper sleeve, or copper sleeve with nylon insulation. UL and CSA Recognized. For prices, see Price Code tables on following page.

Meet current MIL-C-5015 specifications; interchangeable with units made to meet previous specs. **Finish:** Cadmium-plated aluminum with olive drab chromate conversion coating; non-reflective, corrosion-resistant. **Inserts:** Molded diallyl phthalate; offers dimensional stability, high insulation resistance, high arc resistance. **Contacts:** Non-rotating, silver-plated; pre-tinned solder pockets. **Coupling Rings:** Made from solid aluminum bar stock. Other MS/AN connectors for potting and pressurizing are available; write for complete literature.

Note: For W, X, Y or Z polarization, add **5c** to price shown.

Type 3100A: Wall receptacle with mounting flange; with AN3057 cable clamp.
Type 3101A: Cable receptacle. Provides for detachable splice in cable or conduit.
Type 3102A: Box receptacle that mounts on chassis or panel. For open type wiring.
Type 3106A: Straight plug with solid back shell.
Type 3106B: Same but with split back shell.
Type 3108A: Angle plug. Solid back shell.
Type 3108B: Same, but with split back shell.

MINIATURE AN 165 SERIES CONNECTORS

Economical, quality miniature connectors feature quick mate and disconnect with reliable bayonet coupling. Pressure- and weather-proof. **Finish:** Aluminum shells with clear conversion seal. **Construction:** Internal rubber gasket cable clamp except those with potting construction. **Inserts:** Hard dielectric, rubber faced for environmental capability. Available in eight insert configurations with from 5–24 contacts in two shell sizes. **Contacts:** Gold over silver-plated; available in X and W alternate positions. **Mounting:** Small receptacles mount in $1\frac{13}{32}$" dia. hole, four .125 screw holes on $\frac{25}{32}$" centers. Large receptacles mount in $1\frac{1}{16}$" hole with four .125 screw holes on $1\frac{5}{64}$" centers. **Size:** Small plugs, $2\frac{1}{64}$" lg. x $\frac{57}{64}$" dia.; large plugs, $2\frac{1}{16}$" lg. x $1\frac{9}{64}$" dia. **Rated:** 500 volts rms except as otherwise indicated. **Weight:** 3 oz., average.

SMALL SIZE: FIVE #20 CONTACTS

Rated 600 volts rms.

MS3057A CABLE CLAMPS & AN3420 BUSHING

Clamp for rubber-covered cables protected by tubing. Both halves float so cable is always centered for maximum strain relief. With unjacketed cable or wire bundles, use bushing. Shell sizes 16 and larger require two "telescoping" bushings (one corresponding size AN3420 with one smaller).

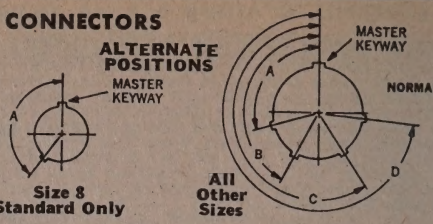
HOW TO ORDER ASTRO/348 CONNECTORS

348	-3	0	E	18	-85	S	1	(200)
A	B	C	D	E	F	G	H	I



(A) Series Designation: **348.**

(B) Type: **3**—Long MIL-C-81511, Rev. B. For blind mating; can't damage by wiping contacts across a mating shell. Even when mated, .090" contact separation is guaranteed. Won't mate with Type 4. **4**—Standard MIL-C-81511, Rev. B. Standard construction; for most applications. Won't mate with Type 3.

(C) Shell Style: **0**—Square Flange Receptacle. **1**—Cable Receptacle. **3**—Single Hole Mounting Receptacle. **5**—Hermetically-sealed, Solder Flange Receptacle. **6**—Straight Plug.

(D) Class: **E**—Environmental is standard. H, Hermetic and P, Potted are available on special order.

(E) Shell Size: **08, 10, 14, 16 and 18** are standard; **20, 22 and 24** available only in long construction.

(F) Insert Arrangement: **03, 04, 05, 07, 09, 11, 12, 14, 19, 21, 24, 27, 32, 37, 38, 41, 45, 55, 61, 74, 85, 92, 121 and 155.**

(G) Contact Style: **P**—Pin Contact. **S**—Socket Contact.

(H) Shell Position: 1, normal; 2, 3, 4, 5 or 6 available.

(I) Deviations: Omit if no cable clamp is desired; **(200)**—connector with cable clamp; **(201)**—connector less contacts (separate contacts listed on the previous page).

Write for key and keyway arrangement for standard and long construction types.

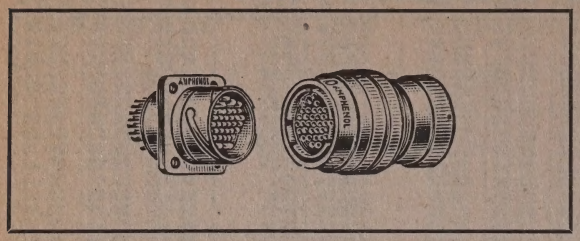
MINNI-E® SERIES 67 MINIATURE CONNECTORS



Quick disconnect, multi-contact, miniature bayonet connectors are environment sealed with unitized back end grommet or provision for potting. Shells are polarized for easy mating alignment; single key on 12, 14 and 18 sizes, 5 keys for sizes 20 and 22. Spring-loaded coupling ring for positive locking action in bayonet slot; stainless steel slots and pins. Hooded contacts resist test prod damage. Contacts gold plated over silver. Visual engagement indicator built-in. Face seal gasket has individual barriers; hard insert dielectric. **Insulation Resistance:** "E" type following altitude-moisture resistance test, 1000 megs min.; MIL-C-5015 minimum following type "E" test, 100 megs. **Test Voltage:** 1500 V rms. 70,000 ft. on sealed connectors. **Vibration:** 10–2,000 Hz at 20 G's per Method 204 of MIL-STD-202A. **Temperature Cycling:** Per MIL-C-5015, Para. 4.5.3 increased to 257° F max., −67° F. min. Diallyl phthalate dielectric except hermetically sealed type. **Type P:** Potting mold meets MIL-C-5015. Indicated by P in number (example: 67-01P12-7S). Comes with disposable polyethylene potting form. **Type E:** Meets MIL-C-5015. With unitized grommet and clamp; individual wire seal. **Type J:** For use with jacketed cables; has waterproofing type cable clamp. **Type C:** General duty construction has standard type cable clamp to provide strong support for jacketed cables or unjacketed individual wire leads. When potted, meets requirements of "E" performance while providing a mechanical cable support. **Type H:** Glass dielectric hermetically sealed. **For X or W Positioning:** Specify by adding appropriate suffix, and **20c** (1–24), **18c** (25–99) or **15c** (100–199) to net price shown.

SERIES 225 PRINTED CIRCUIT CONNECTORS

Gold plated bifurcated ribbon contacts with eyelet, straight pin or right angle solder type terminations. Rated 5 amps at 600 VAC rms. Large mating surface provides low contact resistance. Centers .156" for .154" to .170" PC boards. Glass filled diallyl phthalate. Meets MIL-C-21097C. Polarizing key assures contact positioning. Straight pin is .406". Screw mount on 0.128" clearance hole.

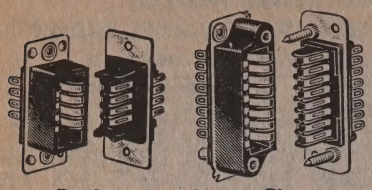
BLUE RIBBON® CONNECTORS



Barrier Polarization — Pin Polarization

Patented gold plated ribbon contact provides self-wiping action with low contact resistance. Steel mounting plates with float bushings for alignment in rack and panel applications. Impact and moisture resistant, high quality diallyl phthalate dielectric.

BARRIER POLARIZATION TYPES

Requires rectangular panel cutout. Polarization and contact alignment by construction of dielectric barriers at end of connectors (26-182, -183), or by barrier thickness between contacts. **Rating:** 5 amps, 750 V. Parts 26-4200 are float mounted, all others, fixed positions.

CABLE TO PANEL TYPES WITH KEYED LATCH-LOCK SHELLS

With end cable clamp (26-4301) or right angle cable clamp (26-4501) on the plug; both units mate with receptacle 26-4401. With notched keying to avoid cross-mating.

MICRO RIBBON® MINIATURE CONNECTORS

Extremely small connectors for dependable use where miniaturization is needed. Smooth, easy insertion and extraction. Self-wiping and cleaning. Double sided, flexing action of both contact members for added reliability. Available in up to 50-contact arrangements. Diallyl phthalate dielectric bodies. **Rating:** 700 VDC at sea level, 200 VDC at 70,000 feet. Shells, cadmium-plated brass with clear chromate finish.

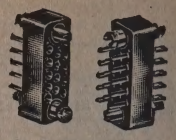
MINIATURE RECTANGULAR CONNECTORS



Rectangular connectors of a miniature size, intended for use wherever a circuit must be re-routed, made or broken in the interior of the equipment. Contacts and polarizing pins are gold over silver-base plating; will not tarnish or corrode. Dielectric bodies are of melamine. **Voltage Rating:** Types A and B, 700 V rms at sea level between contacts and 600 V rms at sea level between contacts and ground with a current of 17 amps; Type C and D, 600 V rms with a current of 7.5 amps. **Insertion Force:** 15 lbs., minimum to 40 lbs., maximum. **Withdrawal Force:** 1 lb., minimum to 4 lbs., maximum.

SERIES 126 RACK AND PANEL CONNECTORS

11, 15 and 20 contact connectors for use on rack and panel mountings. All have eyelets inserted in the mounting holes for added strength, holes for wiring instead of the usual hooks on the male contacts, and interlocking barriers to prevent accidental shorting. All models can be supplied with or without a protective can and cable clamp as shown. Molded of mica-filled phenolic. Contacts are gold over silver and molded into the insert. **Voltage Rating:** 900 volts rms, 60 Hz, at sea level. Contact size 12 rated 23 A; size 16 rated 13 A; size 20 rated 7.5 A. Also available to MIL-C-8384; specs and prices on request.

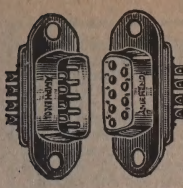
MIN RAC® 17 MINIATURE RACK AND PANEL CONNECTORS WITH POKE-HOME® CONTACTS



Half the size and weight of standards. "Poke Home" contacts are soldered to leads outside the connector, then "Poked Home" for quick, simple and reliable assembly. No damage or difficulty from "close in" soldering. From 9 to 50 contacts. Solder type contacts take up to #20 AWG wire. Crimp type take #20, #22 or #24 AWG wire. Steel shells with either clear chromate (listed) or gold iridite (change 2nd number from 0 to 1, e.g., -21090), over cadmium finish. Current rating: 7.5 A. Prices listed less cable housing.

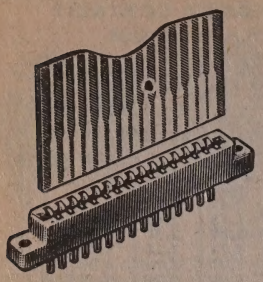
PRINTED CIRCUIT CONNECTORS



RECEPTACLES

—143 SERIES

Type 01

Type 03

The contact is the secret of these connectors' effectiveness; gold plated tuning fork contacts firmly, but gently. Will form-fit any standard .055″ to .073″ board. Contacts are on .156″ centers. Rated 600 V rms, 5 amps.

Contact Style

-01—Eyelet contact type. **-03**—Pin contact type. May be ordered with one contact replaced with a key, for positioning. When ordering, number indicates exactly what is desired: Example—143-010-01 indicates 143 Series, 10 contacts, -01 contact style.

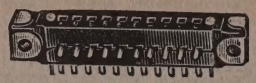
PLUGS—133 SERIES



Type 21

Type 03

For use with printed circuit boards requiring frequent mating and disengagement, also for boards of non-standard thickness. Contacts are on .156″ centers. Type 21 contact tail for use in cable to panel applications using a mate to 143 Series connector. Rugged, gold plated contacts. Rated 600 V rms, 5 amps. May be ordered with contact omitted for keying.

Contact Types

-21—Double Tail, solder type.

-03—Single Side Mount, pin type.

Stock Number Identification: No. 133-022-21 indicates 133 Series, 22 contacts, 21 contact tail (double tail, solder type).

INDIVIDUAL "WIRE-FORM" AND "RELIA-TAC" CONTACTS

For Amphenol Series 220–223 connectors. Current rating, 3 amps. Both take 24, 26, 28 gauge solid wire; 24, 26, 28 gauge stranded wire. **Wire-Form:** 4-member spring design. Gold clad copper alloy wire in gold plated copper sleeves; .413″ long. **Relia-Tac:** Gold-over-nickel on copper alloy body. Male, .388″ long; female, .404″ long. Does not mate with Wire-Form. **Ask about solder-tail contacts, special adapters, Ultra-Tac crimp contacts, special contacts, guide pins and strain reliefs also available.**

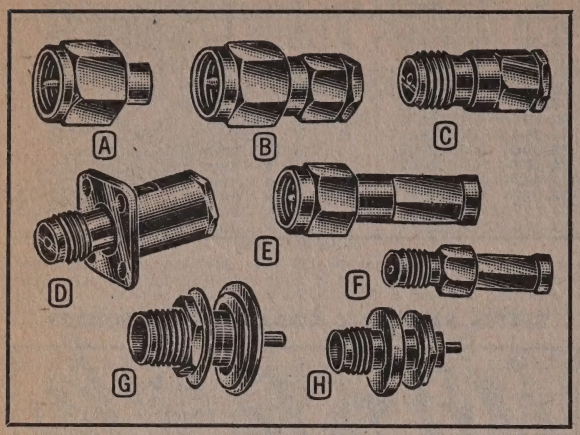
SEE FOLLOWING PAGES FOR PRICING

SERIES SMA SEMI-PRECISION 3mm HIGH FREQUENCY CONNECTORS



Excellent mechanical and electrical performance, DC to 18 GHz, even after 100 mating cycles. "Thin Wall" beryllium copper bodies have .00452" interface mating cross-section. Coupling nut torque can be twice that of other SMA designs. Easy assembly requires only a simple, low-cost tool kit; crimp style uses standard BNC/TNC Crimper No. 227-350.

Amphenol No. 901-2500 Tool Kit—Jacket and dielectric trim tools for precise cable preparation required for electric performance specified. Net Each, Lots 1–24 ..... **$12.50**

PLUGS AND JACKS

Solder attachment, except: *Clamp; †Crimp.

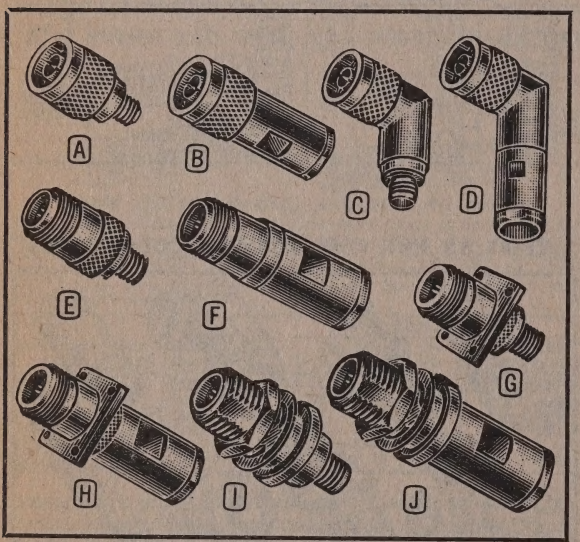
TYPE N MIL-C-39012 CONNECTORS



Medium size, weather proof, threaded coupling units for use up-to microwave frequencies. Designed to meet MIL-C-39012. They have crimpable fully captivated contacts, cable retention equal to the strength of the cable braid and utilize the same series of crimpable tools as the Amphenol BNC/TNC MIL type. Frequency range 0–10,000 MHz. 1500 V peak voltage.

QUICK-CRIMP TNC SERIES CONNECTORS

Exclusive design has optional crimp or solder center contact. Maintains constant impedance even when center contact is crimped. Non-impedance match connector when used with cables other than 50 ohms. VSWR is identical to standard solder type TNC connectors, 1.25 to 1, over frequency range to 10,000 MHz.

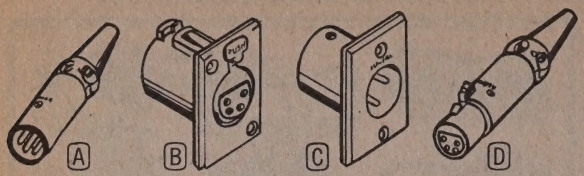
BUNKER RAMO AMPHENOL Audio Connectors

SERIES 91 MICROPHONE CONNECTORS



Low-cost, dependable audio-type Excellite connectors with latch-lock coupling; fully interchangeable with Qwik Series (below) and Cannon XLR series. Shells of tough molded ABS plastic, nickel-plated inside and out for best shielding. Copper alloy, silver-plated and chromate dipped contacts with solder cup termination.

MINIATURE TYPE S SOCKETS

These low cost sockets can be used for vacuum tubes, relays, input or output cable connections and where standard size sockets will not fit. Solderless wrap types mount in 5/8" dia. round or D shaped panel cut out; friction type retainer ring included. PC board types mount thru 1/16" dia. holes in PC boards arranged in proper pin circle dia. Contact shoulders prevent socket from bottoming, allow clearance for air circulations and cleaning.

COMPLETE LINE OF RF CONNECTORS FOR PROMPT DELIVERY.

ASK FOR UNLISTED OR NON-STOCK ITEMS, AVAILABLE ON SPECIAL ORDER.

AUGAT Plugs and Sockets

LOW PROFILE, PRINTED CIRCUIT DIP SOCKETS

Low profile, .063″ above board, sockets with closed, tapered entry insulator design. Anti-shorting wafer on bottom of each socket. Available with gold or tin plated contacts. **Contacts:** Wire-wrap—2 level and 3 level. PC—Style A, .005″ x .024″ straight; Style B, .005″ x .024″ crimped for retention on board during wave soldering.

HIGH DENSITY SOCKETS

Low profile 28-pin sockets designed to mate with the 9P28 Series Plug Assemblies. Available with mounting ears and wire wrap terminations or without mounting ears and printed circuit terminations. Two piece tapered-entry socket terminals. Four-leaf machined closed-entry inner contact and machined outer sleeve, beryllium copper, gold over nickel plated. Terminations are brass, gold over nickel or gold-plated.

PROGRAMMING JUMPER PLUG ASSEMBLIES

Program plugs to perform expanded DIP switch functions. Assemblies span .3″ centers to connect opposing contacts in IC patterns. Available with 1, 2, 3, 4, 7, 8 or 9 jumpers per assembly and in special configurations combining .1″ and .3″ center shorting jumpers on special order. **Insulator:** Thermoplastic polyester. **Pins:** Phosphor bronze, gold over nickel plated.

25-PIN CONTACT STRIP

Accepts flat dual inline IC leads or round leads to .025″ dia. Strips may be mounted side by side or end to end for any required pattern; ends may be cut off for continuous spacing on .100″ centers for more than 25 contacts on one row. Available with wire wrap (AG1F) or PC (AG1D) termination; alignment spacer provided with wire wrap termination sockets. Body is diallyl phthalate; wire wrap contacts are gold over nickel plated; PC contacts are spring temper beryllium copper over nickel plated. Size, .200″ w. x 2.560″ d. x .285″ h.

LED NUMERIC DISPLAY SOCKETS

Precision matched contacts for ultra reliability. Printed circuit or chassis mounting. Single units standard with multi-patterns available. Printed circuit, Wire Wrap* or solder pocket terminals Come in 8, 14, and 16 contacts with .300″ between rows (.600″ for 8 contacts). Gold plated contacts and tin plated sleeves standard. Gold plated sleeves available on request. Thermoplastic polyester insulators. Two piece contact assembly (inner contact and outer sleeve). **Overall Size:** 8 pins, .750″ x .400″ x .135″; 14 pins, .750″ x .450″ x .135″; 16 pins, .850″ x .450″ x .135″. Dimensions without terminals. **Terminals:** PC, .020″ dia. x .110″ h. min.; W/W, .025″ sq. x .500″ h.

AUGAT Plugs and Sockets

DUAL INLINE IC SOCKETS

For testing and packaging of 14-, 16-, 24-, 36 and 40-pin integrated circuits. Accept packages with round or flat leads, 300-mil (500-mil for Series 324 type AG1; 600-mil for Series 324 type AG2 and Series 336 and 40 spacing between rows and 100-mil spacing between leads. Series 314 and 316 types AG1 and AG3 are standard profile types; Series 314 and 316 types AG5 and AG6 are low-profile types. Contoured entry holes guide IC leads into socket; suffix **R** indicates inner guide rails. Body is molded diallyl phthalate except (‡) polyester; contacts are gold over nickel plate except (§) tin plate. Series 314 and 316 are sold in multiples of 5 only.

LEAD SOCKET CARRIERS

Aluminum carrier provides patterns of lead sockets for easy group insertion into board. Eliminates time consuming assembly of individual lead sockets. Carrier is disposable after wave soldering. Contacts are two piece—four-leaf machined closed-entry contact and machined outer sleeve.

ADAPTER PLUGS

Used for interposing discrete components and for modular construction with PC boards and substrates. Terminals are on same dimension as IC pattern. Base is glass-filled nylon; pins are phosphor bronze, gold over nickel plated. Contact pins available in three styles: round, solder pocket and slotted (standard). Terminal pins are .190″ long x .016″ sq.

26-PIN PLUG AND HEADER ASSEMBLY

Self-stripping "U" contact connection on round multiconductor cable. Plug (Augat No. 4P26-1) is glass-filled nylon with phosphor bronze, gold over nickel plated contacts. Cable (Augat No. 14010-2P8) comes in 100-ft. rolls; 28-gauge stranded 26-conductor copper wire with P.V.C. insulation. Header assembly (Augat No. 5P26-1) is glass filled nylon with phosphor bronze, gold over nickel plated terminals. Size: plug, .245″ w. x 1.500″ d. x .490″ h.; header assembly, .240″ w. x 1.900″ d. x .125″ h. Mounting centers, 1.600″.

HIGH DENSITY PLUG ASSEMBLIES

Low profile 28-pin single and double ended plug and cable assemblies. Designed for use with Series 8136 High Density Packaging Panels or can be used separately for bulkhead mounting. **Plug:** Thermoplastic polyester. **Pins:** Phosphor bronze, gold over nickel plated. **Size:** .805″ w. x .410″ h. x .495″ d. **Color Code:** Write for detailed color code wiring diagram. Plugs mate with Series 528 Sockets.

*Suffix **-05** (e.g., 1502-01-**05**19) indicates electro-solder plating; **-01**, silver plating; **-03**, gold plating. †Suffix indicates standard color: **16**, blue for diallyl units; **19**, white for Teflon units. MIL-T-55155 dash numbers (**0/9**) indicate range of colors available. Colors other than standard may be made to order in min. of 500 unit quantities: for diallyl, add **$0.01** ea.; for Teflon, add **$0.02** ea. To order nonstandard colors, replace **19** or **16** final endings of Cambion No. with: **-11**, brown; **-12**, red; **-13**, orange; **-14**, yellow; **-15**, green; **-17**, violet; **-18**, gray. ‡Dash nos. (e.g., 1942-**01**-05) indicate varying stud lengths available; specify with order. §Min. std. pkg. is 50 pcs. •Reg. DuPont T.M.

TEFLON• PRESS-MOUNT INSULATED TERMINALS

Easy mounting: Press into hole for permanent, rigid installation.

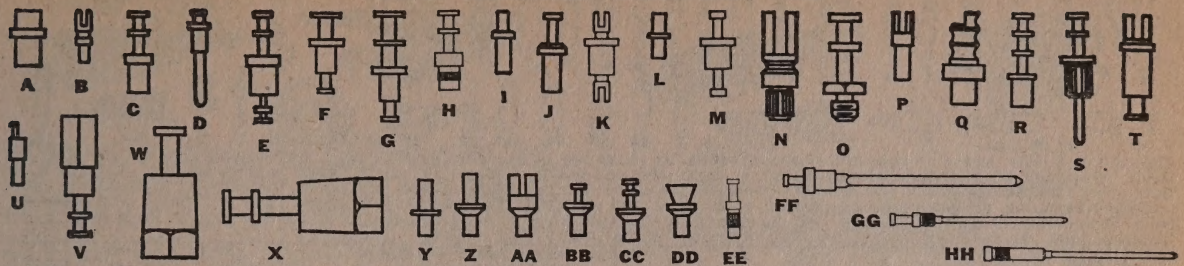
Solder Terminals, Wire-Wrap† Pins and Swaging Tools

SOLDER TERMINALS, WIRE-WRAP† PINS



CAMBION offers a full line of all styles and sizes of standard solder terminals: Single and double turret, slotted, castellated, forked and others. The most popular types are listed. Prices shown are for the following standard platings: Plating code suffix **-01**, silver; **-04**, electro-tin; **-05**, electro-solder; **-01-05**, both silver and electro-solder (prices of other platings available on request). Order by CAMBION Type No. with correct dash number for board thickness desired, followed by plating code suffix.

HAND SWAGER

Designed for quick, uniform swaging of solder terminals on terminal boards. Adjustable to a wide range of terminal board thicknesses. Swaging in place as far as 1 1/8" from board edge. Less tooling.

Cambion Type 3802-1—2 1/2" throat.
Net Each.....**$65.50**

Cambion Type 3803-1—5" throat.
Net Each.....**$104.50**

TYPE 3804-7 SOLENOID SWAGER WITH SWEEPGUARD AND FOOT SWITCH

Semi-automatic staker designed primarily for requirements too large for hand swaging, yet not large enough to require a Hopper Staker machine. A variable voltage autotransformer of at least 5 ampere size, 50–60 Hz, 115 volts AC, required but not furnished or included in price. Size, 25" H. (approximate) x 10" square base.

Cambion Type 3804-7 Solenoid Swager with Sweepguard and Foot Switch—
Net Each..**$764.50**

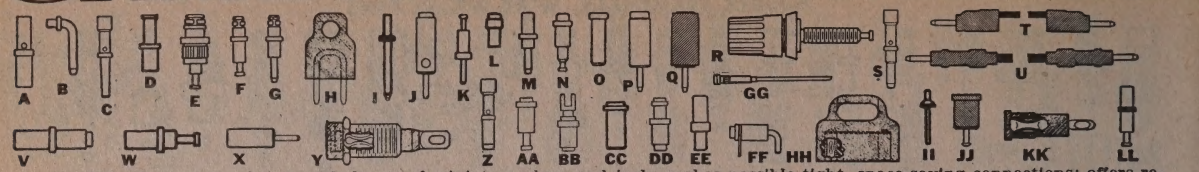
MINIATURE PLUG AND JACK CONNECTORS



CAMBION'S wide variety of sizes and shapes of miniature plugs and jacks makes possible tight, space-saving connections; offers reliable "pluggability" for individual components or assemblies and provides unique PC board design possibilities with patching to or from boards. Positive grip, with low contact resistance after many repeated insertions and extractions. Insulated or noninsulated types—units for swaging, dip-soldering, press mount or threaded stud mounting. **To Order:** Use Cambion Type No. (1521); add Dash No. from "Recommended Board Thickness" column to indicate board thickness or patch cord length, as the case may be. Final suffix shown indicates finish: **03**, Gold; **04**, Electro-Tin; **05**, Electro-solder; **08**, Bright Alloy plating.

Printed circuit connectors designed for minimum printed circuit card wear, low insertion force and positive contact with the printed circuit board. Units with solder tab or dip solder terminations utilize bifurcated contacts permitting two flexing surfaces instead of one for positive contact. Bifurcated contacts are especially recommended for added contact reliability where vibration or printed circuit board irregularities would otherwise cause trouble. Types meeting MIL spec MIL-C-21097B are also available as indicated. **Termination:** Bifurcated contacts with conventional 0.115" x 0.050" slot solder tabs. **Mounting:** Available with 0.128" dia. holes for standard mounting, molded-in bushings or floating bushings. Diameter of 0.142" also available on request. **Insulator Material:** Green glass-filled diallyl phthalate type SDG-F per MIL-M-14. **Contacts:** Phosphor bronze with 30 micro-inches gold finish; beryllium copper with 50 micro-inches gold to meet MIL-C-21097B as specified. **Polarizing Keys:** Ordered separately as follows: No. 50-PK-1 for in-contact polarization made of diallyl phthalate; No. 50-PK-2 for between-contact polarization made of glass epoxy. **Voltage Rating:** 830 VAC rms at sea level. **Current:** Rated 5.0 amps. **Contact Resistance:** 0.005 ohm at rated current. **Insulation Resistance:** 5,000 megohms. **Temperature Cycling:** 5 continuous cycles per Method 107B, Test Condition B. Beryllium copper, −65° C to +125° C; phosphor bronze, −65° C to +105° C.

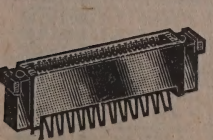
TYKON MINIATURE EDGE CONNECTORS



High density edge connectors with .050" centers for use with double-sided .062" printed circuit boards. Conventional wiring tails. Insulator is diallyl phthalate, type SDG-F per MIL-M-14F. Contacts are beryllium copper with .00003" gold plate per MIL-G-45204 Type II. Carbon steel mounting clip for use in semi-flush printed circuit mounting, and cellulose acetate polarizing key available as separate items.

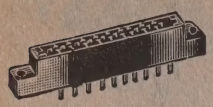
CINCH PC BOARD EDGE CONNECTORS

PC BOARD EDGE CONNECTORS



Extended Tail Dip Solder

Card Extender

Wire Wrap Terminal

Three series of 0.156″ centers PC edge connectors have special purpose terminals which make them particularly well-suited in special applications.

Extended Tail Dip Solder Terminal Series: These connectors have 15/64″ terminations that are long enough to pass through two or three 1/16″ PC boards. The connector can be used to connect two PC boards at right angles to third or to provide the equivalent of a double-sided or multilayer board by making a sandwich of two or three boards. Can also be used where a component is to be soldered to the underside of the board at the connector. Connectors designed for minimum card wear, low insertion force and incorporate bifurcated phosphor bronze contacts with 30 micro-inches gold plating for positive electric contact even under high vibration conditions or printed circuit board irregularities. Insulator is glass-filled diallyl phthalate type SDG-F per MIL-M-14. Connectors are available in both single and double read-out.

Card Extender Series: Permit end-to-end connection of PC boards. The solder tabs terminals are formed so that there is 0.050″ spacing between rows. Insertion of a standard 1/16″ board between the rows allows soldering of terminals to the printed circuit conductor paths to form a permanent, vibration-proof attachment. Designed for minimum card wear, low insertion force and incorporate beryllium copper contacts with 30 micro-inches gold plating for positive electric contact. Insulator is glass-filled diallyl phthalate type SDG-F per MIL-M-14.

Wire Wrap* Terminal Series: Economical, high quality printed circuit board terminals have cantilever contact construction which provides a simple dependable design capable of handling 1/16″ thick single or double sided boards. Contacts are preloaded against an insulator stop to provide gap uniformity and assure rapid build-up of force to the PC board. Construction combines minimum insertion force with maximum contact pressure. Comb contact formation permits simultaneous insertion of contacts for consistency of assembly and increased speed. Wire Wrap tails are available in lengths of .550″, .750″ and 1.051″ to accommodate Wire Wrap equipment and popular clip-on connections. Contact is automatically inserted, locked in position and is preloaded in one operation. Bifurcated phosphor bronze contacts with 30 micro-inches gold plating are designed so that contact pressure is independent of depth of PC board insertion. Selective gold plating permits concentration of gold in area of contact at substantially reduced cost. Wire Wrap termination of 0.031″ x 0.062″, between contact polarizing. Insulator is of general purpose impact phenolic and black color. **Models 50-30W-10 and 50-44W-10** have .045″ square tail Wire Wrap terminals on .156″ spacing, double read-out for 1/16″ printed circuit boards, and have .128″ diameter mounting holes. **Model 50-80W-20** has .025″ square tail Wire Wrap terminals on .125″ centers; .156″ diameter mounting holes. **Polarizing Key 50-PK-2** is used for these connectors and must be ordered separately.

*Registered Gardner-Denver trademark.

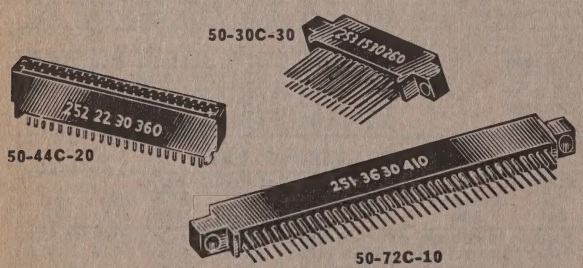
PRECISION DOUBLE READ-OUT EDGE CONNECTORS WITH 0.100 INCH CENTERS, 1/16″ BOARDS



Unique bifurcated cantilever contact construction provides simple, dependable design capable of handling 1/16″ thick printed circuit boards. Contacts pre-loaded against an insulator stop to provide gap uniformity and assure rapid build-up of force to the PC board. Contacts are grade A phosphor bronze, gold plated with 30 micro-inches of gold over 50 micro-inches of nickel in contact area and 10 micro-inches minimum gold on remainder of contact, per MIL-G-45204, Type II. Insulation, glass-filled diallyl phthalate, Type SDG-F per MIL-M-14. **Polarizing Key: No. 50-PK-3,** ordered separately. **Card Guide: No. 50-GP-1,** must also be ordered separately.

Conventional solder tails.

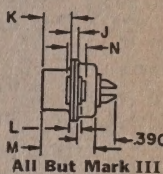
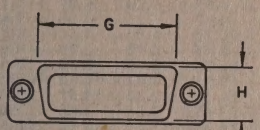
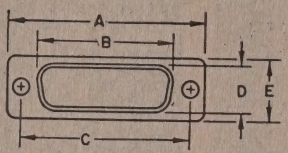
Mark III



All But Mark III





Five basic shell sizes cover a full array of contact configurations for most rack and panel applications. Solder pot contacts rated 5 amps (1.5 amps, MIL) are standard; crimp-on contacts available. Cadmium-plated steel shell has yellow chromate coating. Insulators glass filled diallyl phthalate per MIL-M-14F, Type SDG in monobloc construction; or, two-piece nylon insulator. Pins and sockets are #20 AWG; coaxial contacts and high voltage contacts available. **Voltage:** 1700 VAC rms, 60 Hz at sea level, average flashover; 1250 volts, test. D-H series, 1000 VAC rms, 60 Hz at sea level, flashover; 750 volts, test. **Insulation:** 5,000 megohms, MIL-STD-202A, Method 302. **Contact Voltage Drop:** 2.67 mV max. per amp, MIL-C-8384B, Para. 4.6.4. **Contact Separation Force:** 1–8 oz. **Environment:** MIL-STD-202A, Meth. 106, moisture; Meth. 204, vibration; Meth. 202A, shock; Meth. 101A, Cond. B, 50-hr. salt spray; Meth. 301, high potential; Meth. 102A, Cond. D, temp. cycling. All referenced in MIL-C-8384B.

*Refer to ordering code for insulator type designation. †.120" dia. holes, standard units; .086" dia., float mount units. ‡Measured as outside dimensions at bottom of the draw.

HOW TO ORDER

D	E	SM	F	-9	P
(A)	(B)	(C)	(D)	(E)	(F)

(A) **Prefix:** Indicates Cinch Series **D.**

(B) **Shell Size:** Five basic sizes determined by insert arrangement. See table of dimensions for sizes: **E, A, B, C** and **D.**

(C) **Insulator Type:** If **none,** insulator is two-piece nylon; **M,** monobloc diallyl phthalate with solder pot contacts; **MA,** same as M, but with snap-in, removable, crimp, rear release assembly; **SM,** same as M, but crimp, snap-in contacts.

(D) **Float Mount:** Float-mounting shell type available for all standard connectors. Has stainless steel washers and rivets.

(E) **Insert Arrangement:** Choice of **9, 15, 20, 37** or **50** contacts, standard. Combination layouts available with coaxial cavities in Mark I Golden "D" series (see listing). High voltage cavities also available; details on request.

(F) **Contact Type: P,** Pin; **S,** Socket.

MARK III ROYAL "D" CONNECTOR

Snap-in, removable crimp contacts with rear release assembly. Contacts not interchangeable but units will mate and are interchangeable with all other D Series. Insulator diallyl phthalate, glass fiber filled, per MIL-P-19833, Type GDK-30F, royal purple color, monobloc construction. **Contacts:** Pin, leaded copper, gold plate over silver plate; socket, copper alloy, gold plate over silver plate with stainless steel sleeves.

*Right-angle. †Short type plug. ‡Straight.
*Manufactured by agreement with ITT Cannon Electric Co.

MARK II GOLDEN "D" CONNECTORS

Snap-in, crimp type contacts eliminate soldering; cut assembly and maintenance time. Monobloc insulator is diallyl phthalate, asbestos filled, (FS-6) per MIL-M-14F, Type MDG. Keystone shaped shells provide proper polarization. Friction coupling is standard; locking accessories are available. Floating mount shells also available. Not interchangeable with other "D" series. **Temperature Range:** −65° F to +300° F. **Contacts:** Gold plate over silver-plated, leaded copper. Contacts supplied, but unassembled.

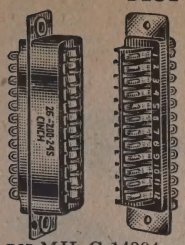
CINCH RACK, PANEL & HINGE CONNECTORS

BLUE RIBBON* CONNECTORS



Ideal and used universally in a wide variety of applications. Proven reliability combines with smooth, easy insertion action. Self-wiping and self-cleaning contacts available in linear arrays up to 32 per unit. Barrier-type polarization and interlocking mating of dielectric bodies gives easy alignment without visual aid. Ribbon contacts can't bend. Rectangular body for easy layout. Corrosion resistant, passivated stainless steel mounting plates are molded in. **Current:** 5 amps. **Voltage:** 800 VDC at sea level; 300 VDC at 70,000 ft. **Insulator:** Diallyl phthalate per MIL-M-14F, Type MDG. **Plug Contacts:** Gold per MIL-G-14204 over silver per QQ-S-365 on copper per ASTM-B-152, Type ETP. **Receptacle Contacts:** Gold per MIL-G-14204 over silver per QQ-S-365 on phosphor bronze per ASTM-B-103-51, MIL-B-892, Grade A. **Size:** (Other than shown in table below): Body ¾″ w. x ⅜″ d. below mtg. plate, socket; $^{25}/_{64}$″ d., plug. Mtg. plate ⅞″ wide. Plug mtg. holes .125″ dia., with ctrs. $^{11}/_{64}$″ from plate ends; socket, in bushing, .116″ dia. **Code:** Suffix indicates number of contacts (**-8, -16,** etc.); **S,** socket; **P,** plug.

MICRO-RIBBON* CONNECTORS

Extremely small, ribbon-contact connectors suited for airborne and computer applications with high reliability. Shell type polarization; easily inserted or withdrawn without visual aid; self-wiping, self-cleaning contacts in units up to 50 per connector. Float-mounted receptacle prevents misalignment. **Current:** 5 amps. **Voltage:** 700 VDC at sea level; 200 VDC at 70,000 ft. **Insulator:** Diallyl phthalate per MIL-M-14F, Type MDG. **Contacts:** Gold plate per MIL-G-45204 over silver plate per QQ-S-365 on cadmium bronze, ASTM-B-105. **Shells:** Cadmium-plated brass (ASTM-B-36, Alloy 6) with clear chromate finish. 10500, 20500-6, -7 have additional insulator between opposite rows of contacts. Dimensions on request. Cable plugs with hoods, chassis-mounted sockets with spring latches.

HINGE CONNECTORS

Plug and socket bodies showing contact arrangement.

No contact damage due to insertion and extraction. Maximum contact in minimum space; engaged with normal pressure. Simple locking device insures positive contact. Spring action contacts separate units after releasing the lock. Wiping contact action for clean contacts at all times. Castings are of black phenolic, type CFG. Contacts are of phosphor bronze, cadmium plated (.0001). Current rating is 4.5 amps. **Alternate Lock:** For more secure locking, order Alternate Lock No. 37AL separately. It has a special device to prevent accidental unlocking. **Caps:** Formed fiber liners, nickel-plated cable clamps. Designed to take the alternate lock when required. Black wrinkle finish.

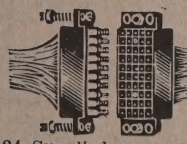
"MINI-JONES" CRIMP-ON, SNAP-IN CONNECTORS



Space saving connector provides contact density of 25 contacts per sq. inch. No tools required for inserting contacts. Pin and contact terminations accommodate either one AWG 18, 20, 22, or 24; or two AWG 22 or 24. Supplied unassembled. Tinned phosphor bronze contacts. Black phenolic insulators. Polarizing pins and lock nuts of cadmium plated brass. **Voltage:** 830 V rms, 1230 VDC. **Current:** 4.0 amperes. **Contact Resistance:** .0065 ohms, max. **Low Level Resistance:** Current flow at 0.1 μvolts; no variation at 6.5 mA and 16.25 mA. **Insulation Resistance:** 1000 megs. Standard or lock type.

CINCH Plugs and Sockets

300 SERIES PLUGS AND SOCKETS from famous "Jones" line, the standard for the electrical and electronic industry for many years. Small size, with good separation between contacts, for medium-duty applications. Molded phenolic insulator; 2 to 33 cadmium-plated phosphor bronze contacts; for cap or panel mounting. Polarized so only common sizes will mate. "Knife-switch" type socket contacts engage both sides of flat plug contacts. Rated 730 V rms, 10 A max. Contact resistance, .016 ohms max. UL Standard #498 rated (all contacts simultaneously) 7.5 amps, 1875 watts for 2–12 contacts; 4.5 amps, 1125 watts, 15–33 contacts.

400 SERIES PLUGS AND SOCKETS are rated for duty beyond the range of 300 Series: 1200 V rms at 15 amps. Contact resistance, .001 ohm avg. Polarized and suitable for either cap or panel mounting in 2, 4, 6, 8, 10 and 12 contact sizes. "Knife-switch" type socket contacts of cadmium-plated phosphor bronze engage both sides of flat plug contacts. Plug prongs are cadmium-plated brass ¼" wide, 1/16" thick. Caps finished in black wrinkle and fiber lined.

CINCH Barrier Terminal Blocks

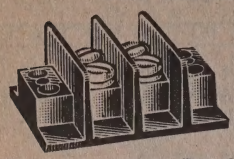
500 SERIES TERMINAL BLOCKS



Designed for critical electrical and mechanical requirements. Closed bottoms eliminate need for insulating strips. Knock-outs are molded in so "Y" terminals are acceptable if desired. Top-mounted marker strip available. **Series 540:** Terminals on 3/8" centers; 5-40 binder head screws. Rated 2300 V rms, 15 A max. Size, 1 1/8" w. x 39/64" h. **Series 541:** Terminals on 7/16" ctrs.; 6-32 binder head screws. Rated 2800 V rms, 20 A max. Size, 1 3/8" w. x 11/16" h. **Series 542:** Terminals on 1/2" ctrs.; 8-32 binder head screws. Rated 4000 V rms, 30 A max. Size, 1 5/8" w. x 7/8" h.

CINCH MARKER STRIPS AND ACCESSORIES

MARKER STRIPS FOR BARRIER TERMINAL BLOCKS

140 SERIES MARKER STRIPS

For labelling terminal positions on barrier terminal blocks and insulating exposed portions of terminals from metallic mounting surface. Mounting holes correspond with those on appropriate barrier terminal block. Made of 1/32" vulcanized fiber and numbered sequentially from 1 with legible white numerals.

Convenient means for rapidly connecting or disconnecting wiring from barrier terminal blocks. Facilitate cable or harness wiring and minimize the possibility of subsequent wiring errors. Available in both straight and angle types. Black XP phenolic mount, 3/32" thick x 1/2" wide, is supplied with hole in either right or left side; secures cable with lacing twine. For larger sizes, use of a cable clamp is recommended. Terminals are .032" cadmium-plated brass. **All 160 Series** fit barrier block 140 Series, 3/4" terminal centers. **Series 162** fit barrier block 142 Series, 9/16" terminal centers; 5/8" wide. **Series 161** fit barrier block 141 Series, 7/16" terminal centers.

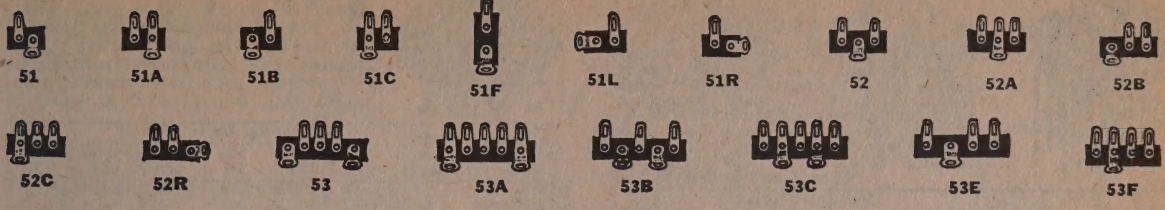
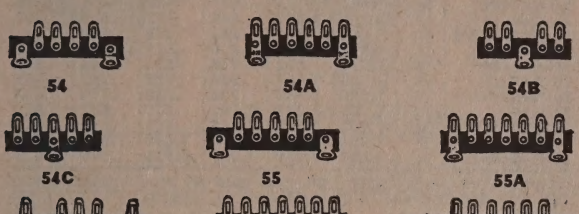
CINCH TERMINAL STRIPS, CLAMPS, SOCKETS

LUG-TYPE TERMINAL STRIPS





These terminal strips are handy for neatly supporting resistors, capacitors, etc. in circuit wiring. Cadmium-plated steel lugs are spaced on 3/8" centers with 0.140" dia. mounting holes. Chocolate-colored phenolic is used. Strips are 1/16" thick and 3/8" wide.

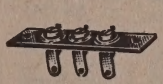
2000 Series



Screw Strips

SERIES 2000 TERMINAL STRIPS

Compact, sturdy terminal strips for wiring, etc. Phenolic insulation; cadmium-plated steel brackets with .140" dia. mounting holes centered 5/32" from bracket end. Terminals are tin-plated .019" brass spaced on 5/16" centers; last 2 digits of no. indicate no. of terminals (e.g., 2008 has 8 terminals).

SCREW TYPE TERMINAL STRIPS

Ideal design for chassis or breadboard layouts. Strips with 1 to 6 lugs are 1/16" thick phenolic; those with 7 to 10 terminals are 3/32" thick. Ends of screws are captivated to prevent removal; made of cadmium-plated steel. Terminals are cadmium-plated brass, spaced on 7/16" centers. Mounting holes .136" dia.

★LARGER QUANTITY PRICES ON REQUEST.

TO-5 OR TO-18 LOW PROFILE TRANSISTOR SOCKETS

Mount directly to PC board with snug fit to prevent bleeding of solder and flux to opposite board surface. Chamfered socket holes minimize lead bending during insertion. Contact ends are watertight, formed so that solder and fluxes cannot enter barrelled contact to obstruct lead entry. TO-18 directly accepts TO-5. TO-5 accepts TO-18 if leads are left full length or formed to match TO-5 lead centers. Insulator molded from 20% glass filled nylon in black, natural, or green. Contacts are of beryllium copper with etched tin, bright finish. Maximum pin dia., 0.019". Max. pin depth, 0.200" ±0.010". Max. insertion force, 5 ounces; withdrawal force, 1/4 ounce at 3 and 100 cycles. Voltage ratings at sea level, 1500 AC rms, 2000 VDC. Current rating, 2.5 amperes. Contact resistance, 0.005 ohms. Insulation resistance, 100,000 megs. Low profile, only .130" above PC board surface.

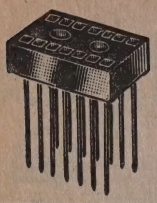
CINCH SOCKETS FOR INTEGRATED CIRCUITS, PRINTED CIRCUITS, TRANSISTORS

LOW PROFILE WIRE WRAP•



DIP SOCKETS

Provides higher board packing density. Accept standard 14 or 16 contacts size IC packages with flat or rolled leads. Contact resistance, 0.006 ohm max. Contacts of solid .025″ phosphor bronze. Wire Wrap, .670″ lg., enough for 3 wraps. Glass nylon insulation withstands temp. from −65° C to +125° C.

•Reg. Gardner-Denver TM.

Molded power transistor socket. Casting is molded of general purpose phenolic. Contacts are phosphor bronze, cadmium plated. Mounting holes are .098″ dia.; mounting centers are .425/.435″.
Net Each, Lots of 1-24.....**$0.153**; 25-49.....**$0.128**
Lots of 50-99. **$0.117**; 100-249. **$0.102**; 250-499.. **.092**

MODEL 2TS-4 GENERAL PURPOSE (FIG. D)

This new transistor socket was originally designed for an all-transistor television set; however, its future applications are many. This socket may be used in industrial communications, test equipment, ham gear, etc. Socket has a triangular base layout with 0.2″ by 0.1″ (JEDEC-30) contact centers, as well as three contacts inline (.048″ by .192″ contact centers). Casting is molded of general purpose phenolic; contacts are phosphor bronze, cadmium plated. May be used with the following EIA base designations: E3-14, E3-15, E3-25, E3-32, E3-38, E3-39, E3-42, E3-43, E3-44, E3-51, E3-53, E4-13, E4-24, E4-31, E4-43, E4-52, ET-103-D.
Cinch No. 2TS-4—Net, Lots of 1-24. **$0.204**; 25-49. **$0.167**
Lots of 50-99. **$0.140**; 100-249. **$0.128**; 250-499. **.117**

UNIVERSAL TRANSISTOR SOCKETS (FIG. E)

Universal transistor socket that can be used with all transistor bases shown in illustration above. Casting is of mica-filled phenolic (MFE). Contacts are beryllium copper and are gold plated. Contacts may be used with one or two-sided 1/16″ PC boards.

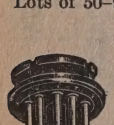
MOLDED CONNECTOR PLUGS AND SOCKETS



A

B

C

D

MODEL 8PB 8 CONTACT PLUG (FIG. A)

Molded from high dielectric black phenolic. Pins are nickel-plated and have tapered ends for easy insertion. Mounts on 1/16″ chassis using No. 8RO retaining ring, or can be used with No. 16F cap. Will fit any standard octal socket.
Cinch No. 8PB—Net Ea., Lots of 1-24..**$0.36**; 25-49..**$0.30**
Lots of 50-99..**$0.26**; 100-249..**$0.22**; 250-499.. **.21**

★DUE TO THE INSTABILITY IN THE COST OF GOLD, ALL PRICES FOR SOCKETS HAVING GOLD PLATED TERMINALS WILL VARY. CHECK WITH US FOR THE LATEST QUOTATIONS.

MODEL 11PB 11 CONTACT PLUG (FIG. B)

Molded from high dielectric black phenolic. Pins are nickel-plated and have tapered ends for easy insertion. Mounts on 1/16″ chassis using No. 8RO retaining ring. Can be used with No. 16F cap. Will fit No. 11RB socket.
Cinch No. 11PB—Net Ea., Lots of 1-24. **$0.47**; 25-49. **$0.33**
Lots of 50-99..**$0.30**; 100-249..**$0.26**; 250-499.. **.24**

MODEL 11RB 11 CONTACT SOCKET (FIG. C)

Molded from high dielectric black phenolic. Solder coated brass contacts. Mounts on 1/16″ chassis using No. 8RO retaining ring. Can be used with No. 16F cap. Mates with No. 11PB plug.
Cinch No. 11RB—Net Ea., Lots of 1-24. **$0.45**; 25-49. **$0.36**

Check us for latest quotations.**

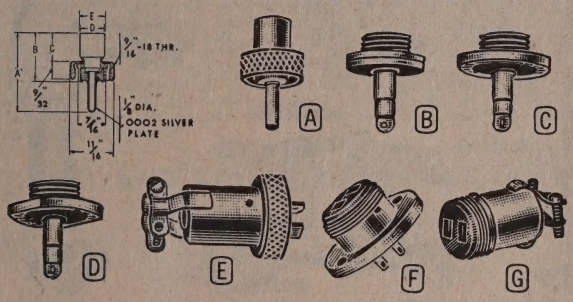
AUDIO PLUGS AND SOCKETS



SERIES 101 SOCKETS

Brass base, bright nickel finish. Brass contact is silver plated. Insulation is of low loss natural color XXX phenolic. Phenolic of No. S-101-D is recessed in the base. Two sides of base of No. S-101-D Mod are milled. Mounting Holes: No. S-101, #41 drill on 1 1/16″ centers; all others, #30 drill on 1 3/16″ centers.

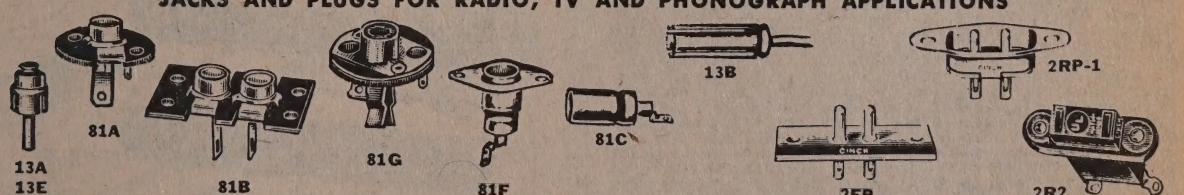
JACKS AND PLUGS FOR RADIO, TV AND PHONOGRAPH APPLICATIONS



RCA TYPE PHONO CONNECTORS

Cinch No. 13A Plug—9/16″ long pin. For Jack Types 81A, 81B and 81G.

Cinch No. 13E Plug—1 1/16″ long pin. For Jack Types 81A, 81B and 81G.

Cinch No. 81A Jack—Single jack for No. 13A. Mtg. ctrs., 1 1/16″.

Cinch No. 81B Jack—Double jack for No. 13A. Mtg. ctrs., 1 1/16″. Jacks spaced on 7/16″ ctrs. Size, 1½″ x 1″.

Cinch No. 81G Jack—Normally connected; this connection breaks when plug is inserted, making plug connection. Brass mtg. plate. Mtg. holes .136″.

ANTENNA CONNECTORS

Cinch No. 81F Jack—Motorola type. Shielded. Sturdy steel flange, 15/16″ mtg. ctrs. with .136″ dia. mtg. holes. Mounts with screws or rivets. Mates 13B plug.

Cinch No. 81C Jack—Same as 81F less flange. May be soldered in position. Mates with No. 13B.

MOTOROLA TYPE ANTENNA PLUG

Cinch No. 13B Plug—Has 1/8″ pin extending 1/2″ from shell whose eight cutting edges provide positive grounded connection when inserted in No. 81C or No. 81F.

MODEL 2FP CONNECTOR PLUG

Consists of two prongs mounted on a phenolic board. One piece contact. Mounting plate is of 1/16″ natural XP phenolic 1 5/8″ lg. x ¾″ w. The .135/.140″ mounting holes are on 1¼″ centers. An inexpensive current supply connector for TV sets.

MODEL 2R2 110-250 VOLT SOCKET

Rated at 15 amps, 110 V, or 10 amps, 250 V. Accepts any standard 2-prong electric plugs. Mounts in 11/64″ x 11/32″ hole. Ideal for radio and TV chassis. UL Listed.

MODEL 2RP-1 RECESSED PLUG

Recessed sub-panel mounting type plug. One piece contact. Perfect for current supply for TV sets. Rated at 125 V, 7 amps. Size: 3/8″ w. x 1 5/8″ lg., overall; body 5/16″. d. Mtg. Ctrs.: .140/.145″. UL App.

ITT CANNON ELECTRIC Connectors

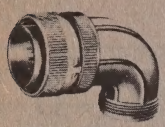
MS-A AND MS-B (MIL-C-5015) CONNECTORS

MS3100A

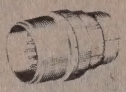
MS3101A

MS3102A

MS3106A
MS3106B



MS3108B



MS3101B

MS3106B

MS3107A,
MS3107B

General purpose non-environmental connectors have melamine inserts; meet MIL-C-5015 specifications. MS-A types have solid endbells; MS3108B, MS3101B and MS3106B have split endbells. **Shells:** Aluminum alloy. **Finish:** Olive drab chromate coating over cadmium plating. **Contacts:** Silver plated copper alloy. **Terminals:** Tinned solder pot type. **Clocking Positions:** Normal, W, X, Y, or Z.
Note: For clocking other than normal, add **5c** to price.
To Order: Use complete MS number, denoting shell style and insert type: e.g., MS3100A8S-1P.

MS3100A: Wall mounting receptacle: solid endbell.
MS3101A: Cable connector plug: solid endbell.
MS3102A: Box mounting receptacle: solid endbell.
MS3106A: Straight plug: solid endbell.
MS3107A: Quick disconnect plug: solid endbell.
MS3108B: 90° angle plug: split endbell.
MS3101B: Cable connector plug: split endbell.
MS3106B: Straight plug: split endbell.
MS3107B: Quick disconnect plug: split endbell.

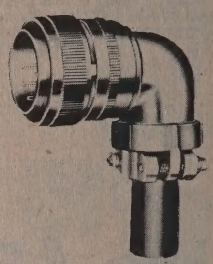
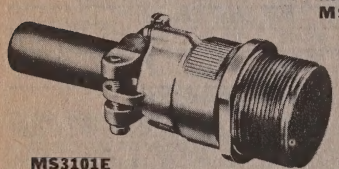
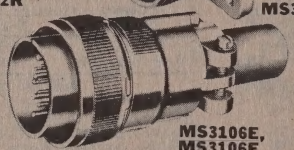
MS3106R



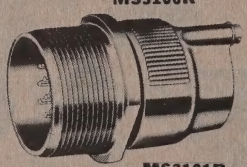
MS3108E,
MS3108R



MS3101E



MS3106E,
MS3106F



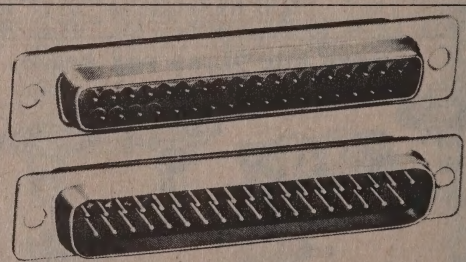
MS3101R

Environmental connectors meet latest revision of MIL-C-5015. Featuring resilient insulators and wire sealing grommets for extreme environmental conditions and high altitude sealing. MS-E and F types have a mechanical cable clamp for strain relief. MS-R types have shorter lighter weight endbells without cable clamps and have an O-ring to supplement the interfacial seal. **Shell:** Aluminum alloy. **Contacts:** Silver plated copper alloy. **Finish:** Chromate coating over cadmium plating. **Insulator:** Polychloroprene. **Terminals:** Tinned solder pot type.
Note: Available with five clocking positions—normal, W, X, Y, or Z; no extra charge for positions other than normal.

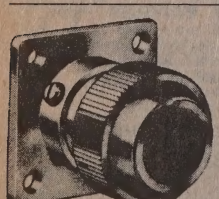
MS3100E, MS3100F: Wall mounting receptacle.
MS3101E: Cable connector plug.
MS3102E, MS3102R: Box mounting receptacle.
MS3106E, MS3106F: Straight plug.
MS3100R: Wall mounting receptacle.
MS3101R: Cable connector plug.
MS3106R: Straight plug.
MS3108E, MS3108R: 90° angle plug.

D SUBMINIATURE CONNECTORS

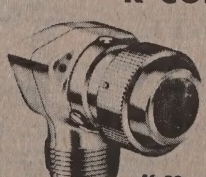
D Subminiature connectors are small, lightweight, rectangular connectors available in 5 sizes, with 9, 15, 25, 37 and 50 gold plated contacts. Shells are steel or brass with gold chromate finish. Insulators are diallyl-phthalate, D Subminiatures are available with accommodations for coaxial contacts and taper pins. Solderless, crimp-type, snap-in contacts can also be supplied. D-original D, solder contacts; D*C-general purpose, crimp snap-in rear release contacts; D*M-monobloc insulator, solder contacts; D*MA-meets MIL-C-24308, rear release crimp snap-in contacts. Monobloc insert material is diallyl-phthalate, with closed-entry socket contacts and snap-in coaxial contacts. Shell finish is golden iridite over cadmium plate. The Golden D meets more critical applications. The Golden D is physically interchangeable with the D subminiature with the exception of the solder pot and rear insulator extension which are slightly larger.



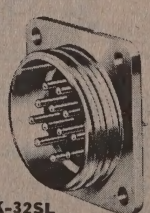
K CONNECTORS



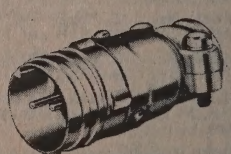
K-31SL



K-23



K-32SL

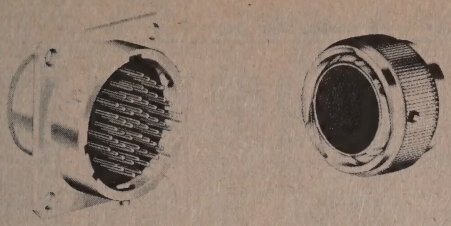


K-22C

Series K Connectors are similar in many respects to the Series MS. The principal difference is in the coupling thread, which is an acme thread in the V line, whereas the MS uses unified screw threads. The K line comes in standard K and RK series. The RK is, essentially, a reverse coupling version of the standard K, and hence the two will not mate. Shells are made of aluminum alloy with standard cadmium finish. Contacts are copper alloy, silver-plated with tinned solder pots. Come in eight basic shell types with eight insert sizes totaling 350 arrangements with a variety of amperage and voltage capacities. They are available with 1 to 110 contacts. Prefix R (RWK, RLK, etc.) types are reverse versions with pin insert typical in the plug; socket insert in the receptacle; and, coupling nut reversed. Alternate positions V, W, X, Y and Z are available at the same price.

®"CANNON" is a trademark registered in the U.S. Patent Office and in other countries by ITT Cannon Electric Inc.

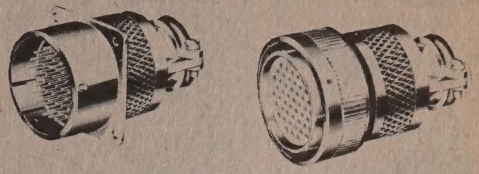
KJ SERIES CONNECTORS



Low profile, environment-resistant miniature circular connectors meet MIL-C-38999 requirements. Engineered for high density applications at temperatures from −65° F to +302° F or −65° F to +392° F. Crimp snap-in contacts in Little Caesar® rear release contact retention assembly; features multiple-tine metal retaining clip for dependable retention. Contacts are inserted, released and extracted from rear of connector. Monobloc (one-piece) hard inserts are made of strong, durable thermosetting plastic. Pin contact cavities are designed with closed-down effect for superior pin stability and positive axial alignment of the contacts. Lead-in chamfers in hard front socket face provide positive contact mating. Five-keyway shell polarization assures alignment during engagement; three-point bayonet lock coupling provides fast connect and disconnect. Complete environmental sealing by interfacial seal with individual raised tapered sealing barriers around each pin contact, a peripheral seal, and multiple-ripple wire sealing grommet. Available in nine shell styles, including three hermetic versions; total of 42 contact arrangements that will accommodate from 1 to 128 contacts using AWG wire sizes from 16 through 28. Contacts are high conductivity copper alloy with gold over gold plate finish. **Write or call for complete descriptive information and quantity pricing.**

PV SERIES CONNECTORS

M83723/M0026482F (SERIES III)



High performance, crimp contact miniature environmental connectors are designed to M83723/0026482F specifications. Made for highly demanding space age applications. Little Caesar® rear release contact assembly features stamped metal retaining clip captivated by molded-in shoulders in the insulator. Easy insertion and extraction of crimp snap-in contacts, using rear-inserted plastic tool. Closed-entry socket design insures positive mating. Wire sealing is accomplished by multiple ripple design, exceeding M83723/0026482F wire sealing requirements. An interfacial seal on pin insert is bonded to hard dielectric. Raised tapered barriers around each pin contact lock into the lead-in chamfers on the socket insert, assuring individual contact sealing. Simple, strong contact design offers high resistance to bending or damage. Contacts have a single holding shoulder and no undercuts. PV series connectors come complete with expandable plastic insertion/extraction tool; cannot damage contact, insulator or grommet. Available in four shell styles (narrow flange receptacle, wide flange receptacle, jam nut receptacle, or straight plug); three environment-resistant classes; nine shell styles, plus a variety of special types. **Write or call for complete information and quantity pricing.**

KPT AND KPSE SERIES (MIL-C-0026482F SERIES I, II) CONNECTORS

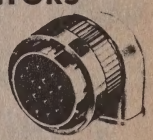
Straight Plug

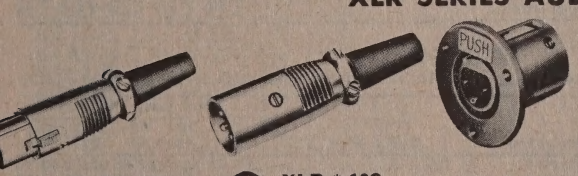
KPT07/MS3114, KPSE07/MS3124
Jam Nut Receptacle



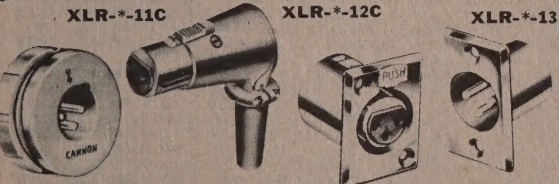
KPT08/KPSE08

Miniature circular connectors meet MIL-C-0026482F specs.
KPT Series: General purpose connectors with solder pot terminations; closed-entry socket contacts for positive mating.
KPSE Series: Environment-resistant connectors with front release, crimp snap-in contacts. Unique unitized insulator, integrally molded into a single voidless part; mechanically retained in the shell by a positive, hard plastic-to-metal lock retention. Complete moisture sealing achieved by four seals: Shell, peripheral, interfacial and wire seals. Closed-entry socket contacts for positive mating.

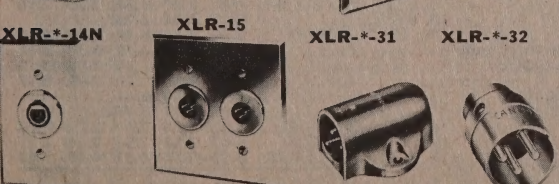
XLR SERIES AUDIO CONNECTORS



XLR-*-11C XLR-*-12C XLR-*-13



XLR-*-14N XLR-15 XLR-*-31 XLR-*-32



XLR-*-35 XLR-*-36-2G XLR-*-42 XLR-*-50

Advanced design, streamlined audio connectors with resilient socket insulator for shock protection and quiet operation. Latch-lock coupling insures positive mating. Integral cable clamp with two clamping positions for positive grip on cable from 7/32" to 5/16" dia. Neoprene bushing design permits easy cable insertion. Aluminum alloy shell has protective satin nickel finish and thick aluminum cross-sections for added strength. Glass-filled nylon pin insulator; resilient polychloroprene socket insulator. Silver plated brass contacts. XLR-3 types have three 15-amp contacts; XLR-4 types have four 10-amp contacts; XLR-5 types have five 7½-amp contacts.

*Standard finish is silver, electro-deposited to QQ-S-365A and reinforced by electrolytic chromate treatment which resists tarnish and salt spray. †TR-5® finish recommended for greater durability; a white alloy electro-deposit which provides exceptional hardness and superior resistance to tarnish and corrosion.

*Standard finish is silver, electro-deposited to QQ-S-365A and reinforced by electrolytic chromate treatment which resists tarnish and salt spray. †TR-5® finish recommended for greater durability; a white alloy electro-deposit which provides exceptional hardness and superior resistance to tarnish and corrosion. *Larger quantity prices on request.

Needs no mounting hardware. Provides full insulation from metal chassis. Exclusive design saves time and money on the assembly line. Merely drop ¼ turn unit through D-hole and manual or automatic tooling automatically turns it 90°. Flatted portion turns free, while rounded area is grooved against D-flat, producing a positive locking action in chassis. Material: Insulator, Teflon*; shell, brass; contact, beryllium copper; standard plating, gold over copper. *Registered DuPont Corp. trademark.

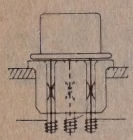
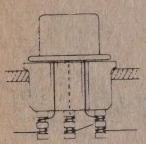
PRESS-FIT SERIES 60 TRANSISTOR AND IC SOCKETS

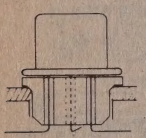
Supercon transistor and IC hardware features high-retention precision contacts. Allows fast, easy replacement of transistor or IC. Maintains retention, in excess of 50 grams per lead, through shock and vibration and repeated component insertions. Permits transistor or IC device interface into associated circuitry without electrical noise or signal dissipation due to contact resistance build-up.



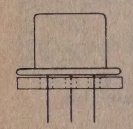
PRESS-FIT SERIES 60:
Transistor and IC sockets
Low-cost, high precision series 60 sockets. Permit plug-in and removal of TO-5, TO-18 cans and IC packages at will. Precise contact design provides a positive mechanical grip while making electrical contact with minimum resistance.



PRESS-FIT TRANSISTOR AND IC HOLDERS
Provides insulated chassis mounting with thru holes and soldering lugs for transistor leads and circuit connections.



PRESS-FIT TRANSISTOR AND IC BUSHINGS
Press-fit or grommet-type chassis mounting. Provides support for transistor can and thru-chassis hole plus strain relief for leads.



PRESS-FIT TRANSISTOR AND IC PADS
Provides insulation from mounting surface and strain relief for glass seals.

PRESS-FIT:
For chassis thickness .040″ and over, use 60° countersink. Use 82° countersink under .040″.

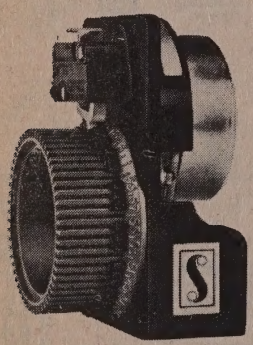
LCT SEALECTROTIMER



- FIELD-ADJUSTABLE
- MULTIPLE FUNCTION
- ECONOMICAL, PRECISE PROGRAMMING
- COMPLETE FIELD ADJUSTABILITY
- SETS UP IN SECONDS WITH 100% REPEATABILITY
- UP TO 60 ON/OFF FUNCTIONS/REVOLUTION
- CONTACTS RATED 15 AMPS

SINGLE CONTACT SEALECTROTIMERS

Sealectro Number	Speed	Net Each
095-016-6500-000	1 rpm	$22.00
095-016-6521-000	1 rph	22.00
095-016-6522-000	1 rpd	22.00

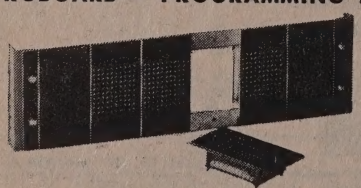
095-026-6525-000	1/24 rpm	24.00

SEALECTROBOARD™ PROGRAMMING BOARDS



Build your own programming systems with 'off-the-shelf' standard components. **Size:** 19¼" x 5⅞".

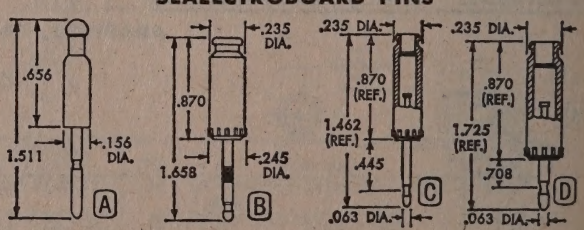
1. Module Rail: Designed for mounting on standard 19" relay racks. Offset is provided for flush panel installation. Mounting holes are provided for any combination (up to 6) of blank panels and Sealectroboard modules.
Sealectro No. 710-2000-10-0-000—Net Each, Lots 1–24..**$3.88**

2. Blank Panel: Fills in unused width. May be used for mounting other components or associated equipment. Blank plastic with white filler for engraving.
Sealectro No. 780-1060-00-0-000—Net Each, Lots 1–24..**$1.77**

3. Side Plate: Provides end dressing.
Sealectro No. 708-7000-50-0-000—Net Each, Lots 1–24..**$1.23**

4. Matrix Module: 10 x 10 hole Sealectroboard module with bussed upper and lower contacts. Same width as that of blank panels and thus may be added at any time by merely replacing blank panels. Features terminals which are combination solder and clip-on types. Contact strips are silver plated.
Sealectro No. 070-101-0600-600—Net Each, Lots 1–6..**$25.40**

SEALECTROBOARD PINS

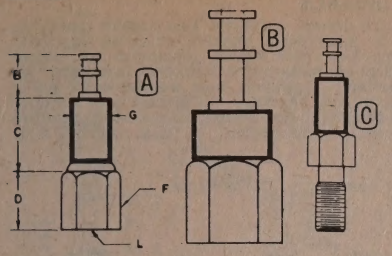


Shorting Pins (Fig. A): Available in 10 standard EIA colors for program or function coding.
Sealectro No. 077-200-0020-608—
Net per 1000, Lots 1–249.....**$120.00**

Component Holders (Fig. B): Accommodate components, such as diodes, resistors, with dimensions not exceeding ⅜" l. x ⅛" d. overall and with leads #23 AWG max., 1" min. length. For special applications, units are available to house a variety of components including potentiometers, miniature lamps or relays.
Sealectro No. 076-200-3250-608—
Net per 1000, Lots 1–249.....**$560.00**

Wireable Pins: Provides a means of shorting pin programming with the capacity of connecting external circuitry to Sealectroboards including test equipment and function generators.
Sealectro No. 077-100-0050-608 (Fig. C)—Net/1000...**$380.00**
Sealectro No. 077-200-0060-608 (Fig. D)—Net/1000...**380.00**

SEALECTRO PRESS-FIT® Teflon* Terminals



METAL BASED INSULATED TEFLON STAND-OFFS

Teflon insulated stand-offs have brass lugs, standard tin or tin/lead plating. Base is brass, cadmium with chromate coating. Part Nos. 003-5707 and 023-5705 supplied with Military specifications mounting hardware. *Registered Dupont Corp. trademark

SEALECTRO PRESS-FIT® Teflon* Terminals

NEW RIVET-LOC™ TEFLON INSULATED TERMINALS

Rivet Loc Teflon insulated terminals for chamfered or non-chamfered holes install the right way, from the major diameter side, in one simple smooth operation with all insertion forces working together. Employs a simple riveting and locking of the Teflon bushing assuring a better finished installation. Seating flange locates positively on major diameter of Teflon bushing. Final seating and locking of the terminal in the chassis is uniform even with wide parameters of tool settings. Knurled portion of lug always locates in chassis area for greater stability. The smaller metal lug mass in proportion to the Teflon bushing provides improved dielectric strength. Provides more Teflon insulation for better mechanical and electrical characteristics. Numbers listed are currently considered standard. However, new numbers are being added constantly. Almost any terminal configuration or requirement can be met with the Rivet-Loc design. Submit your requirements, or write or phone for information. *Reg. DuPont TM.

SEALECTRO

Teflon* Terminals

Simplest, fastest, most economical terminal installation known. Practically unrestricted as to chassis material and thickness. Inexpensive insertion tool fits any drillpress or hand arbor. Terminal, under pressure, slips into hole for rigid, permanent, trouble-free installation. Use tool listed for each particular terminal. Miniature units conservatively rated 4000 volts. Available in colors; designed for color coding.

*Registered DuPont trademark.

"LITTEL-JAX" PHONE JACKS

A Quality phone jacks that mate with standard ¼" phone plugs. Notched insulating washers mechanically interlock springs and solder lugs. "V" bend in tip spring firmly "holds" mating plug. Minimum space requirements. Economical. Mounts in single ⅜" hole, panels up to 5/32" thick, except L-11 and L-12A in panels up to ¼" thick.

Nos. C-11 and C-12A mate with No. 440 (PJ-005B) Plug; C-12B, S-12B mate with No. 480 (JAN-PJ-068) or No. 484 (W.E. No. 309) Plug. Nos. C-11 and C-12B have locating pins (non-turn devices). No. S-11 similar to No. 11 except .210" I.D. sleeve. C-11, C-12B and C-12A per JAN-J-641. All others mate with standard ¼" dia. plugs.

No. 14B Stereo "Littel-Jax", switches-out speakers when connecting stereo headphones. Dual, N.O. switch contacts, open both stereo circuits independently when a 3-conductor plug is inserted.

TWO CONDUCTOR TYPES

"TINI-JAX" MINIATURE PHONE JACKS

B Miniature 2-conductor Phone Jacks, approximately ⅓ the size of the "Littel-Jax", otherwise similar in construction. Mount in ¼" dia. hole; panel up to 3/8" thick. No. 43A has a unique spring design that requires a pear shaped tip, such as Switchcraft "Tini-Plug" No. 750.

Part No.	Schematic No.	Typical Mating Plug	Con-ductors	Ea. 1-9	10-24	25-49	50-99	100-249
41	I	750	2	.52	.39	.358	.325	.28

43A	VI	750	2	.88	.66	.605	.55	.44

"TINI-EXTENSION JAX"

C An extension or cable jack to mate with "Tini-Plug". Two-conductor. Metal housing for ruggedness and electrical shielding. Solder lug terminals.

Switchcraft No.	Ea. 1-9	10-24	25-49	50-99	100-249
125	1.60	1.20	1.10	1.00	.80

"MICRO-JAX" SUB MINIATURE PHONE JACK

D Precision manufactured jack for miniaturized applications. Two-conductor, single closed circuit. See Schematic Circuit III. Silver plating on special tempered nickel silver springs. Internally keyed nylon insulation interlocks springs and solder lugs to eliminate shorts. Fits .190" dia. hole in panels to 5/32" thick. Only 1/25th the size of standard phone jacks. Mates with "Micro-Plug", Series 850, 880.

Switchcraft No.	Ea. 1-9	10-24	25-49	50-99	100-249
TR-2A	.64	.48	.44	.40	.32

"HI-D JAX" PHONE JACKS

E New smaller, more compact phone jacks, mate with std. ¼" phone plugs. Molded box body protects integral silver-plated, nickel silver springs. Low contact resistance and electrical leakage with little capacity between the springs. Mount on 5/8" centers in single ⅜" hole in panels up to 5/32" thick, depth behind panel 13/32". All part Nos. with "N" prefix feature a threaded nylon bushing to provide complete insulation of jack sleeve from mtg. panel. All part Nos. with "M" prefix are designed and adjusted to mate with telephone and MIL-std. plugs. Tip and ring (3-cond.) springs are gold plated, and shunt and isolate switching circuits (where used) have welded cross bar palladium contacts for stable, low resistance interconnections in sensitive and critical circuits. Stereo "HI-D Jax," Nos. 114B switches out speakers when connecting stereo headphones. Dual N.C. switch contacts open both stereo circuits independently when a 3-cond. plug is inserted.

TWO CONDUCTOR TYPES

Part No.	Schematic No.	Typical Mating Plug	Ea. 1-9	10-24	25-49	50-99	100-249

N-114B	XII	267	1.00	.75	.688	.625	.50

"TINI-D JAX" MINIATURE PHONE JACK

F New, small completely enclosed, molded phone jack. Mate with Switchcraft "Tini-Plug," No. 750 etc. Phenolic housing protects the bifurcated beryllium copper springs from being bent during mounting. No. 142A has threaded bushing for conventional mtg. Tip spring terminals that "snap-in" P.C. boards. Mount on ⅜" centers, in ¼" dia. hole in panels up to 1/8" thick. Depth behind panel 7/16".

Part No.	Schematic No.	Typical Mating Plug	Con-ductors	Ea. 1-9	10-24	25-49	50-99	100-249
142A	III	750	2	.60	.45	.413	.375	.30

"EXTENSION JAX" CABLE EXTENSION JACKS

Standard ¼", 2 and 3-conductor extension phone jacks with solder lugs or screw type terminals. Size 11/16" O.D., 25/32" long; 121 and 131, 1/2" O.D., 21/32" long. Black handles are durable plastic. Shielded handles are brass, bright nickel plated.

Part No.	Fig.	Cond.	Typical Mating Plug	Term	Handle	Ea. 1-9	10-24	25-49	50-99	100-249
80	G	2	250	Screw	Black	1.44	1.08	.99	.90	.72

1230	H	3	290	Screw	Shielded	2.48	1.86	1.71	1.55	1.24

JACK COVERS

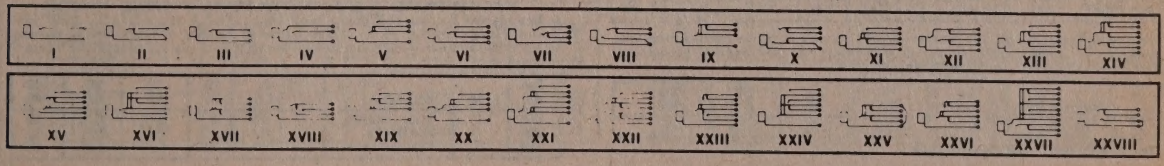
Handy, rugged, spring-load phone jack covers. Covers jack openings when phone plug is removed. Protects against dust and moisture. Series 500—Use with standard 3/8"-32 threaded bushing type phone jacks.

Part No.	Color	Ea. 1-9	10-24	25-49	50-99	100-249
515	Black	1.32	.99	.908	.825	.66

"THICK-PANEL JAX"

Phone jacks with long bushing. Mount in single 15/32" dia. hole in panels up to 1¼" thick. Solder lug terminals. Ideal for use with microphones; extra shielding virtually eliminates audio hum. No. 151, 2-conductor mates with 240, 245, 250, 255, 270 and 280 Plugs. No. 152B, 3-conductor mates with 260, 267, 269 and 297 Plugs.

Part No.	Description	Ea. 1-9	10-24	25-49	50-99	100-249
151	2-cond. Brass Nickel Plated	1.84	1.38	1.27	1.15	92
152B	3-cond. Brass Nickel Plated					



MILITARY TYPE "LITTEL-PLUG" AND "EXTENSION JAX"

Designed to meet exact industrial and military requirements. Plugs are made in accordance with MIL-P-642(A) specifications. One-piece tip rod and one-piece sleeve and plug body provide internal interlock to prevent parts shifting in position. Handle: plastic: †Red; ‡Black. All plugs have screw terminals.

Part No.	Fig.	Mil-Type No.	Typical Mating Jack	Cond.	Ea. 1-9	10-24	25-49	50-99	100-249

"FLAT-PLUG" PHONE PLUGS

¼" phone plugs featuring flat, space-saving handles. Ideal for applications where conventional plugs would protrude too far. Nos. 220 have adapter clips which make them convenient to clamp standard phone tips to terminals. Shielded flat plugs, Nos. 228 and 238 have nickel plated steel handles; all others have red or black plastic handles.

TWO-CONDUCTOR TYPE

Part No.	Fig.	Typical Mating Jack	Handle	Terminals	Ea. 1-9	10-24	25-49	50-99	100-249

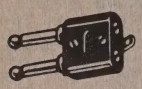
THREE-CONDUCTOR TYPE

238	L	12B	Shielded	Solder	1.80	1.35	1.24	1.13	.90



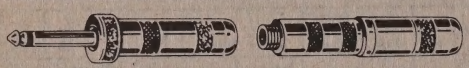
MILITARY TYPE "TWIN-PLUG"

Meet exact industrial and military requirements. Nos. 412 and 413, use identical materials. "Twin-Plug" sleeves spaced ⅝" center to center with self-aligning feature.

Part No. 412 – Two electrically independent 2-conductor plugs in black plastic handle. Has external cord clamp. Old Military Type PJ-289. Similar to W.E. 289B

Part No. 413 – Three circuit plug with two electrically independent tip circuits in heavy duty die cast frame. Molded black phenolic handle notched to indicate polarity. Interchangeable with MIL-Type PJ-421 and W.E. 241

Switchcraft No.	Ea. 1-9	10 -24	25 -49	50 -99	100 -249
412	4.76	3.57	3.27	2.98	2.38
413	4.76	3.57	3.27	2.98	2.38



"LOCK-PLUG" AND "EXTENSION JAX"

Standard size ¼", 3-cond. phone plug and mating cable extension jacks, with built-in locking device. Ideal for all P.A., audio applications. Plug has coupling ring that can be threaded to the bushing of a "Littel-Jax" or to the mating end of the "Lock-Extension Jax". "Lock-Plug" handle, 1 51/64" long; ½" dia. "Lock-Extension Jax", ½" O.D.; 2½" long. Solder lug terminals. Available in 2-cond. types on special order.

Part No.	Description	Ea. 1-9	10 -24	25 -49	50 -99	100 -249
298	3-Conductor "Lock-Plug"	2.32	1.74	1.60	1.45	1.16
133	3-Conductor "Extension Jax"	2.76	2.07	1.90	1.73	1.38

MT–389

"MT-JAX" MILITARY TELEPHONE JACKS

Long frame, telephone switchboard jacks designed for high quality communication and military equipment. Springs are of a special nickel silver alloy with welded cross bar palladium contacts. "MT-Jax" are available in two frame designs, namedly "A" & "C". Part numbers in chart cover "A" frame design. For frame design "C" as shown in Fig. B, add prefix letter "C" to part numbers.

Part No.	Schematic No.	Adjusted for Plug	Mil-Type No.	Ea. 1-9	10-24	25-49	50-99	100-249
MT-331	I	440*	JJ-086	1.36	1.02	.935	.85	.68

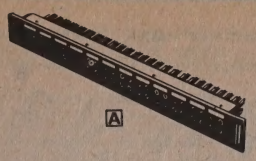
880	F	Natural Handle	.84	.63	.578	.525	.42

Phone Jacks, Panels and Patch Cords



JACK PANELS

Rugged, heavy-duty jack panels for switching, distribution and control of audio signals in broadcasting stations, theaters, P. A. systems installations, etc. Series 1200, Fig. A, black phenolic panels reinforced with steel for the utmost rigidity. Mounting brackets slotted to fit all standard 19" relay racks. Panel includes plastic covered designation strips. Add Prefix "X" to part numbers to indicate offset ground lugs on jacks.

Part No.	Fig.	Rows	Number of Jacks	Size, In. W x D x H	Ea. 1-9	10-24	25-49	50-99	100-249

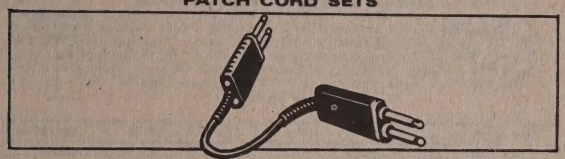
JACK PANEL HOLE PLUG

Hole Plug, P-1801, molded nylon, fits all Switchcraft jack panels, Series 1200, 1400, 2400, 2600, 2800. Designed to plug unused holes in jack panels.

Part No.	Description	Ea. 1-9	10-24	25-49	50-99	100-249
P-1801	Hole Plug	.28	.21	.193	.175	.14

PATCH CORD SETS



All patch cords are constructed of bronze tinsel conductors, insulated and shielded, with a heavy black nylon braid overall.
Series 17Q—2-conductor patch cords have No. 413 "Twin-Plug" at each end with shields grounded both ends.
Series 18Q—2-conductor patch cords use Military Plug PJ-051 (Switchcraft Part No. 482) at each end with shields grounded both ends.
Series 19Q—Single conductor patch cords utilize Military Plug PJ-047B (Switchcraft Part No. 420) connected to each end with shield grounded both ends.

TT PATCH CORDS

"tini-telephone" patch cords with 2- and 3-cond. attachable single and twin plugs. Black handles, braided shield, black nylon cord. .173" dia. fingers. Mate with TT-Jax.

Series TT-720—2-cond. Shielded cord. Shield is grounded to sleeve of each plug.
Series TT-740—2-cond. Shielded cord. Shield is grounded to sleeve of each plug.
Series TT-840 [G] 2-cond. Shielded cord with twin-plug phone plug attached to each end.

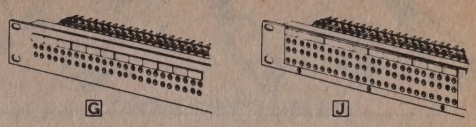
SERIES TT "TINI-TELEPHONE" JACK PANELS



U.S. Pat. No. 3,597,867

Series "TT" Jack Panels provide up to 104 jacks (1¾" x 19" area) or 156 jacks (2⅝" x 19" area) in standard panels. Constructed of black anodized, extruded aluminum with an extra wide flange for greater rigidity. Series 1600, a double row panel for 96 "TT-Jax" consists of an aluminum panel and 4 molded plastic inserts which accommodate 24 jacks each. Series A1600—similar to Series 1600; accepts 104 "TT-Jax" or "WTT-Jax" (2 rows of 52 jacks; jacks spaced on 5/16" centers each row). Provides greater connecting density on standard 1¾" x 19" panel. Series 1700, a double row panel for 48 "TT-Twin-Jax", consists of an aluminum panel with 2 molded plastic inserts which accommodate 24 twin jacks each. Series B1700 same as Series 1700 except accommodates 48 "Tri-Jax". Part Nos. TT-95 or WTT-95 (24 per insert). All Series feature Switchcraft's exclusive "kwik-change" designation strips. Strips consist of a clear plastic snap-on cover and a reusable plastic marking strip.

Part No.	Fig.	Rows	Number of Jacks	Ea. 1-9	10-24	25-49	50-99	100-249

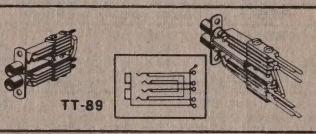
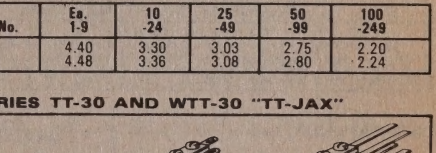
"TINI-TELEPHONE" TWIN-JAX



Series "TT Twin-Jax" and "WTT Twin-Jax" are similar in design to the Series "TT-Jax" and "WTT-Jax" single jacks, except the 2 frames are welded back-to-back with mtg. holes on 13/16" centers and bushings on 5/16" centers. Twin jacks are designed to be mounted on Series 1700 jack panels. Part No. TT-89 has solder lug terminals; Part No. WTT-89, wire-wrapping terminals. Both mate with TT-Patch Cords. Series TT-120, TT-160, TT-740, and TT-860.

Switchcraft No.	Ea. 1-9	10 -24	25 -49	50 -99	100 -249
TT-89	4.40	3.30	3.03	2.75	2.20
WTT-89	4.48	3.36	3.08	2.80	2.24

SERIES TT-30 AND WTT-30 "TT-JAX"



New, "tini-telephone" Jax, miniatures of the std. long frame telephone-type jacks. Rugged steel frame, with gusset for extra rigidity. Special nickel silver springs with welded crossbar palladium contacts. Series TT-30 require only 2 1/4 16" depth behind panel, mounted on 5/16" centers, in a 1/4" dia. hole in panels up to 3/8" thick. Designed to be mounted on Series 1600. "TT" Jack Panels. Series TT-30 jacks also available with wire-wrap terminals, Fig. E. Series WTT-30. Same quality construction. Depth behind panel 2 1/16". Both TT-30 and WTT-30 jacks can be mounted in combination or interchangeably with "TT-Switch" and "TT Lamp-Jax" on Series 1600 panels.

Here is the most complete low-cost family of miniature audio connectors available today. Exact replacements for plugs and receptacles, used on most foreign built tape recorders, radios and dictation equipment. Switchcraft/Preh 2 to 7 contact connectors include male and female plugs and receptacles with bright nickel-plated shells and plastic snap-on shells. Check these outstanding features . . . lock-ring coupling, silver plated contact pins for low contact resistance, contact friction coupling for low mechanical interference noise, exclusive "automatic" grounding and polarization provisions. Five receptacles offer some form of internal switching. Positioning "Ground Key-Rib" or "Ground Contact – electrically integral with the connector shell – is provided in each plug and receptacle (except those with plastic housings or shells) to ground or shield the connector shell. Designed for low level circuitry, they have unlimited use in commercial, industrial, consumer and military applications.

CONTROL AND SWITCHING RECEPTACLES FOR 01QK2M PLUGS

Each receptacle includes an elongated center contact for positive polarization. When inserting mating plug, contact is made to terminals 1 and 2. Plug may then be turned 180°, without a polarity change, and re-inserted to open switch and make contact to terminal 2.

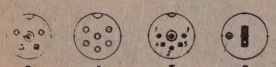
PIN ARRANGEMENTS



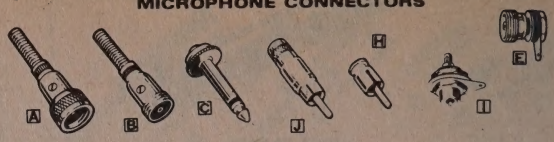
CONTACT ARRANGEMENTS

"MINI-CON" MINIATURE CONNECTORS

Popular "Mini-Con" microphone-type connectors used with miniaturized audio equipment, lapel microphones, musical instruments, etc. About ½ the size of standard microphone connectors. Accepts single conductor shielded cables up to ⅛" O.D. Nickel plated brass bodies. Coupling ring on 5501F removable for quick change of female to male type. Cable-braid spring clamped to body by hollow point set screw. 5501MP mounts back side of panel in ⅛" dia. hole.

Part No.	Fig.	Description	Ea. 1-9	10-24	25-49	50-99	100-249
5501F	A	Female Cord Connector	.80	.60	.55	.50	.40
5501MP	D	Panel Connector, Male	.64	.48	.44	.40	.32

MICROPHONE CONNECTORS



Standard connectors with ⅝"-27 threads. Designed for use with single conductor microphone cable with .332" max. O.D. **Coupling ring** on 2501F removable for fast change of female to male type. Spring assembled into body, cable braid and spring clamped by hollow set screw. **No. 44** adapts 2501F to fit standard 2-cond. phone jack. No. 2501MP mounts in .385" dia. hole. *No. 2501MPC same as 2501MP except closed circuit type.

Part No.	Fig.	Description	Ea. 1-9	10-24	25-49	50-99	100-249
2501F	A	Female Connector	.88	.66	.605	.55	.44
2501M	B	Male Connector	.72	.54	.495	.45	.36
44	C	Phone Plug Adapter	.64	.48	.44	.40	.32

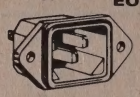
2501MPC	E	Panel Receptacle	.84	.63	.578	.525	.42

RF-JACKS AND RF-PLUGS

Standard phono jacks and plugs with nylon insulation. For use in radio frequency applications – low cost, max. insulation resistance. **No. 3505F** mounts front of panel in ⅜" hole – fits panel up to 1/64" thick. **No. 3507** has 13/32" O.D. shielded, screw-on handle with cable clamp.

3505F	I	Chassis jack	.64	.48	.44	.40	.32
3507	J	Plug	.84	.63	.578	.525	.42

EUROPEAN A.C. RECEPTACLE



New, Switchcraft A.C. receptacle designed to meet European I.E.C. standards. 3 pins, .078" x .157", **rated at 250V, 6 AMP., U.L. and C.S.A. approved.** Rugged molded plastic housing. Mates with Belden plug type SPH-386, or European A.C. cord sets. Mounts in a rectangular 1 1/16" x 3/4" hole and two #8 dia. holes for #5 screws (not furnished).

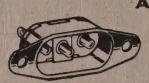
Switchcraft No.	Ea. 1-9	10-24	25-49	50-99	100-249
EAC-301	1.16	.87	.798	.725	.58

AC LINE CORD

Part No. P-2392 AC Line Cord has 3, #18 AWG cond., UL type SVT cordage. Length is 7½' with heavy black vinyl jacket. 3-contact receptacle mates with Part No. EAC-301 AC Power Receptacle and European equivalent. Male plug on other end is 3-pin type. Part No. P-2392 is U.L. and C.S.A. recognized. Female connector (3-contact) is designed to meet I.E.C. requirements. Federal Stock No. FSN-6150-3405 identifies Part No. P-2392 for government/military applications.

Part No.	Electrical Specifications	Ea. 1-9	10-24	25-49	50-99	100-249
P-2392	3-cond.; 7 amps DC 7 amps AC, 125V.	2.64	1.98	1.82	1.65	1.32

AC RECEPTACLES



Highly dependable 3-pin receptacles for use in all electrical/electronic equipment. "Chassis hugging" recessed type mounting. Brass contact pins are silver plated, chromate dipped. Part Nos. AC3 and LAC3 (ungrounded) and Part Nos. AC3G and LAC3G (grounded), include a self-aligning feature which allows movement of pins No. 1 and No. 3 in the shell to take up any slight off centering of the mating plug contacts. The center pin No. 2, is stationary and serves as a guide. Receptacles AC3 and AC3G have .122" dia. pins and mate with custom AC line cords such as **Belden Ph-243.** Part No. LAC3GD, same as LA3G, except center pin is ⅛" longer to permit ground circuit to "make" before power circuits "make". Receptacles LAC3, LAC3G and LAC3GD have .124" dia. pins and mate with std. A.C. line cords such as **Belden 17258.** All types are U.L. approved. Part No. LAC3GD is also C.S.A. approved. Rating: 115V., 7 amps.

Part No.	Ea. 1-9	10-24	25-49	50-99	100-249
AC3	.76	.57	.523	.475	.38

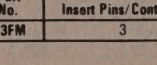
LAC3G	.72	.54	.495	.45	.36
LAC3GD	.76	.57	.523	.475	.38

S(*)FM AUDIO CONNECTOR ADAPTER



Male insert at one end, female insert other end. For use as a transformer, attenuator circuit, etc. **Overall length 4", 1½" space** for circuitry between terminals. Unwired.

Part No.	Insert Pins/Contacts	Ea. 1-9	10-24	25-49	50-99	100-249
S3FM	3	7.84	5.88	5.39	4.90	3.92

AUDIO CONNECTORS WITH COMPLETE GROUNDING PROVISIONS!

Switchcraft's "Quick-Ground" connectors feature a separate "Ground-Terminal" electrically integral with the connector shell. Ground continuity between mating plugs automatically accomplished through the exclusive "Ground Contactors". Possible loss of insert screw is eliminated by new "Captive Design" Insert Screw. Socket and pin assemblies utilize "wedge-action" to insure firm, reliable positioning in connector shell. Q-G® Series 3- and 4-contact audio connectors, offer 4- and 5-contact versatility when "Ground Terminal" is used. Used interchangeably with: 3- and 4-contact (Amphenol 91-850 and Excellite 91-450 Series, and Cannon XLR-3, XLR-4). ***Number of insert contacts or pins must be specified to complete Part No.**

A(*)F CORD PLUGS

Fresh, streamlined design includes rugged, die-cast zinc body, satin nickel finish, high-impact resistant thermosetting plastic socket insert, molded latchlock, dual pressure plates, keyed neoprene relief bushing. Features "Ground Terminal" and "Ground Contactors offers 4- and 5-contact versatility. Mates with Switchcraft A(*)M and other connectors with similar contact arrangements. Overall length $1\frac{37}{32}$"; diameter $\frac{3}{4}$".

Part No.	Insert Contacts	Ea. 1-9	10-24	25-49	50-99	100-249
A3F	3	2.48	1.86	1.71	1.55	1.24
A4F	4	3.08	2.31	2.12	1.93	1.54

A(*)M CORD PLUGS

Has "Captive Design" insert screw, one-piece pin insert assembly easily removable for fast soldering. Polarizing groove. Die-cast zinc shell, satin nickel finish. Mates with Switchcraft A(*)F and other connectors with similar contact arrangements. Brass, silver plated chromate dipped pins to resist tarnishing. Overall length $2\frac{25}{32}$"; dia. $\frac{3}{4}$".

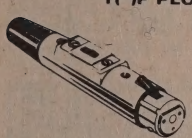
P(*)F PLUG

Female audio connector mounts directly to a flexible gooseneck and/or microphone stem. Diecast zinc housing has a $\frac{5}{8}$-27NS-2B internal thread, $\frac{9}{16}$" deep. Mate with all female receptacles with similar pin arrangements. Overall length $2\frac{1}{4}$"; dia. $\frac{3}{4}$".

P3F	3	2.40	1.80	1.65	1.50	1.20

T(*)F PLUG WITH ON-OFF SWITCH



Part Nos. T(*)F Cord Plugs connect directly to microphones. Built-in submin. slide switch permits instant on-off control of audio (ideal for entertainers, broadcasters). Switch provides in-line DPDT (2-C) switching—T(*)F has locking sw. Contacts rated 1 amp, 125V AC; 0.5 amp, 125V DC. Easy to operate with thumb. Incl. "Ground Contactor" & "Captive Design" insert screw features. Overall length $3\frac{61}{64}$", diameter $\frac{3}{4}$".

T3F	3	7.60	5.70	5.23	4.75	3.80

B(*)M RECEPTACLES

For panel or chassis mounting; locknut accommodates panels up to $\frac{1}{4}$" thick. Single hole mounting, can be keyed by using "D" shaped panel hole. Pin insert features "Captive Design" insert screw and "Ground Terminal". Mates with Switchcraft A(*)F and other connectors with similar contact arrangements. Diecast zinc shell, satin nickel finish. Dimensions: Flange $1\frac{7}{64}$" dia.; Barrel $1\frac{3}{16}$" overall; pin extensions $\frac{9}{32}$".

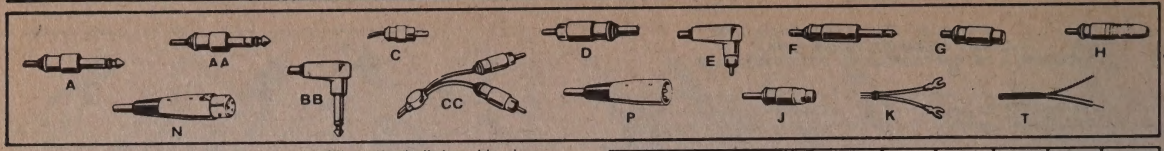
SWITCHCRAFT® INC. Audio Cable Assemblies



Only Switchcraft quality molded cable assemblies offer built-in cable clamps to support cable and eliminate strain – functionally designed handles to provide an easy grip. Cable is chrome grey (unless otherwise specified) with matching plastic handles. Fig. N Switchcraft Q-G 3-Pin Audio Connector – Female. Fig. P Switchcraft Q-G 3-Pin Audio Connector. Part Nos. 25WN25, 25WT25, 25WN82, 25WT82 have molded brown handles and clear (low visibility rip cord cable).

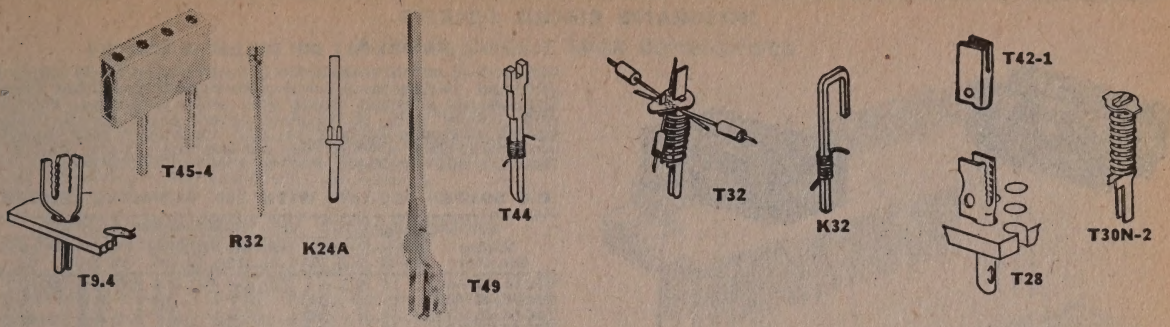
Vector Terminals and Tools



PUSH-IN TERMINALS

Zip push-in terminals are fast and easy to use because they fit prepunched holes in Vectorbord®, Micro-Vectorbord® and Plugbords. Simple, listed hand tools firmly seat terminals to hold without staking. Slots or fingers in some models hold leads until soldered. Wire wrappable types have sharp-cornered, 0.025" square tails for reliable wire wrapping. Klip-Strip T45-4 accepts DIP leads or #22 gauge wire for solderless interconnections. T30 and T32 types hold up to 6 leads in solderless spring connection and are ideal for experimental terminals.

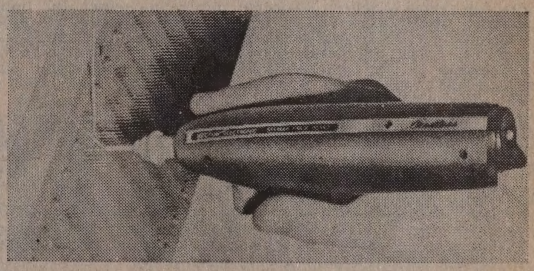
BATTERY OPERATED WIRE WRAPPING TOOL

The P160-4R electric, rechargeable wrapping tool makes reliable, low cost, gas tight, right-hand wraps with the listed wrapping bit, which must be ordered separately. Ideal for lab or bench use, tool is lightweight (9 oz.) and easy to use. Wraps for many hours without recharging, recharges in 14 to 16 hours with the recharger unit furnished.

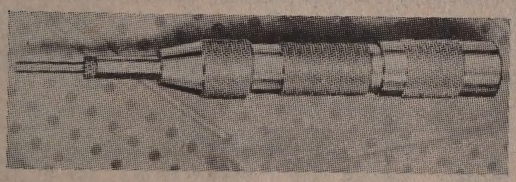
Vector No. P160-4R Wrapping Tool—Complete with recharging unit. Net Each..... **$45.68**

Vector No. P160-2A Wrapping Bit—For .025" sq. posts. Fits above tool or may be used by hand. Overall length, 5.81", with hardened wrapping section. Wraps #26 thru #30 gauge wire, with #28 gauge preferred. Net Each..... **$7.95**

Vector No. P160-1A Manual Unwrapping Tool—For .025" sq. posts. Unwraps left or right hand wraps. Overall length, 5.0", with insulated sleeve and handle grip. Unwraps #26 thru #30 gauge wire. Net Each..... **$9.50**



SPRING IMPACT TOOL FOR SEATING PUSH-IN TERMINALS



Model P158 spring impact tool delivers an adjustable blow to easily drive in and seat Zip Push-In Terminals. Interchangeable die points (listed with their appropriate terminals above) deliver the force to the terminals and make terminal installation fast and easy. Order **P158-1** adapter to use P158 Tool in drill press or arbor press.

Vector No. P158-1 Press Adapter—Net Each..... **$9.19**
Vector No. D-7 Adapter—Net Each..... **6.35**

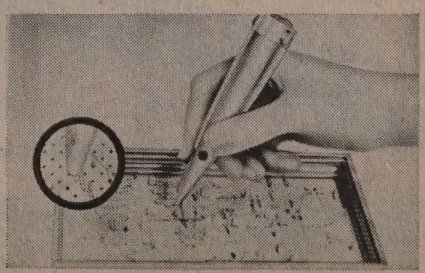
Vector No. D-8 Adapter—Net Each..... **3.86**
Vector No. D-9 Adapter—Net Each..... **3.86**
Vector No. D-11 Adapter—Net Each..... **3.86**

WIRING PENCIL

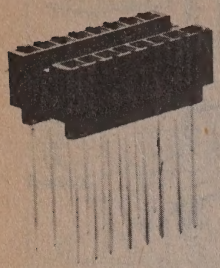
New P173 wiring pencil wires circuits three times faster than conventional soldering or manual wrapped wire connections. Tool consists of a hand-held featherweight (less than 1 oz.) unit which is used to guide and wrap heat-strippable insulated wire, fed off a self-contained replaceable bobbin, onto component leads or terminals installed on prepunched "P" pattern Micro-Vectorbord®. Connections between wrapped wire and component leads, pads or terminals are made by soldering. When heat is applied to junction points with soldering iron, the wire insulation melts, permitting the applied solder to bond the junction. Average time required to make a connection is only a few seconds.

Vector No. P173 Wiring Pencil—Complete with 250' spool of #36 gauge red wire and 250' spool of #36 gauge green wire, threading loop, instructions. Net Each..... **$9.50**

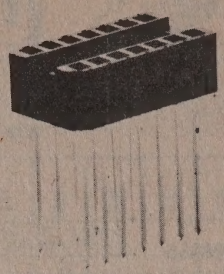
Replacement Wire—#36 gauge solder-thru insulation. No. W36-3-A, green; W36-3-B, red; W36-3-C, clear; W-363-D, blue. Package of three spools. Net Each Pkg..... **$2.40**



INTEGRATED CIRCUIT SOCKETS



Press-In Panel Mount



PC Board Mount

PRESS-IN PANEL MOUNT IC SOCKETS

IC sockets with 14 and 16 contacts and Wire-Wrap* terminals for dual inline packages. For steel or aluminum panel applications. Closed entry design. Contacts are replaceable from bottom of insulator. Insulator is glass-filled nylon. Contacts are phosphor bronze with choice of plating, .000030″ gold, .000010″ gold, or tin plate. Sockets available in black or white. Size: Pin diameter, .025″; terminal length, .600″. Size, less terminals: 14-pin, .760″ w. x .400″ d. x .335″ h.; 16-pin, .860″ w. x .400″ d. x .335″ h.

P/C BOARD MOUNT IC SOCKETS

Sockets with 14 and 16 contacts, Wire-Wrap terminals, for dual inline integrated circuits. Features minimum height PC board mounting, .250″ high. Closed entry design. Glass-filled nylon insulator. Phosphor bronze contacts with choice of plating, standard .000030″ gold, minimum .000010 gold, or electro-tin plating. Pin diameter is .025″. Sockets available in black or white. Size, less terminals, 14-pin, .760″ w. x .395″ d. x .250″ h.; 16-pin, .860″ w. x .395″ d. x .250″ h. Terminal length, .600″.

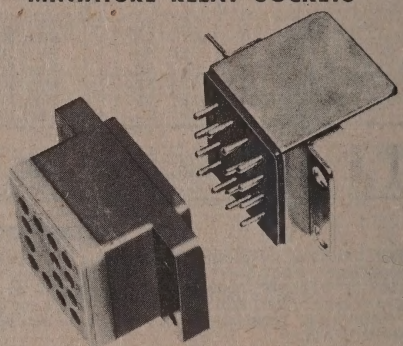
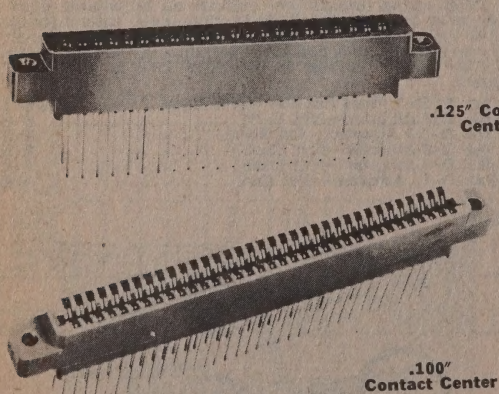
MINIATURE RELAY SOCKETS



Military quality relay sockets are available in three mounting styles: Threaded insert for below-chassis mounting; thru-hole for below-chassis mounting; or molded-in threaded insert and stud for above-chassis mounting with flange-mounted relays. Diallyl phthalate insulator for use at voltages up to 180 VDC. Stainless steel hardware; solder pot terminals take #20 AWG thru #16 AWG wire. Available with 8, 10, 14, 16 and 24 contacts in a variety of patterns. Write or call for information and prices on relay sockets available in 5 contact terminations: solder pot, dip solder, pierced tab, turret lug and crimp removable.

NORSMAN™ SERIES PRINTED CIRCUIT CONNECTORS WITH WIRE-WRAP TERMINALS



Norsman series PC connectors for low cost, Wire-Wrap applications. Features Autac™ electro gold plating process which eliminates or reduces gold thickness on functionally non-critical areas of the contact, thereby minimizing cost. Meets MIL-G-45204, Type II, Grade C. Standard thickness is Class 1 (.000050″ gold thickness on head only). Contact material is phosphor bronze with gold over nickel. Insulator is thermosetting glass-reinforced plastic. Accepts .062″ printed circuit board. Polarized between contacts. Wire-Wrap terminals are .025″ sq. x .620″ long. **Mounting Hole:** .125″ dia. thru hole. **Operating Temperature:** To 250° F continuous. Polarizing key No. 091-0071-000 available.

Viking Printed Circuit Connectors

PRINTED CIRCUIT EDGE CONNECTORS

Military quality edge-board connectors for use with .062″ printed circuit boards. Bifurcated bellows type contacts of beryllium copper, plated .00003″ gold over nickel. Diallyl phthalate insulators per MIL-M-14. Available with choice of four contact spacings (.05″, .10″, .125″, .156″). **Operating Temperature:** To 400° F. **Mounting Holes:** Two .125″ dia. **Terminals:** Pierced solder type, Wire-Wrap or dip solder/weld, as indicated.

DOUBLE ROW WITH .100″ CONTACT CENTERS SOLDER/PIERCE TERMINALS (NOT ILLUSTRATED)

Double row of terminals on .100″ contact centers. Type N pierced terminals are .240″ long, take three #26 AWG wires. Type V dip solder terminals are .240″ long, fit .040″ min. dia. holes.

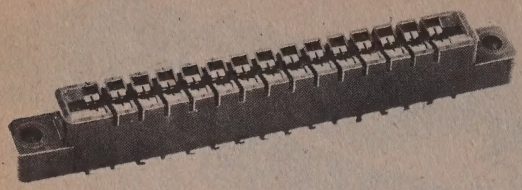
VIKOM™ SERIES PRINTED CIRCUIT CONNECTORS
SOLDER/PIERCE TERMINALS



Low-cost connector for commercial equipment. Vikom I connectors available in single or dual read-out configurations on .156″ contact centers. Insulator is glass-filled alkyd. Contacts are copper alloy with .000010″ minimum gold flash. Vikom II, available in dual read-out configuration only, is identical to Vikom I except for the contact design. Contacts are of the "cantilever" design for applications where a long contacting interface is not necessary. **Mounting Holes:** .125″ dia. holes. **Operating Temperature:** −55° C to +105° C.

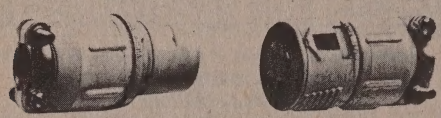
THORKOM™ SERIES LOW-COST MINIATURE CIRCULAR CONNECTORS AND RECEPTACLES



Receptacle and Plug with Cable Clamp Backshell

Receptacle and Plug with Low-Cost Backshell

Thorkom Family of Parts

Plastic molded circular connector withstands 50G shock. Cable clamps are nickel-plated aluminum. Choice of screw machined or die formed contacts, copper alloy with .000030″ gold plating. Neoprene sealing gaskets. **Current Rating:** 5.0 amps. **Operating Voltage:** 1500 V rms at sea level. **Operating Temperature:** −55° C to +125° C. UL Approved plastic.

PLUGS

Contacts are not included; order separately.

NYLON CABLE CONNECTORS

Highly reliable, versatile connectors rated 250 volts per circuit. Nylon housings are available in miniature size for .062″ pin terminals, or standard size for .093″ pin terminals (supplied less terminals). Ideal for use in business machines, appliances, communications, instrumentation, and other demanding applications. Available with integrally molded ears for easy panel mounting. All types (except single circuit) are polarized. Both male and female pin terminals of the same mating diameters can be intermixed in the same housing. Terminals can be extracted and easily replaced, using ejector tools. Housings are UL Recognized.

CABLE CONNECTOR DESIGNER KITS

WM-50

Ideal for the creative designer, repairman and experimenter. Eliminates need of searching for proper connectors or tools; everything under one lid, covering all circuit capacities with male and female housings, terminals and crimping tool. Separate compartments for connector elements, numbered and described for easy part reordering. **Lightweight, unbreakable case** has snap-lock to avoid spills and mix-ups.

Manual, prototype crimping tool is specially balanced and weighted for easy operation; made of hardened steel, it provides excellent, uniform crimps every time. Also strips and cuts wire. **An extractor tool** is also provided with each crimping tool to assist in circuit changes or corrections.

Waldom No. WM-50 Designer Kit—Same as WM-72, but parts cover from single circuit to 15-circuit designs (250 V and up to 12 amps per circuit); and, totals 45 complete connectors only. All have pin terminal size 0.093″ dia. With crimping tool, pin terminal ejector tool and case. Net Each.....**$29.95**

Waldom No. WM-72 Designer Kit—Contains all parts needed to assemble male and female connectors from single circuit to 36-circuit designs (250 V and up to 5 amps per circuit); totals 56 connectors. All have pin terminal size 0.062″ dia. With crimping tool, pin terminal ejector tool and case. Net Each.....**$34.95**

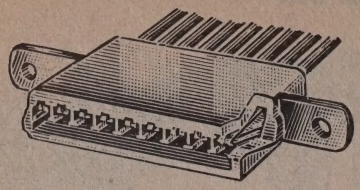
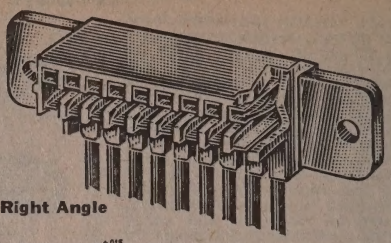
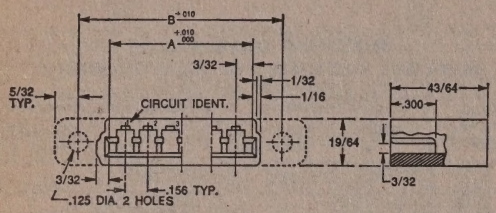
waldom / molex Connectors

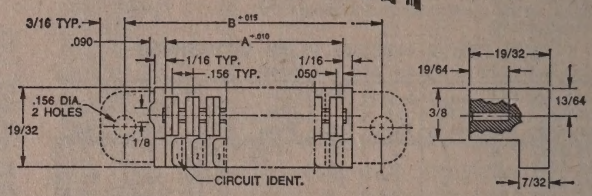


Straight-on



Right Angle





PC EDGE CONNECTORS

Straight-on: Edge connectors are available in 6, 9, 12, 15, 18, 21, 22 and 24 circuit configurations. Bifurcated terminals provide a really solid contact with excellent reliability. Connector can be slipped on and off, time after time, without any damage to the printed circuit. Use of polarizing key when necessary, guarantees positive polarity. Comes with or without mounting flange. **Right Angle:** Edge connectors are available in 6, 9, 12, 15, 18, 21 and 22 circuit configurations and offer all the advantages of "Straight-on" Series plus the added feature of mounting the printed circuit board at a right angle, requiring minimum space.

MICRO SWITCH CONNECTORS, TERMINALS

Single and three circuit series nylon connectors offer low cost and especially the three circuit, a full proof method of making quick connections on micro type switches. Housing accepts crimp-on, snap-in quick disconnect female terminal type No. 05-06-0302, for 14–22 wire range of 05-06-0403 for 22–30 wire range, which fit a standard 3/16" male tab, .020" thick. Female quick disconnect terminals are vastly different than the conventional type female quick disconnects. Average insertion force of 2 per term is much lower and smoother, and does not force the switch out of proper adjustment. **Single Circuit:** Single circuit micro switch connector fits any standard 3/16" (.020") switch male tab. **Three Circuit:** Single circuit portion is a unique feature of the three-circuit micro switch connector. Purposely sprung to allow easy connections to all micro switches of various manufacturers as their tab locations do vary slightly.

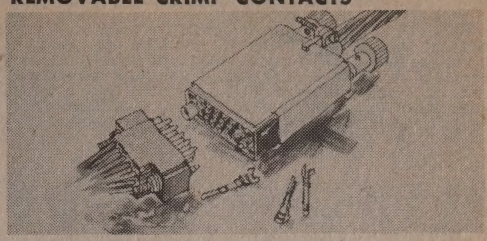
MAC-COM™ SERIES CONNECTORS WITH REMOVABLE CRIMP CONTACTS

Designed to fill the gap between sophisticated MIL connectors and the minimum cost type, the MAC-COM series provides a broad line of rack and panel connectors at moderate prices. The series handles moderate, but critical, signal functions and provides high reliability in high humidity environments and fairly intense temperatures. A complete line of hardware and special options is available. **Dielectric Material:** Black phenolic type MFH per MIL-M-14. Contact identification is alphabetical; to order numerical identification, substitute **XNAFC** for **XAFC** or **MNAFC** for **MRAFC. Contacts:** Must be ordered separately. Gold plated over nickel over phosphor bronze. Available in two sizes to accept wire sizes from #18 to #30 AWG. **Insulation Resistance:** 500 volts, per MIL-C-28748. **Full Specifications and Pricing Information on Request.**



XAFC TYPE WITH MOUNTING PLATE AND SHELLS

XAFC	9	P	M	1	A	3	00	G
(A)	(B)	(C)	(D)	(E)	(F)	(G)	(H)	(I)

(A) Series Identification.

(B) Number of Contacts:
9, 14, 18, 20, 26, 34, 42, 50

(C) Contact Style:
P—Pin.
S—Socket.

(D) Guides:
O—None required.
G—Phosphor bronze cylindrical.
K—Beryllium copper cylindrical.
N—Brass cylindrical.
Add: **SS** for stainless steel guides, i.e. **NSS.**
P for two guide pins, i.e. **NP.**
S for two guide sockets, i.e. **GS.**
Jackscrews:
O—None required.
M—Polarized short turnable jackscrew and jacksocket with standard knobs. Cannot be used with hood.
C—Polarized long turnable jackscrew and jacksocket with standard knobs. Used with hood.
W—Polarized long turnable jackscrew and jacksocket with straight knob. Used with hood.
D—Polarized one-piece mono-jackscrew and mono-jacksocket (no separate knob). Used with hood on sizes 34, 42, 50.
F—Polarized fixed jackscrew and jacksocket. Used with or without hood. No knob required.
J—Non-polarized short turnable jackscrews with standard knobs. Cannot be used with hood.
L—Non-polarized long turning jackscrews with standard knob. Used with hood.
R—Non-polarized fixed jacksockets. No knob. Used with or without hood.
FZ—Same as **F** but with 6-32 thd.
MW—Same as **M** but with knurled round knob with internal hex.*
MU—Same as **M** but with knurled round knob with screwdriver slot.
MX—Same as **M** but with hex knob.
CW—Same as **C** but with knurled round knob with internal hex.
CU—Same as **C** but with knurled round knob with screwdriver slot.
CX—Same as **C** but with hex knob.
CZ—Same as **C** but with prybar knob.
*Consult factory for availability.

(E) Shell Type:
0—No shell.
1—Plug shell.
2—Receptacle shell.
3—Plug shell used with mono-jacks.
4—Receptacle shell used with mono-jacks.
6—Flanged receptacle shell.*
7—Plug shell, stainless steel.*
8—Receptacle shell, stainless steel.*
*Consult factory for availability.

(F) Polarization Position:
A, B, C, D, E, F, G
Omit letter when polarization is not required.

(G) Hoods:
0—No hood.
3—Hood, top opening, use with type **C, D,** or **L** jackscrews.
4—Hood, side opening, use with type **C, D,** or **L** jackscrews.
5—Hood, top opening, use with type **F** jackscrews and all guides.
6—Hood, side opening, use with type **F** jackscrews and all guides.

(H) Mounting Plates:
Mounting plates not used with type **M, C, J, L,** or **D** jackscrews.
00—No plate required.
10—Standard mounting plate.
20—Narrow mounting plate.*
30—Stainless steel plate.*
*Consult factory for availability.

(I) Special Features:*
Omit letter when none required.
G—Bulkhead gasket, use only with mounting plate.
F—Face gasket, use only with male insert.
B—Both bulkhead and face gaskets.
X—Large cable opening for hood.
*Consult factory for availability.

MRAFC TYPE WITH VIBRATION LOCKS

Same as the XAFC series, but with vibration locks and without mounting plates or shells.

MRAFC	34	S	G	H	VL
(A)	(B)	(C)	(D)	(E)	(F)

(A) Series Identification.

(B) Number of Contacts:
9, 14, 18, 20, 26, 34, 42, 50

(C) Contact Style:
P—Pin
S—Socket

(D) Guides:
G—Phosphor bronze cylindrical.
K—Beryllium copper cylindrical.
N—Brass cylindrical.
Add: **SS** for stainless steel guides, i.e. **NSS.**
P for two guide pins, i.e. **JTCP.**
S for two guide sockets, i.e. **GS.**
Jackscrew Locks:
J—Polarized fixed jackscrew and jacksocket.
JT—Polarized short turning jackscrew and jacksocket.
JTC—Polarized long turning jackscrew and jacksocket.
JTD—Polarized long turning mono-jackscrew and mono-jacksocket for sizes 34, 42, 50 only.
JZ—Same as **J** but with 6-32 thd.
JTW—Same as **JT** but with knurled round knob with internal hex.*
JTU—Same as **JT** but with knurled round knob with screwdriver slot.
JTX—Same as **JT** but with hex knob.
JTCW—Same as **JTC** but with knurled round knob with internal hex.
JTCU—Same as **JTC** but with knurled round knob with screwdriver slot.
JTCX—Same as **JTC** but with hex knob.
JTCZ—Same as **JTC** but with prybar knob.
*Consult factory for availability.

(E) Hoods:
H—Standard top opening. For 26, 34, and 42 sizes only.
H1—Standard side opening.
H8—Large top opening. For 26, 34, 42, 50 sizes only.
H9—Large side opening.
H13—Large top opening, high hood. For 9, 14, 18, 20 sizes only.

(F) Vibration Locks:
V—Lock tab.
VL—Lever and pivot assembly.

WIN-COM™ 56 AND 59 SERIES LOW COST RACK AND PANEL CONNECTORS

The WIN-COM series crimp removable contact rack and panel connectors are especially suited for the high component density, high volumetric efficiency requirements of today's consumer and commercial electronic equipment. These general purpose nylon connectors resemble those of other competitive manufacturers and will intermate with most. The wide range of options in the WIN-COM series give the design engineer greater freedom and more solutions to the design problem.

Dielectric Material: General purpose Nylon, usable to +105° C. Standard color is natural white. Other colors available at extra cost. **Contacts:** Type 56, .062″ dia.; Type 59, .093″ dia. Tin plate on brass. Also available as gold plated phosphor bronze or gold plated CA-725 alloy. **Current Rating:** Type 56, 5 amps per circuit for 1 to 15 circuits, 4 amps per circuit for 24 to 36 circuits; Type 59, 12 amps per circuit for 1 to 3 circuits, 9 amps per circuit for 4 to 9 circuits, 7.5 amps per circuit for 21 to 15 circuits. **Voltage Rating:** 250 volts max. **Full Specifications and Pricing Information on Request.**

1/4 x 1-1/4 inch FUSES

VISUAL INDICATING FUSES

For use with HLD fuseholder. Bright red dot on indicating pin extends from end of fuse when fuse is open even after power is off. Rated 125 V or less, carries 110%, opens at 135% in 1 hour or less. Only ¼″ x 1¼″.

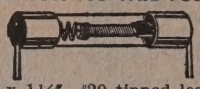
Buss No.	Amperes	Net Price For Five	100
GBA	¾	$4.15	$69.00
GBA	1, 1½, 2, 3, 4, 5	3.00	50.00

Fiber tube with silver plated indicating pin which extends when fuse is blown. May be used to actuate a signal when used in HKA fuseholder or Signal Fuse Block. Dual tube construction in sizes larger than 5 amps (cannot be used in HKA fuseholder). Voltage, 125 volts, except 8 amp and over which are 32 volts. Size, ¼″ x 1¼″.

GLD	¾	$3.65	$61.00
	1, 1½, 2, 3, 4, 5	2.80	47.00
	6, 8, 10, 12, 15, 20	4.00	67.00

1/4 x 1-1/4 inch FUSES

FUSETRON PIG-TAIL FUSES



Body ¼″ x 1¼″, #20 tinned leads, 1¼″; 1/100 to 2-8/10 same as MDL type; 3 to 7 amps same as MDX type. UL Recognized.

Buss No.	Amperes	Volts	Net Price For Five	100
MDV	1/100, 1/32	250	$3.00	$50.00
MDV	⅛, 1/10, ⅛, 15/100, 175/1000, 3/16, 2/10, ¼, 3/10, ⅜, 4/10, ½, 6/10, ¾, 8/10, 1	250	2.35	39.00
MDV	1¼, 1½, 1-6/10, 1-8/10, 2, 2¼	125	2.25	38.00
MDV	2½, 2-8/10, 3, 3-2/10, 4, 5, 6¼, 7	125	1.90	32.00

PIG-TAIL FUSES

Glass tube ¼″ x 1¼″ with 1¼″ leads of #20 tinned wire. Carry 110%, open 135% in 1 hour. 250 V. UL Recognized.

Buss No.	Amperes	Net Price For Five	100
GJV	1/32	$2.35	$39.00
GJV	⅛	2.35	39.00
GJV	¼, 3/10, ⅜, ½, ¾	1.50	25.00
GJV	1, 1½, 1¾, 2, 3	1.15	19.00
GJV	4, 5, 6, 7	1.20	20.00

1/4 x 1-1/4 inch FUSES

FUSETRON GLASS TUBE FUSES

Dual-element slow-blowing type, ¼″ x 1¼″. Fuse link operates only on very high overloads or short-circuits; thermal cutout functions on low overloads (cannot operate quickly on any load, thus providing long time-lag). Carry 110%, open at 135% in 1 hour. MDL 1/100 to 2-8/10 amp and MDX 3 to 7 amp sizes, UL Recognized. MDL type has longer time-lag than MDX type.

Buss No.	Amperes	Volts	Net Price For Five	100
MDL	1/100, 1/32	250	$2.50	$42.00
MDL	⅛, 1/10, ⅛, 15/100, 175/1000, 3/16, 2/10, ¼, 3/10, ⅜, 4/10, ½, 6/10, 7/10, ¾, 8/10, 1	250	1.90	32.00

OTHER STANDARD AND SPECIAL FUSES, BLOCKS AND HOLDERS

If the fuses, fuse blocks and holders shown do not fit your requirements ask for information on other types. Fuses and fuse mountings to meet JAN and Military specifications also available. If you have a special problem in protection, send description or sketch giving number of circuits, type of fuse, terminals, etc., desired. We welcome such inquiries.

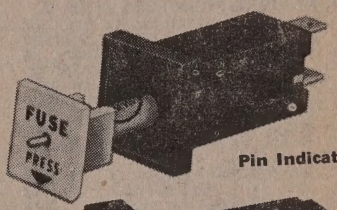
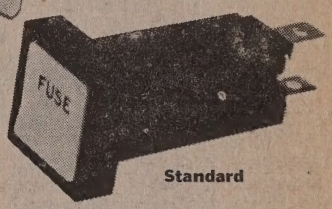
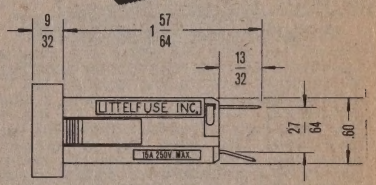
LOW PROFILE FUSE HOLDERS



Pin Indicating



Standard



Low profile fuseholders ideal for front or rear panel installation on computers, photocopying and business equipment, aircraft and marine equipment. No mounting hardware required, snap-on the terminals and snap-in the holder. Available for 3AG standard or pin indicating fuses. Molded phenolic resin body with high temperature thermo-plastic color-coded caps. Quick-connect solder type terminals are one piece brass electrotin plated; available in two widths. Dielectric withstanding voltage between terminals and terminals to ground at room temperature and 90% R.H. exceeds 1500 volts. Withstands 10–55 Hz at 0.06" double amplitude vibrations; withstands 50G for 11 millisec vibration. Rated 15 amps at any voltage to 250 volts. Mounts in 0.625" sq. hole 1/32"—1/8" thick chassis panel. UL Recognized.

MALLORY Duracell® Batteries

MERCURY DURACELL BATTERIES

Mercury Duracell batteries offer more power per unit of volume than any other type. Sizes range from the RM312, which is aspirin tablet size, up thru the Power-Pak types. Voltage stability is excellent, as is storage life. Types with **R** in the suffix are rated at 1.35 volts per cell; all others rated 1.4 V. All have flat terminals unless otherwise noted. Types with suffix **T** have solder tab on negative terminal; suffix **T2**, solder tabs on both terminals.

*Standard package, weight, 8 oz.; all others 4 oz.

SHIELDED TEFLON CABLES MIL-W-16878D, UL STYLES 1212, 1213

Each conductor stranded silver-plated copper. Type E, .010" extruded Teflon insulation per MIL-W-16878D. Rated 600 volts. A silver-plated copper shield is braided over the conductor(s) for 90% coverage. Outer Cover column in table below lists Shield for no outer insulation; Fused for a braided, white, fused-Teflon-impregnated, fiberglass braid over the shield; or Taped for a sintered, wrapped, white Teflon tape jacket over the shield; Temp., −65° C to +200° C. Conductor color code: 1=White, 2=Black, 3=Red, 4=Green, 5=Yellow, 6=Blue, 7=Brown, 8=Orange, 9=Slate, 10=Violet, 11=White/Black, 12=White/Brown, 13=White/Red, 14=White/Orange, 15=White/Yellow.

SPECIFICATION MIL-W-16878D HOOK-UP WIRE

RX-7000 IRRADIATED-HEAT RESISTANT HOOK-UP WIRE (FIG. A)

Newly developed hook-up wire with insulation made of irradiated polyvinylchloride compound (PVC) provides insulation far superior to ordinary PVC. Withstands higher temperature, and even in direct contact with a soldering iron will not shrink back, melt, blow or deform. Ideal where high reliability is essential, particularly in the wiring of tight, high density systems, appliances, computer wiring, business machines, instrumentation and control systems. Rated 600 volts, Type B; 1000 volts, Type C. Temperature, +105° C.

MIL-W-16878/D TYPE B STRANDED, +105° C, 600 VOLTS

*Fig. A.

UNJACKETED SHIELDED CABLE (MIL-C-7078A TYPE 1) BASE WIRE MIL-W-5086A TYPE 1 (FIG. C)

Each conductor stranded tinned copper, color coded polyvinylchloride insulation. Clear nylon jacket on each conductor, cabled, braided tinned copper shield overall. 85% coverage per Type 1 MIL-5086A, Type 1 MIL-C-7078A. Temp. rating, −55° C to +105° C. Voltage rating, 600 volts. Resists effects of water, oil, aircraft fuels, hydraulic fluid, skydral, ethyleneglycol, alcohol, dilute acids, alkalis, fungus and abrasion.

RX-7000 IRRADIATED-HEAT RESISTANT HOOK-UP WIRE MIL-W-16878D UL STYLES 1430, 1429, 1472 (FIG. A)

Newly developed hook-up wire with insulation made of irradiated polyvinylchloride compound (PVC) provides insulation far superior to ordinary PVC. Withstands higher temperature, and even in direct contact with a soldering iron will not shrink back, melt, blow or deform. Ideal where high reliability is essential, particularly in the wiring of tight, high density systems, appliances, computer wiring, business machines, instrumentation and control systems. Rated 300 volts.

KYNAR® WIRE, 125° C, 300 VOLTS FOR WIRE WRAP CONNECTIONS (FIG. A)

Solid, silver-plated, oxygen-free high conductivity (OFHC) copper conductor, extruded Kynar (Polyvinylidene fluoride) insulation. Extremely tough, high cut-through resistance. Self-extinguishing, will not support combustion. Excellent ultra-violet and weathering resistance. Used in automatic wire wrapping equipment in computer and related industries. Temp. rating, through 125° C continuous (UL rated at 105° C). Voltage rating, 300 V. Nominal wall thickness, .005″. Cut lengths available, write or phone for information.

SHIELDED AUDIO AND DATA CABLE WITH PLASTIC JACKET (FIG. B)

Tinned-copper conductors with color-coded polyethylene insulation, twisted into pairs. Tinned-copper 22-gauge drain wire with Mylar®-supported aluminum foil shield, aluminum facing inward. Chrome gray PVC jacket overall. Capacitance: Between cond. of a pair, 25 pF/ft; single cond. to shield, 45 pF/ft. For audio, RF and pulse applications requiring superior circuit isolation. **Conductors' Color Code:** Combinations 1 thru 27 per Color Code Table Two**.

UNSHIELDED AUDIO CABLE (FIG. C) MULTI-CONDUCTOR, PLASTIC JACKET

#22 GAUGE

For unbalanced intercom systems, low voltage relay control cable, PA systems, signal systems, electronic computors. Each conductor suitable for outdoor use. 22 AWG stranded tinned copper; color-coded polyvinylchloride insulation; conductors twisted; gray PVC jacket overall. Rated 200 volts. Temp., −20° C to +80° C. **Conductors' Color Code:** 1 thru 60 per Color Code Table One*. Also available in multi-conductor combination gauges. Write or phone for information and prices.

SHIELDED MICROPHONE CABLE

STANDARD DUTY, PLASTIC JACKET (FIG. A)

Nos. 1702-1706: Single stranded tinned copper conductor with white polyethylene insulation; braided or spiral-wrapped tinned copper shield and gray PVC jacket overall. For all high impedance mikes or for hi-fi interconnection. **Nos. 1709-1712:** Each conductor stranded tinned copper with color-coded (1 = White, 2 = Black) polyethylene insulation, cabled with fillers, textile wrap, braided or spiral-wrapped tinned copper shield and gray polyvinylchloride jacket overall. For all low impedance mikes. Temp., −20° C to +80° C. Rated 1000 volts except 1703, 3500 volts; 1704, 5000 volts; 1706, 4000 volts; 1712, 600 volts.

*Nom. capacitance between one conductor and remaining ones connected to shield. †Three strands tinned copper; 4 strands tinned Copperweld®. ‡Spiral-wrapped shield; all others braided. §Mylar® wrap under tinned copper shield. #Neoprene jacket; all others rubber. ▲UL Style 1150.

UNSHIELDED CONTROL & AUDIO CABLE, INNER CONDUCTORS—600 VOLTS, 80° C (FIG. C)

Each conductor, stranded tinned copper, color coded PVC insulation with Mylar wrap, chrome gray PVC jacket overall. Working voltage, 600 volts. Temp. rating, −20° C to +80° C. Inner conductors meet UL Style 1011. Used as industrial control cable for telemetry and automatic control; communications and signaling.

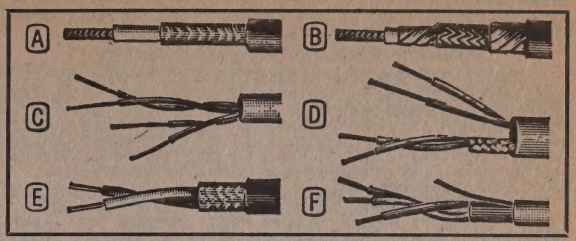
*Polypropylene insulation, aluminum-Mylar foil shield, solid tinned copper drain for grounding; all others PVC, braided shield. †Oval, .285″ x .180″. ‡Oval, .200″ x .300″. §Oval, .180″ x .315″. #2 pairs, both shielded.



BRAIDED SHIELDED JACKETED CABLE (FIG. E)

Tinned copper, stranded or solid conductor with color-coded polyvinylchloride insulation. Conductors twisted with braided copper shield and gray polyvinylchloride jacket overall. Shield permits pigtail soldering. Strong and flexible for PA, sound, studio, amateur and similar applications. Shield coverage, 75%. Jacket .016″ thick, nom. Temp., −20° C to +80° C. **Conductors' Color Code:** 1 = Black; 2 = Red; 3 = White; 4 = Green.

All cables on this page (except unshielded control cable) available with other jacket colors: data and prices on request.

MINIATURE FOIL SHIELDED CABLE TWO 22 GAUGE CONDUCTORS (FIG. A)

Each conductor tinned solid or stranded copper, color coded polypropylene insulation, aluminum/Mylar* foil shield, drain wire, gray vinyl jacket overall. Designed for space-saving in miniature and sub-miniature instrumentation and audio applications. Temp. rating, −55° C to +105° C. Voltage rating, 200 volts. Nominal wall thickness, .008". **Color Code of Conductors:** Black, red.
*Reg. DuPont trademark.

PLASTIC SPEAKER CABLE COLORED AND CLEAR INSULATION (FIG. C)

Conductors parallel, stranded bare copper, color coded polyvinylchloride insulation, conductors separate easily when slit apart. Designed for hi-fi speaker cable, miniature juke box speaker connection and rear auto speaker extension cable. Clear insulation will blend with interior room decor. Temp. rating, −20° C to +60° C. **Stock Colors:** Alpha No. **1944,** brown, black, white, gray, tan. **1945,** clear. **1948,** gray. **1949,** gray, clear. **1977,** brown, black, white, gray, clear. **1979,** clear.

TELEPHONE STATION CABLE 22-GAUGE SOLID CONDUCTOR (FIG. D)

Solid, annealed 22-gauge bare copper conductor, color coded polyethylene insulation, conductors cabled with PVC jacket overall. Jacket designed to resist weathering and abrasion. For use in telephone and intercom installation. May be used in building duct or outside installations. Cable may be easily installed to baseboards or walls with staple gun or clamps. Beige jacket. Insulation .015" thk.

HEADSET CABLE FOR LANGUAGE LABS (FIG. E)

Conductors consist of combination tinned copper and Copperweld* strands, color coded, polyethylene insulation. Spiral wrapped, tinned copper shield. Chrome gray vinyl jacket. Flat configuration. Extra sturdy, steel reinforced conductor and polyethylene jacket resists pulling and abrasion. Designed for two channel stereo application in audio-visual education, language laboratories, etc. Conductor colors, red and clear. Insulation thickness, .017". Jacket thickness, .020". *Reg. Copperweld Steel Corp.

LOW CAPACITANCE SHIELDED MICROPHONE CABLE, UL STYLE 1354 (FIG. G)

Single conductor, stranded tinned copper, white foam polyethylene insulation, braided tinned copper shield, chrome gray polyvinylchloride jacket. Two conductors, stranded tinned copper, color coded foam polyethylene insulation, 1 white and 1 black, cabled with fillers, textile wrap, braided tinned copper shield, chrome gray polyvinylchloride jacket. Temp. rating, −20° C to +80° C. Low loss foam polyethylene provides lower capacitance and attenuation increasing effective length of usable cable without loss of signal. Nominal jacket thickness, .030". **Color Code of Conductors:** 1, white; 2, black.

UNSHIELDED CONTROL CABLE (FIG. H)

Heavy-duty multi-conductor cable with rugged neoprene jacket. Each conductor stranded bare copper, color coded rubber insulation, cabled with fillers where necessary, wrap over conductors. Used for remote control of automatic electrical equipment and sub-stations, telemetering, voltage pressure and motor control, signal transmission. Also for outside installation. Resists oil, ozone, sunlight, moisture abrasion and impact. Voltage rating, 600 volts.

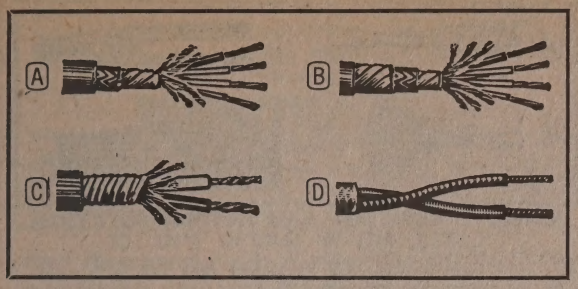
*Standard spool put-up cut to specific lengths. All orders non-cancellable. **Color-Code:** Neoprene jacketed control cables conforms to IPCEA standards. (See another Alpha Wire page for color code.) •Available in 500′ spools; prices on request.



MULTI-CONDUCTOR CONTROL CABLE

•Spool of 500′ also available; prices on request.

SHIELDED GENERAL PURPOSE PLASTIC JACKET (FIG. A)

Each conductor, stranded tinned copper with color-coded polyethylene insulation .014″ thick, cabled with fillers where necessary; rayon wrap; braided, tinned copper shield; chrome gray polyvinylchloride jacket overall. Rated 600 volts. Temp., −20° C to +80° C. **Conductors' Color Code:** 1 thru 20, per color code table* below.

TEFLON FEP EXTRUDED JACKET OVER SHIELD MIL-W-16878D, UL STYLE 1212, 1213 (FIG. D)

Each conductor stranded silver plated copper, Type E extruded TFE insulation color coded, cabled, braided silver plated copper shield 90% coverage, extruded FEP white Teflon jacket overall. Temp. rating, −65° C to +200° C. Voltage rating, 600 volts. Resists acids, alkalis, oil, flame, moisture, solvents and fungus. Nominal wall thickness, .010″; jacket thickness, .010″. **Conductors' Color Code:** 1 = White; 2 = Black; 3 = Red.

SPIRAL WRAP TUBING

The SW Series tubing simplifies wire harnessing, cabling, and bundling work. The tubing clings tightly to the wire or cable being bundled, yet is flexible and simple to apply. Available in: polyethylene, meeting MIL-I-631D; flame-resistant polyethylene, meeting MIL-E-500F; nylon, meeting MIL-M-20693A; Teflon, meeting MIL-I-22129C; and ultraviolet-resistant polyethylene for use outdoors.

IRRADIATED CONDUCTOR CABLE, 600 VOLTS, 105° C, MIL-W-16878D/B, UL 1429 (FIG. B)

Miniature shielded cable with both military specifications and UL listings. Ideal for application on crowded circuit boards where terminals must be soldered. Prevents shrinkback, melting or charring when used in production line soldering. Stranded tinned copper conductors, color coded, irradiated PVC (RX-7000) insulation (braided, tinned copper shield) white PVC jacket overall. Nom. jacket thickness, .025". Nom. insul. thickness, .010". **Conductors' Color Code:** 1 = White; 2 = Black; 3 = Red; 4 = Green.

SHIELDED CONTROL AND INSTRUMENTATION CABLE, MIL-W-16878D (FIG. C)

Used as interconnecting cables for electronic equipment, instrumentation and control cable, telemetry data, remote control of sensitive recording instruments. Each conductor stranded tinned copper, color coded, polyvinylchloride insulation, cabled, Mylar® wrap. Braided tinned copper shield 90% coverage, chrome gray polyvinylchloride jacket overall. Temp. rating, −55° C to +105° C. Resists acids, alkalis, oil, flame, moisture, solvents and fungus.

COMPUTER CABLE

COAXIAL—UL STYLE 2386 (FIG. D)

Used for interconnection of modules and data transmission. Individual miniature coax cables, grouped together under common overall shield and jacket. Individual cables of #26 AWG solid silver-plated copper conductor, air-spaced, flame-retardant polyethylene dielectric spiral-wrapped 29 AWG tinned copper drain wire, braided tinned copper shield, overall .016" PVC jacket. Nominal dia., .155". Completed cable constructed of miniature coaxial cables cabled with PVC fillers, clear Mylar wrap, overall gray PVC jacket. Shielded cables have braided tinned copper shields with spirally wrapped #26 AWG solid copper alloy drain wires. Nominal impedance, 95 ohms. Attenuation at 400 MHz max., 10.2 dB/100 ft. Velocity propogation, 83%. Voltage, 750 V, max.

20/10 PVC NYLON UNSHIELDED STATION CONTROL CABLE

Heavy-duty, multi-conductor cable with plastic jacket. Used for remote control of automatic electrical equipment, recording and relaying devices, telemetering, temperature voltage pressure and motor control, etc. Each conductor stranded bare copper, .020" polyethylene insulation on 14 and 12 gauge cable; .015" on 16 gauge cable. .010" polyvinylchloride jacket over each conductor. Moisture resistant tape, black polyvinylchloride jacket overall. Rated 600 volts. Cable cut to specific lengths, minimum 25 ft. All orders are non-cancellable. **Color Code:** Conforms to IPCEA standards either with full color code or surface printed with color name and number.

15/5 PVC NYLON CONTROL CABLE 600 VOLTS, 90° C

Widely used for all types of control and signal circuits. Bare stranded copper conductor, .015" PVC insulation. .005" nylon jacket over each conductor. Has moisture resistant tape, black PVC jacket overall. Suitable for underground burial. Conductors color coded per IPCEA standards. See color code, below. Meets UL, ASTM, IPCEA S-61-402. Available cut to customer's length requirement. Minimum order 25 ft. per item. Orders are non-cancellable.

POLYETHYLENE DIELECTRIC RG/U COAXIAL CABLES

Manufactured in accordance with the latest military specification MIL-C-17. Factory tested to assure physical and electrical performance. Production runs are subjected to electrical property tests to determine capacitance, impedance and attenuation. Further tests are made for corona extinction and physical properties. Dielectrics and insulating jackets are subjected to aging and flow tests in a special forced-draft oven; plus, exposure to extreme low temperatures in sub-zero environmental chamber to determine cold-bend properties. All have solid polyethylene dielectric (VP, 65.9%) except as noted. Dimensions shown are max.

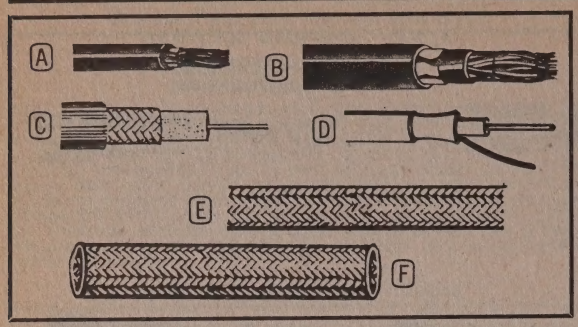
Jackets: BP, black polyethylene, Type IIIA; FEP, extruded FEP Teflon; NCV, non-contaminating polyvinylchloride, Type IIA; NP, natural polyethylene, Type III; NY, nylon; PE, solid polyethylene; TFE, fused TFE Teflon tape; V, polyvinylchloride, Type I. ‡Armor .475″ O.D. alum. wire. §Armor .945″ O.D. alum. wire. *Dielectric is SPP (semi-solid polyethylene), 84% VP. ®Reg. TM's: Teflon of DuPont; Copperweld of Copperweld Steel Corp. ♦Available in 1000-ft. put-ups with max. of 3 lengths per put-up, where continuous lengths are not necessary; to order, add prefix **L** (e.g., **L**9608A) and **deduct 10% from 1000′ put-up price shown.**



TELEMETERING AND SUPERVISORY SHIELDED CONTROL CABLE (FIG. A)

Used for remote control of rocket recording data and test-firing control, transmission of signals which telemeter temperature, voltage pressure, etc., control of multiple circuits, measuring devices, quality control equipment, radar antenna. For aerial, duct and conduit installations. Double jacketed types have higher dielectric strength, suited for direct burial installations. Each conductor bare solid copper. High molecular weight polyethylene insulation. Color coded, twisted into pairs, cabled with a non-hygroscopic binder tape .008" aluminum shield, black polyethylene jacket overall. Voltage rating, 300 V. Double jacketed types have additional inner black polyethylene jacket over binder, and .005" copper shield. **Standard Put-up:** Cut to specification, minimum, 25 ft. Orders non-cancellable. **Color Code:** Fully color coded in accordance with REA standards.

MICRO-MINIATURE COAXIAL CABLE— 50, 75, 100 OHM IMPEDANCES (FIG. D)

For computer instrumentation and ultra-compact wiring. Extremely small and flexible coax has high cut-through resistance. Provides uniform characteristic impedance, low losses and low propagation delays. Crosstalk kept to minimum. Center conductor, solid silver-plated copper with 40 micro-inch minimum plating. Aluminized Mylar® shield, 30 AWG. Solid silver-plated copper drain wire, parallel to center conductor. Flame-retardant, blue-colored jacket overall.

BRAIDING

TINNED COPPER FLAT BRAID (FIG. E) TO MIL SPEC QQ-W-343/5, ASTM-B-33

For shielding insulated wire and cable, bonding and ground straps. For applications requiring extreme flexibility (pigtails, component leads, connecting moving parts, etc). Very fine, soft annealed tinned copper wires, braided and rolled flat. Strand size, 36, except Nos. 1239 thru 1242/4 which are 30 AWG. Also available in spool of 500' except: 1240-1242/4; prices on request.

TINNED COPPER OVAL BRAID (FIG. F)

Woven, tinned copper braid manufactured to a specific inside diameter but, due to its extreme flexibility, cannot maintain its completely round shape and becomes oval. Used as an electrostatic shield to cover a conductor, a series of conductors, cable etc. Specifically constructed and left in its tubular or oval form so that it can easily be slipped over wire, cable, or other components for which shielding is required. Each strand 34 AWG.

TINNED COPPER TUBULAR BRAID (FIG. F) TO MIL SPEC QQ-B-575

Maximum shielding against electrostatic interference for wires, cables, etc. Woven, tinned copper braid fully round per MIL Spec QQ-B-575. Each strand is soft, drawn, tinned copper wire, 36 AWG except as noted. Self-supporting to maintain the round shape. Shielding coverage 95%.

LOW LEAKAGE MEDICAL SAFETY CABLE UL TYPE SJT

Specially designed low leakage power cable reduces danger of electrical shock in medical and dental applications. Utilizes special low dielectric constant fillers and core for wider conductor spacing. Each conductor stranded and annealed copper. Insulation color coded FEP Teflon®. Paper tape wrap over core with red PVC jacket overall. Maximum leakage, 10 ft. length at 120 V is 6 μA to green, 16 μA through jacket. Three conductor, black, white, green. Nominal insulation thickness, .031″; jacket thickness, .050″.

NEOPRENE WELDING CABLE

Lightweight, flexible cables with high resistance to abrasion, impact, flexing and twisting. Stranded bare copper conductor, tape wrap, black Neoprene® rubber insulation. Sizes of cable recommended by NEMA Electric Welding Section for standard hand welding equipment based on lengths up to 90 ft. (i.e., 45 ft. of welding cable and 45 ft. of return cable): 100 A welder, 4 AWG; 150 A welder, 3 AWG; 200 A welder, 2 AWG; 300 A welder, 1/0 AWG; 400 A welder, 2/0 AWG; 500 A welder, 2/0 AWG; 600 A welder, 3/0 AWG.

RETRACTILE COIL CORDS; LAMP, REPLACEMENT & EXTENSION CORDS

ALPHA WIRE

RETRACTILE COIL POWER CORDS

Neoprene jacket. Long extension. UL Approved.

RETRACTED LENGTHS 2 AND 4 FEET

Quality multi-conductor has stranded tinned copper conductors, rubber insulation and weather-resistant neoprene jacket, overall. Retracted length 2 ft. has extended length 12 ft.; retracted length 4 ft. has extended length 25 ft. Temp., −20° C to +60° C. **Conductors' Color Code:** 1 = Black; 2 = White; 3 = Green; 4 = Red.

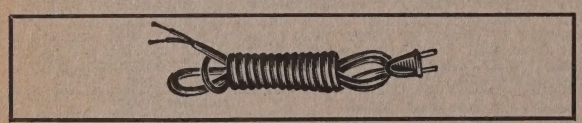
REPLACEMENT CORD SETS



Types SV and SVT for small tools, business machines and light duty equipment. Types SJ and SJT for heavier duty tools, electric saws, small motors, grinders, saws and sanders. Conductor bare copper, vinyl or rubber color coded insulation, cotton fillers, rubber or vinyl jacket overall. One end fitted with molded two or three conductor male plug; other end jacket stripped back 1½″ with 5/8″ bare conductors exposed. Available in individual boxes or coiled and tied in bulk packages. Prices for bulk packages of 10 or 25 available on request.

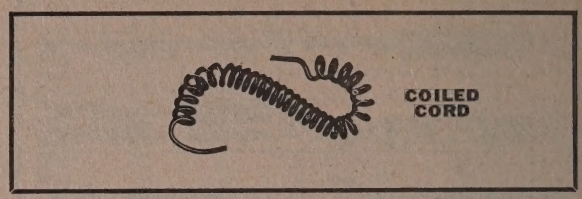
RETRACTILE COIL COMMUNICATION CORDS

Neoprene jacket. Long extension.



RETRACTED LENGTHS 2 AND 4 FEET

Multi-conductor with extra flexible, tinned, soft cadmium copper with high flex life. Rated 1 amp, 120 volts. Units 2 ft. retracted are 12 ft. extended; 4 ft. retracted, 25 ft. extended. Some types (see table) have cadmium copper shield over individual conductors (rated 75 volts); shield can be pigtailed for direct solder connection. **Conductors' Color Code:** 1 = Black; 2 = White; 3 = Red; 4 = Green; 5 = Blue; 6 = Yellow; 7 = Brown.

MINIATURE COMMUNICATION COIL CORDS

Small diameter plastic cord with stranded tinned copper conductors for maximum flexibility. PVC insulated and jacketed. For low voltage power and communication equipment with space and weight limitations. Rated ½ amp, 100 volts. Retracted length, 2 ft.; extends approx. 10 ft. With 6″ straight lead on each end. **Conductors' Color Code:** 1 = Black; 2 = White; 3 = Green; 4 = Red.

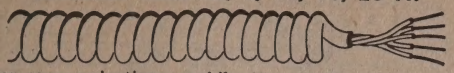
RETRACTILE CORDS, TEST LEAD WIRE, FIT® SHRINKABLE TUBING

PVC RETRACTILE COMMUNICATION CORDS

RETRACTED LENGTHS, 1, 2, 3, 4 FT.
EXTENDED LENGTHS, 6, 12, 18, 25 FT.



Ideal for communications, mobile, Ham radio equipment, headsets. Eliminates hazards and inconveniences caused by tangled straight cords. Plastic retractile coil cords are durable and long lasting. Each conductor stranded tinned copper PVC insulation and PVC jacket overall. Operating temp., −20° C to +60° C. 23 AWG conductor, 31/36 strands, 120 volts, 1 amp.

TEST LEAD WIRE

Used as test leads in analyzers, oscillators, multi-meters and test apparatus where extra flexible insulated wire is required. Heavy duty type designed for television, therapeutic equipment, analyzers, oscillators, etc. Single conductor, extra flexible stranded tinned soft annealed copper, separator, color coded rubber insulation. Smooth satin finish. Operating temp., −20° C to +60° C. Conductor size for **Numbers 1632** and **1633** is 20, balance, 18. Stock colors black and red, except **No. 1639**, black, red, green.

RETRACTILE TEST LEAD WIRE

RETRACTED LENGTH 12″, EXTENDED LENGTH 6 FT.

High grade quality rubber insulation for maximum flex life extruded over a single conductor of extra flexible tinned copper which gives long life. Available in 12″ retracted length with 6″ straight lead on each end. Cord extends to 6 feet. Black or red. Rated 5,000 volts.

Alpha No.	Conductor Size	Conductor Strand	Ampere Rating	Nominal Coil O.D.	Nominal Cord O.D.	Net/ Foot
650	20	41/36	4	¾″	.165″	$2.36

MEASURING AND COILING MACHINE

Easy to use, hand operated machine for measuring and dispensing small coils of wire from larger spools or coils. Consists of heavy duty measuring unit with capacity to 10,000 feet. Digital register accurately indicates feet and inches. Measuring unit has spring-loaded rollers that set for proper tension by adjusting control knob. Capacity up to one inch O.D. wire and cable. Wire winder has adjustable arms. Dispensing reel holds all diameters of spools, reels or coils.

Alpha No. WMD-1—Net Each..... **$356.71**

CABLE CLAMPS FOR WIRE, CABLE, TUBING DURABLE, LIGHTWEIGHT, NON-ABRASIVE

ETHYL CELLULOSE CLAMPS −65° F TO +175° F

All-purpose clamp has excellent corrosion, moisture and shock resistant properties. Specially treated with ultra-violet inhibitor compound for long lasting outdoor as well as inside applications.

NYLON CLAMPS −60° F TO +175° F MIL-C-21565 (NAS), MIL-P-17091-B, MIL-P-20693, MIL-STD-24E

For high temperature applications, or for surfaces subject to vibration or mechanical stress. Inside surfaces are smooth with rounded edges to prevent jacket chafing and damage. Clamp thickness, NCL-⅛ and NCL-½, .050″; balance, .060″. Clamp width, NCL-⅛ and NCL-½, ⅜″; balance, ½″. Distance from clamp edge to mounting center, 7/32″.

FIT-400 FEP. TEFLON* HEAT SHRINKABLE TUBING

Requires less heat. Operating temperature, 400° C. Shrinkage ratio, 2:1 (50% shrinkage). Designed for use with heat-sensitive components, solid state devices, solder joints, FEP tubing is applied as a natural, transparent tubing and requires heat of 200° F to 350° F to shrink. Stock color, natural.

—WHAT IS ALPHA FIT TUBING?—
See next page for description of this method of insulating and jacketing wire and cable.

FIT-105 POLYVINYLCHLORIDE TUBING

Extra-flexible tubing, ideal for cable jackets. Conforms to MIL-I-23053/2. High flexibility, strength and 50% shrinkage make it suitable for insulating components and cables with wide shape and size variations. **Shrinkage Temp.:** Approx. 347° F (175° C). **Operating Temp.:** 105° C, continuous. **Tensile Strength:** 1800 psi, min. **Elongation:** 200% ultimate min. **Low Temp. Flexibility:** −20° F. **Dielectric Strength:** 750 V/mil, minimum. **Longitudinal Shrinkage:** 10%. **Environment Resistance:** Inert to fungus; excellent resistance to fuel, oil, hydraulic fluid, solvents, acids and alkalis. Self-extinguishing to flame; non-corrosive. Poor resistance to soldering irons. **Standard Put-Up:** Continuous lengths and 6″ lengths. **Color:** Black.

FIT-221 IRRADIATED POLYOLEFIN TUBING

Simple-to-use, all-purpose extruded tubing gives tight mechanical bond with thermal stability. Controlled shrinkage to correct predetermined size occurs in 7 seconds at 275° to 300° F, beginning at a slower rate at 235° F. Shrinks 50% (2:1 ratio) with only 5% maximum longitudinal shrinkage. Will not cold-flow or melt, but retains form stability throughout its temperature range. Clear tubing remains transparent over its full operating range, −67° F to 275° F. Though high temperature, material is flammable; will not burn, however, when shrunk over flame-resistant on non-flammable components. **Operating Temperature:** −55° C to +135° C continuous. **Tensile Strength:** 2000 psi min. **Elongation:** 200% min., ultimate. **Dielectric Strength:** 500 volts/mil, min. **Dielectric Constant:** 2.9 max. **Environment Resistance:** Will not support fungus. Non-corrosive. Max water absorption, 0.6%. Excellent resistance to fuel, oil, acids, alkalis and solvents. (Tested to Bell Labs tests.) **Colors:** Specify clear, black, white, red, yellow or blue when ordering.

—WHAT IS ALPHA FIT TUBING?—

This concept in insulating and jacketing saves time and money and insures a better job. The user simply fits an expanded piece of FIT Tubing over the wire, cable, component or termination to be insulated, then uses heat to shrink it down to form a permanent, form-fitting seal. This expanded FIT Tubing eliminates forcing, covers irregular shapes and forms a skin-tight band. The irradiation process improves the properties of polymer tubing: Irradiated, cross-linked polymers will not flow at elevated temperatures; they are more resistant to chemical action; they are completely stress-crack resistant; longitudinal shrinkage is controlled and never exceeds 10%.

FIT-295 POLYOLEFIN SEMI-RIGID TUBING

Maximum strength at stress points; extremely strong, abrasion-resistant extruded tubing with heavy wall; good stability. Shrinkage 2:1 (50%) gives wide versatility. High temperature capability, though inflammable. **Shrinkage Temp.:** Approx. 275° F (135° C). **Operating Temp.:** 135° C, continuous. **Tensile Strength:** 2500 PSI, min. **Elongation:** 200% ultimate min. **Low Temp. Flexibility:** −67° F. **Dielectric Strength:** 500 V/mil, min. **Dielectric Constant:** 2.7. **Volume Resistance:** 10^{16} ohm/cm. **Environment Resistance:** Inert to fungus. Excellent resistance to fuel, oil, hydraulic fluid, solvents, acids and alkalis. Non-corrosive. Excellent resistance to soldering irons. No cracks or splits with heat aging 175° C (347° F) for 168 hours. **Standard Put-Up:** 4 ft. (prices given are per 100′) and 6″ lengths. **Colors:** Available in clear (specify) or color as indicated in table below.

FIT-300 IRRADIATED POLYOLEFIN TUBING

OUTER WALL SHRINKS . . . INNER WALL MELTS

Surface irradiated tubing has been developed to answer the need for easy-to-use, permanent encapsulation and jacketing material. Because only the outer wall of this tubing is irradiated, when heat is applied, only this outer wall shrinks. The inner wall, instead of shrinking, melts and the viscous plastic released by the heat, encapsulates the wire or component placed in the tubing. The pressure created by the outer wall shrinkage forces the melted plastic into every orifice, eliminating voids and resulting, when cooled, in a solid, homogenous molding. Alpha HG-1 hot air gun is recommended for heating tubing. However, excellent results may be achieved by use of an oven, hot liquids, soldering iron or even the flame of a match. **Shrinking and Melting Temperature:** 275° F (135° C). **Operating Temperature:** −55° C to +110° C. **Tensile Strength:** 2000 psi. **Elongation:** 400%. **Dielectric Strength:** 1100 V/mil. **Volume Resistance:** 10^{16} ohm/cm.

FIT-500 SHRINKABLE TEFLON TUBING

FIT-500 shrinkable tubing forms a tight, flexible protective covering for wires and electronic components; it is recommended for use as a mechanical shield and for friction-proofing. Resists chemical and corrosive agents; is non-burning, non-corrosive. Electrical characteristics remain stable throughout electrical range. It shrinks to approximately 65% of its supplied dia. at a temperature of 327° C; longitudinal shrinkage is less than 10%. **Operating Temperature:** −67° C to +250° C.

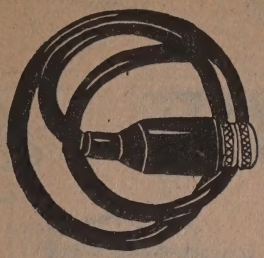
FIT® TUBING ACCESSORIES, CAPS AND SOLDERING SLEEVES

FIT-600 NEOPRENE EXTRA FLEXIBLE-RUGGED IRRADIATED HEAT SHRINKABLE TUBING



MEETS MIL-R-46846A/1, MIL-1-23053/B/1, AMS-3623

Highly flexible, abrasion resistant heavy wall neoprene tubing ideal for fabrication in house short-run cables and harnesses. Widely used in prototype and repair work. At applied heat of 175° C, FIT-600 shrinks to approximately half its supplied diameter. Longitudinal shrinkage is less than 10%. Has good dielectric strength, excellent chemical and solvent resistance. Dielectric strength, 300 volts/mil. Flammability, self-extinguishing in 5 sec. Elongation, 250%.

FIT-700 ADHESIVE LINED POLYOLEFIN CABLE AND CONNECTOR SLEEVES

Designed to protect cables used in overhead or underground installations from moisture penetration, corrosion and electrical breakdown. Sleeves are made of irradiated polyolefin tubing with an inner pre-coat of moisture resistant mastic for splice and connector protection on electrical, telephone, CATV cable. When heated to 275° F, tubing shrinks down and mastic flows to totally encapsulate wire splice or connector and cable insulation. Available in standard wall sleeves for use in general applications where wall thickness up to 600 volt cable is required, and in heavy wall sleeves for applications where extra mechanical protection or minimum wall thickness is needed, or where underground specifications must be met. Tough crystaline seal withstands external pressures to 100 psi. Operating temp., −40° C to +135° C. Dielectric strength, 300 volts/mil. Tensile strength, 2400 psi ASTM-D 2671. Black only.

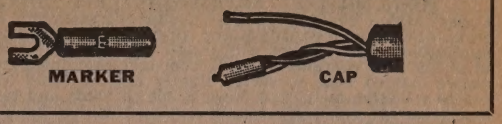
FIT-MARKERS AND FIT-CAPS



FIT-MARKERS—SHRINKABLE WIRE MARKERS

Pre-printed lengths of flexible black polyolefin tubing for permanent wire and cable identification. Printed in white type by hot stamping foil process; assures permanence even when subjected to a high degree of abrasion or certain chemical solvents. For numerical markers (two each 1–50) add suffix **NS** (example, MRK-B-**NS**); for alphabetical markers (4 each A–Z) add suffix **LS** (example, MRK-B-**LS**) to numbers below.

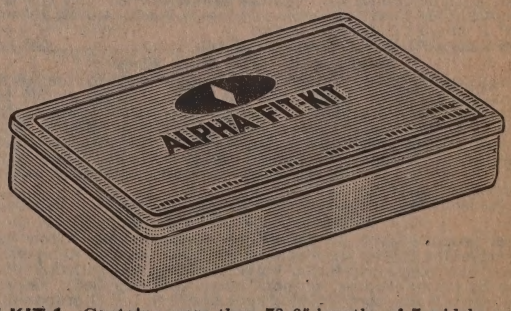
FIT-KITS—IDEAL R & D, OR PROTOTYPE SAMPLERS



FIT-KIT-1—Contains more than 70 6″ lengths of 7 widely used types of FIT Tubing in a variety of colors. Compartmented clear plastic box allows easy storage and quick identification. Includes lengths of FIT-105, FIT-221, FIT-295, FIT-300, FIT-350, FIT CAPS AND FIT MARKERS. Size, 11″ w. x 6½″ d. x 2″ h. Net Each..... **$29.15**

FIT-KIT-2—Contains all items in FIT-KIT-1, plus 6″ lengths of FIT-200, FIT-400, FIT-500, FIT-600, FIT-700, and 1″ cut pieces of FIT-200 and FIT-521. Kit is complete engineering, prototype, or laboratory inventory of all Alpha FIT-Tubing. Consists of two 11″ w. x 6½″ d. x 2″ h. compartmented clear plastic boxes. Net Each..... **$52.50**

FIT-SEAL—MOISTURE-RESISTANT FEEDTHROUGH SEAL

MEETS MIL-1-81765, MIL-E-917, MIL-STD-454

Covers cables from .38″ to 2½″. Reduces installation time and costs. May be used on ship-board, aircraft, control box or cabinet applications. May be used with plastic jacketed or armored cables or piping. Seal contains a sealing boot and a retaining ring. Heat causes molded boot to shrink tightly against cable while pre-coated adhesive melts and flows to fill all voids and establish a moistureproof seal. Meets requirements established for U.S. Navy and Coast Guard vessels.

Alpha No.	Cable O.D. Range	Drilled or Punched Hole*	Net Each

FIT-SEAL-6	1.77″–2.50″	3.808″	29.17

*± .030″.

FIT-CAP-P IRRADIATED HEAT SHRINKABLE TUBING

Completely pots connections. Assures absolute electrical protection. Inexpensive method of encapsulating crimped electrical connections. When heated with heat tool, outer jacket quickly shrinks forcing meltable inner wall to flow into every irregularity of the crimp. Dielectric strength, 1100 volts/mil. Stock color, black.

FIT-BOOTS FOR D-SUBMINIATURE CONNECTORS*

Designed for subminiature rectangular connectors manufactured by ITT-CANNON, CINCH and AMPHENOL-BORG. Replace metal molds and plotting forms used on molded harnesses. Boots are molded of heat shrinkable, modified polyolefin compound. Shrinks tight over connector shells. Any Alpha heat gun may be used to shrink boots.

HEAT GUNS AND ACCESSORIES

MINIATURE FIT GUN

For shrinking all FIT tubing and FIT sleeves. Durable, electric motor driven unit delivers a high volume of air to the nozzle. Lightweight, for bench or hand use. Easily replaceable heat elements; 3-position rocker switch. Rated 7 amps, 115 VAC. Includes tubing reflector and FIT sleeve reflector; stand for vertical or horizontal use. **Typical Temperatures:** 347° F without adapter; 401° F with adapter only; 446° F with tubing reflector; 664° F with FIT sleeve reflector.

Alpha Gun FG-1 FIT Gun—Net Each..... $61.25

INFRA-RED HEAT GUN FG-5

Shrinks tubing safely, in seconds. Ellipsoidal reflector focuses heat from quartz iodine lamp onto the tubing. Most visible light optically filtered to eliminate eyestrain. Reflectors permit operator to observe shrinking process, minimizing faulty installation. Noiseless, lightweight, no annoying heat build-up. Includes interchangeable tubing reflectors and small sleeve reflector. Input power, 105–120 VAC, 50–60 Hz, 4.2 amps. Lamplife, more than 1000 hrs. (intermittent). Weight, 1.6 lbs.

Alpha No. FG-5 Infra-Red Heat Gun—Net Each.... $287.37

FLAME TORCH KIT FG-10

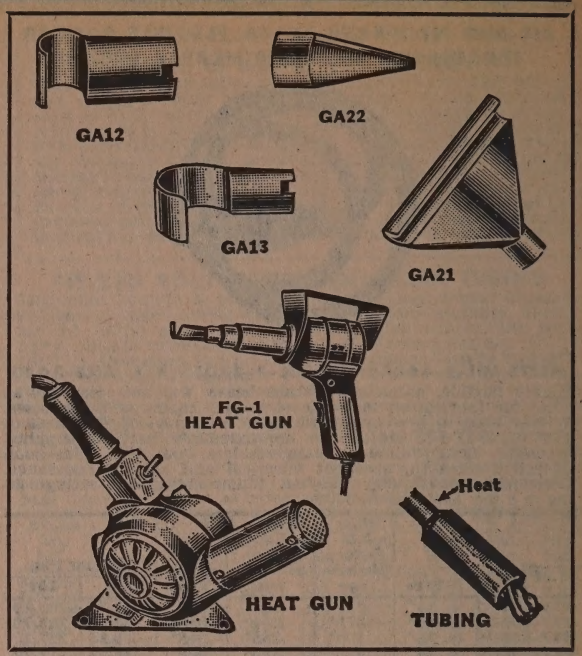
Ideal propane torch for in-field use. Supplies soft yellow flame for shrinking tubing without damage. Provides even-temperature flame. Has pistol grip torch. Valve assembly has control knob for attachment to ordinary propane bottle (not supplied). Assembly includes belt clip, torch holding hook. Has 6 ft. L.P.G. propane hose.

Alpha No. FG-10 Flame Torch Kit—Net Each..... $98.51

HEAT GUNS

The recommended tool for shrinking FIT tubing. A flameless, quiet-operating hot air torch that may be used for portable operations or secured permanently to a bench by means of a mounting bracket. Heavy-duty construction. Adjustable turbo fan air intake to control temperature and a double jacketed housing of diecast aluminum. With neoprene-jacketed 3-wire cord and plug and adapter for 2-prong receptacle. Motor for 115 VAC/DC. Length, 11″ overall.

Alpha No. HG-1 Heat Gun—Temp. up to 500° F. Net . $66.34
Alpha No. HG-2 Heat Gun—Temp., 750°–1000° F. Net. 79.48



HOT AIR PENCIL FG-4

Controls airflow temperature, velocity and direction. Used for precise selective heating of smaller diameter tubing and sleeves. Permits concentration of heat exactly where it is required. Ideal for crowded circuit areas. Uses factory or shop compressed air supply. Unit complete with stand, regulator, needle point tip, sleeve reflector and tubing reflector. Input power, 120 VAC, 4 amps. Airflow, 60 psig/min., 4 CFM.

Alpha No. FG-4 Hot Air Pencil—Net Each..... $167.07

ADAPTER NOZZLE

Concentrates heat and allows use of baffle accessories.

Alpha No. AN-1 Adapter Nozzle—Net Each..... $4.42

BAFFLES

Designed to concentrate heat in a confined working area. To be used with AN-1 Adapter Nozzle.

Alpha No. GA-12 Baffle—For small size cables. Net Ea.... $4.12
Alpha No. GA-13 Baffle—For larger sizes of cable. Net.... 6.16
Alpha No. GA-21 Baffle—For larger cables in long lengths. Net Each..... $35.25
Alpha No. GA-22 Baffle—Pointed design for spot shrinking. Net Each..... $22.84

FLAT BRAIDED TAPE

Nom. Thick.: .014″ (LC-134 is .010″, LC-162 is .012″). **Nom. Width:** 3/32″ (LC-134 is 1/16″). **Tensile Strength:** 50 lbs. (LC-134 is 30 lbs.). **Material:** Nylon (LC-162 is Dacron). **Finish:** Per MIL-T-713A except: LC-132 is synthetic rubber-like resin, melting point over 190° F; LC-140, non-slip fungistatic synthetic rubber; LC-143, "wax free" thermoplastic synthetic resin, melting point over 350° F. LC-136 meets MIL-T-713A, Type P, Class II.

LC-206	.225	250 yds. on spool	44.60

ALPHA POLYVINYLCHLORIDE PVC-105 MIL-I-631D PLASTIC TUBING

All-purpose, economical tubing is compounded with first quality, non-migratory resinous type plasticizers; designed to counteract chemical and environmental degradation. Rated for temperatures as high as 105° C with high dielectric strength. No loss in tensile strength or flexibility; resistant to abrasion. Retains its flexibility which permits it to cling to and protect irregular shapes. Meets MIL-I-631D, Type F, Form U, Grade C, Class I, Category 1.

Dielectric Strength: 800 V/mil. **Tensile Strength:** 2700–3300 psi. **Min. Volume Resis.:** 10^{11} ohm/cm. **Low Temperature Flexibility:** −20° C. **Specify Color:** #24 thru #2: Clear, black, white, yellow, red or green; #1 thru 1": Clear, black or white; 1⅛" thru 2½": Clear or black. **To Order:** Add gauge size to prefix **PVC-105/**, e.g., **PVC-105/24.**

ALPHA POLYVINYLCHLORIDE LOC-TRAC ZIPPER TUBING

All-purpose, easy-to-use jacketing material; zips on in seconds without disconnecting or disturbing connections. Will not pop open even when bent into a U-shape. Does not need sealant nor adhesive. Track thickness when closed, .150", dielectric strength, 759V/mil; tensile strength, 3810 psi; ultimate elongation, 255%; operating temperature, −86 to +106°C; fungus proof; self-extinguishing. One metal slider with every 25 feet of tubing; additional sliders, AB-395, may be ordered at 10c each. **ZIP-41 Type:** MIL-I-631D, Grade C materials. All-purpose type. Wall thickness, .020". Clear or black. **ZIP-41M Type:** MIL-I-631D, Grade C materials. Wall thickness, .040" for heavy-duty use. Clear or black. **ZIP-60 Type:** Aluminum foil laminated between two sheets of polyvinyl. Wall thickness, .040". Silver-gray color.

BRAIDED FIBERGLASS SLEEVING

This series of fiberglass sleeving is the toughest and most pliable of insulating materials and is formulated to provide the maximum in electrical characteristics, chemical resistance, heat stability and abrasion resistance. Tubing is constructed from an inorganic, woven fiberglass sleeving. Ends will not fray when cut. **Type PIF-240:** plain sleeving not coated, usable to 240° C.; **Type PIF-150:** impregnated with acrylic resin, usable to 155° C, conforms to MIL-I-3190C; **Type PIF-200:** coated with silicone rubber, usable to 200° C., conforms to MIL-I-3190C; **Type PIF-130:** impregnated with vinyl plastic, usable to 130° C, conforms to MIL-I-3190B. Type PIF-130 is black; others are natural.

POLYOLEFIN SHRINKABLE TUBING

Designed primarily as a strain relief and insulation for "quick disconnects" and other terminals. The 50% shrink ratio allows four sizes to fit most of the common terminations in use. **Shrink Temperature:** 136° C–148° C.

Alpha No.	Original I.D. (In.)	Shrunk I.D. (In.)	Recommended Term. Size (In.)		Net Each 25 4-ft. Lengths 100′ Total

Other put-ups and discounts available upon request.

*Net for five 4-ft. lengths.

POLYOLEFIN SHRINKABLE TUBING WITH ADHESIVE LINING

The FIT-750 is a tubing with an adhesive lining that melts as the tubing is shrunk. The thermoplastic adhesive adheres to a wide variety of surfaces. **Dielectric Strength:** 500V/mil; **Shrink Temperature:** 121° C.

Alpha No.	Original Dia. (In.)	Shrunk Dia. (In.)	Net Each 25 4-ft. Lengths 100′ Total

*Net for five 4-ft. lengths.

EXTRUDED TEFLON TUBING

Teflon tubing is completely inert and has zero moisture absorption. The tubing is rated for continuous operation from −65° C to +260° C and retains toughness and flexibility throughout this range. **Dielectric Strength:** 1400V/mil; **Dielectric Constant:** 2.2. Conforms to MIL-I-22129C, AMS 3651B, 3655, 3653, and Fed. Spec. P-403A.

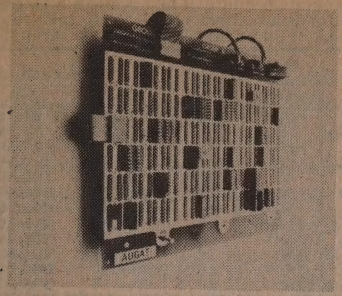
AUGAT Integrated Circuit Panels



HIGH-DENSITY PACKAGING PANELS FOR DUAL INLINE PLUG-IN IC'S

Double-sided panels accept plug-in IC packages with flat or round leads, 300-mil row spacing and 100-mil lead spacing. Large contoured, closed-entry contacts. Power and ground planes at each pattern (power plane on bottom): Types PG3, PG13, PG19, PG21, RG2, RG4, RG8 and RG10 have two dummy pins for power and ground; PG1, PG18, RG1 and RG7 have Pin 7 power and Pin 14 ground; types PG5, PG20, PG3 and PG9 have Pin 8 power and Pin 16 ground. All RG panels are 60-pattern panels; type UG1 is a universal type for any combination of 6 thru 40 lead dual-in-line IC's, available in any multiple of 9 rows up to 54 rows as indicated by the last part of the Augat Number; PG types are available as panels in any multiple of 30 patterns up to 180 patterns, as indicated by last part of Augat Number. To extend flexibility of Series 8136 panels, socket/terminals may be purchased separately; prices on request.

SCHOTTKY TTL DIP PACKAGING PANEL

Designed for the 54S/74S Schottky TTL Logic. Features expanded planar power distribution. Capacitive decoupling permitted at each DIP location. Three-plane design doubles ground surface area, increases the distributed capacitance, permits low impedance ground distribution and reduces high frequency noise. VZZ and Gnd pins are directly soldered to their respective planes for low impedance and eliminating need for wrapping those pins.

ENCLOSURES AND RACK ASSEMBLIES

Panel rack pivots for back panel accessibility. Specified in four ways permits application in a standard 19″ rack. Designed for 13 standard panels. Back panel easily removed for automatic wire wrapping. **Model 8160-EG10, -EG20, -EG21, -WG1,** and **-WG3:** Back panel only. **Model 8170-MG1, -RG1, -RG7, -RG14, -RG19:** Rack with back panel. **Model 8170-RG3, -RG16:** Rack only. **Size:** Enclosure, 17″ w. x 18.25″ d. x 8.75 h.; back panel, 16.4″ w. x .125″ d. x 8.25″ h.

DRAWER ASSEMBLIES

Pack up to 720 DIP's in one drawer assembly. Four panel frames are hinged from either side for accessibility or fast removal. Half drawers hold 2 frames. Top and bottom covers furnished providing protection and duct effect for blowers. Aluminum, gold iridite all frame members and front plate is of painted aluminum. **Size:** 17″ w. x 20.7″ d. x 3.5″ h. **Model 8170-DG1:** Drawer assembly with fan cut-out rear plate and perforated front plate. **Model 8170-DG2:** Drawer assembly with rear blank plate and front blank plate. **Model 8170-DG4:** ½ Drawer version of DG1. **Model 8170-DG5:** ½ Drawer version of DG2. **Model 8170-DG7:** ½ Drawer with perforated front plate and rear blank plate.

AUGAT Logic Panels and Cables

RIBBON CABLE PLUG ASSEMBLIES

Low profile plug assemblies (14 and 16 pin) with flat cable and twisted pairs (UL FR-1 type per MIL-W-16878). Encapsulated for cable strain relief and protection. Designed for use with series 8136 High Density Packaging Panels. Excellent retention and contact reliability. **Plug:** Glass filled nylon. **Contacts:** Brass, gold over nickel-plated. **Color Code:** Flat cable, 14 or 16 different colors (10 solid plus 4 or 6 strips); twisted pair, white common with 7 or 8 solid colors. Write for detailed color code wiring diagrams. **Overall Size:** .785″ w. x .490″ d. x .205″ h. **Pins:** .016″ sq. x .190″.

ECL/SIP HIGH DENSITY WIRE WRAP DIP PACKAGING PANEL

High performance panel accepts 16 pin (ECL21 and ECL26) or 16 and 24 pin (ECL25) DIP ECL 10K logic. Each 27 or 30 pattern section accepts 2 (26 contact) plugs for I/O connections. Includes V_{tt} (−2 volt) plane for terminating load resistors. Series damping resistors easily utilized. Area provided for capacitive decoupling of voltage planes every 2½ DIP's. Thermal effects are minimized through the Wire Wrap socket array. Glass epoxy PC board with 3 layers of tin plated copper circuitry. **Terminals:** Brass, gold over nickel-plated. **Female Contacts:** Beryllium copper, gold over nickel-plated. **Size:** 30 pattern, 2.675″ w. x 7.475″ d. Add 2.7″ to width for each multiple of 30 pattern.

SERIES 8136-M MINI RACK ASSEMBLY AND LOGIC PANELS

Designed for automatic wire wrapping, units available with 12, 18 or 24 patterns. Double sided board (1/16″ thick) with voltage and ground terminals preselected at each pattern. Additional socket terminals available for variable voltage and ground connection and plugging in capacitors. Edge connector take off accepts 72 contact (36 dual row) edge connector. **Terminal:** Brass, gold over nickel-plated. **Female Contact:** Beryllium copper, gold over nickel-plated. **Ejector Keys:** Nylon. **I/O Pins:** Phosphor bronze, gold over nickel-plated.

COMPUCAB SERIES

"Now Look" practical and adaptable to many types of instruments. New keyboard look matches today's advanced digital technology concept. All aluminum construction combines beauty, utility and sturdiness. No fasteners are visible on panel area. Shipped assembled. **Material:** Base, ⅛" aluminum; cover and back, 0.057" aluminum; feet, rubber, self-adhesive; 10-32 screws. **Finish:** Back and cover, smooth white enamel; base, black texture enamel; feet, black. **Assembled** with 6-32 screws. **Rear Panel:** One ⅞" dia. knockout centered, SC-13100; two ⅞" dia. knockouts and four sets of louvers, each set 2" w. x 1¾" h., SC-13101.

Bud No.	Overall Size, Inches W. x D. x H.	Net Each, Lots of 1-5	6-9	10-19

SLOPE SERIES

Sloping front enclosures for excellent visibility of panel mounted components. Modern concept in enclosures embodying clean vertical and horizontal lines. Highly desirable where quick access to the interior is needed. One-piece body is easily detached to provide access to interior components. No exposed fasteners. **Material:** Base, ⅛" aluminum; cover, 0.057" aluminum; feet, rubber, self-adhesive. **Finish:** Cover, smooth white enamel; base, black texture enamel. **Assembled** with 6-32 screws. **Rear Panel:** Single knockout centered, SC-12100; two knockouts, SC-12101. **Front Panel:** 20° slope.

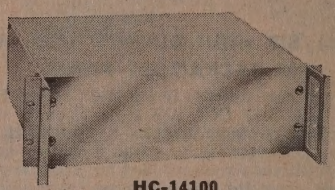
RC-11100



HC-14100

LINEAR SERIES

Highly practical enclosures offer solutions to the designer of electronic subsystems and instrumentation. Attractive and functional; one-piece body can be removed to expose the entire interior. No visible fasteners. With self-adhesive rubber feet. **Material:** Base, ⅛" aluminum; cover, 0.057" aluminum. **Finish:** Cover, smooth white enamel; base, black texture enamel; feet, black. **Assembled** with 6-32 screws. **Rear Panel:** Single knockout centered, RC-11100; two knockouts, RC-11101.

VALU/LINE CABINETS

Classic and contemporary styling together with innovative engineering techniques result in a ruggedly built enclosure. Completely assembled unit includes two separate detachable rack mounting brackets and black rubber feet; adhesive paper protective covering on panels provides an excellent surface for indicating position when drilling or punching panel areas; ⅞" dia. knockout in rear. **Material:** Sides and front panel, ⅛" aluminum; base and cover, 0.057" aluminum; outer brackets, #11 gauge steel; inner brackets, 0.090" aluminum; handles, aluminum extrusion 6063-T5. **Finish:** Base and cover, white smooth enamel; sides, inner and outer brackets, white textured enamel; handles, caustic etch and clear lacquer. **Assembled** with 6-32 and 10-32 screws. Removable outer brackets for mounting in standard EIA 19" cabinet. Bails available as listed; slides also available.

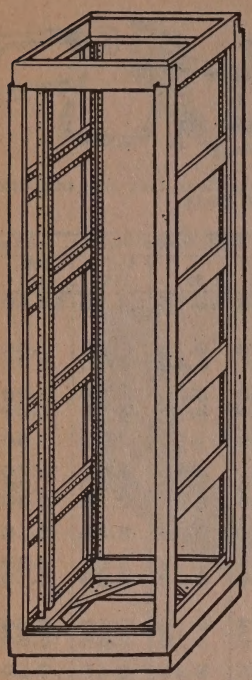
BUD Series "60" Cabinet Racks



Ⓐ Upright Rack

Scientifically designed to meet all requirements for human needs as well as component physical specifications; the most practical cabinet rack developed for either a single piece of equipment or a large instrumentation system. Very economical to the user, units are shipped fully assembled and ready for immediate use.

Basic frame welded in a solid unit composed of 14-gauge cold-rolled steel channels. Sides have "U" braces with perforated channels for fastening vertical adjustable mounting rails. Rails also support other types of equipment such as brackets, shelves, slides, etc. Eliminates need of drilling holes in the rack. Sides and rear door made of 18 gauge steel. Door may be mounted to open left or right. Vertical channel, 4" wide, welded to door to prevent vibration or whip. Two pairs of panel mounting rails are supplied; fully adjustable. Panels may be mounted in front and rear at the same time. Front rails drilled and tapped 10-32 W.E. spacing. Rear rails are drilled according to universal spacing.

All Series Sixty enclosures may be quickly combined with each other to create units of any desired width as shown in the Add-A-Rack series. In addition, such accessories as desk tops, turrets, drawers, slides, sloping panel supports and front door are easily installed.

Standard finishes are textured baked enamel over primer. Specify two-tone gray by adding suffix **GGY.** For two-tone blue, add suffix **BBY** to order number. Standard Bud relay rack panels are available for the Series Sixty racks. (See Relay Rack Panels for colors available.)

UPRIGHT CABINET RACKS (FIG. A)

Completely assembled 19" racks with sides, rear door and top. Standard units have plain sides and door and solid top. For greater ventilation, order units with louvered sides and rear door and solid top. Width, 24 1/16". Inside depth 20 1/2" clear on all units with 22" outside depth; 24", all others. Top opening 18 5/16" w. x 17" d. on units with 22" outside depth; 18 5/16" w. x 20 1/2" d., all others. **Specify Color When Ordering:** Add suffix **GGY** to number for gray; suffix **BBY** for blue.

SERIES SIXTY TURRETS (FIG. L)

Made of 16 gauge steel; designed so that any one of three sides may be attached to a Series Sixty upright rack or any horizontal surface. Accommodate standard 19″ panels. All mounting rails have universal spacing. Sides easily removed when a series of interconnecting turrets are desired. **Specify Color When Ordering:** Add suffix **GG** for dark gray; **BB** for dark blue; **HG** for gray hammertone. Order standard Bud panels with suffix **GY** for light gray; **BY** for light blue; **HG** for gray hammertone.

SERIES SIXTY DRAWER, DESK TOP, AND SHELF ACCESSORIES

No. 60-2368 Drawer: Fits into any Series Sixty cabinet rack. Slides easily on nylon rollers. Will support heavy loads. Extends to full depth; stops prevent drawer from falling out. Slides easily attach to panel supporting rails. Silver anodized handles. Shipped completely assembled. **No. 60-2361 Sliding Desk Top:** Fits all Series Sixty racks. Has smooth Formica* surface for writing, servicing or inspection. Fits flush with front of unit. Usable area when fully extended, 11″ x 17 5/8″. Occupies only 1 3/4″ of panel height. Will support 50 lbs. Ball-bearing slide mechanism mounts directly in Series Sixty racks; brackets included to fit other Bud cabinets and consoles. **No. 60-2363 Desk Top Drawer:** Fits Series Sixty racks. Has Formica surface. Fits flush with front of unit. Hinged desk top on drawer holds small tools or parts. Special front-panel latch both locks and releases drawer or top as desired. Mounts to cabinet U-braces; slides travel on nylon rollers. Hardware supplied. **No. 60-2380 and 60-2381 Shelves:** Ideal for support of chassis, power supplies or other equipment; also may be used as base plate for bottom support. Of one-piece 16 gauge steel with flanged front and rear for extra strength and rigidity. Easily bolted to cabinet U-braces. Will support 200 lbs. Hardware supplied.

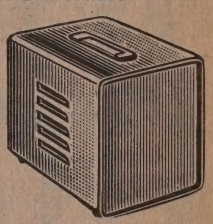
PORTACAB INSTRUMENT CABINETS



Attractive, versatile cabinets desirable as housings for instrumentation requiring highly stylized appearance. Custom, quality look achieved in standard production models. Made entirely of aluminum to minimize weight. Flexible recessed handle permits easy portability as well as vertical stacking. Well louvered for adequate ventilation. Louvers point inward, permitting side-to-side placement of cabinets without space loss. Aluminum front panel recessed ½". Welded back has opening. Perimeter of panel follows contour of body. Has four detachable rubber feet. Gray hammertone finish only.

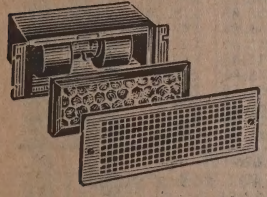
TRANS-AIRE BLOWER



Ideal for use where excessive heat is generated by equipment in an enclosed rack, cabinet or console. Brings in fresh air or exhausts heated air, enabling use as an exhaust or intake blower, depending upon mounting position. Unit will operate in any position—vertical or horizontal. May be mounted to rails of standard cabinet or rack. Use of Bud Chassis Supporting Angles SA-1349, SA-1350 or CE-2219 is recommended when blower is mounted in rack or cabinet. Motor is rubber mounted. Thermal overload protection to prevent overheating. Automatic reset. Oil impregnated, disposable fiberglass filter can be changed without removing unit from cabinet. Air displacement shown is at 0° static pressure. Double shielded, permanently lubricated ball bearings. B-50, B-52 and B-54 are short-depth models with single speed; others, dual speed. Complete with filter, nickel-plated grille and 24" three-wire cord. Light gray enamel finish.

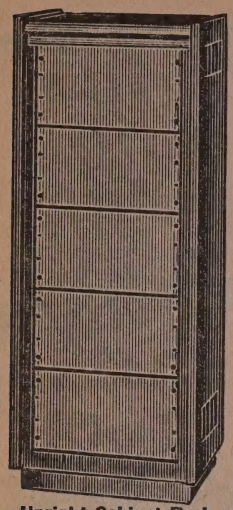
Series 2000 Cabinet Racks



Upright Cabinet Rack

SERIES 2000 UPRIGHT CABINET RACKS

Modern rack enclosures combine the dramatic appearance of sheer, square lines with rugged Bud construction. Basic frame is all-welded with 14 gauge steel members; 18 gauge steel door, sides and top. "U" braces welded to sides of frame augment its strength and rigidity and act as a mounting for the vertical rails, which can be horizontally adjusted. Front panel mounting rails are tapped 10-32; rear rails are pierced 9/32" dia. Caster bracket in base accepts Bud RC-7758 casters. All cabinets accept standard 19" panels. Shipped completely assembled. Width, 24 3/16". Available in royal blue or gray textured enamel with clear anodized aluminum cowl, or gold textured enamel with gold anodized aluminum cowl. **Specify Color When Ordering.** **30" deep racks also available; prices on request.**

Desk Top

DELUXE RELAY RACKS WITH ADD-A-RACK

High quality relay racks made of 16-gauge steel with 7/64" panel supports. Panel mounting supports are recessed so that no panel edges will be exposed. Both back and sides are fully louvered for best ventilation. Snap catches are positioned on the door. Rounded corners give streamlined appearance. Base constructed with four special supports so that casters may be applied to base directly for mobility. Racks are 22" wide to accept all standard 19" panels.

Super Deluxe 2-Door Series Relay Racks are equipped with adjustable panel mounting supports permitting forward and backward adjustment of panels for more efficient use of space. Adjustable points are at 1" intervals for 9" to 15" clearance behind panels. Super Deluxe 2-Door Racks are fitted with both front and rear doors, the rear to cover any equipment behind the panel while making it easily accessible. The front door, not louvered, conceals controls on the front panel.

Add-A-Rack Series—Where relay racks are to be joined in series. Provides additional strength and improved appearance. Includes door, top, bottom and coupling unit, all that is needed to make a double relay rack out of a single Deluxe series.

All Racks Listed are shipped knocked-down with all necessary hardware and assembly instructions. Casters optional. When ordering specify finish. Add suffix **"HG"** for gray hammertone; suffix **"GR"** for gray rinkletex; suffix **"BR"** for black rinkletex.

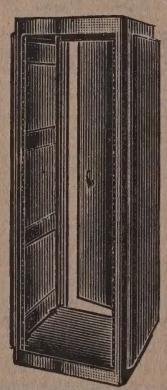
PRESTIGE BALL CORNER RACKS



Attractive, practical housing for permanent or mobile instrumentation. Standard Prestige relay rack consists of framework, top, bottom, two ball cornered sides, and a ball corner door. Sides attach to frame by means of a tongue-and-slot arrangement at bottom and two screws at top. Sides easily removable for access. Drilled and tapped panel mounting rails on all four vertical members of frame. Doors mount from either left or right side. Slotted base takes ball-cornered side panels on any of the four sides. Door and side clearance permits covering of equipment without damage to knobs or controls. Provision made for recessed casters. Extra doors available for placing on any of the sides. Knockout holes provided for attaching two or more units together. Bottom will support 500 lbs., panel rails 200 lbs. suspended vertically between rails. Units take Bud SD-1717 sliding drawer assembly or 60-2368 drawer. Shipped knocked-down, with necessary assembly hardware. **Gray hammertone finish only. Furnished with adjustable panel mounting rails.**

PRESTIGE ADD-A-RACKS

Where relay racks are to be joined in series the Add-A-Rack assembly is lower in cost yet provides additional strength and improved appearance. Consists of top, bottom, rear door and framework. Made of 16 gauge steel. Extra ball corner doors will fit adjustable panel mounting rails which are recessed so that panel will be flush with face of rack. Add-A-Racks may be added at any time as needed. Gray hammertone finish.

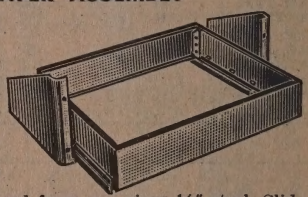
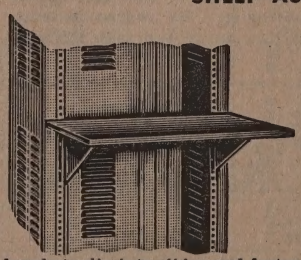
SLIDING DRAWER ASSEMBLY



Ideal for use as a record player mounting base, typewriter base, apparatus and instrument base, writing desk, etc. Installs quickly and simply in any standard rack. Can't fall out or tilt. Provides a completely safe mounting base for anything put on it. Ball bearing suspension for easy sliding. Chassis formed from one-piece 14 gauge aluminum; electro-welded. Support brackets formed from one-piece ⅛" steel. Slide rail fastens securely to chassis, slides in and out easily on channeled ball bearings. Stop screw on slide rail prevents drawer from falling out of channel. Support brackets finished in black, channel finished in natural aluminum; chassis, slide and plate finished in light gray hammertone. Will support up to 30 lbs. **Chassis Size:** 16¾" x 14" x 3", with ½" flange top and bottom. Drawer plate fastens to top or bottom.

Bud No.	Description	Wt., Lbs.	Net Each, Lots of 1-2	3-4	5-7
SD-1717	Sliding drawer	5	$27.40	$24.65	$21.90
TP-1718	Drawer plate	1½	6.60	5.95	5.30

SHELF ASSEMBLY



Immediately adds extra utility to a standard rack at very little cost. Useful as a desk, work space, etc. Gray or black rinkletex finish or gray hammertone finish will match all standard Bud rack finishes. Can't fall off or tilt; will support any reasonable weight. Shelf portion supported by two brackets, punched to fit standard panel mounting strips. No panel support needed but can be attached over panel if desired. Slides welded to bottom of shelf; mounting brackets slip into slides and fasten with two screws. All necessary hardware furnished. Formed of 16 gauge steel; ⅝" flange on all three sides; overall height, 7⅛". Brackets are 7" high. Specify black rinkletex (suffix **BR**), gray rinkletex (suffix **GR**), or light gray hammertone (suffix **HG**) finish.

STYLIST SERIES CABINET (FIG. A)

Highly modern cabinet designed to give you the style and construction advantages that add value to your products. Square-corner design, aluminum extrusion framing of front panel lends a contemporary dimension which complements the appearance of your product. Full width flanges along top and bottom of cabinet add strength at each corner. No tilt, no sway when cabinet is loaded; panel dimensions remain constant. Load bearing capacity is 500 lbs. Constructed of 16 gauge cold rolled steel. Structure is self-supporting, no internal framework. Has 16 gauge steel louvered rear panel, 1¾" high opening for cable accessories. Front and rear openings meet E.I.A. standards, accept either 19" panels or Stylist Series doors. Self-adhesive rubber feet furnished. Specify suffix for color: **RB**, royal blue; **HG**, hammertone gray. Example: S-1640**RB**. **Size:** 20 1/16" w. x 15¼" d., overall.

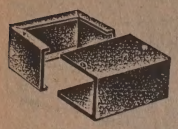
MINIBOXES, HANDY BOXES



Design of this box permits installation of more components than would be possible in the conventionally designed boxes the same size. Two-piece construction. **Either snap-lock or screw type.** The flange type construction assures adequate shielding. Made from heavy .040 ga. aluminum. Available in natural aluminum finish and gray hammertone finish.

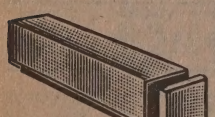
MINISLIDES



Ideal for housing components or assemblies where easy access to internally mounted parts is important. Can be mounted in a number of positions in a rack or cabinet. Accessibility achieved by removing sliding cover. Design of Minislide Box provides adequate shielding and protection from dust. Sturdily made of .050 aluminum. 4 self-tapping fastening screws included. Choice of gray hammertone (**HG**) or natural aluminum (**NA**).

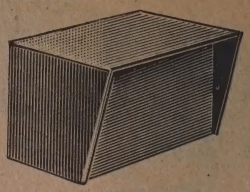
COWL-TYPE MINIBOXES



The cowl-type Minibox has a projecting cover to reduce glare on the panel from overhead lighting. It also provides protection for controls and dials. Cover has two box braces to which bottom is attached with sheet metal screws. When assembled, this type of construction results in a sturdy, rigid housing. Constructed of .040" aluminum and available in natural or light hammertone gray finish.

CHASSIS MTG. BRACKETS

Mounts chassis to panels; supports entire chassis weight. Heavy gauge steel 6½" high, cut away at bottom to mount flush to panel. Black enamel finish.

Bud No.	Depth, In.	Net per Pair, Lots of 1-49	50-99	100-149
MB-458	8	$2.90	$2.60	$2.30

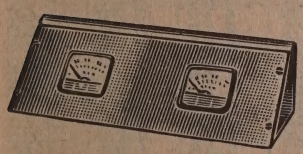
MB-450	10	4.35	3.90	3.50
MB-451*	13	4.50	4.05	3.60

*8½" high for chassis height of 4".

DUAL-VIEW PANEL SUPPORT



Designed for installation on a rack where an oblique view of instrument panel is desired. Engineered so that the entire assembly occupies no more space than size of supported panel. Panel support cover can be removed for easy servicing or installation of instruments. Made of heavy gauge steel with contoured edges. Comes knocked-down with necessary assembly hardware, but without panels. Bud panels to fit these supports are PS-1253 (steel), and PA-1104 (aluminum) for Model IP-1120; PS-1255 (steel), and PA-1106 (aluminum) for IP-1121. Specify color when ordering, use suffix: **BR**, for black rinkletex; **HG**, gray hammertone; **GR**, gray rinkletex; **GY**, light gray textured; **BY**, light blue textured.

Bud No.	Panel Space Required, In.	Wt., Lbs.	Net Each, Lots of 1-24	25-49	50-99
IP-1120	19 x 7	3½	$ 9.70	$ 8.75	$ 7.75
IP-1121	19 x 10½	6¾	13.60	12.25	10.90

TRIANGULAR MOUNTING BRACKETS

Ideal for rigid support of shelves to take heavy loads. Heavy gauge steel with ¾" flange. Black enamel finish only.

Bud No.	Size, In. D. x H.	Wt., Lbs.	Net per Pair, Lots of 1-49	50-99	100-149
MB-1266	5 x 5	½	$2.35	$2.10	$1.90
MB-1267	7 x 7	1	2.85	2.55	2.30
MB-1268	9 x 9	1½	3.50	3.15	2.80

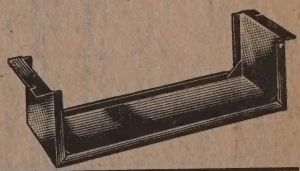
CHASSIS SUPPORTING ANGLES

Distribute weight to sides of the rack to relieve the panel. Angles are 3" x 1⅜" x 7/64" steel. Black enamel finish. **No. CE-2219** designed for attachment to rails of Prestige Relay Racks. Slotted for infinite vertical adjustment; extend to full cabinet depth; 21" x 3" x 2¾".

Bud No.	Length, Inches	Wt., Lbs.	Net per Pair, Lots of 1-24	25-49	50-99
SA-1349	14½	3½	$5.35	$4.80	$4.30
SA-1350	12	3	5.35	4.80	4.30
CE-2219	21	6½	7.10	6.40	5.70

PANEL CHASSIS

Panel mounting chassis for vertical installation where depth is limited or front service is desired. Made of .060" aluminum alloy 5005 H-14 in natural finish. Front flange has standard notching. Fits standard 19" panel space.



Bud No.	Height, Inches	Wt., Lbs.	Net Each, Lots of 1-24	25-49	50-99

BUD Cases and Chassis Bases

TRANSICASE PORTABLE INSTRUMENT CASES

Handsome, portable instrument case with unlimited applications. Contour design fabricated of .040" aluminum with flush-fitting aluminum panel. Lid protects instruments in case; mounted on two slide-off, bright nickel-plated hinges with toggle catches. Rubber feet at both base and back; metal plugs supplied to fill holes if rubber feet are not used. Bright nickel-plated handle. **Specify Color:** Add suffix **BBY** for textured blue; **GGY** for textured gray enamel.

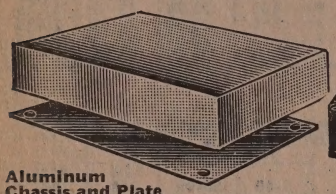
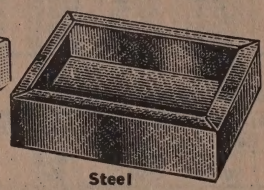
ALUMINUM AND STEEL CHASSIS BASES



Aluminum Chassis and Plate



Steel

Each chassis is made from a single sheet of metal. All corners are reinforced and spot welded. Natural finish aluminum alloy 5005 H-14. All four sides are folded at the bottom for added rigidity and strength.

See following page for Chassis Bottom Plates.

TR SERIES INSTRUMENT ENCLOSURES (FIG. A)

Versatile, functional, good looking instrument enclosures in four sizes, available immediately. Can be used as desk top instrument cases, in systems, or as portable enclosures. The TR Series is designed to accommodate an accessory chassis, also immediately available, or 1/16" thick printed circuit boards. Chassis is reversible, and two configurations are possible with one unit. Top and bottom of instrument enclosure are .050" aluminum; front panel, .090" aluminum. Top and bottom can be removed quickly for easy access to the unit's dust-free interior. Carrying handle is also used as tilting bail. Finished in mar-resistant, durable, easy to clean Nextel. Specify color by suffix, **BLN,** blue and white, or **BRN,** brown and white. Example: TR-6100**BLN.** Enclosure includes front panel, rubber feet and carrying handle. Weight: TR-6100, 4½ lbs.; TR-6101, 5½ lbs.; TR-6102, 7 lbs.; TR-6103, 9½ lbs.

SHOWCASE (FIG. B)

Used as desk top instrument cases, in systems, in racks, as portable enclosures. Lightweight, but sturdy, comes in ten different sizes. Top, sides and bottom are .050" aluminum; front panel is .090", rear panel is .050" aluminum. Strong flexible handle. Two standard color combinations: Black textured (BT) and white; royal blue (RB) and white.

CLASSIC II CABINETS (FIG. C)

Combines serene rectilinear beauty with rugged construction. Double rim aluminum extrusion with edges polished, outlines front of cabinet. Two full-length steel flanges support the recessed anodized aluminum handles. Plain .060" aluminum panels on all four sides; textured finish. Clear inside depth, 20 5/16"; overall, 21 7/16". Specify color by suffix: **GT,** gray textured; **RB,** royal blue textured; **GD,** gold textured.

CLASSIC II DOORS 19" WIDE (FIG. D)

Designed for use on Classic II Cabinets; also fit any rack or cabinet with 19" panel space by attaching to panel mounting rails. Made of 1/8" aluminum alloy 5005-H36. Stop fits on one panel mounting rail; hinged door attaches to other rail. Equipped with plated, flush-type latch. Finished in vinyl texture; specify color by suffix: **WH,** white textured; **S,** sand.

CLASSIC II CABINET RACKS (FIG. E)

Clean, contemporary designed and dependable racks. Side panels and door are 18 gauge steel; top and bottom are 16 gauge steel. Double rimmed, brushed aluminum extrusion around front adds to the appearance of the rack. Comes in four sizes, and in two standard colors; gray textured **(GT)** and royal blue **(RB);** select white **(WH)** for panels and doors. **Size:** 22" w. x 22" d. Rear doors included.

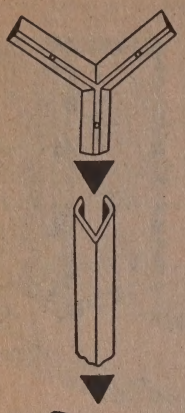
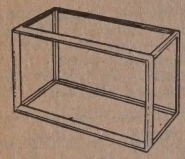
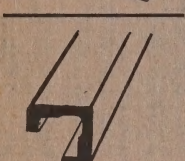
BUD Slimline 901 Imlok®



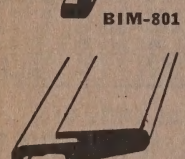
BIM-801



BIM-806

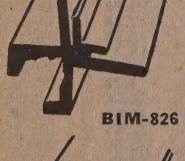


BIM-826



BIM-810

BIM-601



BIM-101

Bud Slimline 901 Imlok is based upon the same, proven principles as the Standard Imlok system. The basic difference is lighter weight and narrower appearance of the extrusions; corner connectors are smaller in size and are not visible in the completed housing. Connectors are 380 aluminum die castings; extrusions are 6063 aluminum.

EXTRUSIONS (9 FT. LENGTH ONLY)

Bud No.	Description	Net Each, Lots of 1-9	10-14	15-19
BIM-801	90° external extrusion suitable for lightweight frameworks; when enclosed with panels it is not visible from the outside.	$11.55	$10.40	$ 9.25
BIM-802	90° external extrusion has retaining groove for 20-gauge panels.	10.00	9.00	8.00
BIM-803	90° external extrusion; heavier extrusion with retaining grooves for 20-gauge panels.	14.50	13.05	11.60
BIM-806	90° bezel extrusion; bezel frame for recessed panels; one side has panel retaining groove.	14.05	12.65	11.25
BIM-807	90° bezel extrusion similar to BIM-806, but heavier; thicker internal flange permits mounting of rack type panels.	20.80	18.90	17.00
BIM-821	90° bezel extrusion similar to BIM-806, but has much deeper recess that provides picture frame effect for the panel.	28.30	25.45	22.65
BIM-826	90° internal extrusion used for all internal 90° applications; retaining grooves for 20-gauge panels.	36.10	32.50	28.90
BIM-810	Spacer bar extrusion matches BIM-801 for dividing and reinforcing panel areas.	12.75	11.50	10.20
BIM-811	Spacer bar extrusion; visible face similar to BIM-802; used with all extrusions except BIM-801.	13.75	12.40	11.00
BIM-812	Spacer bar extrusion similar to BIM-811, but with wider visible area to match BIM-803.	19.05	17.15	15.25
BIM-601	15° external extrusion used for all 15° external corner applications; fits one leg of BIM-915 and BIM-91 connectors; used with BIM-802, BIM-803, BIM-806, BIM-807, BIM-821 and BIM-845 extrusions.	27.40	24.65	21.90
BIM-611	15° internal extrusion used for all 15° internal corner applications; fits one leg of BIM-951 connector; used with BIM-802, BIM-803, BIM-806, BIM-807 and BIM-821 extrusions.	27.40	24.65	21.90
BIM-641	45° external extrusion used for all 45° external corner applications; fits one leg of BIM-945 and BIM-94 connectors; used with same extrusions as BIM-601.	27.15	24.45	21.70
BIM-651	45° internal extrusion used for all 45° internal corner applications; fits one leg of BIM-954; used with same extrusions as BIM-611.	27.15	24.45	21.70
BIM-681	75° external extrusion used for all 75° external corner applications with BIM-975 or BIM-97 connectors; used with same extrusions as BIM-601.	27.15	24.45	21.70
BIM-682	75° acute external extrusion.	27.15	24.45	21.70
BIM-691	75° internal extrusion used for all 75° internal corner applications with BIM-957 connector; for same extrusions as BIM-611.	27.15	24.45	21.70
BIM-845	90° deep recess extrusion has 5/8" deep recess on one side and is similar to BIM-803 on other; used with appropriate corner connectors.	27.10	24.40	21.70
BIM-847	Deep recess conversion extrusion used where BIM-845 is not suitable; used with extrusions BIM-802, BIM-803, BIM-812, BIM-826, BIM-651, BIM-691 and one side only on BIM-806, BIM-807, BIM-811, BIM-821 and BIM-845.	21.40	19.25	17.10
BIM-610	Deep recess conversion extrusion similar to BIM-847; used with BIM-601 and BIM-611 extrusions.	21.90	19.70	17.50
BIM-690	Deep recess conversion extrusion similar to BIM-847 and BIM-610; used with extrusions BIM-641, BIM-681 and BIM-682.	21.90	19.70	17.50
BIM-846	Deep recess spacer bar extrusion matches deep recess on deep-recess conversion extrusions; inner flanges accept standard captive nuts suitable for 14-gauge material.	37.80	34.00	30.25
BIM-834	90° glazing extrusion has retaining groove on both sides to accept 1/4" panels.	32.40	29.15	25.90
BIM-835	Same as BIM-834, but accepts 1/8" panels.	27.70	24.95	22.15
BIM-836	90° sliding door extrusion has twin channels on one side to accept 1/4" sliding doors; retaining groove on other side for 1/4" fixed panel.	42.75	38.50	34.20
BIM-837	Same as BIM-836, but for 1/8" doors and 1/8" panel.	39.60	35.65	31.70
BIM-822	1/4" sliding door conversion extrusion; used where 1/4" sliding doors are required without a side panel. May be added to either side of BIM-802, BIM-803, BIM-812, BIM-826, BIM-651, and BIM-691 extrusions; or, to one side only of BIM-806, BIM-807, BIM-811, BIM-821 and BIM-845 extrusions.	19.65	17.70	15.70
BIM-823	1/8" sliding door conversion extrusion similar to BIM-822, except will accommodate 1/8" sliding doors; may be added to same extrusions as BIM-822.	18.90	17.00	15.10
BIM-832	Closure section may be added to inside of frameworks using 90° connectors to completely conceal them.	8.10	7.30	6.50
BIM-818	90° door frame extrusion used for making double skinned doors.	16.45	14.80	13.15
BIM-829	90° mounting flange extrusion used with BIM-801 to provide a flange suitable for rack mounting.	30.30	27.25	24.25
BIM-107	Panel mounting conversion extrusion; normally fitted to two vertical members to provide mountings for rack type panels.	24.00	21.60	19.20
BIM-856	90° inset frame angle for vertical mounting between flanges of top and bottom front-to-rear extrusions; use with BIM-858 for recessed panel mountings.	8.65	7.80	6.90
BIM-857	90° panel mounting extrusion similar to BIM-803, but one flange extended to allow fitting of standard rack panels.	23.10	20.80	18.50
BIM-858	90° top/bottom extrusion used with BIM-857 to provide clear aperture above and below rack panels; can be used as a vertical member with BIM-856.	22.80	20.50	18.25

MITERING JIGS

Bud No.	Description	Net Each, Lots of 1-9	10-14	15-19
BIM-101	90° mitering jig; external, double miter	$19.65	$17.70	$15.70
BIM-102	45° mitering jig; external, single miter	19.05	17.15	15.25
BIM-115	90° mitering jig; external, single miter	19.05	17.15	15.25
BIM-116	90° mitering jig; internal, single miter	19.05	17.15	15.25
BIM-117	15° mitering jig; external, single miter	19.05	17.15	15.25
BIM-118	15° mitering jig; internal, single miter	19.05	17.15	15.25
BIM-121	45° mitering jig; external, single miter	19.05	17.15	15.25
BIM-122	45° mitering jig; internal, single miter	19.05	17.15	15.25
BIM-125	75° mitering jig; external, single miter	13.90	12.50	11.10
BIM-126	75° mitering jig; internal, single miter	19.05	17.15	15.25
BIM-127	Acute 75° mitering jig; external, single miter	19.05	17.15	15.25
BIM-129	Notch jig	77.80	70.00	62.25

CONNECTORS

Bud No.	Description	Net Each, Lots of 1-14	15-24	25-34
BIM-902	90° external standard connector used for normal 90° external corners and for joining spacer bars to the various 90° external and bezel extrusions.	$2.70	$2.45	$2.15
BIM-901	90° external corner connector; a lighter duty model than BIM-902; used with extrusions BIM-801, BIM-834, BIM-835, BIM-836 and BIM-837; if one leg is removed use BIM-818.	2.20	2.00	1.75
BIM-90	90° external slotted connector replaces BIM-902 if an unobstructed aperature is required on framework involving extrusions BIM-802, BIM-806, BIM-810, BIM-811 and BIM-821.	4.30	3.85	3.45
BIM-909	90° internal connector; extrusion BIM-826 is fitted to one leg and the other two legs accept extrusions BIM-802, BIM-803, BIM-806, BIM-807 and BIM-821.	3.90	3.50	3.10
BIM-090	90° internal spacer bar connector enables spacer bars BIM-810, BIM-811 or BIM-812 to be fitted to extrusion BIM-826.	4.30	3.85	3.45
BIM-990	90° cruciform connector; used to join spacer bars BIM-810, BIM-811, or BIM-812 where they cross to divide large panel areas.	4.45	4.00	3.55
BIM-915	15° external corner connector; used for 15° external corners when two 90° frame extrusions are BIM-803 or BIM-845; extrusion BIM-601 is always fitted to third leg.	3.60	3.25	2.90
BIM-91	15° external slotted connector replaces BIM-915 when 90° extrusions are BIM-802, BIM-806, BIM-807 or BIM-821; also used for joining spacer bars to BIM-601.	3.80	3.40	3.05
BIM-951	15° internal corner connector for all 15° internal corner applications; extrusion BIM-611 is fitted to one leg; the other two will accept BIM-802, BIM-803, BIM-806, BIM-807 or BIM-821.	3.60	3.25	2.90
BIM-015	15° internal spacer bar connector permits spacer bars BIM-810, BIM-811 or BIM-812 to be fitted to 15° internal extrusion BIM-611.	4.45	4.00	3.55
BIM-945	45° external corner connector; used for 45° external corners when extrusion is either BIM-803 or BIM-845; must be used with extrusion BIM-641.	3.60	3.25	2.90
BIM-94	45° external slotted connector replaces BIM-945 when extrusions are either BIM-802, BIM-806, BIM-807 or BIM-821; also used for joining spacer bars to extrusion BIM-641.	3.80	3.40	3.05
BIM-954	45° internal corner connector; used for all 45° internal corners with extrusion BIM-651; two legs accept 90° extrusions.	4.45	4.00	3.55
BIM-045	45° internal spacer bar connector; used in fitting spacer bars to extrusion BIM-651.	4.45	4.00	3.55
BIM-975	75° external corner connector; used for 75° external corners with either 90° extrusion BIM-803 or BIM-845; BIM-681 is always the third extrusion.	3.60	3.25	2.90
BIM-97	75° external slotted connector; used to replace BIM-975 when 90° extrusions are BIM-802, BIM-806, BIM-807 or BIM-821; connects spacer bars to extrusion BIM-681.	3.80	3.40	3.05
BIM-957	75° internal corner connector; used for all 75° internal corners with extrusion BIM-691 fitted to one leg; use BIM-802, BIM-803, BIM-806, BIM-807 or BIM-821 on other two legs.	3.90	3.50	3.10
BIM-075	75° internal spacer bar connector enables spacer bars to be fitted to extrusion BIM-691.	4.30	3.85	3.45
BIM-75	75° acute external slotted connector replaces BIM-750 when extrusions BIM-802, BIM-806, BIM-807 or BIM-821 are used; also joins spacer bars to extrusion BIM-682.	4.30	3.85	3.45

ACCESSORIES

Bud No.	Description	Net Each, Lots of 1-9	10-14	15-19
BIM-103	Tapped block 6-32 threaded for mounting panels with extrusions BIM-801 and BIM-810.	$2.10	$1.90	$1.70
BIM-104	Tapped block 10-32 threaded for mounting panels with extrusions BIM-801 and BIM-810.	2.10	1.90	1.70
BIM-105	Tapped block 6-32 threaded for mounting panels with extrusions BIM-801 and BIM-810.	1.90	1.70	1.50
BIM-106	Adjustable mounting bracket may be positioned as required to allow standard rack panel mountings on extrusions BIM-801, BIM-802, BIM-803, BIM-806, BIM-807, BIM-810, BIM-811, BIM-812, BIM-821 and BIM-845.	.75	.70	.60
BIM-108	90° external corner gusset may be fitted to connectors BIM-90 and BIM-901.	.70*	.65†	.55‡
BIM-109L	Lift-off butt hinge, left hand; chrome plated.	3.30*	2.95†	2.65‡
BIM-109R	Lift-off butt hinge; right hand; chrome plated.	3.30*	2.95†	2.65‡
BIM-134	45° corner gusset with 3 drilled holes (one .44″, two .22″) plus 4 holes tapped 10-32. For 90° corners only.	2.70†	2.45†	2.15‡
BIM-135	45° corner gusset with 3 drilled holes (one .44″, two .22″).	2.25*	2.05†	1.80‡
BIM-136	23°–67° corner gusset drilled and tapped for use in any 90° corner; may be fitted after framework is completed.	2.35*	2.10†	1.90‡
BIM-110	Open hinge, cadmium plated steel, undrilled, 4-ft. length for use with deep recess extrusions.	9.90	8.90	7.90
BIM-130	Pivot hinge block and collar designed for use with either flush fitting or recessed doors; chrome plated.	4.05*	3.65†	3.25‡
BIM-137	Bracing extrusion for internal bracing at any desired angle; particularly useful for strengthening non-90° corners.	21.25	19.15	17.00
BIM-140	Concealed hinge suitable for use on BIM-803 or BIM-858; can also be used on one side only of BIM-812 or BIM-857.	5.80	5.20	4.65

Net Each, Lots of: *1–14; †15–24; ‡25–34.

Cabinet system permits quick assembly of structures of your own design using a variety of corner castings and extrusions held with screws. No grinding or welding needed.

EXTERNAL CORNER CONNECTORS

Bud No.	Description	Net Each, Lots of 1-14	15-24	25-34
BI-1001	90° basic corner connector for rectangular cabinets. Use with BI-2004, BI-2014, BI-2024, BI-2034, BI-2044, BI-2054 or BI-2064 extrusions.	$1.90	$1.70	$1.50
BI-1016	67½° corner connector holds vertical wall and horizontal wall to a third rising at 67½° to the horizontal. One leg fits BI-2041 extrusion; other two fit any 90° external extrusion.	4.15	3.75	3.30
BI-1024	60° corner connector similar to BI-1016. One leg fits BI-2081; other legs fit any 90° external extrusion.	4.15	3.75	3.30
BI-1002	45° corner connector similar to BI-1016. One leg fits BI-2005, BI-2015, or BI-2025; other two legs fit any 90° extrusion.	2.85	2.55	2.30
BI-1020	30° corner connector similar to BI-1016. One leg fits BI-2061; other two legs fit any 90° external extrusion.	4.15	3.75	3.30
BI-1012	22½° corner connector similar to BI-1016. One leg fits BI-2021; other two legs fit any 90° external extrusion.	4.15	3.75	3.30

EXTERNAL STANDARD EXTRUSIONS

Bud No.	Description	Net Each, Lots of 1-9	10-14	15-19
BI-2004	12 ft. long, 90° external extrusion most used; has panel retaining groove on each flange for 0.050" panels. For small to medium sized structures with unbraced spaces up to 2 ft. lg.	$18.90	$17.00	$15.10
BI-2004-3	3 ft. length BI-2004	5.80	5.20	4.65
BI-2004-6	6 ft. length BI-2004	11.05	9.95	8.85
BI-2004-9	9 ft. length BI-2004	15.70	14.15	12.55
BI-2064	12 ft. long, 90° extrusion with panel retaining flange to take 20 gauge panels.	19.90	17.90	15.90
BI-2064-3	3 ft. length BI-2064	5.95	5.35	4.75
BI-2064-6	6 ft. length BI-2064	11.40	10.25	9.10
BI-2064-9	9 ft. length BI-2064	16.30	14.65	13.05
BI-2041	12 ft. long, 67½° extrusion; companion to BI-1016 for unbraced spans up to 3 ft. long.	23.10	20.80	18.50
BI-2041-3	3 ft. length BI-2041	6.90	6.20	5.50
BI-2041-6	6 ft. length BI-2041	13.20	11.90	10.55
BI-2041-9	9 ft. length BI-2041	18.75	16.90	15.00
BI-2081	12 ft. long, 60° extrusion; companion to BI-1024 connector. For unbraced spans up to 3 ft. long.	23.05	20.75	18.45
BI-2081-3	3 ft. length BI-2081	6.85	6.15	5.50
BI-2081-6	6 ft. length BI-2081	13.20	11.90	10.55
BI-2081-9	9 ft. length BI-2081	19.00	17.10	15.20
BI-2005	12 ft. long, 45° extrusion used with BI-1002 connector; for spans up to 2 ft. long.	16.65	15.00	13.30
BI-2005-3	3 ft. length BI-2005	5.10	4.60	4.10
BI-2005-6	6 ft. length BI-2005	9.70	8.75	7.75
BI-2005-9	9 ft. length BI-2005	13.60	12.25	10.90
BI-2061	12 ft. long, 30° extrusion used with BI-1020 connector.	23.10	20.80	18.50
BI-2061-3	3 ft. length BI-2061	6.90	6.20	5.50
BI-2061-6	6 ft. length BI-2061	13.20	11.90	10.55
BI-2061-9	9 ft. length BI-2061	18.75	16.90	15.00
BI-2021	12 ft. long, 22½° extrusion used with BI-1012 connector.	24.00	21.60	19.20
BI-2021-3	3 ft. length BI-2021	7.05	6.35	5.65
BI-2021-6	6 ft. length BI-2021	13.75	12.40	11.00
BI-2021-9	9 ft. length BI-2021	19.35	17.40	15.50
BI-2014	12 ft. long, 90° strengthened extrusion similar to BI-2004 but stronger for use in unbraced spans 4 to 5 ft. long.	21.30	19.15	17.05
BI-2014-3	3 ft. length BI-2014	6.40	5.75	5.10
BI-2014-6	6 ft. length BI-2014	12.25	11.05	9.80
BI-2014-9	9 ft. length BI-2014	17.40	15.65	13.90
BI-2015	12 ft. long, 45° external strengthened extrusion used in place of BI-2005 in unbraced spans up to 3 ft. long.	18.90	17.00	15.10
BI-2015-3	3 ft. length BI-2015	5.70	5.15	4.55
BI-2015-6	6 ft. length BI-2015	10.90	9.80	8.70
BI-2015-9	9 ft. length BI-2015	15.30	13.75	12.25
BI-2054	12 ft. long, 90° strengthened extrusion with two 1 1/16" extended flanges for std. ⅛" panel; retaining groove at root of flanges.	26.65	24.00	21.30
BI-2054-3	3 ft. length BI-2054	8.05	7.25	6.45
BI-2054-6	6 ft. length BI-2054	15.15	13.65	12.10
BI-2054-9	9 ft. length BI-2054	21.90	19.70	17.50
BI-2024	12 ft. long, 90° strengthened extrusion w/one flange extended ⅝" to fit ⅛" panel; other has normal panel-retaining groove.	21.60	19.45	17.30
BI-2024-3	3 ft. length BI-2024	6.75	6.10	5.40
BI-2024-6	6 ft. length BI-2024	12.30	11.05	9.85
BI-2024-9	9 ft. length BI-2024	17.65	15.90	14.10
BI-2025	12 ft. long, 45° strengthened extrusion w/one ⅝" extended flange for ⅛" panel and one normal panel-retaining groove	20.70	18.65	16.55
BI-2025-3	3 ft. length BI-2025	6.25	5.65	5.00
BI-2025-6	6 ft. length BI-2025	11.85	10.65	9.50
BI-2025-9	9 ft. length BI-2025	17.05	15.35	13.65
BI-2034	12 ft. long, 90° heavy duty extrusion takes loadings for spans over 5 ft. long. Additional returns reinforce strength. Flanges are both ⅝" deep.	38.10	34.30	30.50
BI-2034-3	3 ft. length BI-2034	11.40	10.25	9.10
BI-2034-6	6 ft. length BI-2034	21.90	19.70	17.50
BI-2034-9	9 ft. length BI-2034	31.15	28.05	24.90
BI-2044	12 ft. long, 90° reinforcing angle screws to return flanges of BI-2034 for extra rigid, boxed in section. Use with heavy duty BI-1011 spacer bar and BI-2018 and BI-2028 extrusions to build almost any size structure.	14.35	12.90	11.50
BI-2044-3	3 ft. length BI-2044	4.20	3.80	3.35
BI-2044-6	6 ft. length BI-2044	8.10	7.30	6.50
BI-2044-9	9 ft. length BI-2044	11.70	10.55	9.35
BI-2045	90° inset frame angle for fastening rear end of chassis runners where they do not extend to full unit depth; mounts vertically between top and bottom front-to-rear extrusions.	Write for prices		
BI-2074	12 ft. long, 90° external extrusion for 20 ga. panels on one flange while other is extended ⅝" for ⅛" panels.	Write for prices		
BI-2144	90° external extrusion with one extended and one deep recessed flange. For fitting recessed doors, etc. to standard Imlok structures.	86.95	78.25	69.55

Imlok® "Prototyper" Cabinets

INTERNAL EXTRUSIONS

Bud No.	Description	Net Each, Lots of 1-9	10-14	15-19
BI-2032	12 ft. long, 90° internal extrusion to fit BI-1028; has two panel retaining grooves; for unbraced spans up to 3 ft. long.	$28.50	$25.65	$22.80
BI-2032-3	3 ft. length BI-2032	8.65	7.80	6.90
BI-2032-6	6 ft. length BI-2032	16.30	14.65	13.05
BI-2032-9	9 ft. length BI-2032	23.20	20.90	18.55
BI-2051	12 ft. long, 67½° internal extrusion to fit BI-1017 connector. For use in unbraced spans up to 3 ft.	28.90	26.00	23.10
BI-2051-3	3 ft. length BI-2051	8.20	7.40	6.55
BI-2051-6	6 ft. length BI-2051	16.15	14.55	12.90
BI-2051-9	9 ft. length BI-2051	22.20	20.00	17.75
BI-2091	12 ft. long, 60° internal extrusion; fits BI-1025 connector.	28.20	25.40	22.55
BI-2091-3	3 ft. length BI-2091	8.65	7.80	6.90
BI-2091-6	6 ft. length BI-2091	16.30	14.65	13.05
BI-2091-9	9 ft. length BI-2091	23.20	20.90	18.55
BI-2006	12 ft. lg., 45° internal extrusion has one ⅝" flange, the other with panel-retaining groove. For flat-topped, sloping front cabinets.	24.25	21.85	19.40
BI-2006-3	3 ft. length BI-2006	7.45	6.70	5.95
BI-2006-6	6 ft. length BI-2006	13.95	12.55	11.15
BI-2006-9	9 ft. length BI-2006	20.10	18.10	16.10
BI-2071	12 ft. long, 30° internal extrusion; fits BI-1021 connector.	28.80	25.90	23.05
BI-2071-3	3 ft. length BI-2071	8.65	7.80	6.90
BI-2071-6	6 ft. length BI-2071	16.30	14.65	13.05
BI-2071-9	9 ft. length BI-2071	23.10	20.80	18.50
BI-2031	12 ft. long, 22½° internal extrusion; fits BI-1013 connector.	28.20	25.40	22.55
BI-2031-3	3 ft. length BI-2031	8.65	7.80	6.90
BI-2031-6	6 ft. length BI-2031	16.05	14.45	12.85
BI-2031-9	9 ft. length BI-2031	23.20	20.90	18.55

TABLE TOP OR FOOT EXTRUSION

BI-2009	12 ft. long, table-top extrusion for use at base of cabinet, as vertical member where double radius between cabinets is undesirable. Has flange with normal retaining groove; other is 1" deep to support table or bench top.	$21.25	$19.15	$17.00
BI-2009-3	3 ft. length BI-2009	6.40	5.75	5.10
BI-2009-6	6 ft. length BI-2009	12.25	11.05	9.80
BI-2009-9	9 ft. length BI-2009	17.40	15.65	13.90

SPACER BARS AND REINFORCEMENT EXTRUSIONS

Bud No.	Description	Net Each, Lots of 1-9	10-14	15-19
BI-2008	12 ft. long, spacer bar extrusion for use with any spacer bar connector. Serves as a cross-bracing member or to sub-divide panels. Uses BI-2028 reinforcing channel.	$25.95	$23.35	$20.75
BI-2008-3	3 ft. length BI-2008	7.80	7.00	6.25
BI-2008-6	6 ft. length BI-2008	14.70	13.25	11.75
BI-2008-9	9 ft. length BI-2008	21.25	19.15	17.00
BI-2018	12 ft. long, heavy duty version of BI-2008	30.30	27.25	24.25
BI-2018-3	3 ft. length BI-2018	9.70	8.75	7.75
BI-2018-6	6 ft. length BI-2018	19.05	17.15	15.25
BI-2018-9	9 ft. length BI-2018	25.95	23.35	20.75
BI-2028	12 ft. long, reinforcing channel for above BI-2008 and BI-2018 spacer bar extrusions. Screws to flanges; gives rigid boxed-in section. Also useful as a base member.	29.80	26.80	23.85
BI-2028-3	3 ft. length BI-2028	9.25	8.35	7.40
BI-2028-6	6 ft. length BI-2028	17.65	15.90	14.10
BI-2028-9	9 ft. length BI-2028	25.35	22.80	20.30

EXTERNAL SPACER BAR CONNECTORS

Bud No.	Description	Net Each, Lots of 1-14	15-24	25-34
BI-1004	90° external spacer bar connector; one leg fits BI-2004, 2014, 2024, 2054, 2064, 2074 or 2084 extrusion, other two legs fit BI-2008 or 2018 spacer bar extrusion.	$ 5.05	$ 4.55	$ 4.05
BI-1011	This connector specially designed for use with 90° external heavy duty extrusion BI-2034. One leg fits this extrusion as well as all other 90° external extrusions. The other two legs fit BI-2008 and 2018.	4.15	3.75	3.30
BI-1018	67½° external spacer bar connector; brace or sub-divide walls where BI-1016 is used at corners. One leg fits BI-2041; other two fit any spacer bar extrusion.	4.15	3.75	3.30
BI-1026	60° version of BI-1018. One leg fits BI-2081; other two fit any spacer bar extrusion.	4.15	3.75	3.30
BI-1007	45° version of BI-1018. One leg fits BI-2005, BI-2015 or BI-2025; other two fit any spacer bar extrusion.	5.10	4.60	4.10
BI-1022	30° version of BI-1018. One leg fits BI-2061 extrusion; other two fit any spacer bar extrusion.	4.15	3.75	3.30
BI-1014	22½° version of BI-1018. One leg fits BI-2021; other two fit any spacer bar extrusion.	4.15	3.75	3.30

INTERNAL CORNER CONNECTORS

BI-1028	90° internal connector gives an included angle of 90° for L-shaped structures. One leg fits BI-2032 extrusion; other two fit any 90° external extrusion (BI-2004, BI-2014, BI-2024, BI-2034, BI-2054 and BI-2064).	$ 4.15	$ 3.75	$ 3.30
BI-1017	67½° internal connector used where two walls are to meet to include a 67½° angle. One leg fits BI-2051 extrusion; other two fit any 90° external extrusion.	4.15	3.75	3.30
BI-1025	60° version of BI-1017. One leg fits BI-2091; other two fit any 90° external extrusion.	4.15	3.75	3.30
BI-1006	45° version of BI-1017. One leg fits BI-2006; other two fit any 90° external extrusion. Helps make flat top, sloping front structure.	5.10	4.60	4.10
BI-1021	30° version of BI-1017. One leg fits BI-2071; other two fit any 90° external extrusion.	4.15	3.75	3.30
BI-1013	22½° version of BI-1017. One leg fits BI-2031; other two fit any 90° external extrusion.	4.15	3.75	3.30

INTERNAL SPACER BAR CONNECTORS

Bud No.	Description	Net Each, Lots of 1-14	15-24	25-34
BI-1029	90° internal spacer connector permits bracing or sub-division of spans of BI-2032. One leg fits BI-2032 internal extrusion; other two fit BI-2008 and BI-2018 spacer bar extrusions.	$4.15	$3.75	$3.30
BI-1019	67½° internal spacer bar connector is companion to BI-1017 for sub-dividing or cross-bracing. One leg fits BI-2051; other two fit any spacer bar extrusion.	4.15	3.75	3.30
BI-1027	60° version of BI-1019 above; companion for BI-1025. One leg fits BI-2091; other two fit any spacer bar extrusion.	4.15	3.75	3.30
BI-1010	45° version of BI-1019; companion for BI-1006. One leg fits BI-2006; other two fit any spacer bar extrusion.	4.15	3.75	3.30
BI-1023	30° version of BI-1019; companion to BI-1021. One leg fits BI-2071; other two fit any spacer bar extrusion.	4.15	3.75	3.30
BI-1015	22½° version of BI-1019; companion to BI-1013. One leg fits BI-2031; other two fit any spacer bar extrusion.	4.15	3.75	3.30
BI-1030	Table top (or foot) spacer bar connector. One leg fits BI-2009; other two fit spacer bar extrusions BI-2008, 2018.	4.15	3.75	3.30

SPECIAL CONNECTORS

BI-1003	T-junction connector makes it possible to form a T with two lengths of extrusion; also for picture-frame effect. Fits extrusions BI-2004, BI-2014, BI-2024, BI-2054, BI-2064.	$2.85	$2.55	$2.30
BI-1005	Table top (or foot) connector radiused in one plane only; produces flat surface with a recess to take a table top. It can be used as a foot or for wall mounting. One leg fits any 90° external extrusion BI-2004, BI-2014, BI-2024, BI-2034, BI-2054 and BI-2064. The other two legs fit table top extrusion BI-2009.	3.60	3.25	2.90
BI-1009	Spacer bar cruciform connector for use with spacer bar extrusions for right-angles in middle of wall or a cabinet, acting as cross-bracing members or dividing the wall into four panels. Each arm fits extrusion BI-2008 or BI-2018.	5.10	4.60	4.10
BI-1033	90° internal kneehole connector, use with BI-2032 on all three legs.	7.80	7.00	6.25

EXTERNAL AND INTERNAL CUTTING JIGS

Bud No.	Description	Net Each, Lots of 1-9	10-14	15-19
BI-3003	90° external cutting jig for any 90° external extrusion (BI-2004, BI-2014, BI-2024, BI-2034, BI-2054, BI-2064), for cutting to length and for mitering extrusion flanges at 45°.	$30.90	$27.80	$24.70
BI-3002	45° external cutting jig for use with BI-2005, BI-2015 and BI-2025.	42.75	38.50	34.20
BI-3004	22½° external cutting jig for use with BI-2021.	46.50	41.85	37.20
BI-3005	30° external cutting jig for use with BI-2061.	49.00	44.10	39.20
BI-3006	60° external cutting jig for use with BI-2081.	49.00	44.10	39.20
BI-3007	67½° external cutting jig for use with BI-2041.	49.00	44.10	39.20
BI-3012	90° internal cutting jig produces a mitered butt joint between two lengths of 90° external extrusion when fitted to 90° internal corner connector BI-1028. For use with all 90° external extrusions (BI-2004, BI-2014, BI-2024, BI-2034, BI-2054 and BI-2064).	49.00	44.10	39.20
BI-3008	22½° internal cutting jig for use with BI-1013.	49.00	44.10	39.20
BI-3009	30° internal cutting jig for use with BI-1021.	49.00	44.10	39.20
BI-3010	60° internal cutting jig for use with BI-1025.	49.00	44.10	39.20
BI-3011	67½° internal cutting jig for use with BI-1017.	49.00	44.10	39.20

IMLOK ACCESSORIES

BI-1008	Stacking plate for use with table top connector BI-1005 to permit stacking of cases but can be fitted in any 90° corner or used as a mounting for casters, adjustable feet, etc.	$ 2.10	$ 1.90	$ 1.70
BI-4302	Concealed hinge, cadmium-plated brass with stainless steel pin. Used with 90° external extrusions BI-2004, BI-2014, BI-2024 and BI-2054.	5.40	4.85	4.30
BI-4303	Lift-off heavy duty concealed hinge, cadmium-plated brass with stainless steel pin. Suitable for left- or right-hand doors and fits extrusions BI-2008, BI-2015, BI-2018, BI-2021, BI-2024, BI-2025, BI-2041, BI-2054, BI-2061, BI-2081 and BI-2084.	8.50	7.65	6.80
BI-4601	Ventilation ring, chrome-plated with aluminum gauze. Normally used in addition to slots and louvers and are easily fitted to 2⅝" dia. holes with fixed clips supplied.	8.10	7.30	6.50
BI-9414	Steel gusset plate for bracing corners where extra reinforcing is required or as a mounting for casters, rubber feet, etc.	3.30*	2.95†	2.65‡
BI-9651	Open hinge, made of mild steel, 4 ft. lengths.	11.70*	10.55†	9.35‡

GLAZING SECTIONS AND ACCESSORIES

Provide the facility for fitting glass or any other material panels up to ⅜" thickness to almost any standard Imlok extrusion.

BI-2901	12 ft. long, glazing extrusion needs only to be cut to length and mitered; no drilling or tapping operations are required. Use with extrusions BI-2004, BI-2005, BI-2006, BI-2008, BI-2009, BI-2014, BI-2015, BI-2021, BI-2024, BI-2025, BI-2031, BI-2032, BI-2038, BI-2041, BI-2051, BI-2061, BI-2064, BI-2071, BI-2081 and BI-2091.	$27.00	$24.30	$21.60
BI-2901-3	3 ft. length BI-2901	7.95	7.15	6.35
BI-2901-6	6 ft. length BI-2901	14.95	13.45	11.95
BI-2901-9	9 ft. length BI-2901	20.70	18.65	16.55
BI-4711	Retaining plate for clamping BI-2901 to mating extrusion.	1.35	1.20	1.10
BI-4712	Mitre bracket for glazing extrusion BI-2901	1.35	1.20	1.10
BI-2042	12 ft. long, Y-strengthener slides inside any external extrusion except 45° to reinforce it.	15.75	14.20	12.60
BI-2042-3	3 ft. length BI-2042	4.50	4.05	3.60
BI-2042-6	6 ft. length BI-2042	8.70	7.85	6.95
BI-2042-9	9 ft. length BI-2042	12.15	10.95	9.70

Muffin® Fan

The dependable, low cost, largest selling fan for commercial cooling applications.

- 105 cfm free air delivery
- 4.68" square x 1.50" depth
- weight 17 oz.
- acoustical rating as low as NC-38
- more than 10 years continuous duty at 20°C
- impedance protected
- for ambients to 70°C
- UL yellow card recognized and CSA approved

Aximax® - 1, 2, & 3

Family of miniature, high-performance air movers for air-borne and other critical space/weight/performance applications.

- free air delivery from 11 cfm to 157 cfm
- optional Altivar® motors automatically increase speed with altitude
- life expectancies from 10,000 hours up at 72°C
- withstand ambients up to 257°F (125°C)
- sizes: 1½" x 1½", 2" x 1½", and 3" x 2 5/16"
- weight 4 oz., 4½ oz., and 14 oz. respectively
- meet all applicable military specifications

Models for 115 VAC, 1 phase, 400 Hz; 200 VAC, 3 phase, 400 Hz; and 115 VAC 1 phase, 60 Hz (except Aximax 1)

Propimax® 2, 3, & 3B

Large-volume and high-pressure air movers for airborne equipment.

- free air delivery from 22 cfm to 190 cfm
- offer pressures as high as 7" H_2O at cut-off
- optional Altivar® motors automatically increase speed with altitude
- life expectancies of 10,000 hours at 14.7 psia and 72°C
- withstand ambients up to 257°F (125°C)
- size/weight: 3¼" x 1½" and 6.5 oz., for Propimax 2, 3¾" x 2" and 15.2 oz. for Propimax 3 & 3B
- meet all applicable military specifications

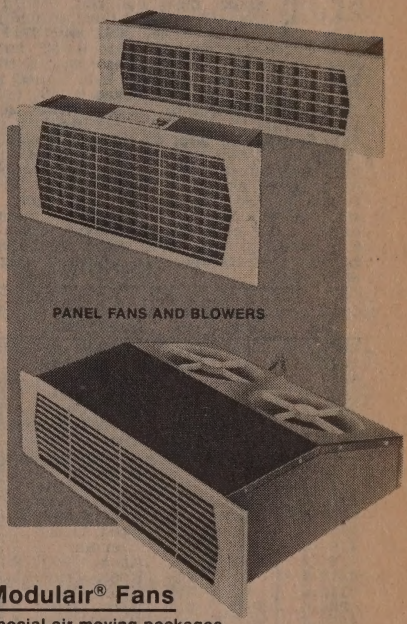
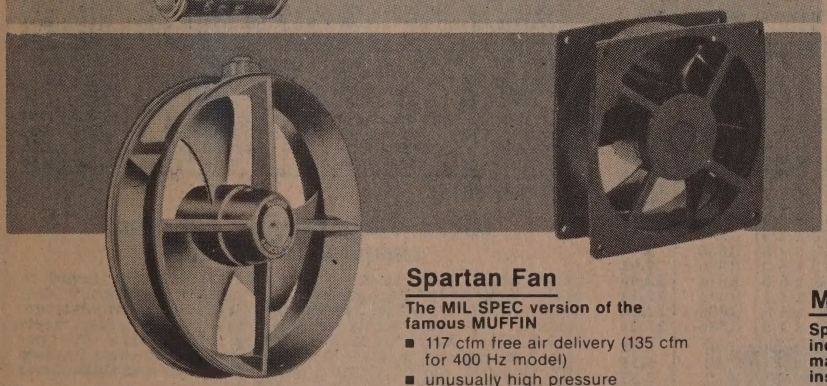
FOR MILITARY SPECIFICATION APPLICATIONS



PANEL FANS AND BLOWERS



Saucer® Fan

High volume and high pressure both, from a minimum of fan space.

- 280 cfm free air delivery
- generates pressures of over .5" H_2O
- driving motor entirely within hub for minimum depth - 2.50", dia. 7"
- pre-lubricated stainless steel ball bearings
- for ambients from −60°F (−54°C) to 255°F (+125°C)
- clamping rings at venturi ends for easy mounting
- meets all applicable military specifications

Spartan Fan

The MIL SPEC version of the famous MUFFIN

- 117 cfm free air delivery (135 cfm for 400 Hz model)
- unusually high pressure characteristics (up to .5" hg)
- dimensionally interchangeable with Muffin fan (4.68" square x 1.50")
- Double shielded stainless steel ball bearings
- lubricated for life
- highly efficient multi-slot motor
- withstands ambients from −60°F (−54°C) to 255°F (125°C)
- venturi, spiders, and hub are single aluminum casting for shock and vibration resistance
- meets all applicable mil specs for ground and shipboard

Modulair® Fans

Special air moving packages incorporate proven Rotron fans to maximize air flow and simplify installation.

- fit standard 19" relay racks and cabinets
- incorporate washable filters, and grilles for attractive appearance

MB-9100

- uses three Muffin Fans to provide 240 cfm free air delivery
- 5¼" high, 19" wide, 3½" deep

MB-9200

- uses two Feather Fans to provide 400 cfm free air delivery
- 8¾" high, 19" wide, 3½" deep

MB-5100

- uses two Feather Fans to provide 400 cfm
- special angle allows base mounting, minimizes eddying
- 5¼" high, 19" wide, 13 21/32" deep, 13 lbs.

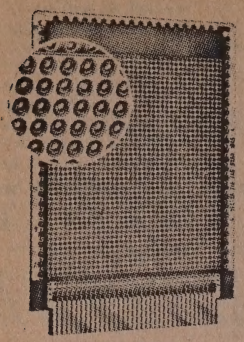
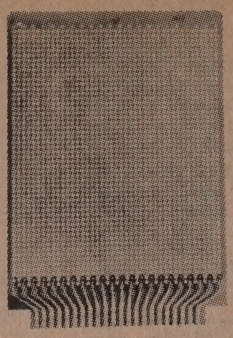
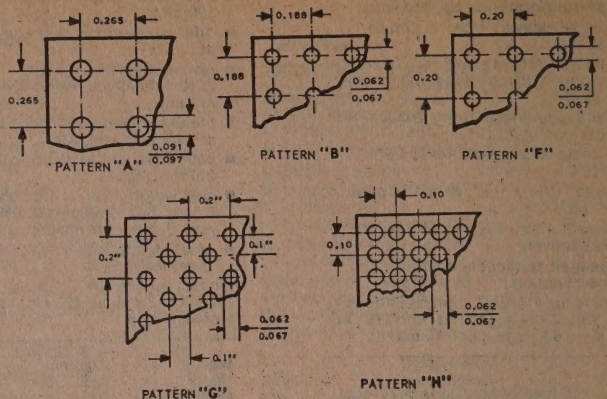
Vector Bord® and Plugboards



4112-4



3662



DIP PLUGBORDS

3682 Series: Mount Wire-Wrap* sockets. Have interleaved etched tinned power and ground buses, punched 0.042″ holes on 0.1″ x 0.1″ grid, epoxy glass material, etched nickel gold contacts. **–4** model has O/A etched tinned ground plane with etched clearance area on each hole. **3662 and 3719 Series:** Upper area is copper-free and punched with 0.042″ holes on 0.1″ x 0.1″ grid. Board material is epoxy glass; etched contacts are nickel gold. **3677 Model:** Has etched 3-hole tinned pads, interleaved buses for Vcc and ground, punched 0.042″ holes on 0.1″ x 0.1″ grid, epoxy glass material, etched nickel gold contacts, holds 24 14-pin or 21 16-pin DIP's. **–2 Model** is the same but 6½″ long. **4112 Series:** Has punched 0.042″ holes spaced on 0.1″ x 0.1″ grid, groups of 3-hole etched tinned pads, interleaved zig-zag bus, back side tinned ground plane with etched clearance holes. Ideal for soldered circuits mixing any size DIP's, transistors, or discretes. Etched contacts are nickel gold. **4066 Series:** Ideal for wrapped wire construction. Has O/A punched 0.042″ holes spaced on 0.1″ x 0.1″ grid, two interleaved tinned zig-zag buses plus back side tinned ground plane with etched clearance holes. **3690 Extender:** Permits operation of wired plugboards outside of card enclosures.

*Elco Varicon contacts. †Permanently mounted receptacle. #Has solder tabs. For 0.025″ sq. wire wrap tail model, order R644-3. *Reg. Gardner-Denver TM.

PLUGBORDS

Pre-punched plugbords speed production of printed circuit prototypes or serve as ready-to-wire structures for card mounted circuitry in any equipment using plug-in circuit cards. Plugbords are ⅛″ thick epoxy paper per MIL-P-22323 Type PEE or G-10 epoxy glass per MIL-P-18177 with pre-punched .062 holes located on alternate 0.1 centers. Contacts attached at bottom are Elco Varicon on .2 centers or 2 oz. copper etched on .156 centers with "lands" terminating around holes near bottom edge of board. Precision punched holes accept Vector T-28 MiniKlips, standard turned terminals, or eyelets.

838AWE	Epoxy Glass	22 etched	4½ x 6½	$4.25

VECTORBORD® PUNCHED TERMINAL BOARD

Available in tax XXXP phenolic (MIL-P-3115B), ivory epoxy paper (MIL-P-22324) or G-10 epoxy glass (MIL-P-18177), with pre-punched holes for breadboards and prototypes. Flame retardant. May be sawed, drilled or punched. **Pattern "A":** 0.091″ holes on 0.265″ centers. **Pattern "G":** 0.062″ holes on 0.200″ centers, staggered. **Pattern "H":** 0.025″ holes on 0.05″ centers. **Pattern "P":** 0.042″ holes on 0.1″ centers.

MICRO-VECTORBORD® PUNCHED INSULATING BOARD

Pre-punched epoxy glass or epoxy paper insulating board in choice of 1/32″ or 1/16″ thickness. Flame retardant. P pattern is ideal for dual-in-line circuit packages, sockets and other microminiature modules. EP type meets MIL-P-22324. Epoxy glass meets MIL-P-18177 XXXP type is PBE-P per MIL-P-3115. C1 types have 2 oz. copper one side; C2 has 2 oz. copper two sides. **Pattern "P":** Has .042″ dia. holes on 0.1″ grid. **Other sizes and thicknesses available on request.**

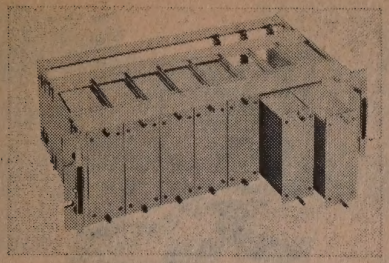
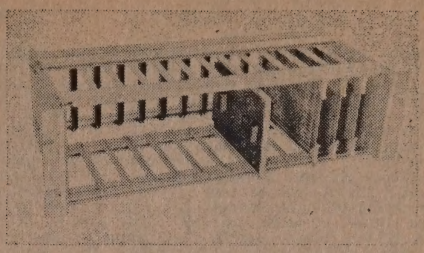
Vector Cases and Cages





VECTOR-PAK SYSTEM

The Vector-Pak System is a coordinated packaging system which provides modular cases and cages for nearly all Vector Plugbords and many industry-standard plug-in boards. Versatility, adjustability and compatibility are integral features for maximum customer benefit. All cages listed are completely assembled. Unassembled kits and parts, plus many other variations and products are available—write for catalog.

Vector No. CMA3-20 Cage—Fully assembled, 5¼″ h. x 8.9″ d., all aluminum with anodized finish, fits 19″ racks. Holds eight 2″ wide x 6½″ long x 4.6″ high modules (EFP204-6.6). Connectors mount easily on adjustable rear struts without drilling holes. Net Each.....**$56.87**

Vector No. CMA4-20 Cage—Same as CMA3-20, except holds eight 2″ wide x 9.7″ long x 4.6″ high modules (EFP204-9.7) and is 12″ deep. Net Each.....**$58.17**

Vector No. CMA3-16 Cage—Same as CMA3-20, except holds ten 1.6″ wide x 6.6″ long x 4.6″ high modules (EFP164-6.6). Net Each.....**$61.74**

EFP MODULES

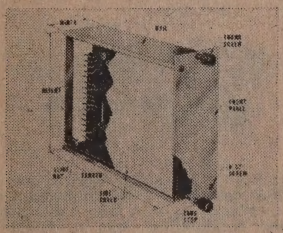
All-aluminum modules are anodized finished and have 5¼″ high front panels with thumb screws, solid rear panels for connector mounting or circuit board slotting, rear sliding side covers, plus inner multiple-grooved top and bottom rails to hold 1/16″ thick circuit boards without special bracketing.

Vector No. EFP164-6.6 Case—Has 6 circuit board grooves spaced 0.150″ apart on top and bottom rails, holds circuit boards 4.5″ wide x 6.5″ maximum length inside. Net Each.....**$6.88**

EFP204-6.6 Case—Same as EFP164-6.6, except has 9 circuit board grooves. Net Each.....**$7.08**

Vector No. EFP204-9.7 Case—Same as EFP164-6.6, except holds circuit boards 4.5″ wide x 9.6″ maximum length inside Net Each.....**$8.12**

CAGE KIT



Vector No. CA52HP-89 Cage Kit—All-aluminum 19″ rack mounting unit is 5¼″ x 8.9″ deep and has 6 bracket-mounted cross members, slotted side walls, and all assembly hardware. Use for maximum flexibility in card or module cage design. Net Each.....**$27.60**

PLUG-IN CASES

Sleek and sturdy aluminum cases have .075″ wide slots on .150″ centers across case width for screw-free mounting of circuit cards or shielding panels. Easily removable fourth side permits side cover to slide off for quick access. Clear anodized; colors available.

FT-3	Rubber bumper feet (package of 8)				.87

VECTOR-PAK CARD CAGES

19″ rack mounting cages are supplied completely assembled, ready for connectors. Models listed accommodate 1/16″ thick cards 4.5″ maximum to 3″ minimum width x 6.5″ long. Heavy extruded aluminum cross members (T-Struts) provide strength and easy infinitely variable connector spacing. 21 pairs of 4-40 connector mounting nuts are furnished installed.

Vector No. CCK-13 Card Cage—19″ wide x 5¼″ high x 8.9″ deep. Has 21 pairs of riveted anodized aluminum card guides. Net Each.....**$34.07**

Vector No. CCK-13P Card Cage—Same as CCK-13, except has 21 pairs of riveted plastic guides. Net Each.....**$34.07**

Vector No. CCK-3 Card Cage—Has 108 grooves 0.075″ wide for 1/16″ circuit cards in extruded aluminum plates mounted top and bottom. Vertically and horizontally adjustable rear cross members have 21 pairs of 4-40 nuts in captive grooves for easy connector mounting. Net Each.....**$28.82**

CARD GUIDES

Extruded plastic or aluminum guides are supplied with screws and nuts for mounting wherever required. Package of 12 with mounting hardware.

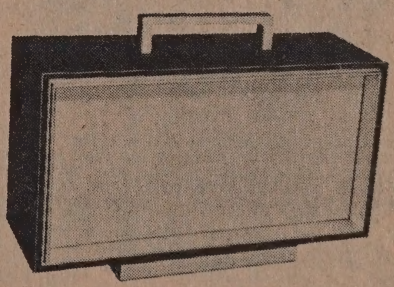
Vector No. BR20-4HP Card Guide—Plastic for 5″ long cards. Net Each.....**$2.47**

Vector No. BR20-4H Card Guide—Aluminum for 5″ long cards. Net Each.....**2.47**

Vector No. BR20-6HP Card Guide—Plastic for 6.5″ long cards. Net Each.....**2.55**

Vector No. BR20-6H Card Guide—Aluminum for 6.5″ long cards. Net Each.....**2.55**

MULTI-MOD CASES



Modular plug-in cases have tube base type plugs, metal covers, fastening hardware, and aluminum bases where indicated. Ideal for building plug-in solid-state circuits or incorporating newer circuitry without chassis rewiring.

Vector No.	Plug Type	Size, Inches	Internal Structure	Net Each
B-8	8 Octal	2″ sq. x 2″	None	$2.07

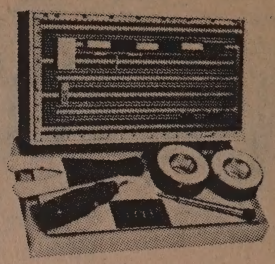
Vector IC Breadboarding Kits

40X SOLDER KIT



Unique new kit for faster circuit construction. Features P173 Wiring Pencil and "solder-thru" insulated wire. The tool is used to route and draw #36 gauge wire around tabs or component leads from a self-contained spool. A touch of solder melts through the insulation, thus assuring fast, reliable connections. Kit contains P173 Tool; one "P" pattern Padboard 4½" x 8" x 1/16" with etched, tinned copper oval pads and buses; one plain "P" pattern Micro-Vectorbord® 4½" x 8" x 1/16"; over 300 assorted terminals and pins including solderable and wrappable types; six 16-pin DIP sockets; two round 8-pin IC sockets; two 570G-1 16-pin solderless breadboard sockets; 25 R41 sockets for LED's with .018" leads; solderless slip-on contacts for .040" pins; 100 ft. of bare and insulated #22 gauge wire; 400 ft. of #36 gauge "solder thru" wire; wire jumpers; solder preforms; bus strips; DIP marker strips; foam mounting pad; pot and switch mounting loops; and 2" high aluminum chassis frame.

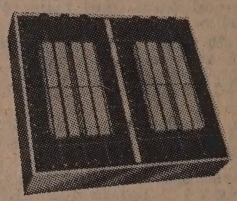
Vector No. 40X Solder Kit—Net Each.....**$66.85**

41X COMBINATION WIRE WRAPPING/SOLDER CONSTRUCTION KIT

Kit has almost everything needed to make wire wrapped circuit breadboards. Includes P.C. Padboard and hand wire wrapping tool for fast, reliable connections; 100 ft. of wire-wrapping #28 gauge hook-up wire; component lead bender; "P" pattern Micro-Vectorbord chassis 4½" x 8" x 1/16"; wire cutter and stripper; over 300 terminals including four different .025" square types and some solder types; ten 16-pin wire wrap DIP sockets; R32 socket pins; socket contacts for .018" LED's; bus strips; pot and switch mounting loops; terminal installing tools; alignment block; and 2" high aluminum chassis frame.

Vector No. 41X Construction Kit—Net Each.....**$89.25**

51X DIP PATCHBOARD



Flexible and adjustable. Handles microprocessor chips, MSI and LSI packages with .6" as well as .3" spaced leads. Accepts up to 12 DIP's. Includes 4½" x 8" glass epoxy "P" pattern Micro-Vectorbord with printed registration mounted on a 1" high aluminum frame. Has eight 24-quad Klip-Bloks (T66-96); four 48-tie-point Klip-Buses (T45-48); three 5-way power binding posts installed; four Klip-Strips (T45-4); DIP marker strips for pin identification; adapter pins (T49-1) for large leads; complete instructions and application suggestions.

Vector No. 51X DIP Patchboard—Net Each.....**$25.50**

32XA +POSITIVE PHOTOSENSITIZED ETCHED CIRCUIT KIT

Make finely detailed, professional quality etched circuits without photography or negative reversing in less than an hour. Kit has everything except hot water and yellow "safe" light. Uses supplied positive artwork including lines, dots, DIP, IC and transistor base patterns. Includes one each 1 oz. copper-clad-one-side boards 7.9" x 9", 4½" x 6½", 2.73" x 4½"; one each 2-sided boards 4½" x 6½", 4½" x 7" with .042" hole pattern; Mylar*; sufficient amonium persulfate etchant; positive developer; glass pressure plate; Rubylith; plastic etching/developing tray; and complete instructions. *Reg. DuPont TM.

Vector No. 32XA Etched Circuit Kit—Net Each.....**$26.20**

25X EXPERIMENTERS CHASSIS KIT

Large kit has big 8½" x 17" x 3/32" Vectorbord chassis with 3/32" diam. holes on .265" centers; 2" high aluminum mounting frame. Kit is ideal for experimenting with tubes, transistors, and discrete components. Most connections can be made without solder, using the included solderless T32 or T30N-2 terminals. Strong chassis accommodates large heavy components. Being solderless, most parts are reusable. Includes two power transistor sockets; four universal TO-5 type 4-lead transistor sockets; three 7-pin, three 9-pin, and two 8-pin octal tube sockets; over 100 solder terminals; bus strips; hook-up wire and patch leads; miscellaneous screws, nuts, spacers, brackets; and layout paper.

Vector No. 25X Experimenters Kit—Net Each.....**$24.78**

OUR STOCKS ARE ALWAYS KEPT COMPLETE AND UP-TO-DATE.

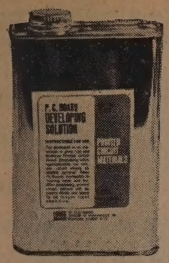
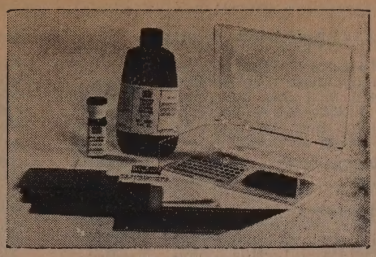
PRINTED CIRCUIT MATERIAL, KITS AND ACCESSORIES



22-234



22-296 Kit

PRINTED CIRCUIT MATERIAL AND KITS

G-C Etch Resist Ink Pen—Felt tip pen for making resist circuits directly on PC boards. Fine point black ink dries instantly. Can be removed with resist ink remover or fine steel wool.
No. 22-220—Net Each.....**$1.10**
G-C Etch Resist Sensitizer—Photo sensitizes PC boards. Air dries in seconds.
No. 22-230—3-oz. aerosol. Net..**$ 2.97**
No. 22-231—16-oz. aerosol. Net **10.67**
G-C Developing Solution—For developing patterns on PC boards. Perfect pattern in less than a minute. Makes PC board non-sensitive to light.
No. 22-234—16-oz. Net Each.....**$1.27**
No. 22-235—1 gallon. Net Each..**6.55**
G-C Etching Solution—For removing copper foil from PC boards.
No. 22-237—6-oz. Net Each.....**$1.32**
No. 22-238—32-oz. Net Each.....**3.25**
G-C Stripping Solution—Removes remaining etch resist, dye and lacquer from PC boards after etching process.
No. 22-240—2-oz. Net Each.....**$1.05**
G-C Etch Resist Lacquer—For drawing circuit patterns on PC boards.
No. 22-244—½ oz. Net Each.....**$0.85**
G-C Silicone Resin Lacquer—Provides tough protective coat on PC. Insulates, protects and prevents arcing and shorting.
No. 22-245—16-oz. aerosol. Net...**$5.49**
G-C Silver Print—For drawing or repairing printed circuits. Leaves a highly conductive coating. Air drying. Pure silver.
No. 22-246—½ Troy oz. Net...**$11.90**
G-C Printed Circuit Boards—Made of glass epoxy base. 1 oz. grade—0.0014.
No. 22-250—3″ x 5″ x 1/16″ copper one side. Net Each.....**$1.38**
No. 22-255—3″ x 5″ x 1/16″ copper both sides. Net Each.....**$1.38**
No. 22-260—4″ x 6″ x 1/16″ copper one side. Net Each.....**$2.15**
No. 22-265—4″ x 6″ x 1/16″ copper both sides. Net Each.....**$2.15**
G-C Drill Bits—For drilling component lead wire holes in phenolic and glass epoxy PC boards. High speed tool steel for long life. Standard aircraft length.
No. 22-275—No. 66 Bit (.0330″ dia.); No. 60 Bit (.0400″ dia.); No. 1/16 Bit (.0625″ dia.). Net Each.....**$2.40**
No. 22-276—No. 3/32 Bit (.0938″ dia.); No. 31 Bit (.1200″ dia.); No. 27 Bit (.1440″ dia.). Net Each.....**$2.60**
G-C Contact Frame—Assures perfect transfer of circuit negatives to sensitized 4½″ to 6½″ PC boards.
No. 22-280—Net Each.....**$5.45**
G-C Developing and Etching Tray Set—Aluminum and plastic trays for developing and etching PC boards. Includes 2 aluminum trays for developing and 1 plastic tray for etching PC boards.
No. 22-284—Set of 3 trays. Net...**$1.65**
G-C Layout Film—For printed circuit layout. Made of DuPont Mylar Matte finish.
No. 22-290—2 sheets, 8½″ x 11″...**$1.21**
No. 22-292—1 sheet, 34″ x 44″.....**4.29**
G-C Ruby Lith—Makes negatives of PC patterns without using photographic equipment. Cut and peel type. 1 sheet, 34″ x 44″.
No. 22-294—Net Each.....**$1.32**
G-C Printed Circuit Kit—Kit contains 4½″ x 3″, 4½″ x 2″ and 2¼″ x 3″ (2) copper clad boards, etching solution, etch resist lacquer, layout strips and circles, polishing pad and brushing tool. With instruction manual and etching tank plastic case.
No. 22-296—Net Each.....**$5.95**
G-C Professional Printed Circuit Kit—Kit contains: Drafting aids, tray set, etch resist sensitizer, etch resist lacquer, developing solution, etch solution, stripping solution, layout film (2 sheets, 8½″ x 11″), contact frames and 2 PC boards (3″ x 5″ x 1/16″; 4″ x 6″ x 1/16″).
No. 22-297—Net Each.....**$21.95**

PRESSURE SENSITIVE PC DRAFTING AIDS

Pressure sensitive adhesives with repeat adhesive can be re-positioned several times All patterns accurate to ±.002 (IPC Standard) or better. Net/Pkg.....**$1.27**

G-C also offers a wide range of "B" NEG negative drafting aids, donut pads, combination pack, drafting tape, combination assortments and component removing set (Quick-Pick). Write for complete information.

PRINTED CIRCUIT AIDS

G-C Master Printed Circuit Kit—Kit includes: Special printed circuit soldering iron with small tip, low-melt solder, solder washers (fluxed), special PC soldering probe, small tweezers, Print-Kote silicone resin spray No. 14-6, complete instructions.
No. 683—Net Each.....**$18.35**
G-C Standard Printed Circuit Kit—Same as above, less soldering iron.
No. 682—Net Each.....**$8.75**
G-C Solder-Wick—Desolders any connection in seconds. Absorbs molten solder instantly. Eliminates component damaging heat build-up.
No. 684—Size, 2, yellow label for miniature PC boards. Pads, .060″–.125″. Net..**$1.64**
No. 685—Size 4, blue label for commercial PC boards and connectors. Pad size, .190″ or larger. Net Each.....**$1.85**
G-C Printed Circuit Service Kit—Kit contains: 14-2 Print-Kote silicone resin, 13-2 Print-Kote solvent, 21-1 ½ Troy oz. pure silver print, 9093 solder probe tool, 9094 stainless brush/scraper, special Print-Kote solder and PC service manual.
No. 680—Net Each.....**$16.62**
G-C K27 Print-Kote Printed Circuit Spray—Spray after repairing TV printed circuit to insulate, protect and prevent shorts.
No. 14-6—6-oz. aerosol. Net Each..**$3.03**
No. 14-2—2-oz. bottle. Net Each..**1.71**
G-C Pure Silver Print—Coating containing pure silver powder as pigment. Used for making or repairing printed circuits. Used to apply conductive coating to non-conductors. Brush applicator in cap.
No. 21-1—½ Troy oz. Net.....**$11.77**
No. 21-2—1 Troy oz. Net Ea...**23.25**
G-C Copper Print—High conductive, fast drying compound to touch up printed circuits. Complete with brush-cap bottle.
No. 20-2—2-oz. Net Each.....**$2.75**
G-C Print-Kote Solvent—Only solvent for silicone resin. Dissolves and removes silicone resin from printed circuits. Can be used for thinner for 14-2 Print-Kote resin.
No. 13-2—2-oz. Net Each.....**$0.66**
G-C Print-Kote Soldering Flux—Non-corrosive liquid flux for easy PC soldering and repairing. Brush-cap bottle.
No. 12-2—2-oz. Net Each.....**$0.83**
G-C Printed Circuit Repair Solder—Specially made for printed circuits. Non-corrosive flux and low melting solder.
No. 9131—11 foot coil. Net Each..**$0.88**

SOLDER AID TOOLS

PC TYPE MINIATURE SIZE—5¾″ LONG
G-C Reamer and Scraper Tip—Twist proof chrome plated steel for scraping joints or reaming out lug holes. Ends insulated.
No. 9069—Plastic handle. Net....**$1.25**
No. 9469—Wood handle. Net.....**1.25**
G-C Brush and Forked Tip—For holding or twisting wires. Ends insulated.
No. 9073—Plastic handle. Net....**$1.30**
No. 9473—Wood handle. Net.....**1.30**
G-C Brush and Scraper Tip—For cleaning and scraping joints. Both ends insulated.
No. 9074—Plastic handle. Net....**$1.25**
No. 9474—Wood handle. Net.....**1.25**
G-C Straight Reamer and Forked Tip—Made from heat treated tool steel.
No. 9075—Plastic handle. Net....**$1.25**
No. 9475—Wood handle. Net.....**1.25**
G-C Angled Reamer and Forked Tip—Forked tip for holding or twisting wires, angled reamer on the other end.
No. 9076—Plastic handle. Net....**$1.25**
No. 9476—Wood handle. Net.....**1.25**

STANDARD TYPE SIZE—7½″ LONG
G-C Straight Reamer and Forked Tip—Chrome plated steel. Ideal for cleaning out lug holes or twisting and holding wires.
No. 9086—Plastic handle. Net....**$1.50**
No. 9486—Wood handle. Net.....**1.50**
G-C Heavy Duty Brush and Forked Tip—Stiff wire brush for cleaning; forked tip for holding wires. Special stainless steel with hardened probe.
No. 9088—Plastic handle. Net....**$1.50**
No. 9488—Wood handle. Net.....**1.50**
G-C Angle Reamer and Forked Tip—Special stainless steel fine point probe to aid in soldering and probing printed circuits.
No. 9093—Plastic handle. Net....**$1.50**
No. 9493—Wood handle. Net.....**1.50**
G-C Brush and Scraper Tip—For scraping and cleaning silicone resin from printed circuits. Fine stainless steel brush, hardened steel scraper.
No. 9094—Plastic handle. Net....**$1.50**
No. 9494—Wood handle. Net.....**1.50**

Chemicals and Cleaners

Most chemicals come in 2-oz. wide mouth bottles for easy use. The plastic cap has a brush attached. Write for prices and information on larger containers, also available.

CEMENTS

G-C Epox Cement—Super-strong adhesive cures at room temperature. Bonds metal, ceramic, glass, plastic, etc. with 3000 lbs./sq. in. strength. Resistant to virtually any environment. Good dielectric property. Mix from kit of 2 tubes in equal amounts; 3 oz.
No. 346—Net Each Kit.....**$2.48**

G-C Epoxy Glue—Super grip, fast set glue is specified by NASA for use in space program. Resists acids, alkali, grease, gas, water, etc. Mix from two tubes in equal parts, hardens in 5 min. under 150° F heat lamp. Kit of 2 tubes, approx. 4-oz.
No. 347—Net Each Kit.....**$3.03**

G-C GR-R-RIP—All new rapid bonding adhesive that makes short work of repair jobs. Sets in seconds; effective on most surfaces: Metal, plastic, rubber and porcelain.
No. 10-115—Net Each.....**$1.99**

G-C Quik-Stik—Epoxide adhesive permanently bonds ceramic, glass, plastic, wood or metal in 5 minutes. Ideal for almost any kind of repairing.
No. 10-114—Net Each.....**$1.49**

G-C Radio Service Cement—The best cement for repairing radios and torn speaker cones or replacing torn cones. Vibrationproof, waterproof and fast drying. Non-shrinking. Use also on plastic, metal, wood, etc.
No. 30-2—2-oz. Net Each.....**$0.83**
No. 30-4—4-oz. Net Each.....**1.09**
No. 34-2-S—Tube. Net Each.....**.83**

G-C Bakelite® Cement—The only cement for use on phenolics. Use on knobs, cabinets, panels.
No. 32-2—2-oz. Net Each.....**$1.27**

G-C Plastic Cement—For broken plastic cabinets, knobs, dials, and crystal assemblies, grille cloth, etc.
No. 32-2A—2-oz. Net Each.....**$0.83**

G-C Rubber-to-Metal Cement — For cementing dial drives, rubber mountings, gaskets, hose, weather stripping, etc.
No. 35-2—2-oz. Net Each.....**$0.83**

G-C Pliobond—A cold-setting, rubber-like, thermoplastic liquid that dries rapidly to a waterproof, chemically-resistant bond with permanent flexibility and very high strength. Glues all materials.
No. 43-2—2-oz. Net Each.....**$0.83**

G-C Acrylic Cement—For Lucite®, plexiglass, and acrylic materials. Strong, fast drying.
No. 40-2—2-oz. Net Each.....**$0.76**

G-C Ne-O-Prene Cement—For cementing neoprene rubber to neoprene or other products, such as metal, wood, paper, etc. Fast drying.
No. 52-2—2-oz. Net Each.....**$1.21**

G-C "Vinylite" Cement—Thermoplastic cement. Clear plastic cement for use in metals, plastics, paper, leather, etc. Sets on cooling.
No. 58-2—2-oz. Net Each.....**$0.83**

LUBRICANTS

G-C Lube-Rex—Reduces noise by preventing corrosion and prolongs life. Excellent for lubricating bearings, gears etc.
No. 1206-S—2-oz. tube. Net Ea...**$0.83**

G-C Pressurized Lubricating Oil—Ideal for hard to reach trouble spots. Will shoot oil up to six feet. Lubricates moving machinery, gears etc.
No. 10-916—6-oz. aerosol. Net....**$1.18**

G-C Reach-All Pen Oiler—Fine electronic oil for radio and TV servicing. Oil meets MIL-L-6085A specs. Tube extends and retracts; dispenses a drop or fraction. Best suited for gears, guns, fishing reels etc.
No. 984—Pen oiler. Net Each....**$1.38**

G-C Contact Burnishing Tool Kit—For servicing of relays, switches. Contains one 2-oz bottle No. 210-2 contact cleaner and burnishing tool.
No. 9339—Net Each.....**$1.21**

LUBRICANTS (CONT'D)

G-C Sili-Spray—High quality silicon lubricant. Applies light lubricant film that lasts and lasts, won't leave residue build-up. Can be used in home, office, or workshop.
No. 10-600—6-oz. aerosol.
Net Each.....**$1.53**

10-600

G-C Moisture Remover—Special ingredients remove moisture, deposit a thin lubricating film preventing further oxidation.
No. 10-700—16-oz. aerosol.
Net Each.....**$2.38**

CLEANERS

G-C Chloro-Kleen—Non-toxic powerful solvent quickly dissolves grease, dirt, oils, tar and waxes. Contains Chlorothene®.
No. 213-G—1-gallon. Net per gal..**$11.00**

G-C Audio-Video Magnetic Tape Head Cleaner—Removes dirt and oxide build-up, won't harm tape or paint finish. May be used on running tape. Comes with 6" spray extension.
No. 10-620—16-oz. spray can. Net.**$2.82**

G-C Electronic Dry Cleaner—A "dry" cleaner for use on contacts, relays and other electronic devices where residual, oily deposits are undesirable. Also an excellent degreaser and a general solvent for inks and gummy deposits on electrical or mechanical devices, such as typewriters, presses, etc. Non-flammable; does not contain carbon tet.
No. 8669—16-oz. Net Each.....**$2.53**

G-C Super Freeze Mist—Enables serviceman to pinpoint bad capacitors, transistors, and oxidized joints by cooling components. Leaves no liquid residue; non-toxic, noninflammable. Cools three times faster than other coolers.
No. 8668—6-oz. Net Each.....**$1.37**
No. 10-702—15-oz. aerosol. Net...**2.75**

G-C Relay-Kleen Contact Cleaner—"Dry" cleaner for relays and contacts. Leaves no oily residual deposit. Also a degreaser and solvent. Noninflammable; contains no carbon tet. In spray can with extension tube for hard-to-reach places.
No. 8682-16—16-oz. Net Each....**$3.84**

G-C Super Contact Cleaner—Heavy duty cleaner formulated to provide protection on all electrical and electronic contacts in switches, tuners, and relays. Preserving and lubricating residue lasts longer than that of any other cleaner.
No. 8680—6-oz. Net Each.....**$1.97**

G-C "Red" Electronic Contact Cleaner—All-purpose lubricant cleaner for contacts. Dissolves dirt, removes corrosion and leaves a protective film.
No. 210-2—2-oz. Net Each.....**$0.83**

G-C Carbon Control Cleaner—Cleans and eliminates noise in carbon volume controls without taking apart. Special applicator. Just squirt cleaner along shaft.
No. 212-2—2-oz. Net Each.....**$0.83**

DOPES, INSULATING LIQUIDS

G-C Liquid Tape—For hard-to-get-at places for high voltage insulation. Use also for anti-rust coating, weatherproofing, etc.
No. 176-2—2-oz. bottle. Net Each**$1.32**
No. 176-16—16-oz. bottle. Net Ea. **7.98**

G-C Liquidope—Clear fast drying. Gives excellent support to coil forms. Non-inductive, all wave coil dope. Use G-C No. 28 for thinner.
No. 36-2—2-oz. Net Each.....**$0.85**

G-C Q-Dope—Liquid polystyrene low-loss coil dope for RF, UHF, and VHF components. Will not change circuit values. Also a polystyrene cement.
No. 37-2—2-oz. Net Each.....**$0.76**

G-C TV Tube Koat—Fast-drying conductive coating for recoating the outside of TV picture tubes that are scratched or peeling. Also used to coat the inside of TV cabinets for prevention of high voltage leaks and static discharge. Ideal for coating at points where ground clips contact tube.
No. 49-2—2-oz. bottle. Net Each..**$0.99**
No. 49-12—16-oz. spray can. Net. **2.70**

DOPES, INSULATING LIQUIDS (CONT'D)

G-C TV High Voltage Corona Dope—For preventing corona shorts in high voltage circuits in TV sets. Easy to apply, air drying. Use on any high voltage circuit.
No. 50-2—2-oz. Net Each.....**$1.05**

G-C Red Glpt Insulating Varnish—Most common coating for solder connections, anti-corona and high voltage points. Heat resistant to 300° F.
No. 90-2—2-oz. Net Each.....**$0.88**

CHEMICAL SPRAY BOMBS

In 6-oz. aerosol spray cans.
G-C K-27 Print-Kote—TV silicone resin for printed circuits.
No. 14-6—Clear. Net Each.....**$3.03**

G-C De-Ox-Id®—Electrical contact cleaner for silver, detent, and radar contacts.
No. 19-6—Net Each.....**$2.48**

G-C Spra-Kleen—Combination cleaner and lubricant for electrical contacts.
No. 8666-16—16-oz. aerosol. Net..**$2.35**

SOLVENTS AND THINNERS

G-C Strip-X—Strips enamel from magnet wire. Just dip wire into and wipe off insulation—cleaned, ready for soldering.
No. 26-2—2-oz. Net Each.....**$1.05**

G-C Cement Thinner—Best thinner for G-C Service Cement.
No. 28-2—2-oz. Net Each.....**$0.72**

G-C Lacquer Thinner—Thins all lacquer, lacquer enamels, telephone black and gray, etc.
No. 29-2—2-oz. Net Each.....**$0.72**

G-C Radio Service Solvent—Best thinner for all cements—dissolves cement off old cones and speakers.
No. 31-2—2-oz. Net Each.....**$0.72**
No. 31-8—8-oz. Net Each.....**1.38**

G-C Q-Dope Thinner—Solvent for Q-Dope and polystyrene materials. Clear water white solvent.
No. 41-2—2-oz. Net Each.....**$0.72**

TUNER CLEANERS

G-C Tuner Bath—Cleanses and degreases tuners. Does not harm plastics and will not detune.
No. 10-901—16-oz. spray can. Net.**$2.77**

G-C Magic Vista Golden Foam Tuner Cleaner—Puts life in color and black and white TV tuners. Cleans, polishes and lubricates tuner contacts. Safe for plastics.
No. 10-800—8-oz. spray can. Net..**$2.52**

SPRA-KOAT CHEMICALS

All Spra-Koat products are supplied in 16-oz. aerosol spray cans.

G-C Zero-Mist—Instantly located defective circuit components of an intermittent nature due to temperature change. Checks components in operation without removal.
No. 8667—Net Each.....**$2.63**

G-C Corona Dope Spra-Koat—Air-drying corona dope for TV hi-voltage work.
No. 47-12—Net Each.....**$3.58**

G-C Koloid Clear Acrylic—Acrylic ester resin compound for high frequency work.
No. 8665—Net Each.....**$2.00**

G-C Koloid K-29 Hi-Voltage Resin—Air-drying clear resin spray for insulating high voltage points or parts.
No. 9123—Net Each.....**$2.50**

HEAT SINK COMPOUNDS

G-C DC-Z9 Silicone Heat Sink Compound—Lowers overall temp. level of electronic devices, seals between transistors, diodes etc. and compound will not dry out or harden. Oxides suspended in silicone dissipate "hot spots."
No. 8109-S—1-oz. tube. Net Each.**$3.25**

G-C Transistor Z5 Silicone Compound—Maintains efficient transfer of heat from transistor to chassis such as in auto radios. Applied to original installation and whenever transistors are replaced.
No. 8101-S—1-oz. tube. Net Each.**$2.92**

®Trademark: Bakelite of Bakelite Corp.; Lucite of DuPont; De-Ox-Id of De-Ox-Id Labs, Chlorothene NU of Dow Chemical Co.

TECHNICAL AIDS

DIP DESOLDERING AND EXTRACTION TOOL

REMOV-IC

Safely extracts soldered 14 and 16 pin DIPS in just seconds while preventing board discoloration, delaminating, measling and the lifting of pads. Simply place REMOV-IC over DIP and press actuator handle bringing heater blocks into contact with DIP. All heat is transferred through leads to the solder. As solder melts, the DIP is extracted. Bio-mechanical design allows easy and accurate positioning over DIPS. Positioners assure heater blocks never touch board eliminating chance of heat damage. Pre-tinned, replaceable heater blocks are designed for uniform heat output and long life. REMOV-IC is completely portable and can be used by anyone in plant or in the field – no waiting for heat-up or special set-ups.

Cat. No. 40-65 **$225.00**

INTEGRATED CIRCUIT TOOLS

INSERTIC

Designed to allow quick, accurate positioning for insertion of I.C.'s. Easy to load—will not damage I.C. and provides maximum protection to leads. Scientifically shaped for fatigue free handling—speeds up I.C. insertion time. Constructed of high impact plastic for years of service. Ideal for use in manufacturing or by service technician.

Cat. No. 9480	**Carded**	**$2.95**
870	**Boxed**	**2.50**

PUL-N-SERTIC

Inserts or extracts I.C.'s quickly, easily—without damage, while providing maximum protection to I.C. leads. Also acts as heat sink when desoldering I.C.'s. Constructed of high impact plastic. Versatile—for use on the production line, in rework area or in the field.

Cat. No. 9481	**Carded**	**$4.95**
875	**Boxed**	**4.20**

INTEGRATED CIRCUIT REMOVAL TOOL KIT

Flat I.C. Removal Tool removes or replaces 8, 10, 14, 16 and 18 pin DIP I.C.'s, and the round TO-5 outline tool that removed JEDEC 99-100 and TO-5 outline I.C.'s in plastic carrying case. Flat tool hooks under diagonal terminals and lifts circuit out. TO-5 tool clamps on circuit and holds it firmly while you desolder leads. Circuit lifts out after desoldering.

Cat. No. 9228	**I.C. Removal Tool Kit**	**$3.07**
9227	**I.C. Removal Tool**	**1.97**
9217	**TO-5 Removal Tool**	**.94**

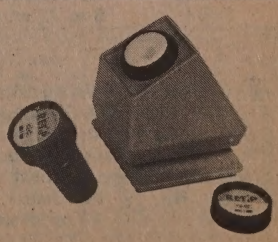
QUICK PICK

Fast, easy method of removing transistors and capacitors. QUICK PICK leaves hands free to desolder leads and hold circuit board. Made of non-magnetic material. 7 different tools fit more than 25 outlines of transistors and can capacitors. Each tool is approximately .028 size larger than part being removed. Color coded for fast easy selection.

Cat. No.		
9216	**Kit of 7 tools**	**$6.65**
9217	**Red, size: .312-.335"**	**.94**
9218	**White, size: .287-.310"**	**.94**
9219	**Blue, size: .262-.285"**	**.94**
9220	**Yellow, size: .212-.235"**	**.94**
9221	**Green, size: .222-.245"**	**.94**
9222	**Mustard, size: .162-.185"**	**.94**
9223	**Orange, size: .183-.206"**	**.94**

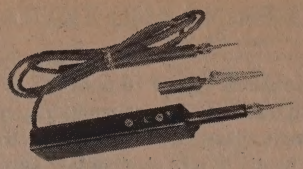
RE-TIP

Cleans soldering iron tips instantly. Simply insert hot iron tip into RE-TIP and then withdraw—all contaminants are instantly removed. Uniformly cleans tips up to ¼" diameter. Prevents contaminated solder joints. Prolongs tip life—tips solder faster, longer. With Base for use in shop, or hand held for portable use and tool box.



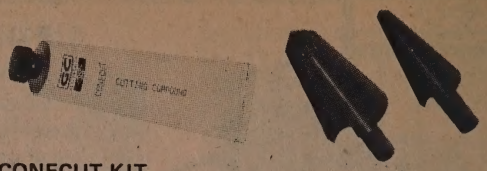
Cat. No. 9482	**RE-TIP base & cartridge**	**$6.25**
9483	**Portable RE-TIP (Refill cartridge only - bubble carded)**	**2.65**
9484	**Refill Cartridge only (boxed)**	**2.65**

TECHNICAL AIDS



PROBE IV
Check four functions with one instrument! PROBE IV lets you test for:
- ✓ Continuity
- ✓ Polarity
- ✓ Voltage
- ✓ Digital Logic

without carrying a multitude of instruments. PROBE IV is lightweight, pocket size and comes with its own protective carrying pouch. Features positive overvoltage protection in the continuity mode.
Cat. No. 5104 **$14.95**



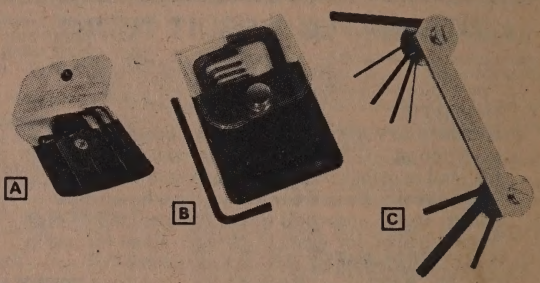
CONECUT KIT
Drill a burr-free hole in sheet or tube in seconds. No center punch hole—no pilot hole. Any number of diameter holes can be drilled—the farther the tool advances, the larger the hole. Kit contains Nos. 1 and 2 drills and Cutting Compound in vinyl carrying pouch.

Cat. No.		
3420	CONECUT KIT	$34.95
3400	No. 1 Drill (1/4"-13/16")	12.95
3405	No. 2 Drill (5/8"-1-3/16")	19.95
3425	Cutting Compound (1 oz.)	2.50

SOLDERLESS TERMINAL TOOL
Handy, heavy duty solderless terminal crimping tool and wire stripper. Crimps all sizes of terminals, strips No. 10 to No. 22 wire.
Cat. No. 8176-S **$6.99**

TEST LIGHTS
Instantly tests both AC and DC circuits. Neon glow lamp varies in light intensity according to voltages. Traces all types of trouble such as grounded lines, open circuits, short circuits.

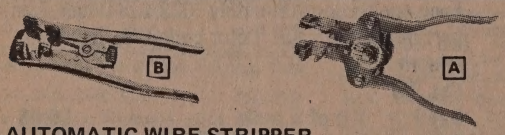
Cat. No.	(5V to 50V AC or DC)	
5105	5" leads with test prods	$1.54
5110	8" leads with alligator clips	2.25
	(60V to 550V AC or DC)	
5100	5" leads with phone tips	.85



A GC HEX-KEY AND SPLINE WRENCH KIT
For both hex and spline type screws. 12 wrenches in leatherette case.
Cat. No. 5028 **$1.75**

B GC POCKET HEX KEY WRENCH SET
7 popular size wrenches .050 to 3/16" fitted in steel case. Convenient and easy to use.
Cat. No. 9124 **$2.15**

C METRIC HEX WRENCH KIT
Kit of 9 most popular size metric hex wrenches. 0.9 mm to 3.2 mm sizes. Made of tempered steel. Complete with plastic carrying pouch.
Cat. No. 5026 **$1.75**

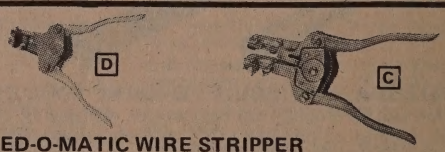


A AUTOMATIC WIRE STRIPPER
"Trig-O-Matic" stay-open feature keeps fine or stranded wires from being crushed. Off/On mechanism enables use as automatic or standard model. At touch of thumb, trigger releases and jaws go back in place. Interchangeable blades.

Cat. No.	For Sizes:	
744	12 to 22 wire	$8.84
744-A	14 to 30 wire	8.84
744-B	10 to 18 wire	8.84
744-D	16 to 22 wire	8.84
744-I	8 to 22 wire	8.84

B SPEEDSTRIP WIRE STRIPPER
With "Stay-Open" feature. New, improved wire strippers that strip fine or stranded wires without crushing. Easily replaced, precision ground steel blades. Ruggedly constructed of pressed steel.

Cat. No.	For Sizes:	
802	10 to 22 wire	$8.84



C SPEED-O-MATIC WIRE STRIPPER
Features "Fully Automatic Delayed Action" to prevent crushing fine or stranded wires. Narrow, easy-grip handles and interchangeable blades.

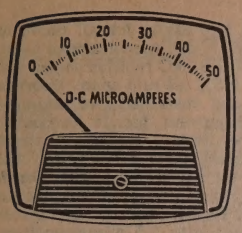
Cat. No.	For Sizes:	
766	12 to 20 wire	$8.84
766-A	14 to 30 wire	8.84
766-B	10 to 18 wire	8.84
766-D	16 to 22 wire	8.84
766-I	8 to 22 wire	8.84

D STANDARD WIRE STRIPPER
Works on 90% of all stripping jobs. Strips wires No. 8 to No. 30. Blades are precision ground steel and are interchangeable. Narrow, easy grip handles.

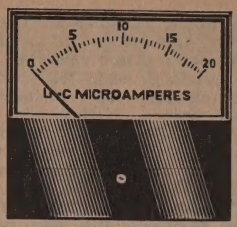
Cat. No.	For Sizes:	
733	12 to 20 wire	$7.25
733-A	14 to 30 wire	7.25
733-B	10 to 18 wire	7.25
733-D	16 to 22 wire	7.25
733-E	14 to 18 wire	7.25
733-I	8 to 22 wire	7.25

GENERAL ELECTRIC Panel Meters

SERIES 250 AND 251 DC PANEL METERS—TAUT BAND



250 BIG LOOK®



251 HORIZON LINE®

Easy-to-read DC panel meters in two styles for all panel and control applications. All DC meters have self-shielded movement with taut-band suspension. All meters meet ANSI Specifications C-39.1. **Accuracy:** ±2% of full scale. **Overload:** DC Voltmeters, 20% momentary and sustained; AC ammeters (momentary), 10 times the rated current for 10 consecutive intervals of ½ second with one minute interval between successive applications; AC ammeters (sustained), 20% for 8 hours. **Scale Data:** 90° rotation. **Insulation Level:** 2600 V rms hi-pot. **Response Time:** 3 seconds maximum for microammeters; 2 seconds maximum for other DC ratings. **Damping:** 40% maximum overshoot with minimum damping factor of 2.5.

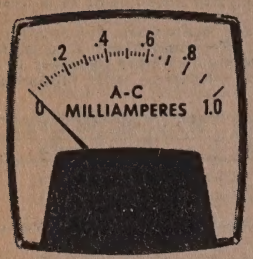
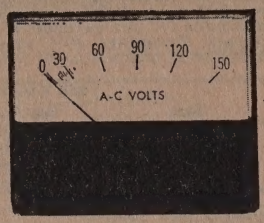
GENERAL ELECTRIC Panel Meters

SERIES 250 AND 251 AC PANEL METERS



250 BIG LOOK®



251 HORIZON LINE®

Handsome, easy-to-read meters in two styles for all panel and control applications. All meters meet ANSI specifications C-39.1. **Accuracy:** AC iron vane type, ±2% FS; AC rectifier type, ±3% FS; expanded scale voltmeters, ±0.5% of mid-span. **Overload:** AC voltmeters, 20% momentary and sustained; AC ammeters (momentary), 10 times the rated current for 10 consecutive intervals of ½ sec with one minute interval between successive applications; AC ammeters (sustained), 20% for 8 hours. **Scale Data:** 90° rotation. **Insulation Level:** 2600 V rms hi-pot. **Burden Data:** AC ammeters, 5 amps, 0.5 VA, 0.5 power factor lagging; AC voltmeters, unity power factor. **Response Time:** 2.5 seconds max. **Damping:** 40% max. overshoot with 2.5 minimum damping factor.

SERIES 254 AND 255 DC PANEL METERS—PIVOT AND JEWEL

Pivot and jewel DC panel meters available in two different styles. All meters meet ANSI Specifications C-39.1. **Accuracy:** ±2% of full scale. **Overload:** DC voltmeters, 20% momentary and sustained; DC ammeters (momentary), 10 times the rated current for 10 consecutive intervals of ½ second with one minute interval between successive applications; DC ammeters (sustained), 20% for 8 hours. **Scale Data:** 90° rotation. **Insulation Level:** 2600 V rms hi-pot. **Response Time:** 3 seconds maximum for microammeters; 2 seconds maximum for all other DC ratings. **Damping:** 40% maximum overshoot with minimum factor of 2.5.

J-B-T® VIBRATING REED FREQUENCY METERS

J-B-T Vibrating Reed Frequency Meters are used extensively in radio, telephone and television service, on engine generator sets, in laboratories, in many types of electronic equipment—wherever constant or known frequency is important to efficient operation of equipment.

MODERN FB SERIES VIBRATING REED FREQUENCY METERS

Modern style; made for easy reading to full limit of accuracy. Permanently calibrated; no temperature compensation needed. Screw term. Typical models listed; others available on order.

J-B-T Model	Range, Hz	No. of Reeds	Standard Voltage	Imped., Ohms	Accuracy ± %	Case Size	Net Each
30-FB	48–52 & 58–62	10	100–130	16,500	0.3	3½″	$41.50
31-FB	58–62	5	100–130	16,500	0.3	3½″	34.50

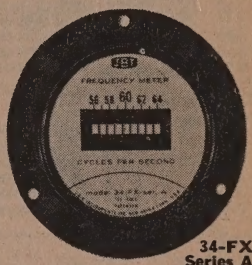
31-FX

MODERN DESIGN FG SERIES FREQUENCY METERS

Modern appearance with bright textured metal insert below the dial, as illustrated for model 31-EGW-5 elapsed time meter. Has same accuracy and electrical characteristics as corresponding FX frequency meters. Design easily installs in 3½″ wide, 3″ high hole. Three typical FG models listed below, others available on order.

30-FG	48–52 & 58–62	10	100–130	140	0.3	3½″	$40.75
33-FG	380–420	9	100–130	130	0.3	3½″	49.25
34-FG	56–64	9	100–130	140	0.3	3½″	40.50



34-FX Series A

NEW HIGH VISIBILITY EG SERIES ELAPSED TIME METERS

New modern style, matches the look of the new FG series frequency meters. Dimensions are same as those for FG series meters, while mechanical specifications match 31-EXW series meters, (see below). Models listed are examples; other voltages, frequencies and numerals on request.

J-B-T Model 31-EGW-5—Five wide digits, 0–9,999.9 hours, 60 Hz, 110–125 V. Net Each. **$27.00**

J-B-T Model 31-EGW—Six wide digits, 0–99,999.9 hours, 60 Hz, 110–125 V. Net Each.. **27.50**

J-B-T Model 13A-234—Half bezel adapter, separate black molded frame and hardware for picture window appearance on any FG or EG meter. Net Each..... **$3.75**

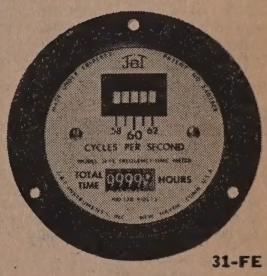
J-B-T Model 13A-239—Same as above, but metal construction for FG and EG meters. Net Each..... **$3.75**

ELAPSED TIME AND 5-REED FREQUENCY METERS 31-FE AND 31-FEX-1

This unique panel instrument combines the elapsed time or running time meter with frequency reeds. It is widely used on motor generator sets and on electrical equipment where maintenance routine calls for periodic servicing. Reads 0–9,999.9 hours; 58–62 hertz at 100–130 volts. Self-starting. Tenths shown in red numerals, all others white numerals on black background. Meter panel 2⅛″ (2⅜″ panel mounting hole recommended); depth behind flange, 4¹⁹⁄₃₂″. Front mounting same as Model 31-F. Variations with 7, 9 or 11 reeds on special order only. 3¼″ metal case.

J-B-T Model 31-FE—Net Each..... **$50.00**

J-B-T Model 31-FEX-1—Same, but with 3½″ metal flange permanently attached for MIL-M-6B mounting. Net Each..... **$54.50**



31-FE

60-Hz ELAPSED TIME METERS 31-EX, 31-EX-200, 31-ES, AND 31-EHXX

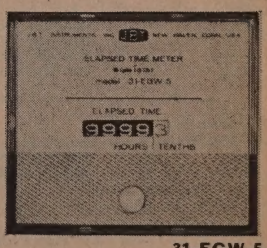
To record operating time of AC electrical and electronic equipment, instrument registers in 1/10th hour steps to 9,999.9 hours, then automatically resets. Shows tenths in red numerals, all others white on black background. Molded case fully encloses all parts. Popular for tube life, TV equipment, punch presses, conveyors, oil burners, maintenance schedules, etc. Meter panel 2¹¹⁄₁₆″ (2¾″ hole recommended); depth behind flange, 3¹⁄₃₂″.

J-B-T Model 31-EX—110–125 volt. Net Each..... **$22.75**

J-B-T Model 31-EX-200—200–240 volt. Net Each..... **$31.50**

J-B-T Model 31-ES—(Square case 3″ x 3″) 110–125 volts. Net Each..... **$23.75**

J-B-T Model 31-EHXX—Same as Model 31-EX, but ruggedized and sealed case. Has glass-to-metal sealed construction with flat front and 3½″ dia. separable flange. Heavy-duty solder terminals. Vacuum chamber checked. Max. 1000 V rms between terminals and case. Barrel dia. 2¹¹⁄₁₆″ to fit 2¾″ panel hole with 2⅛″ depth behind panel. Three flange holes take 6-32 screws on 1.58″ radius. Net Each..... **$30.00**



31-EGW-5

400-Hz SEALED, ELAPSED TIME METER MODEL 33-EHXX

Stable 400-Hz elapsed time meter in 3½″ flanged case. Fully enclosed design has sealed, glass-to-metal construction with flat glass front. Reads 0–9,999.9 hours in 1/10th-hour steps; 110–125 volts, 400 Hz. Case slightly larger than 31-EHXX. **$112.25**

J-B-T Model 33-EHXX—Net Each.....

WIDE NUMERAL, ELAPSED TIME METER MODELS 31-EXW AND 31-EXW-5

Combines basic Model 31-EX (see above) with easily-read, wide 6-digit face design. Distinctive, contemporary dial shows tenths in red on white; units in white on black. Six digits read 0–99,999.9 hours, then automatically resets; 110–125 volts, 60-Hz operation. Black, molded 3½″ case interchangeable with FX Series meters. **$23.25**

J-B-T Model 31-EXW—Net Each.....

J-B-T Model 31-EXW-5—New model interchangeable electrically and mechanically with 31-EX and 31-EXW. Five wide digits, registers 0–9,999.9 and automatically resets. For 60 Hz, 110–125 volts. Net Each..... **$21.75**

400-Hz BROAD AND VERNIER INDICATOR 41-FX-42 (NOT ILLUS.)

Widely used in commercial and military testing, this combination unit provides two windows: Broad 300–500 Hz, 21 reeds in 10-Hz steps; and, for a vernier effect, 380–420 Hz with 21 reeds in 2-Hz steps. Back molded case has flush front; 4¾₆₄″ w. x 4¾₆₄″ h. x 2¹⁷⁄₃₂″ depth behind panel, over studs. **$163.50**

J-B-T Model 41-FX-42—Standard model for 100–130 volts. Net Each.....

J-B-T Model 41-FX-42—Special, with 4 studs for 200–240 (7.7 watts), 115 (4.5 watts) and 30 volts (2 watts). Net Each..... **$183.75**

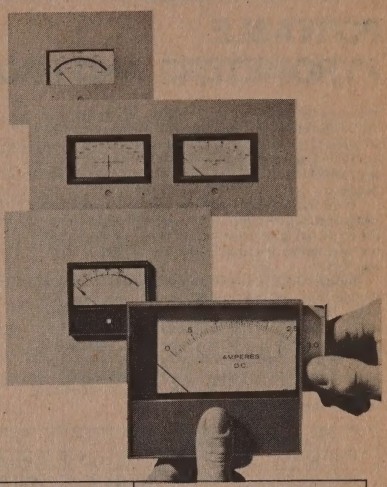
SERIES 7000 PANEL METERS



Series 7000 brings you all that's new in analog panel meters—distinctive style and functional flexibility that offer this exclusive combination of advantages:

- **Three-way choice of mounting—front mount, bezel mount, lens mount.**
- **Phenolic fronts and cases—rugged and reliable.**
- **Glass windows—scratch-proof, free of static electricity.**
- **Front decorator plates—flat black, two shades of grey, tan, and olive.**
- **Insertable scales—field changeable, reduce inventory, eliminate damage.**
- **Taut band movement and 1% tracking—standard in the most popular DC ranges.**
- **Self shielding—for mounting on either magnetic or non-magnetic panels.**

Series 7000 panel meters are available in four sizes: Model 7025 (2½"), Model 7035 (3½"), Model 7045 (4½"), and Model 7055 (5½").

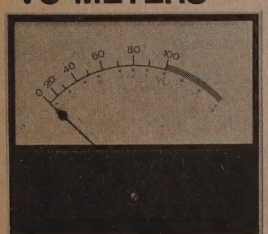
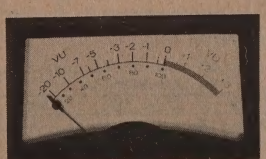
VU METERS



Series 7000 Meter
Shown with Type B scale;
A scale also available.



Model 561(5") Model 361(3½")
Shown with Type A scale;
B scale also available.

API VU meters offer the industry's most advanced styling while conforming to all specifications of ANSI Standard C16.5-1954 entitled "American Recommended Practice for Volume Measurements of Electrical Speech and Program Waves."

All models are available with either Type A scale for recording applications, or Type B which emphasizes per cent modulation for broadcast use. The meter reading is zero VU, or 100%, with application of 1.228 volts across a 3600 ohm resistor in series with the VU meter. This reading represents 4 db above 1 milliwatt into 600 ohms.

api ELECTRONIC PANEL METER

PORTABLE PYROMETERS AND PROBES

New portable pyrometer Models 3030 and 6020 feature standard API taut-band, 1% accurate meters in rugged, attractively styled cases. These self-contained, thermocouple actuated units allow quick spot checking of temperature. No power supply is needed.

Both models have bimetal and thermistor compensation for ambient temperature changes. Meters are mirrored and protected by glass windows. Cases are aluminum trimmed ABS plastic, gray, with a hair finish.

Model 3030 weighs approximately 1 pound. Dimensions are 5.5" wide by 2.3" high by 5.8" long. The instrument is calibrated for 3.85 ohms external thermocouple resistance.

Model 6020 is 7.5" wide by 3.4" high by 8.2" long, weighing approximately 3 pounds. Calibration is for 3.85 ohms in type E thermocouple ranges, 10 ohms in types K and R with external adjustable resistor strip.

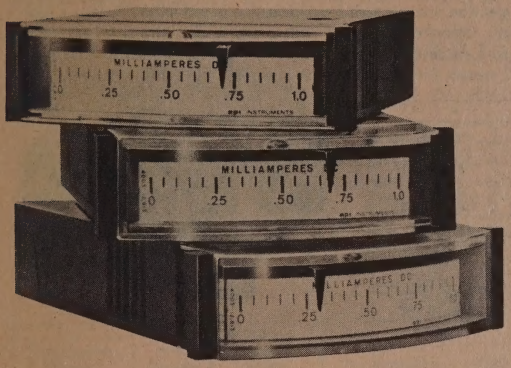
LFE CORPORATION

api SERIES 1000
EDGEWISE PANEL METERS



- **Stackable**
- **1½", 2½", and 3½" sizes**
- **No-fuss mounting**
- **Easy dial changing**
- **18 stock ranges**
- **Tough, high temperature polycarbonate case**
- **Resists shock and vibration**

This new API Series 1000 line of edgewise panel meters has been designed to satisfy the increasing demand for attractive and accurate analog display in a minimum of panel space. Because they're new, these edgewise meters provide a number of user benefits available nowhere else.

A novel case design permits snap-together access to the dial and mechanism for convenient dial changing. The case itself—clear front window and black base—is molded from high-impact polycarbonate for immunity from shock, chemicals and flame.

The unique flat d'Arsonval mechanism with pivot-and-jewel suspension provides 2% accuracy for either vertical or horizontal scale orientations. Unsurpassed stability makes a front zero adjust unnecessary, freeing the dial area for maximum visibility.

Panel mounting has been simplified to the ultimate in the Series 1000. Two mounting clips are attached without screws to the meter case after it has been inserted through its cutout; then the clips are tightened against the panel. Total time: less than half a minute!

**Scale 0-100%

The above part numbers are for horizontally mounted scales. For vertical scales change the last two digits of the part number from 00 to 50. The price does not change.

MODEL 1015

MODEL 1015 features one-piece dial, rear zero adjust, red dragon-tooth pointer, solder terminals and clip-on mounting. Comes complete with mounting hardware and bezel. Panel cutout .500" x 1.650". Meter depth 2.115 inches from front of panel.

MODEL 1025

MODEL 1025 has identical features to 1015 but in a larger size for added visibility and resolution. Bright, uniform one-lamp illumination available; specify 6V or 12V, add $5.00 to the above prices. Comes complete with mounting hardware and bezel. Panel cutout .680" x 2.56". Meter depth 3.170 inches from front of panel.

MODEL 1035

MODEL 1035 features stepped (anti-parallax) dial, front zero adjust, red dragon-tooth pointer and clip-on mounting. Comes complete with mounting hardware and bezel. Rear zero adjust available. Bright uniform one-lamp illumination available; specify 6V or 12V, add $5.00 to the above prices. Panel cutout .680" x 3.30". Meter depth 3.225 inches from front of panel.

LFE CORPORATION

SERIES 4350 DIGITAL PANEL METERS

- ½" planar 7-segment display
- MOS-LSI technology
- Switchboard reliability
- mV, μA, mA and Ω
- Rugged polycarbonate case

Series 4350 is the designer's choice for style, reliability and economy. The crisp, green 7-segment display provides unmatched readability and eye ease, as well as 100,000 hours **proven** lifetime. Very high input and line noise rejection provide stable performance in industrial locations near contactors, motors, spark gaps, etc. Conservative specifications and a wide choice of standard ranges makes the Series 4350 a sure success in new applications. All logic inputs and outputs are TTL/DTL compatible. Size 4" wide x 2 1/8" high; depth given in table below.

HOW TO ORDER

Assemble a 12 digit part number. The first four digits are the model number. The next four digits identify the range and are listed below. The last four numbers are -0000 except for ohm ranges where it is -0040 and except for BCD output options listed below. For example a model 4354 DPM with range of 0 to 500 Ω with BCD output is ordered by part number 4354-6004-0240. Accessories are ordered with the part numbers listed below.

MODEL NUMBER			4350	4352	4354	4359

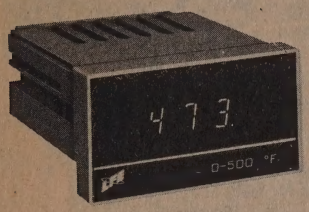
LFE CORPORATION

MODEL 4354 DIGITAL TEMPERATURE INDICATOR

MODEL 4355 DUAL CONTROL COMPARATOR

MODEL 4354 DIGITAL TEMPERATURE INDICATOR



The new LFE Model 4354 Digital Temperature Indicator provides low-cost digital display for RTD (resistance temperature detector) probes. The 4354 provides precise, easily read temperature measurements for ovens, laboratories, furnaces, processes, analytical instruments, environmental chambers, etc. The clean modern styling fits right in with today's panel designs. With digital precision, the full capabilities for high accuracy and repeatability offered by RTD probes can be realized. The 4354 is designed to be used with LFE's type 1 (100 ohm at 0°C, 3850 PPM) platinum RTD probe for temperature measurements in the ranges −80/+299 or 0/+499 in °F or °C. A standard feature of the 4354 when temperature measurements exceed 299 or 499 is for the display to flash at the reading rate, to provide an eye-catching over-range indication.

MOS/LSI circuitry in this low-cost instrument, combined with a unique feedback circuit, provides high-accuracy, single slope, analog-to-digital conversion technique commonly found on expensive laboratory instruments. Rugged, low voltage, low power electrofluorescent tubes provide a ½" high planar 7-segment display of remarkable clarity and brightness. Widely specified for dependability in calculating equipment, these lamps are rated for 100,000 hour life, even at high ambient temperatures. A standard green window provides a pleasing display which is matched to peak visual sensitivity and best focus of the human eye.

Standard features include negative polarity indication, display hold, print command, and over-range. Low cost options include stored BCD outputs. All inputs are DTL/TTL compatible.

Temperature Range	Probe Current	Maximum Input Voltage	Part Number	Price*
0 to +499°F	1 mA	±10V	4354-6604-0020	$195.00
0 to +499°C	1 mA	±10V	4354-8004-0030	195.00
−80 to +299°F	1 mA	±10V	4354-6904-0020	195.00
−80 to +299°C	1 mA	±10V	4354-6904-0030	195.00

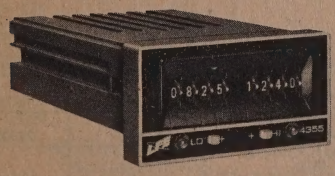
MODEL 4355 DUAL CONTROL COMPARATOR



The LFE Model 4355 Dual Control Comparator adds limit-set, GO / NO-GO, or ON/OFF control capability to any measuring device with TTL-compatible BCD output: digital panel meters, digital voltmeters, up/down counters, scalers, digital temperature indicators, and other process digitizers. Although the Model 4355 has been designed to complement the appearance and function of the LFE 4350 Series digital panel meters, it will work equally well with all types of DPM's with the same standard BCD output capability.

The Model 4355 makes two simultaneous thumbwheel-input comparisons with one 4-digit (or 3½-digit) input word, triggered by the trailing edge of a logic 1 pulse. Algebraic sign of each setpoint is independently selected with two front-panel switches.

The HIGH setpoint LED indicator and relay are switched when the BCD input is equal to, or greater than, the HIGH thumbwheel setting. The LOW setpoint LED indicator and relay are switched when the BCD input is equal to, or less than, the LOW thumbwheel setting.

One form C (DPDT) reed relay output for each setpoint is available for maximum circuit isolation and wiring flexibility. A TTL-compatible logic output for each setpoint also signals comparison status.

One LFE Model 4352 DPM (3½-digits) will drive one or two 4355 Dual Control Comparators, providing four setpoints or three zones for batch control. A standard 24" cable is available to interface one 4352 DPM with one 4355 Comparator.

Input	Supply Voltage	Part Number	Price*
Dual ±9999 thumbwheel setpoints	+5 VDC	4355-2300-1200	$175.00

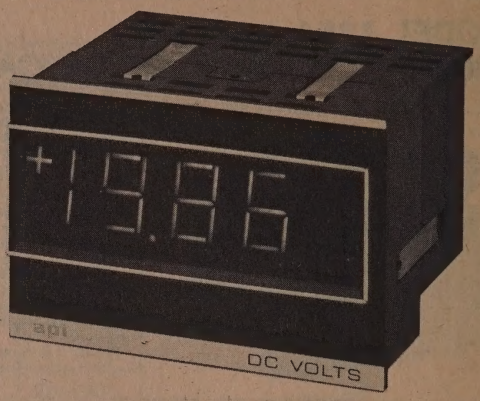
LFE CORPORATION

MODEL 4304 DIGITAL PANEL METER
MODEL 4310 DIGITAL COMPARATOR

MODEL 4304 DIGITAL PANEL METER

- Best readability among DPM's
- 7/8" seven-bar planar display
- High noise rejection
- BCD output standard DTL/TTL compatible
- 0.1% accuracy
- Autopolarity
- Print Command
- Display hold
- Programmable decimal points
- 1000 megohms input impedance
- Front or rear panel mounting
- Separable power supply



This new LFE digital panel meter is a precision measuring instrument with 4 digits for a display to 1999. Its unique segmented display, in a small package, offers unmatched clarity.

Analog to digital conversion with a sample and hold input amplifier provide excellent long term stability and high noise rejection for high accuracy measurements at an input impedance of 1000 megohms. Other standard features include a DTL/TTL compatible BCD output, autopolarity, display hold, print command, polarity and overrange outputs, and selectable decimal points.

Model 4304 easily adapts to users' equipment styling through either front or rear panel mounting, with attractive and easy to use hardware. All controls are included in the window area to eliminate unsightly adjustment holes in the panel when mounted from the rear.

Readings exceeding 1999 are indicated by illumination of the overrange lamp. Decimal points can be selected by either an internal or external connection to the common.

LFE digital panel meters provide maximum benefits in applications requiring repeatable accuracy, high resolution, extended operating temperatures, and fast response time. In addition, Model 4304 offers a large upfront display. Individual requirements can be satisfied by special ranging and zero offset. The 4304 is 4½" wide x 3" high. Depth behind the panel is 4.4" or 2 3/8" with the power supply separated. An input connector is not needed for operation, unless desired.

Mounting holes in the power supply case permit remote installation up to 24" from the display with accessory interconnecting cables. A connector, required for the BCD and decimal outputs, can be attached to the case and is listed under accessories.

STANDARD VOLTAGE RANGES

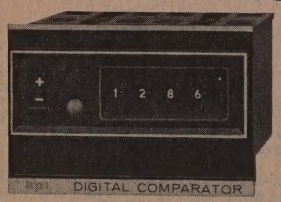
Interconnecting cable (power supply to display) – 12" long	1126-278	$9.50
– 24" long	1126-279	9.50
Input connector	1125-244	3.50
BCD connector	1125-246	3.50
Bezel trim (rear panel mounting only)	1125-208	1.60

MODEL 4310 DIGITAL COMPARATOR



LFE Model 4310 Digital Comparator is a compact, panel-mounted instrument that compares BCD input data to a preselected limit, providing On/Off control.

The instrument algebraically compares both the sign and the BCD data of the input signal. A polarity switch permits selection of the sign, either plus or minus, of the limit point. Limit action occurs when the input data reaches the limit point of the preset sign. Example: With a limit point of –.500, output conditions do not change until the input rises from a more negative value in a positive direction to –.500.

Model 4310 compares on command. Comparison to input data is made but not transferred to the output until a compare command pulse is received. Comparison outputs include 2 ampere relay contact closure, a logic level change, and lamps for above and below limit point indication.

LFE offers a series of comparators which provide a choice of limit selection method and number of digits. Adjustable limits are set with thumbwheel switches on 3½-digit and 4-digit models. For applications requiring programmable limits by remote sources, or where fixed limits are adequate, 3½-digit and 4-digit models are provided without control switches and indicators. A printed circuit connector is all that is required for hard wiring of fixed limits or making remote connections.

Part Number	Single Limit Comparator Description	Range	Input Data	Price*
4310-1020-0000	Adjustable limit (high limit)	±0-1999	3 digits, overrange, polarity	$195.00
4310-1120-0000	Fixed or external limit (high limit)	±0-1999	3 digits, overrange, polarity	125.00
4310-2020-0000	Adjustable limit (high limit)	±0-9999	4 digits, overrange, polarity	231.00
4310-2120-0000	Fixed or external limit (high limit)	±0-9999	4 digits, overrange, polarity	145.00

LFE CORPORATION

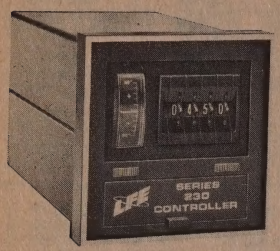
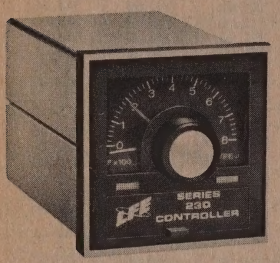
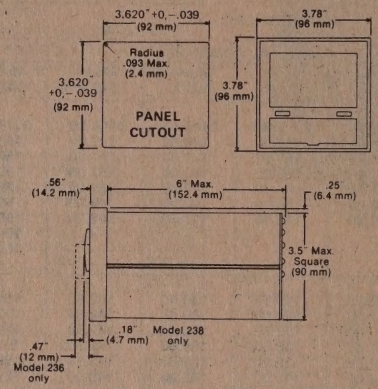
SERIES 230 TEMPERATURE CONTROLLERS





COMPACT DESIGN

Quarter DIN
cutout and bezel dimensions save panel space



LFE's new SERIES 230 temperature controllers are ideally suited for the exacting requirements of thermal processes. They represent the latest state-of-the-art electronics technology backed by LFE's long experience in process control.

LFE SERIES 230 temperature controllers use reliable solid-state design with advanced integrated circuit technology that minimizes heat and component failure and reduces total components. You get precise and ± ¼° consistent control of temperature to assure constant product uniformity, high product quality, and profitable throughput. The controller extends only six inches in depth from the front of the panel. Plug-in construction enables simple field maintenance and rapid replacement if it should become necessary.

Digital and analog setpoint versions are available. Analog set models have a full scale temperature indicator. Digital set models have a thumbwheel setpoint with a ± 50°F or °C deviation indicator. Deviation or process alarm functions are available. LFE SERIES 230 controllers provide proportional, integral, and derivative action. Controller adjustments conveniently located upfront are proportional band, rate time (derivative), reset (integral), cycle time, alarm setpoint, and secondary setpoint.

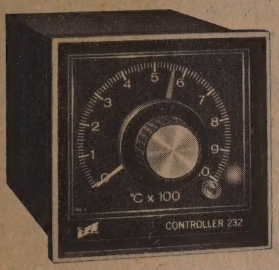
LFE CORPORATION

TEMPERATURE CONTROLLERS

MODEL 232



The Model 232 is a Compact, Solid State Controller available in a variety of control functions. It is suitable for temperature control of processes up to 3,000°F. An easily-read extra long 6.5 inch 250° arc indicator scale provides full scale temperature readout. A press-to-set knob allows the setpoint to be set on the indicator scale. The 232 controller saves panel space with its ¼ DIN dimensions. The 232 controller is available with on-off or time proportioning output.

The Model 232-20 is a highly compact solid-state Temperature Controller designed for applications requiring two separate but related control actions from one control unit. An auxiliary setpoint is adjustable 0 to 5% above or below the primary setpoint.

The 232-F is a Factory Mutual approved temperature limit instrument. It is designed, specifically to protect people and equipment by shutting off heating equipment and/or sounding an alarm when the limit setpoint temperature is exceeded. (FM # 22945)

External indicator output	232	$ 5.00

MODEL 227

The Model 227 Temperature Controller is especially designed for applications requiring a moderately priced controller with two-mode (proportional plus integral, or reset) stability. The 227 will accept Thermocouple or RTD (Resistance Temperature Detector) sensor inputs, and is available with any one of five outputs; Proportioning voltage, proportioning current, on/off relay, and phase fired or zero crossing pulse output. Full-scale temperature indication is provided on a large 3" edgewise display. It is also available with integral power pack especially designed for applications requiring an economical controller for loads up to 20 Amperes.

Control Mode	OUTPUT FORM	Price* ** Package A	Price* ** Package C
On/Off	On/Off Relay output. SPDT contacts rated at 2 amps, 120 VAC noninductive.	$176.00	$162.00
	On/Off triac, 9-amp solid state control element for resistive loads up to 240 VAC with integral power pack.	$181.00	–
Single Mode	Time proportioning, 9 amp solid state control element for resistive loads up to 240 VAC with integral power pack.	$181.00	–
Two Mode	Proportioning voltage output: 0 to 5 volts DC into a min. load of 1K.	$169.00	$153.00
	Proportioning current output: 0 to 5 mA DC into a max. load of 3K.	$169.00	$153.00
	SCR Driver phase-fired output—two isolated pulse outputs to drive SCR gates. Pulse amplitude 10 volts, 10 micro-second duration.	$188.00	$173.00
	SCR Driver zero-crossing output—two isolated pulse outputs to drive SCR gates.	$205.00	$190.00
	Proportioning phase-fired integral control. 9-amp solid-state control element for resistive loads up to 240 VAC with integral power pack.	$209.00	–
	Proportioning zero crossing fired integral control. 9-amp solid-state control element for resistive loads up to 240 VAC with integral power pack.	$229.00	–
	Proportioning phase-fired 20 Amp integral control for resistive loads up to 240 VAC with integral power pack.	$271.00	–
	Proportioning zero-crossing fired 20 Amp integral control for resistive loads up to 240 VAC with integral power pack.	$290.00	–

Package configurations

EDGEWISE PANEL METERS MODELS 3623 AND 3643

Molded polycarbonate case with top and bottom formed steel covers; two-piece offset scale for parallax-free readings; self-contained mounting lock eliminates need for external hardware; front bezel zero adjust. **Accuracy:** 2% of full scale with standard pivot and jewel suspension; 1% of full scale with taut band suspension available on special order. **Scale Length:** 2.6". **Size:** 3.60" w. x 1.23" h. Specify vertical or horizontal mounting type.

STACKING EDGEWISE PANEL METERS—MODELS 1622, 1642, 1921 AND 1941

Stacks horizontally or vertically. Features self-shielding core magnet meter movement to eliminate protruding barrel. Scale extends nearly to full width and height of meter. Steel housing, plastic window, dust-proof construction. Insulated terminals. **Accuracy:** ±2% FS. **Dielectric:** 1,500 V rms. **Terminals:** 1622 and 1642 have 6-32 studs; 1942 and 1941, solder type. **Size:** 1622 and 1642: 2⅝" w. x ¾" h.; mtg. ctrs. 2¹¹⁄₁₆"; cutout .562" x 2.312"; scale 1.85" lg. 1921 and 1941: 1.81" w. x 2.51" d. x .50" h.; mtg. ctrs. 2.28; cutout .525" x 1.718"; scale 1.370" lg.

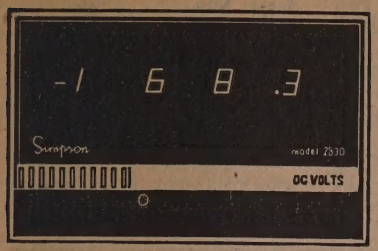
Simpson Panel & Portable Meters

INSTRUMENTS THAT STAY ACCURATE



MODEL 2830 DIGITAL PANEL METER

Reliable 3½ digit digital panel meter for DC voltage and current measurements. Solid state circuitry with IC's for fast and accurate measurements. Features include automatic polarity and out of range indication. High input impedance and fast response time. Zero span and balance adjustable from front panel. Non-blinking type meter has bi-polar display and LED readout (.33" high). AC line operated and built-in power supply. Programmed cyclical burn-in. **Accuracy:** 0.1%. **Response Time:** Up to 1000 counts, less than 600 millisec. **Power Required:** 117/243 VAC ±10%, 50–400 Hz, 6 watts. **Size:** 4.34" w. x 2.813" d. x 2.70" h.; panel cutout, 2.813" x 4.375".

*Greater than. †Based on numerical indication of 1000. Bias current, 2 nA max. at reference conditions. Input isolation, 250 V rms between power line ground and circuit ground.

Options Available: Readout assembly can be remotely mounted. A/D conversion board available separately and with BCD output. Parallel BCD output; DTL/TTL compatible (1-2-4-8 positive logic). Logic Level: Logic "0" = 0 to +0.5 V. Logic "1" = +2 V to +5.25 V. Power supply board is separate; unit can be furnished with or without power supply, or for different input power requirements.

MODEL 2100 4½" PORTABLE INSTRUMENT WITH BUILT-IN CENTURY SERIES METERS

Best suited for electric measurements in schools, labs and industry. Features large, easy to read scale, knife-edge pointer; non-fogging glass lens. Self-shielded DC and AC rectifier movements. Four color-coded, multi-range binding posts, one common and 3 for range selection. Rear hole permits mounting fuse holder; nylon plug covers hole when not in use. **Accuracy:** DC instruments, ±2% full-scale; AC instruments, ±3% full-scale. **Size:** 5.15" w. x 5.55" d. x 5.70" h.

Simpson Model 2100 Portable Instrument—Comes in white case with black and white panel. Built-in Century meters with following ranges are stock items.

Wide-Vue meters, other ranges available on special order.

Simpson Century Panel Meters

INSTRUMENTS THAT STAY ACCURATE

Century Series panel meters offer attractive design and easy reading. DC meters have self-shielded movements, with calibration unaffected by stray magnetic fields or magnetic mounting. AC meters have iron vane type movement. AC milliammeters and ammeters are calibrated for use on 25 through 800 Hz; AC voltmeters, 25–125 Hz. Calibration for frequencies up to 800 Hz available on request. **Flange Size:** 1½″ meters, 1.75″ sq.; 2½″ meters, 2.38″ sq.; 3½″ meters, 3.00″ sq.; 4½″ meters, 4.66″ x 4.20″. **Depth Behind Panel:** 1.34″ except 1½″ meters, .90″; wattmeters, 1.75″.

*2000 ohms/volt. †External multiplier furnished; all others self-contained.

DC AMMETERS—SELF-SHIELDED METER MOVEMENT

Self-contained types are: 1½″ through 10 amps; 2½″, 3½″ and 4½″ through 50 amps. All other ranges require external shunts.

AC MILLIAMMETERS—IRON VANE TYPE MOVEMENT

Ranges Available: 0–10 (Model 2153 not available), 0–50, 0–100, 0–250, 0–500 mA; specify when ordering.

MODEL 2152—2½″

Range, mA (Specify)	Net Each, Lots of 1-9	10-24	25-49
Any range	$21.00	$18.90	$17.85

MODEL 2153—3½″

Range, mA (Specify)	Net Each, Lots of 1-9	10-24	25-49
Any range	$22.50	$20.25	$19.13

MODEL 2154—4½″

Range, mA (Specify)	Net Each, Lots of 1-9	10-24	25-49
Any range	$23.85	$21.47	$20.27

DUAL-RANGE AC PANEL METERS, MODELS 2153 AND 2154, 0-150 AC VOLTS/0-5 AC AMPERES

Single instrument measures both volts and amps. For use in many common applications using an AC voltmeter and ammeter in pairs. Lets you save on panel space and purchasing cost. Can also measure extended AC current ranges through an accessory transformer. Available in 3½″ and 4½″ sizes, in Wide-Vue and Century Models.

Century Dual-Range Meter Model No.	Size	Net Each, Lots of 1-9	10-24	25-49
2153	3½″	$32.10	$28.89	$27.29
2154	4½″	34.20	30.78	29.07

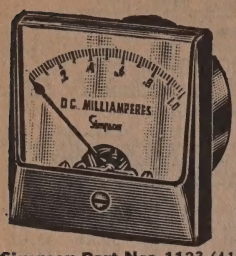
Simpson Wide-Vue Panel Meters

INSTRUMENTS THAT STAY ACCURATE



Modern styling with durable, open face plastic cover for wide-angle readability and protection of meter face. DC meters have self-shielded meter movement (calibration not affected by stray magnetic fields or magnetic mounting). AC meters have iron-vane type movement. AC Milliammeters and Ammeters are calibrated for 25–800 Hz; Voltmeters are calibrated for use on 25–125 Hz; Wattmeters calibrated for either magnetic or non-magnetic panels and frequency range of 25–125 Hz. Other calibrations at frequencies up to 800 Hz, available on request.

Simpson Part Nos. 1123 (4½″) or **1253** (3½″) **Bezels**—For behind-the-panel mounting of "Wide-Vue" Meters. Net Each...**$2.70**

DUAL-RANGE AC PANEL METERS, MODELS 1357 AND 1359, 0-150 AC VOLTS/0-5 AC AMPERES

Single instrument measures both volts and amps. For use in many common applications using an AC voltmeter and ammeter in pairs. Lets you save on panel space and purchasing cost. Can also measure extended AC current ranges through an accessory transformer. Available in 3½″ and 4½″ sizes, in Century Models and Wide-Vue.

Simpson Special Panel Meters

INSTRUMENTS THAT STAY ACCURATE

"RUGGED SEAL" PANEL METERS

Metal-cased panel instruments ideal for use in field test equipment or where rigorous environments are encountered. Completely sealed, commercially ruggedized, metal cased and shielded against steel panel mounting. External magnet movement.

Standard Metal-Cased Meters: AC meters are rectifier type with ±3% of full scale accuracy at 25° C and 60 Hz sine wave. AC ammeters maintain accuracy over 55–125 Hz range; other AC meters over 25–2500 Hz range. DC meters have ±2% of full scale accuracy.

Segmental Metal-Cased Meters: Measure very small changes in input with segmental voltmeters and frequency meters. Significant portion is expanded to occupy the full scale length.

Expanded-Scale Type Meter	Freq. Range, Hz	Sensitivity Ohms/Volt	Waveform Influence		Max. Input Volt. V rms (10 sec)
			Squarewave	Triangular	
AC Voltmeters‡	55–550	50, 65, 80*	2.5, 2, 1%*	1.2, .6, .3%*	150
DC Voltmeters	.....	100	.....	.....	40†
Frequency Meters	.....	3 VA max.	.1% max.	.1% max.	140

*For 100–130, 105–125 and 110–120 V ranges respectively. †Volts max. input. ‡Rms sensing.

MOUNTING BEZEL AND ILLUMINATION KIT

FOR "WIDE-VUE" PANEL METERS

Mounting bezels add modern streamlined appearance to Wide-Vue panel meters (listed on another Simpson page). Groove and flange construction of diecast metal with satin black finish. For behind-panel mounting on panels ⅛" to 3/16" thick. With brackets, screws and template. Illumination kit is for 3½" and 4½" models.

Simpson Special Panel Meters

INSTRUMENTS THAT STAY ACCURATE

DESIGNER SERIES PANEL METERS

Molded black phenolic-cased panel meters for compact equipment designs. Clean, professional styling. All have self-shielded spring backed jewel movement with ±2% accuracy and utilize maximum scale length for full readability. **Size:** Models 523, 543 and 553: 3.95″ w. x 1.81″ d. (behind panel) x 2.67″ h.; mtg. ctrs., 2.936″. Models 524, 544 and 554: 4½″ w. x 1.81″ d. (behind panel) x 2.9″ h.; mtg. ctrs., 3½″. All models supplied with necessary mounting and terminal hardware. Knife-edge pointer.

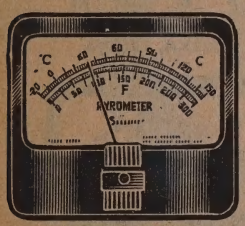
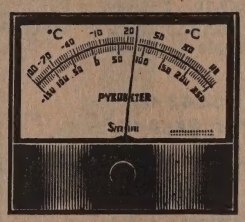
PYROMETERS AND THERMOCOUPLES



Model 29



Model 3324

PYROMETERS

Fully compensated for ambient temperature changes and include copper circuit compensation. Calibrated for use with Simpson iron constantan thermocouples which are available as accessory items. Pyrometers with 0° F to +300° F range are calibrated for 5-ohm thermocouple resistance; all others for 10 ohms. Each pyrometer is supplied with an external, adjustable series resistor to permit use of lower resistance thermocouples in the field. Accuracy: 2%. Size: Model 29, 4.66″ w. x 1.70″ d. (behind panel) x 4.20″ h.; mtg. ctrs., 4″ x 3.56″. Model 3324, 4.68″ w. x 1.89″ d. (behind panel) x 4.15″ h.; mtg. centers, 4″ x 3.56″.

55ET

57ET

1357ET

2153ET

New model 108ET supplied with separate round and square interchangeable metal bezels; operating temp., −55° to +85° C; convex glass window solder-sealed to case; 5-digit readout. Model 1357ET matches Wide-Vue meters. Model 2153ET matches Century Series panel meters. Models 55ET and 57ET are similar to standard 3½″ meters. Uses self-starting synchronous clock motors. **Size:** Model 108ET, 2.675″ dia. round flange (sim. to 55ET), 2.75″ sq. flange (sim. to 57ET), body 2.14″ dia. x 2.368″ deep, three mtg. studs; Model 1357ET, 3.25″ sq. flange, body 2.75″ dia. x 2.37″ deep, four mtg. studs; Model 2153ET, 3″ sq. flange, body 2.69″ dia. x 1.34″ deep, four mtg. studs; Model 55ET, 3½″ dia. flange, body 2.75″ dia. x 2.55″ deep, three mtg. holes; Model 57ET, 3.00″ w. x 3.12″ h. flange, body 2.75″ dia. x 2.60″ deep, four mtg. studs.

Simpson Meter Relays, Accessories

INSTRUMENTS THAT STAY ACCURATE

RUGGED SEAL CONTACTLESS METER RELAYS

Set points are 100% (single), 90% (dual) adjustable on scale by front panel knobs thru a gear drive; indication, by separate lance pointers, within 1% of actual switching. Sensing is done through an infinite life lamp and photoconductors. Solid state switching circuit and DPDT slave relay provided internally for each control point; both slaves open in case of power failure. Slaves will switch to 10 amps per set of contacts at 115 VAC. **Power Required:** 115 VAC, 50–500 Hz. DC required for sensing and switching is provided by external power module furnished with dual control models; self-contained, single control models. **Size:** (Single Control Models) 3½″ units, 3.25″ sq. x 2.20″ d. behind panel; 4½″ models, 4.68″ w. x 4.15″ h. x 2.20″ d. behind panel; 4″ x 6″ models, 5.84″ w. x 4.62″ h. x 2.20″ d. behind panel.

3623XA, 3643XA

MODELS 29XA AND 49XA CONTACTLESS METER RELAYS

Feature contactless control point sensing for high control accuracy, smaller "dead band", absolute freedom from interference with indicating meter. Solid state high gain amplifier for maximum reliability. Self-shielding annular movement. DPDT relay contacts for each control point, rated 10 amps at 115 VAC. **Accuracy:** ±2% of full scale. **Control Point Adjustment:** 0–100% of arc. Double control types have low limit of 0–95% of arc, high limit 95–100% of arc. **Control Point Switching:** Within 1% of indication. **Control Point Differential:** Within 0.5% of full scale. **Differential:** Difference between "on" and "off", within 0.5% of full scale. **Size:** 4.66″ x 4.21″; body, 2.72″ dia. x 4.25″ deep.

MODELS 3623XA, 3643XA CONTACTLESS METER RELAYS

Single and double set point models with mode indication lamps; each set point has SPDT relay rated 5 A resistive, 115 VAC, 50–500 Hz per pole; removable set point knobs to prevent tampering; relays are field-replaceable. **Power Ratings:** 4 VA max. single set point, 6 VA max. double set point; life, 1,000,000 operations. **Set Points:** Single, 0–100% of full scale; double, 0–98% low and 2–100% high, can be set within 2° of each other; control switching within 1.0% of set points; dead band less than 0.5% of full scale. Also available as temperature controller or as photocell output meter relay.

29XA Contact Type

29XA CONTACT METER RELAYS

D'Arsonval movement. **Contacts:** Externally adjustable over 95° of 100° scale arc, within 5° of each other. Non-locking; for use in circuits with external locking provisions or in non-locking uses. Will close within 2% and break within 10% of full scale value. Gold alloy. For use at 15 VDC 10 mA max. on resistive or diode protected inductive loads. **Accuracy:** ±2% of full scale. **Insulation Breakdown:** 300 VAC from relay contacts to meter circuit; 3 kV AC, relay terminals to mounting panel (all at 60 Hz). **Size:** 4.66″ x 4.21″; body, 2.77″ dia. x 0.99″ deep.

Simpson Meter Relays and Panel Meters

INSTRUMENTS THAT STAY ACCURATE

4½" MOTOR-LOAD METER RELAYS

Motor-load meter relays for monitoring motor current for overload and/or no-load conditions; hence meter is protected from costly burn-outs or other damages. Scale on 0–150% ranges are green (0–100%) and red (100–150%); scales on other ranges show motor load in AC amps.

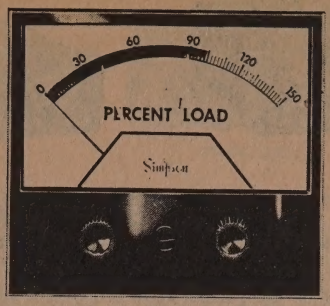
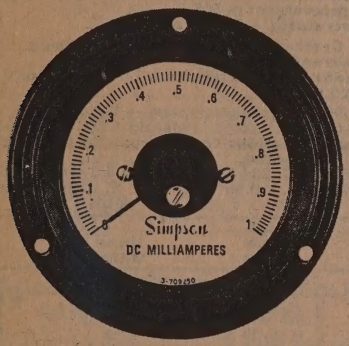
*Use with Model 186 current transformer. †Use with donut type current transformer. ‡High-limit.



SPECIFICATIONS

Calibration Accuracy: ±2% of full scale.
Control Points Adjustment: 0–100% of arc for single; 0–95% of arc for double low-limit; 5–100% of arc for double high-limit; all controls adjustable to within 4° of each other.
Switching: Within 1% of indication.
Differential: "On", "Off" difference is within 0.5% of full scale.
Contacts/Output Relay: DPDT relay contacts for each control point; each set of contacts rated at 10 amps, 115 VAC.
Movement: Self-shielding annular.
Power: 115 VAC, 50–500 Hz.
Case: Sealed metal case, glass window.

250° LONG-SCALE METERS



DC Milliammeter

Designed for applications that require high-accuracy readings, 250° panel meters provide more than double the scale length of the standard 90° or 100° movements. They are self-shielded, permanent magnet, moving coil instruments with non-magnetic pivots and spring-backed jewels. Cases are sealed per MIL-M-10304. External front access zero adjust. Red, knife edge type pointer. **Accuracy:** DC, 2% of full scale; AC, 3% of full scale. **Scale Length:** 4.77" for 3½" meters; 6.54" for 4½" meters.

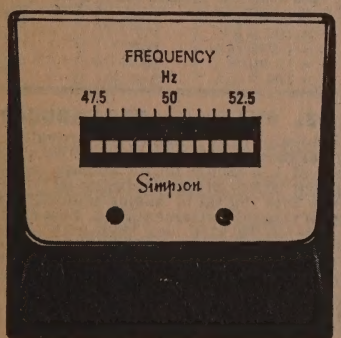
RESONANT REED-TYPE FREQUENCY METERS



Model 1367, 3½" Wide-View

Frequency meters use tuned steel reeds for indicating AC frequency. Vibrating (resonant) reed is both the measuring and indicating element. Accuracy is virtually unaffected by wide changes in signal magnitude, phase or waveform and is basically dependent on only one component, the reed, whose calibration is inherently stable. With one moving part, construction is simple and sturdy. **Frequency:** 50, 60 or 400 Hz nominal. **Number of Reeds:** 11 (general purpose); 21 (high resolution). **Accuracy:** ±0.3% of mid-scale. **Temperature Coefficient:** −0.017% per °C max. **Operating Voltage:** 100 to 150 VAC. **Power Consumption:** 2 watts max. **Power Required:** 2 VA.

WESTON® Digital Panel Instruments

1220

1222

MODEL 1220 BATTERY OR LINE OPERATED BIPOLAR DIGITAL PANEL METERS

Full 3½ digit bipolar digital panel meters utilize the Weston patented dual slope A/D conversion technique. All digital logic circuitry contained on a single MOS LSI plug-in 24-pin chip for added reliability. MOS LSI chip contains all logic circuitry, polarity sensing logic, comparator-to-sense threshold crossing, over range sensing logic, synchronization of the display throbing, and strobing and storage resistor. All logic circuitry is assembled on one socket; hence easily replaceable with another plug-in chip in case of failure. Features include LED readout plug-in type and instant accuracy with no warm-up time. Automatic blanking of unused digits in the readout. Special terminal provided that blanks out the readout when grounded; hence permits the design of "push-to-read" button on portable equipment to extend battery life. Fixed or remote programmed decimal points. Range changes easily accomplished. Easily attainable input vs. readout slope changes.

Voltage Ranges (Input Impedance): 0–100 mV (100 megs); 0–1 V (100 megs); 0–10 V (5 megs); 0–100 V (5 megs); 0–1000 (5 megs).
Current Ranges (Input Impedance): 0–10 μA (10K); 0–100 μA (1K); 0–1 mA (100 ohms); 0–10 mA (10 ohms); 0–100 mA (1 ohm).
Accuracy: ±0.1% of reading ±1 digit at 25° C ±10° C.
Overrange: 100% (reads 1999) except on 1000 V range (stated accuracy applies to full overrange).
Readout: 3½ digits, 7 segment LED, 0.19″ high.
Out-Of-Range-Indication: Flashing "1" in MSD with blanking of remaining digits.
Operating Temperature: 0–60° C (32–140° F).
Temperature Coefficient: ±0.01% FS ±1 digit (±0.005% reading/° C).
Common Mode Rejection: Greater than 120 dB.
Normal Mode Rejection: 30dB at 60 Hz.
Sampling Rates: Greater than 3/sec.
Response Time: Less than 1.5 sec.
Power Required: 5.5 VDC ±10%, 0.75 watts (4 Nicad "C" cells).
Size: 2.83″ w. x 1.41″ h. x 2.55″ d. behind panel. Weight, 4 oz. approx.

MODEL 1230 DIGITAL PANEL METER

GENERAL SPECIFICATIONS

TTL Logic: 0 to +5 volt output. Parallel BCD output except during conversion which is identified by print command output, is available, when specified. BCD to drive 2 loads TTL (sink 3.2 mA).
Operating Temperature: 0–50° C.
Storage Temperature: −40° C to +70° C.

Temperature Coefficient: 100 ppm/° C, full scale.
Input Bias Current: 1 nA max.
Ratio Operation: External reference 1.0 nominal or 0.1 V ±20%. Automatic zero setting.

Display: ±1999 Sperry gas discharge; 7 segment 0.55″ high; 7.5 readings/sec standard; amber Polaroid filter with sockets.
Common Mode Rejection: Greater than 80 dB at line frequency with 1K ohm unbalanced.
Power Required: 117/234 VAC ±10%, 4.7 watts, 50–60 Hz.
Size: Front, 4.00″ w. x 0.56″ d. x 1.75″ h.; behind panel, 4.25″ d.; panel cutout, 3.924″ w. x 1.682″ h. Weight, 1 lb.

MODEL 9744 rms TRANSDUCER

Low cost, all solid state single range device providing DC output signal proportional to rms of input signal. Five voltage ranges. Input impedance of 1 megohm on all voltage ranges makes it suitable for signal or power circuit applications. 0–1 VDC output is suitable for use with digital or analog indicating instruments and a wide range of control instrumentation. Less than 0.5% error on frequency range 40–10 kHz; less than 0.35% on power frequencies (50–400Hz); no more than 1.5% on frequencies in the 30–20,000 Hz range is experienced on any kind of waveform applied. Generous 4:1 crest factor (peak/rms) assures accurate measurements on large signal peaks. **Size:** 4″ w. x 2.88″ d. x 1.94″ h. overall. Weight, less than 9 oz.

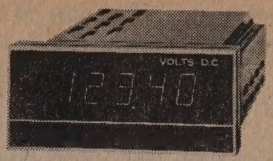
Models 1295, 1296

Model 1297



Model 1234

MODEL 1295 BI-POLAR DIGITAL PANEL METER

Bi-polar 3½ digit panel meter features dual slope A/D conversion technique for long term stability. All digital logic on a single 24-pin LSI MOS chip. Non-blinking display and 100% overrange (except 1000 V range). Automatic bi-polar operation and utilizes only 7 sq. in. of panel space. **Accuracy:** ±0.1% of reading, ±1 digit. **Overrange:** 100% (reads 1999). **Readout:** 7 segment LED's. **Operating Temperature Range:** 0°–60° C (32°–140° F). **Common Mode Rejection:** 100 dB with 1000 ohm unbalance at 60 Hz. **Normal Mode Rejection:** 30 dB at 60 Hz. **Sampling Rate:** More than 3 per second. **Response Time:** Less than 1.5 sec. **Power Required:** 117 VAC, 50–400 Hz; 230 VAC optional. **Size:** Front, 4.00″ w. x 0.56″ d. x 1.75″ h.; behind panel, 4.25″ d.; panel cut-out, 3.924″ w. x 1.682″ h. Weight, 13 oz. approx.

MODEL 1234 DIGITAL PANEL METER

A 4½ digit panel meter with 0.55″ high, seven segment gas plasma characters. Utilizes the Weston dual-slope A/D conversion technique for long-term stability and inherent rejection of AC noise in the input signal. Reliable transistor-transistor micrologic provides optimum applications versatility. BCD coded parallel data outputs may be included for use with a broad range of peripheral devices.

Accuracy: ±0.01% reading ±0.025% f.s. at 23° C.

AC Rejection: 40 dB minimum at 60 Hz.

Common Mode Rejection: 80 dB minimum, 60 Hz and 1000 ohm unbalance.

Reading Rate: 7.5 per sec. (15/sec. or 30/sec. optional).

Step Input Response: 2 sec. max. for full-scale step.

Operating Temperature: 0° to 50° C.

Storage Temperature: −40° to +70° C.

Temp. Coefficient: less than (50 ppm reading ±0.3 digit)/°C.

Outrange Indication: Display blanked except MSD "1" and polarity.

Control Outputs: Hold—Logic "O" retains most recent data; Convert (Optional)—A 1 μsec TTL pulse causes conversion within 10 msec.

Status Outputs: Print Command—Logic "O" signifies valid output data; Polarity—Logic "1" signifies positive input signal; Overrange—Logic "1" signifies signal beyond 19999 counts.

BCD Output (Optional): 1-2 4-8 parallel, TTL/DTL (2 u.l.).

Decimal Selection: External, by grounding appropriate terminal.

Power Required: 117 VAC ±10%, 50–60 Hz, 6 Watts (options of 100, 220, or 240 volts available).

Size: 1.75″ h. x 4.0″ w. x 4.25″ d. behind panel.
Weight: Approx. 2 pounds.

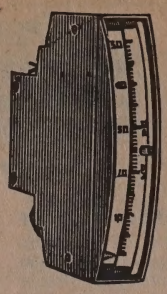
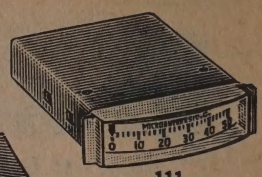
WESTON® Thin Line Panel Meters

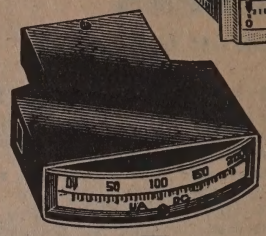
- COMPLETELY FLAT . . . CAN BE STACKED SIDE-BY-SIDE TO SAVE PANEL SPACE
- INLINE POINTER AND SCALE . . . PARALLAX ELIMINATED
- NEW SELF-SHIELDED MECHANISM
- ILLUMINATION (SELF-CONTAINED) ALSO AVAILABLE
- MEETS ASA C39.1 PERFORMANCE



131



111



121

MODELS 131 AND 231 EDGEWISE PANEL METERS

Model 131 is basically a 3½-inch flat edgewise meter offering many benefits not generally offered in this type of meter. To eliminate parallax normally associated with edgewise meters, an inline scale is standard; a red pointer increases readability. For those requiring lighting, self-contained illumination is available as an optional feature; bulbs are removable while meters are mounted in panel—even when stacked side-by-side. Designed to meet ASA C39.1 performance specifications. Incorporates Cormag® mechanism design for shielding purposes. The magnet is inside the moving coil and the resulting inherent shielding allows mounting on magnetic or non-magnetic panels without need for adjustment, as well as the ability to stack meters side-by-side without any interaction. Mechanism also has a shock absorption jewel arrangement to assure long life. For scale presentation approximately twice as wide. **Accuracy:** 2% of FS value for DC; 3% of FS value for AC rectifier type. **Scale Length:** 2.75″; anti-parallax inline scale. **Pointer:** Red lance type. **Movement:** Self shielded thin line Cormag mechanism. Shock mounted jewel arrangement. **Mounting:** Meter can be mounted either horizontally or vertically. Mounting clips fasten to meter behind panel—no screws show on front of panel. For stacking, thru holes are provided so stack can be bolted together. **Dielectric:** 1500 V rms. **Illumination:** Self-contained on request. **Size:** 3.437″ w. x 1.010″ h. x 3.921″ d. overall; panel cut out 2 9/16″ w. x 1 1/16″ h.

Model 231 is identical to above, but with wide face for improved readability.

MODELS 121 AND 125 EDGEWISE PANEL METERS

Model 121 is a 2½″ flat edgewise meter utilizing a true flat Cormag mechanism design for shielding purposes. An inline scale is standard; eliminates parallax normally associated with edgewise meters. Red pointer increases readability. Front mounted zero corrector. **Accuracy:** 2% of FS value for DC; 3% of FS value for AC rectifier type. **Scale Length:** 1.9″; antiparallax inline scale. **Pointer:** Red lance type. **Movement:** Self shielded thin line Cormag mechanism. Shock mounted jewel arrangement. **Mounting:** Either horizontally or vertically. Mounting clips fasten to meter behind panel; no screws show on front of panel. For stacking, thru-holes are provided so stack can be bolted together. **Dielectric:** 2000 V rms. **Size:** 2.880″ w. x 1.010″ h. x 3.921″ d. overall; panel cut out, 2 9/16″ w. x 1 1/16″ h.

Model 125 is identical, but with wide face for best readability.

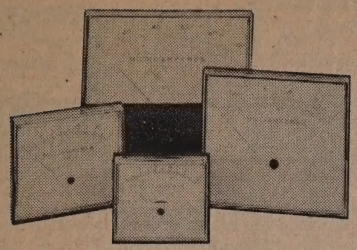
SERIES 2000 PANEL INSTRUMENTS



Attractive panel meters are styled to complement the appearance of equipment, rather than dominate it. Flattened scale arc gives excellent readability. Convenient snap-in covers permit easy scale replacement; use of a simple tool for replacement guards against finger snap-off of covers. Cormag® mechanism uses specially treated Alnico V magnet for full shielding from magnetic effects and long term stability. Offers the best combination of high torque with a minimum response time and minimum power consumption. Meets ANSI C39.1 standard. Features excellent dust sealing, plus the option of superior moisture-resistant sealing where required in critical environmental conditions. Easily adaptable to external illumination. Pivot and jewel types have spring back jewels. Half bezel is available for rear-of-panel mounting. Zero corrector is accessible from front of panel through bezel; no need to cut separate panel hole.

SPECIFICATIONS

All models have knife-edge pointer and plain scale; mirror scale available.

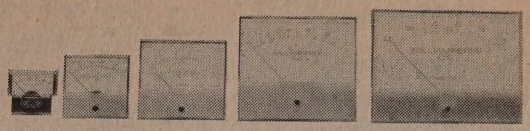
WESTON® Panel Instruments

MUSTANG SERIES PANEL INSTRUMENTS

Cormag® mechanism uses specially treated Alnico V magnets for full shielding from magnetic effects and long term stability. Meters are styled to enhance the appearance of equipment, rather than dominate it. Unique taut band caging design affords added protection against environmental shock and vibration. Flattened scale arc and knife-edge pointer give excellent readability. Convenient snap-lock cover permits easy scale changing. Features excellent dust sealing. Available with either front-mounted Type 1 or flush rear-mounted Type 2 covers. Black painted covers available for front-mounted styles. Mounting styles available include the exclusive Ring-Lock mounting and the conventional stud mounting. Optional features such as painted covers in selective colors, special scales, clear plastic cases to facilitate backlighting of rear-mounted styles in 3½" and 4½" meters, special mounting-stud configurations, etc. are available on special order.



SPECIFICATIONS

All models have knife-edge pointers and plain scale.

To order Ring-Lock mounting, change the fourth digit of number from 9 to 1 and subtract $0.50 from list price.

Simpson Test Equipment

INSTRUMENTS THAT STAY ACCURATE

MODEL 360 PORTABLE DIGITAL VOM

• Unique Analog Output and Indication • AC Line or Battery Operation

Model 360

Solid state IC designed meter for high accuracy measurements. Measures AC and DC current and voltages, conventional and "low-power" ohmic resistance on 29 popular ranges including "low-power" ohms. Analog indicator for scanning of nulls and peaks; analog output for interfacing with chart recorders. Up down integration analog/digital conversion assures superior stability, accuracy and noise immunity. Adjust-A-Vue handle. RANGES: **DC Volts (Input Impedance):** 200 mV (100 megohms); 2 V (1000 megohms); 20 V (10 megohms); 200 V (10 megohms); 1000 V (10 megohms); with accuracy of ±(0.25% reading +1 digit). **AC Volts:** 200 mV; 2 V; 20 V; 200 V; 600 V; all ranges on 1 megohm (15 pF) input impedance and accuracy of ±(0.5% of reading +1 digit). **DC Current:** 20 μA; 200 μA; 2 mA; 20 mA; 200 mA; 2 A; 10 A; with accuracy of ±(0.5% of reading +1 digit). **AC Current:** 200 μA; 2 mA; 20 mA; 200 mA; 2 A; 10 A; with accuracy of ±(1.0% of reading +1 digit). **Resistance:** 200 ohms (low-power); 2K ohms (low-power); 20K ohms; 200K ohms; 2 megohms; 20 megohms.

SPECIFICATIONS: **Temperature Range:** Operating, 0 to +40° C; storage, −40° C to +60° C. **Numeric Display:** 3½ digit, 7-segment, 0.33″ high, LED type, non-blinking with storage. **Conversion Rate:** 5/sec nom. **Overrange Indication:** Automatic beyond 1999, with lower half of the "1" digit flashing. **DC Polarity Selection:** Automatic with "+" or "−" indications. **Analog Display:** 50–0–50 μA moving coil indicator. **Power Required:** 117/234 VAC, 50 to 400 Hz or 4 nickel cadmium "C" size cells (not supplied). **Size:** 5.4″ w. x 3.75″ d. x 7.2″ h. Weight, 4 lbs. (without batteries) and 4.5 (with batteries).

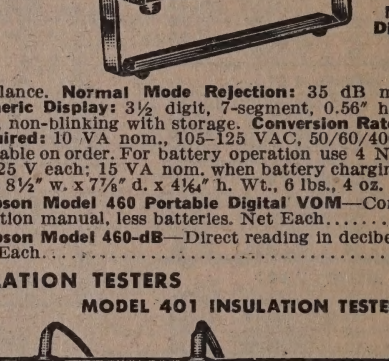
Simpson Model 360 Digital VOM—With test leads, AC line cord (less batteries) and operator's manual. Net Each..... **$325.00**

Simpson Model 360—220 VAC, 50 Hz operation (less batteries). Net Each..... **$330.00**

Simpson No. 00815—Carrying case for 360. Net Each **22.75**

MODEL 460 PORTABLE DIGITAL VOM

Combines high accuracy, multiple range testing with non-blinking 3½ digit numerical display and front panel analog meter readout. Ideal for field or lab use, operates on self contained batteries or line current. Batteries are rechargeable when plugged into AC line. Instant readout, no warm up time required; automatic + or − and overrange indication. Peaks and nulls shown by ½″ edgewise analog meter. Measures 26 switch-selected ranges; DC and AC voltage and current, and resistance. Unit is fused for AC line protection. Features include: Dual purpose handle, convenient line cord storage compartment and color-coded input jacks for instant visual recognition.



Model 460 Digital VOM

RANGES: **DC Volts:** 0–200 mV; 0–2–20–200–1000 V with ±0.1% reading accuracy, ±1 digit; input impedance, 10 megs except 200 mV, 100 megs and 2 V, 1000 megs. **AC Volts:** 0–200 mV; 0–2–20–200–1000 V with ±0.5% reading accuracy, ±1 digit; input impedance, 1 megohm; frequency range, 40 Hz to 10 kHz (±1% accuracy for 10 kHz to 20 kHz). **DC Current:** 0–200 μA; 0–2–20–200 mA (±0.2% reading accuracy, ±1 digit); 0–1000 mA (±0.5% accuracy); voltage drop, 0.2 V. **AC Current:** 0–200 μA; 0–2–20–200 mA (±0.7% reading accuracy, ±1 digit); 0–1000 mA (±1.0% accuracy); voltage drop, 0.2 V. **Resistance:** 0–200–2K–20K–200K–1000K ohms (±0.5% reading accuracy, ±1 digit); 0–20 megohms (±1% accuracy).

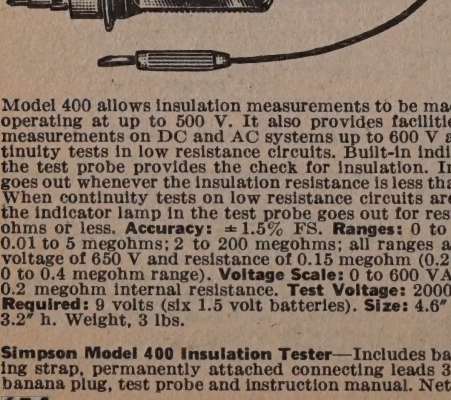
SPECIFICATIONS: **Temperature Range:** +10° C to +40° C. **Common Mode Rejection:** 80 dB min. at 60 Hz with 1K ohms unbalance. **Normal Mode Rejection:** 35 dB min. at 60 Hz. **Numeric Display:** 3½ digit, 7-segment, 0.56″ high, fluorescent type, non-blinking with storage. **Conversion Rate:** 5/sec. **Power Required:** 10 VA nom., 105–125 VAC, 50/60/400 Hz; 230 VAC available on order. For battery operation use 4 Ni-Cad "D" cells of 1.25 V each; 15 VA nom. when battery charging with unit on. **Size:** 8½″ w. x 7⅞″ d. x 4¼″ h. Wt., 6 lbs., 4 oz.

Simpson Model 460 Portable Digital VOM—Complete with instruction manual, less batteries. Net Each..... **$395.00**

Simpson Model 460-dB—Direct reading in decibels. Net Each..... **$000.00**

BATTERY OPERATED INSULATION TESTERS

MODEL 400 INSULATION TESTER

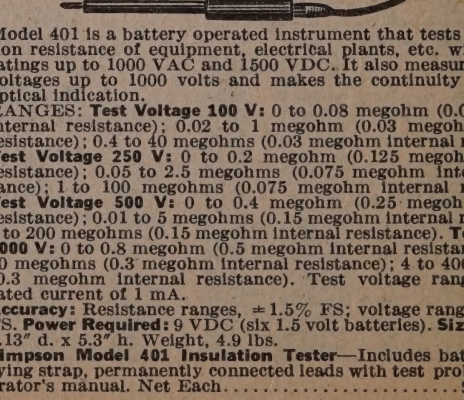


Model 400

Model 400 allows insulation measurements to be made on systems operating at up to 500 V. It also provides facilities for voltage measurements on DC and AC systems up to 600 V as well as continuity tests in low resistance circuits. Built-in indicator lamp in the test probe provides the check for insulation. Indicator lamp goes out whenever the insulation resistance is less than 1 milliohm. When continuity tests on low resistance circuits are being made, the indicator lamp in the test probe goes out for resistance of 500 ohms or less. **Accuracy:** ±1.5% FS. **Ranges:** 0 to 0.4 megohm; 0.01 to 5 megohms; 2 to 200 megohms; all ranges at open circuit voltage of 650 V and resistance of 0.15 megohm (0.25 megohm for 0 to 0.4 megohm range). **Voltage Scale:** 0 to 600 VAC/VDC with 0.2 megohm internal resistance. **Test Voltage:** 2000 volts. **Power Required:** 9 volts (six 1.5 volt batteries). **Size:** 4.6″ w. x 5.6″ d. x 3.2″ h. Weight, 3 lbs.

Simpson Model 400 Insulation Tester—Includes batteries, carrying strap, permanently attached connecting leads 3 ft. long with banana plug, test probe and instruction manual. Net.. **$195.00**

MODEL 401 INSULATION TESTER



Model 410

Model 401 is a battery operated instrument that tests the insulation resistance of equipment, electrical plants, etc. with voltage ratings up to 1000 VAC and 1500 VDC. It also measures AC/DC voltages up to 1000 volts and makes the continuity tests with optical indication.

RANGES: **Test Voltage 100 V:** 0 to 0.08 megohm (0.05 megohm internal resistance); 0.02 to 1 megohm (0.03 megohm internal resistance); 0.4 to 40 megohms (0.03 megohm internal resistance). **Test Voltage 250 V:** 0 to 0.2 megohm (0.125 megohm internal resistance); 0.05 to 2.5 megohms (0.075 megohm internal resistance); 1 to 100 megohms (0.075 megohm internal resistance). **Test Voltage 500 V:** 0 to 0.4 megohm (0.25 megohm internal resistance); 0.01 to 5 megohms (0.15 megohm internal resistance); 2 to 200 megohms (0.15 megohm internal resistance). **Test Voltage 1000 V:** 0 to 0.8 megohm (0.5 megohm internal resistance); 0.2 to 10 megohms (0.3 megohm internal resistance); 4 to 400 megohms (0.3 megohm internal resistance). Test voltage ranges are on rated current of 1 mA.

Accuracy: Resistance ranges, ±1.5% FS; voltage ranges, ±1.5% FS. **Power Required:** 9 VDC (six 1.5 volt batteries). **Size:** 9.6″ w. x 4.13″ d. x 5.3″ h. Weight, 4.9 lbs.

Simpson Model 401 Insulation Tester—Includes batteries, carrying strap, permanently connected leads with test probe and operator's manual. Net Each..... **$395.00**

INSTRUMENTS THAT STAY ACCURATE

MODEL 408 PORTABLE ILLUMINATION LEVEL METER

Model 408 illumination level meter for a wide range of measurements of illumination intensity under natural and artificial lighting conditions. By use of an accessory tube, it can also measure luminance of self-luminous or illuminated by ambient light surfaces. It can also serve as exposure meter with an appropriate table. **Ranges:** 0–15/50/150/500 foot candles; 0–1500/5000/15000/50000 foot candles with x 100 slip-on extension filter. **Light Sensitive Element:** 1.8″ dia. selenium photocell corrected to eye response. **Luminance Measurement:** Using slip-on x 2 tube ranges, 0–300/1000/3000/10000 cd/m²; tube aperture, 1.52″ dia.; test area diameter, 1.7 times distance. **Scale:** Longest scale arc, 2.8″; shortest scale arc, 1.92″. **Accuracy:** ±5%. **Size:** 3.2″ w. x 1.6″ d. x 4.6″ h. Weight, .62 lb.

Simpson Model 408 Illumination Meter—With remote senser, filter x 100 range extension, tube for luminance measurement, high impact plastic carrying case and instruction manual. Net Each..... **$145.00**

MODEL 410 PORTABLE PHOTO TACHOMETER

Model 410 measures the speed of motors, generators, machines and rotating parts of all kinds up to maximum speed of 50,000 rpm without making contact with the rotating body. Horizontal working position. **Ranges:** 1500–5000–15000–50000 rpm. **Accuracy:** ±2.5% FS. **Operating Temperature:** 0 to 40° C. **Pick-Up Head Sensitivity:** From 0.2″ to 2″ with light marking on dark background or reverse; from 2″ to 12″ with reflective marking on non-reflective background or reverse. **Input Resistance:** Greater than 10,000 ohms. **Movement:** Core magnet movement with pivot spring loaded suspension. **Power Required:** Indicating instrument, one 9 volt battery; pick-up head, two 1.5 volt batteries. **Size:** Indicating instrument, 3.6″ w. x 1.77″ d. x 5.98″ h.; pick-up head, 1.42″ w. x 1.9″ d. x 8.0″ h. Weight, indicating instrument .9 lb. and pick-up head of .7 lb.

Simpson Model 410 Photo Tachometer—Complete with batteries and instruction manual. Net Each..... **$205.00**

MODEL 886 SOUND LEVEL METER

- **SETS THE PERFORMANCE STANDARDS FOR MEASURING NOISE AND SOUND LEVELS, INDOORS OR OUT**
- **MEETS O.S.H.A. AND WALSH-HEALY REQUIREMENTS**

Quickly, accurately measures noise (or sound level) anywhere in accordance with O.S.H.A. and Walsh-Healy requirements. Helps check PA installations, small auditoriums, industrial acoustics, outdoor speakers, municipal noise. Simple and easy to operate, this rugged instrument offers all solid state reliability. Has built-in tripod mount and optional safety wrist strap. Output jack permits use with recorders and analyzers. Rugged, calibrated ceramic microphone. Full coverage, 40 to 140 dB with A, B and C weightings. Conforms to ANSI standard S1.4-1971, Type 2. Comes complete with two 9-volt batteries which provide 50 hours operational life. **Sound Level Range:** 40–140 dB in 10 dB increments; 20 μNewtons/m² as 0 dB reference. **Weighting:** 3 selectable networks for A, B or C curves per ANSI S1.4, Type 2. **Accuracy:** Meets requirements of ANSI S1.4, Type 2. **Meter:** 0–100 μA full scale, taut band movement; 2½″ dial has end marks −5 dB to +10 dB. **Response Speed:** Selectable fast or slow modes as required by ANSI S1.4-1971, Type 2. **Output:** 1.2 V rms open circuit for full scale meter indication; source impedance, 620 ohms; connector is Switchcraft 850 min. phone jack. **Harmonic Distortion:** Less than 0.5% (0.1% typical), 32–8,000 Hz (C weighting, meter at full scale). **Calibration:** Adjustable with screwdriver from side of case; requires calibrated sound pressure source coupled to the mike. **Magnetic Field Influence:** 50 or 60 Hz field of 1 Oersted (80 A/meter) will cause approx. 45 dB indication with C weighting when meter is oriented for maximum sensitivity to the field. **Temperature Range:** −10° C to +50° C, operating; −40° C to +60° C, storage with batteries removed. **Temperature Coefficient of Sensitivity:** −0.01 dB/° C at full scale meter indication. **Humidity:** 0 to 90% RH, operating. **Power Required:** Two 9-volt batteries (Burgess 2U6 or equiv.) supplied. **Size:** 3.03″ w. x 1.87″ d. x 10.07″ h. molded high impact, gray plastic case; internally shielded with electronic circuit packaged on flexible PC board. Brass insert on case bottom threaded ¼″-20 for tripod. Weight, 1 lb., nominal.

Simpson Model 886 Sound Level Meter—With batteries and operator's manual. Net Each..... **$250.00**
Simpson Model 00217 Carrying Case—Net Each.... **34.20**
Simpson Model 00576 Safety Wrist Strap—Net Each. **3.00**

MODEL 890 SOUND LEVEL CALIBRATOR

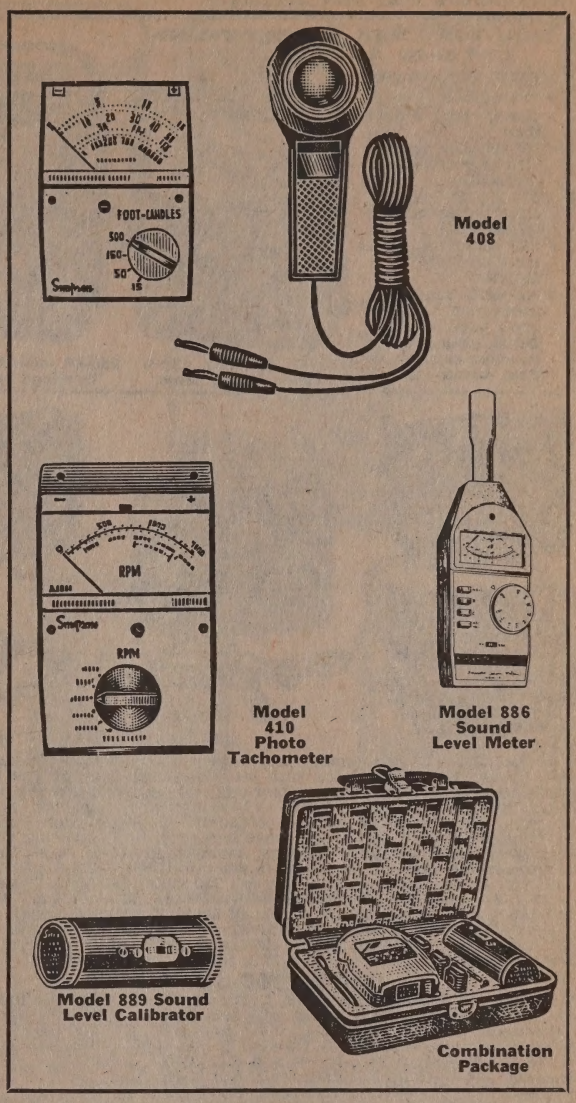
Sound level calibrator is used to calibrate the ceramic microphone on Model 886 Sound Level Meter. This tester is completely self-contained, features a single fumble-free control and yet provides a precise 1000 Hz sound-pressure level. Built-in LED indicator checks for adequate battery voltage. **Frequency:** 1000 Hz. **Pressure Level:** 114 dB ref. 20 μN/m². **Accuracy:** ±1 dB at 23° C and 760 mm mercury pressure. **Temperature Range:** 0 to +50° C operating. **Humidity:** 95% RH and +30° C. **Power:** 9-volt battery operation. **Size:** 5¼″ lg. x 2″ dia. Weight, 13.5 oz.

Simpson Model 890 Sound Level Calibrator—Complete with batteries, adjusting screwdriver and operator's manual. Net Each..... **$100.00**

SPECIAL COMBINATION PACKAGE

For increased convenience on and off locations for fast and accurate measurements. Includes one Model 886 sound level meter, one Model 890 calibrator, three spare 9 V batteries, one calibrator adjusting screwdriver and one wrist strap. Protective case included.

Simpson No. 12622 Combination Package—Net Each. **$380.00**



MODEL 884 SOUND LEVEL METER

Quickly and accurately measures noise (or sound level) anywhere in accordance with O.S.H.A. and Walsh-Healy requirements. Has built-in tripod mount and optional safety wrist strap. Output jack permits use with recorders and other testers. **Sound level range:** 50–130dB; **Weighting:** Type A per ANSI S1.4-1971 for Type 2; **Accuracy:** Meets requirements of ANSI S1.4-1971 for Type S2A; **Output:** 1.2V rms open circuit for full-scale meter indication, 100 ohms output impedance; **Size:** 3.03″ w. x 8.18″ h. x 1.87″ d.; **Weight:** 13.5 oz.

Simpson Model 884 Sound Level Meter—With batteries and operator's manual. Net Each..... **$195.00**

SPECIAL COMBINATION PACKAGE

Includes one Model 884 sound level meter, one Model 890 calibrator, microphone wind screen, three spare 9 V batteries, calibrator adjusting screwdriver, wrist strap, and operator's manual.

Simpson No. 12616 Combination Package—Net Each. **$300.00**

MODEL 888 OCTAVE BAND FILTER

A rugged, solid-state instrument for precision laboratory use or with the Simpson Model 886 Sound Level Meter by direct cable connection for octave band analysis of noise. Complies with ANSI S1.1-1971, DIN45651, and IEC255 (1966) requirements. Has bench-mount handle and in-the-field carrying case with shoulder strap; built-in LED battery test indication. **Center Frequencies:** 31.5, 63, 125, 250, 500, 1000, 2000, 4000, and 8000 Hz, switch selectable; **Filter Gain:** 0, +10, and +20dB, switch selectable with bypass provision; **Power Required:** Two 9 V batteries (Burgess 2U6 or equiv.) supplied; **Size:** 7.19″ d. x 6.01″ w. x 2.6″ h.; **Weight:** 2.6 lbs.

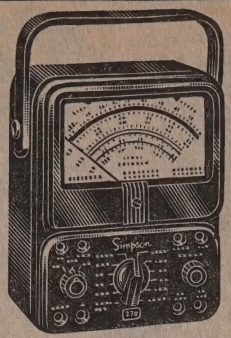
Simpson Model 888 Octave Band Filter—With batteries, carrying case, screwdriver, cable, and operator's manual. Net Each..... **$400.00**

Simpson Test Equipment, Cases

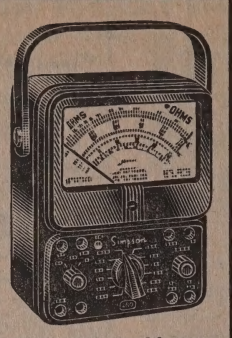
INSTRUMENTS THAT STAY ACCURATE

260® VOM'S WITH TAUT BAND METER MOVEMENT

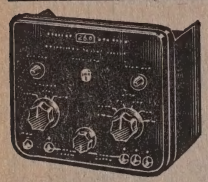
- **260 series 6**
- **260-6M with mirror scale**
- **260-6P with push-button overload protection**
- **261-2 with ±1.5% DC accuracy and mirror scale**
- **250 with 50 mV drop for solid-state circuits**
- **255 with temperature range**
- **270-4 with ±1.25% DC accuracy, temperature compensation, mirror scale**



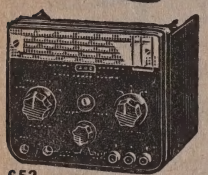
260-6M, 261-2, 270-4 with Mirror Scale



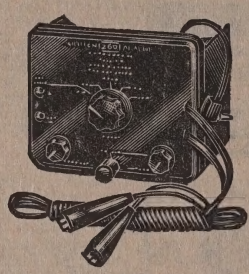
260-6P with Pushbutton Overload Protection



650



652



657

653, 661

150

Features: Self-shielding annular taut band meter movement; increased linearity and stability; input protected with internal 1-amp fuse; greater repeatability; mirror scale with a knife-edge pointer on three models. **Other Features:** Polarity reversing switch for easier, faster DC measurements; no lead reversing. Easy-to-read scales with black and red spread-out for faster, more positive reading. Less circuit loading; AC voltage range sensitivity of 5,000 ohms/volt. Adjust-A-Vue handle for prop-up convenience. Available in roll-top case. Come complete with leads and manual. **AC Volts (5,000 ohms/V):** 0–2.5–10–50–250–500–1000 volts (0.1 μF capacitor in series through 250 volts). **DC Volts (20,000 ohms/V):** 0–.25–1–2.5–10–50–500–1000 volts. **DC Current:** 0–50 μA (250 mV drop); 0–1–10–100–500 mA; 0–10 A (250 mV drop). **dB Scale (1 mW–600 ohms):** −20 to +10; −8 to +22; +6 to +36; +20 to +50. **Resistance:** 0–2K ohms–200K ohms–20 megs (Rx1–x100–x10K); 12, 1200 and 120K ohms centers, respectively. **Scale Length:** 4.2". **Size:** 5¼" x 7" x 3⅛". Shpg. Wt., 6 lbs.

260-6, 260-6M, 260-6P

Lowest priced models of the series, features good accuracy with full range coverage. Choice of scale: 260-6 comes with standard scale; 260-6M has mirror scale. **Accuracies:** AC volts ±3% F.S., 0–2.5 to 0–1000. DC volts ±2% F.S. through 1000. DC current ±1.5% F.S. through 50 μA; ±2% 0–1 mA to 0–10 A. Resist., ±2.5° of arc, Rx1; ±2.0°, Rx100 and Rx10,000.

Simpson 260-6—With standard scale. Net Each..... **$75.50***

Simpson 260-6M—With mirror scale. Net Each..... **78.50***

Simpson 260-6P—Same as 260-6, but features protective overload circuit with reset button that pops out when an overload is present. Net Each.... **$115.00***

MODEL 261-2 HIGH ACCURACY VOM

With mirror scale, knife-edge pointer and special calibration circuit to increase accuracy. Diode overload protection prevents movement burnout even on 200,000% overload. **Accuracies:** AC volts ±3% F.S., 0–2.5 to 0–1000; ±4% F.S., 0–5000. DC volts ±1.5% F.S. through 1000; ±2.5%, 0–5000. DC current ±1.0% F.S., 0–50 μA; ±1.5%, 0–1 mA to 0–10 amps. Resistance ±2.0° of arc, Rx1; ±1.5°, Rx100 and Rx10,000.

Simpson Model 261-2—Net Each..... **$85.50***

MODEL 270-4 HIGH ACCURACY VOM

Features self-shielded annular meter movement with taut band; temperature compensated circuitry. Mirror scale with knife-edge pointer. **Accuracies:** AC volts ±2.0% F.S., 0–2.5 to 0–1000. DC volts ±1.25% F.S. through 1000. DC current ±0.75% F.S., 0–50 μA; ±1.25% F.S., 0–1 mA to 0–10 amps. Resistance ±1.5° of arc, Rx1; ±1.0°, Rx100 and Rx10,000.

Simpson Model 270-4—Net Each..... **$95.00***

***For Roll-Top Case Version**—Add suffix **RT** (i.e., 260-6PRT). Add.... **9.50**

MODEL 250 50-mV DROP VOM

Same as 260-6 except as follows: **AC/DC Volts:** Added ranges of 0–0.050 VDC; 0–500 VAC/DC. **Current:** Same but 50 mV drop on all ranges, plus 250 mV drop on 0–50 μA range only (±1% F.S. accuracy). Diode protected.

Simpson Model 250—With standard scale. Net Each.... **$81.00**

MODEL 255 WIDE TEMP., 50-mV DROP VOM

Same as 260-6 except as follows: **AC/DC Volts:** Added 0–0.05 V and 0–1 VDC ranges. **Current:** 0–50 μA (50 and 250 mV drop; ±1% F.S. accuracy); 0–1–10–100–500 mA (50 mV drop); to 250 amps AC using adapter. No dB scale. **Temp. Range:** +100° F to +1050° F. With leads, prods and 5' thermocouple lead. Diode protected.

Simpson Model 255—With standard scale.

Net Each..... **$95.00**

ACCESSORIES FOR ABOVE VOM'S

Model	Description	Net Each	Model	Description	Net Each
0248†	Roll-top case only	$15.25	0805	Ever-Redy vinyl case	$20.50
0507†	10 kV DC voltage probe	19.75	0549	Same, but with storage	23.25
0161†	10 kV AC voltage probe	22.00	0574	Snap-on probe case, 0549	7.00
0509†	30 kV DC voltage probe	22.00	0163‡	5' thermocouple lead	8.25

†Also used with older 260-3 VOM. ‡For Model 255 only.

"ADD-A-TESTERS"
260 ADAPTER SERIES

Converts Simpson 260 VOM family (250, 255, 260, 261, 270-4) into nine different testers with a quality previously found only in individual pieces of test equipment. Just plug in one adapter, and you have added another application; no complicated connections. Take only ½ to ⅓ storage space of individual testers. Each combination of Add-A-Tester and 250, 255, 260, 261, 270-4 is self-contained and self-powered. All adapters provide for normal usage of basic tester without disconnecting adapter. Cannot be used with roll-top cased models.

MODEL 650 TRANSISTOR TESTER

Beta Ranges: 0–10–50–250, (F.S.). **Beta Accuracy:** Adapter, ±3%; with 250, 255 or 260, ±5% (nominal); with 261 or 270, ±4% (nominal). **Ico Range:** 0–100 μA. **Ico Accuracy:** Adapter, ±1%; with 260, ±3% (F.S.); with 261 or 270, ±2% (F.S.).

Simpson Model 650 Adapter—Net Each.. **$49.50**

Simpson Model 7545 Test Lead—Net Ea... **2.40**

MODEL 651 DC VTVM

Voltage Ranges: 0–.5/1.0/2.5/5.0/10/25/50/100/250/500. **Accuracy:** ±1%; with 250, 255 or 260, ±3% (F.S.); with 261 or 270, ±2% (F.S.). **Input Impedance:** More than 10 megs, all ranges.

Simpson Model 651 Adapter—Net Each.. **$55.00**

Simpson Model 733 Ground Lead—Net... **3.25**

MODEL 652 TEMPERATURE TESTER

Temperature Range: −50° F to +100° F; +100° F to +250° F. **Accuracy:** ±2° (nominal) with 250, 255, 260, 261 or 270. **Sensing Element:** Thermistor. Three lead positions provided.

Simpson Model 652 Adapter—Net Each.. **$55.00**

Centigrade Scale, add..... **1.95**

MODEL 653 AC AMMETER

Ranges: 0–0.25/1/2.5/12.5/25 amps. **Accuracy:** Adapter, ±2%; with 250, 255, 260, 261 or 270, ±3% F.S. **Frequency Range:** 50–3,000 Hz.

Simpson Model 653 Adapter—Net Each.. **$35.00**

MODEL 654 AUDIO WATTMETER

Load Ranges: 4, 8, 16, 600 ohms. **Wattage:** Continuous—25 watts (8, 600 ohms); 50 watts (4, 16 ohms). Intermittent—50 watts (8, 600 ohms); 100 watts (4, 16 ohms). **Accuracy:** Adapter, ±5%; with 250, 255 or 260, ±10% (nominal); with 261 or 270, ±7% (nominal). **Direct Reading Scale:** From 17 microwatts to 100 watts.

Simpson Model 654 Adapter—Net Each.. **$37.50**

MODEL 655 MICROVOLT ATTENUATOR

Ranges: 2.5 microvolts to 250,000 microvolts, continuously variable in decade steps. **Frequency:** DC to 20 kHz. **Accuracy:** Adapter, ± ½ dB; with 250, 255, 260, 261 or 270, ±1 dB.

Simpson Model 655 Adapter—Net Each. **$33.00**

MODEL 656 BATTERY TESTER

Checks all radio and hearing aid batteries up to 90 volts at the manufacturer's recommended load, or any external load. **Accuracy:** Adapter, ±1%; with 250, 255 or 260, ±3% (F.S.); 261 or 270, ±2% (F.S.).

Simpson Model 656 Adapter—Net Each.. **$33.00**

MODEL 657 MILLIOHMMETER

Ideal for accurate measurements of low resistance windings in meters, generators and transformers; ammeter and milliammeter shunts; and contact resistance in switches and relays. **Ranges:** 0–0.1/0.25/0.5/1.0 ohm. **Accuracy:** Adapter, ±½%; with 260, ±2% (F.S.); with 261 or 270, ±1½% (F.S.).

Simpson Model 657 Adapter—Net Each.. **$57.50**

MODEL 661 DC AMMETER

Dependable, portable DC ammeter for use in testing automotive accessories and electrical systems, DC supplies, industrial DC control systems, welding, etc. **Range:** 0–1/2.5/5/10/25 amps. **Accuracy:** Adapter, ±½%; with 250, 255 or 260, ±2% (F.S., nominal); with 261 or 270, ±1½% (F.S., nominal).

Simpson Model 661 Adapter—Net Each.. **$35.00**

MODEL 150 CLAMP-ON AMMETER

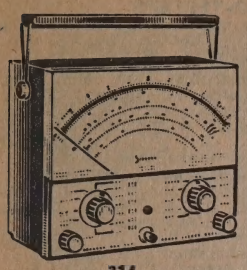
AC ammeter adapter permits current measurement without breaking circuit. Plugs into any VOM on this page. Reads on 0–2.5 VAC scale. **Ranges:** 0–5–10–25–50–100–250 amps AC. With 4' cord.

Simpson Model 150—Net Each..... **$29.50**

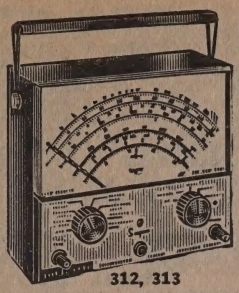
METER SAFE/GUARD

Use with Series 1, 2, 3 or 4 Simpson 260 or any other 20,000 ohms/volt VOM. Installs instantly to prevent damage to meter movement regardless of polarity with currents up to 200 mA, AC or DC.

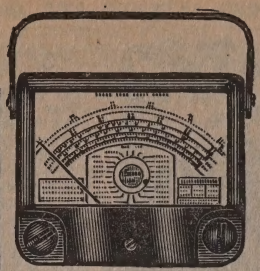
Simpson Model 12621—Net Each..... **$2.30**



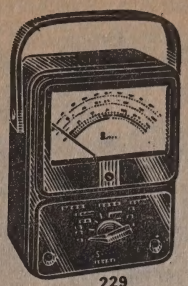
314



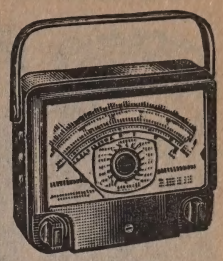
312, 313



263



229



262-3, 269-3

MODEL 314 SOLID STATE AC-DC VOM

Most advanced solid state field effect VOM for general service use. Battery operated portable model accurately measures low-level voltages, current and semiconductor circuit resistances in low power ohms. **Accuracies:** ±2% of FS, DC; ±3% of FS, AC; ±3° arc, resistance. **AC Volts:** 0–0.01–0.03–0.1–0.3–1–3–10–30–100–300–1000; 10-meg input impedance; with probe multiplier on x10, 100-meg. **DC Volts:** 0–0.05–0.1–0.3–1–3–10–30–100–300–1000; 10-meg input impedance; with probe multiplier on x10, 100-meg. **Ohms:** Rx1, x10, x100, x1K, x10K, x100K, x1M; 10 ohms center and 1K ohms maximum on Rx1. **AC and DC Current:** 0–0.01–0.1–1–10–100–1000 mA; frequency response, 30 to 100,000 Hz shunted by 45 pF for AC; 100 mV voltage drop on all ranges except 1000 mA, 125 mV voltage drop. **dB:** −60 to +62 dB, eleven ranges. **Power Required:** One 1.5 "D" cell; two 1.5 V "AA" cells; one 9 V battery; all batteries replaceable through external access battery compartment at rear of instrument. **Size:** 7¾" x 6¾" x 4⅝". Weight, 5¼ lbs.
Simpson Model 314—With AC/DC ohms probe, batteries and instruction manual Net Each..... **$220.00**

MODEL 313 SOLID STATE AC-DC VOM

Portable instrument with VTVM features, VOM convenience. Operates for over 300 hours on 9-volt transistor battery, with high accuracy and high impedance. Rugged design with self-shielding movement, shock-proof and overload-protected. Fully protected voltage ranges. Reliable FET transistor input, 7" scale. Battery test position. Frequency and temperature compensation assure high accuracy of ±3% full-scale, AC and DC. **AC Volts:** 0–0.3–1–3–10–30–100–300–1000; 10-meg input impedance. **DC Volts:** 0–0.3–1–3–10–30–100–300–1000; 11-meg input impedance. **Response:** ±0.5 dB, 20 Hz to 100 kHz on ranges to 3 volts; 20 Hz to 20 kHz on ranges to 100 volts. **Ohms:** Rx1, x10, x100, x1K, x10K, x100K, x1M; 10-ohm center. **DC Current:** 0–0.1–1–10–100–1000 mA. **Size:** 7¼" x 6¾" x 3¾". Weight, 4¼ lbs. **$155.00**
Simpson Model 313—With leads, probe, manual. Net.

MODEL 312 VTVM

Up to 40% less circuit loading then conventional VTVM's; input resistance 16 megs instead of the usual 11. Easy-to-read 7" scale. Ideal for solid state tests with ½-volt range. **Accuracy:** ±3% FS, AC and DC; ±3° arc, resistance. **Frequency Response:** ±3%, 15 Hz to 3 MHz, thru 150 VAC; ±1 dB, 10 kHz to 250 MHz with RF probe; usable to 40 V rms. **DC Volts:** 0–0.5–1.5–5–15–50–150–500–1500 (16 megs imped.). **AC Volts:** 0–1.5–5–15–50–150–500–1500 V rms (1 meg min. imped.); 0–4–14–40–140–400–1400–4000 V p-p. **Resistance:** R x1, x10, x100, x1K, x10K, x100K, x1M; 10-ohm center. **Power:** 105/125 VAC, 50/60 Hz. **Size:** 7¼" w. x 6¾" h. x 3¾" d. Weight, 4¾ lbs. **$120.00**
Simpson Model 312—With probe and manual. Net..

MODEL 263 AC-DC DUAL SENSITIVITY VOM

Overlapping ranges for greater accuracy; ±1½% DC and ±3% AC, full scale. Diode overload protection against burnout (even on 200,000% overload). External battery compartment for easy replacement; takes 1½-volt alkaline type for greater stability on low ohms scale. **AC Volts:** 0–2.5–7.5–30–150–750 at 10K ohms/volt; 0–5–15–60–300–1500 at 5K ohms/volt. **DC Volts:** 0–.15–.75–3–7.5–30–75–300–750–3000 at 20K ohms/volt; 0–.3–1.5–6–15–60–150–600–1500–6000 at 10K ohms/volt. **Output Ranges:** 0.1 μF capacitor in series thru 300 VAC. **Ohms:** 0–500–5K–50K–500K, 0–5–50 megs; 4.5 ohms center scale. **DC Current:** All ranges ±1½% accuracy. At 150 mV, 0–75 μA, 0–.75–7.5–75–750 mA and 0–7.5 amps; at 300 mV, 0–150 μA, 0–1.5–15–150 mA and 0–1.5–15 amps. **dB:** −20 to +75.5 dB, ten ranges. **Size:** 6" x 7¼" x 3". Net Weight, 4 lbs. **$115.00**
Simpson Model 263—With test leads; manual. Net...

MODEL 715 AC VTVM

High sensitivity VTVM for the audio field. **Accuracy:** ±5% of full scale. **Sensitivity:** 10 mV full scale on lowest range. **Frequency Response:** ±1 dB, 10–400,000 Hz. **Input Impedance:** 1 meg minimum at 1 kHz shunted by 25 pF. **Internal Multipliers:** ±1% precision resistors. **Volts:** 0–0.01–0.03–0.1–0.3–1–3–10–30–100–300 rms. **dB:** Total range, −52 to +52 dBm. **Zero dBm:** 1 mW in 600 ohms. **Scale:** −12 to +2 dB. **Input Power Required:** 110–125 V rms, 50–60 Hz at 10 watts. **Size:** 7½" x 5½" x 3". Wt., 3¾ lbs. **$97.50**
Simpson Model 715—Complete with manual and shielded input cable. Net Each.....

MODEL 229 AC LEAKAGE TESTER

Tests 120 and 240 VAC appliances and equipment for current above the human "threshold of perception". Measures as low as 5 μA, detects shorts and near shorts. Overload protection. **Ranges:** 0–0.3–1–3–10 mA; 0–150, 300 volts; battery test. **Accuracy:** ±2% at 60 Hz. **Input Impedance:** 1500 ohms, shunted by shaping network; 500K on voltage ranges. **Size:** 5¼" w. x 3½" d. x 7" h. Weight, 3 lbs.
Simpson Model 229—With test leads and manual. Net Each..... **$99.50**

MODEL 262-3 AC-DC VOM

Compact design covers 33 ranges on easy-to-read 7" scale with repetitive accuracy. Diode overload protection. Self-shielded meter movement and spring-backed jewels. **AC Volts:** 0–3–8–40–160–400–800 at 5K ohms/volt and ±4% accuracy. **DC Volts:** 0–1.6–8–40–160–400–1600–4000 at 20K ohms/volt and ±3% accuracy. **Output Ranges:** 0.1 μF capacitor in series thru 160 VAC. **Ohms:** 0–500–5K–50K–500K; 0–5–50 megs; 4.5 ohms center scale. **DC Current:** ±3% accuracy, 0–80–160 μA; 0–1.6–16–160 mA; 0–1.6–8 amps. **dB:** −12 to +45.5 dB; four ranges. **Size:** 6" x 7¼" x 3". Net Weight, 4 lbs. **$99.00**
Simpson Model 262-3—With test leads; manual. Net..

IMPROVED MODEL 269-3 AC-DC VOM

Self-shielded Taut-Band movement with spring-backed jewels; stops damage to pivots due to shock and vibration. External battery compartment for easy replacement. Input protected by 1.5-amp fuse. **AC Volts:** 0–3–8–40–160–400–800 at 5K ohms/volt and ±3% accuracy. **DC Volts:** 0–1.6–8–40–160–400–800–1600 (±2%)–4000(±3%) at 100K ohms/volt. **Output Ranges:** 0.1 μF capacitor in series thru 160 VAC. **Ohms:** 0–200–20K–200K; 0–2–20–200 megs; 12 ohms center scale. **DC Current:** ±2% accuracy 0–16–160 μA; 0–1.6–16–160 mA, 0–1.6–8 amps. **dB:** −12 to +45.5 dB; four ranges. **Size:** 6" x 7¼" x 3". Net Weight, 4 lbs.
Simpson Model 269-3—With test leads, 4000 VDC probe extension and manual. Net Each..... **$125.00**

MODEL 303-2 AC-DC VTVM

Features easy-to-read 4½" scale. **AC Volts:** 0–1.2–12–60–300–1200 (±5% FS). **DC Volts:** 0–1.2–12–60–300–1200 (±3% FS). **AF Volts:** 0–1.2–12–60. Frequency flat to 100 kHz on the three low AC ranges. **RF Volts:** 20 V max.; frequency 20 kHz to 100 MHz with RF probe. **Ohms:** 0–1K–100K; 0–1–10–1,000 megs (centers at 10, 1K, 10K, 100K and 10 megs, respectively). **dB:** −20 to +63; 5 ranges. **Input Power Required:** 105–125 VAC, 50–60 Hz. **Size:** 5¼" x 7" x 3⅛". Net Weight, 4 lbs.
Simpson Model 303-2—Complete with VDC probe, VAC-ohm probe, ground lead and manual. Net Each.. **$97.50**
Simpson Model 303-2RT—In roll top case. Net Ea.. **$104.50**
Simpson Model 303-2 Dual—For 220/110 volts. Net. **103.50**

MODEL 311-3 AC-DC VTVM

High 22 meg DC input impedance reduces circuit loading. **AC Volts:** 0–1.5–5–15–50–150–500–1,500 rms (±5% FS). **Peak-To-Peak Volts:** 0–4–14–40–140–400–1,400–4,000. **DC Volts:** Same ranges as AC (±3% FS). **AF Volts:** Same ranges as AC (30 Hz to 110 kHz, ±5%). **RF Volts:** 0–1.5–5–15–50–150 with probe (50 Hz to 100 MHz, 0–150 V rms). **Frequency Response:** ±5% to 100 kHz; to 250 MHz with probe. **Ohms:** 0–1K–10K–100K; 0–1–10–100–1,000 megs (centers at 10, 100, 1K, 10K, 100K, 1 meg and 10 megs, respectively). **Input Power Required:** 105–125 VAC, 50–60 Hz. **Size:** 7½" x 5⅝" x 4½". Weight, 5 lbs.
Simpson Model 311-3—With AC-DC ohms probe, ground lead and manual. Net Each..... **$97.50**

AC-DC VOLT-OHMMETERS

COMPACT MODEL 160 Handi-VOM

Small, lightweight model with sensitivity and range of full size VOM. Range selector and polarity reversing switches. Diode overload protection. **AC Volts:** 0-2.5-10-50-250-500-1000 at 5K ohms/volt. **DC Volts:** 0-.25-1.0-2.5-10-50-250-500-1000 at 20K ohms/volt. **Ohms:** 0-3000-30K-300K; 0-3-30 megs. **DC μA:** 0-50. **DC mA:** 0-1-10-100-500. **dB Scale:** −20 to +10; −8 to +22, +6 to +36, +20 to +50. **Accuracy:** ±3% FS, AC; ±2% FS, DC. **Size:** 4⅜" x 3⅜" x 1⅜". Net Wt., 12 oz.
Simpson Model 160—Complete with alligator clip leads and manual. Net Each..... **$65.00**

MODEL 355 MIDGETESTER®

Compact meter with 100 μA self-shielded core meter movement; 10,000 ohms/volt sensitivity. **AC Volts:** 0-3-12-60-300-1200. **DC Volts:** 0-3-12-60-300-1200. **Ohms:** 0-10K-100K; 0-1-10 megs., 120, 1.2K, 12K and 120K ohms center, respectively. **Accuracy:** ± 3% DC; ± 5% AC; ± 3° ohms. **Frequency Response:** Essentially flat to 10 kHz. **Movement:** Self-shielded core magnet permits use without interference from metals or magnetic fields. **Size:** 2¾" x 4½" x 1". Net Weight, 8 oz.
Simpson Model 355—Complete with leads and manual. Net Each..... **$55.00**

SIMPSON MICRO-TESTERS

General purpose, extra-compact test instruments available in a variety of models. **Size:** 3" x 5⅞" x 2½", Net Wt., 1½ lbs.

MODEL 240-4 AC-DC VOLT-OHM-MILLIAMMETER

For high voltage applications. Sensitivity, 1,000 ohms/volt. **AC Volts:** 0-15-150-750-3000. **DC Volts:** 0-15-75-300-750-3000. **Ohms:** 0-3K-300K; 30 and 3K ohms center respectively. **DC Current:** 0–15–150–750 mA. **Accuracy:** VDC ±3% FS; VAC ±4% FS; DC resistance ±3° of linear arc.
Simpson Model 240-4—With leads and manual. Net Ea. **$49.50**

MODEL 230-2 AC-DC VOLT-OHM-MILLIAMMETER

For telephone and marine uses. **AC Volts:** (1000 ohms/volt) 0-10-250-1000. **DC Volts:** (1,000 ohms/volt) 0-10-50-250-1000. **Ohms:** 0-1K-100K. **DC Current:** 0-10-50-250 mA. **Accuracy:** VDC, ±3% FS; VAC, ±4% FS; DC resistance ±3° of linear arc.
Simpson Model 230-2—With leads and manual. Net Ea. **$49.50**

MODEL 370 AC AMMETER

Self-contained current transformer (use on 60 Hz only) and indicating instrument. **Ranges:** 0-1-2.5-5-10-25 amps. **Accuracy:** ± 5% of full scale.
Simpson Model 370—Net Each..... **$45.00**

MODEL 375 DC AMMETER

Covers a wide range without auxiliary shunts. Ideal for unmetered power supplies in radio and TV shops. **Ranges:** 0-1-2.5-5-10-25 amps. **Accuracy:** ± 3% of full scale.
Simpson Model 375—Net Each..... **$45.00**

MODEL 362 LOW-OHMMETER

Makes accurate checks on low-current circuits. Reads from 0.1 to 25 ohms across two ranges, 0-5 and 0-25. Accuracy within ±3° of linear arc length. Ideal for checking motor armatures and fields, switch and relay contact resistances, industrial electrical equipment, shorts in TV and radio chassis wiring, between generator windings and grounds, etc. Draws only 5 mA for long battery life; uses 1½-volt flashlight batteries.
Simpson Model 362-2—Complete with calibrated test leads. Net Each..... **$47.50**

MODEL 372-2 OHMMETER

Features a wide range of measurements from 0.2 ohm to 50 megohms in six ranges. **Ranges:** 0-500-5K-50K-500K ohms; 0-5-50 megs. Center scale values: 5, 50, 500, 5K, 50K, 500K ohms. **Accuracy** ±3° of linear arc.
Simpson Model 372-2—Complete with test leads and manual. Net Each..... **$47.50**

MODELS 391 AND 392 AC-DC VOLT-WATTMETERS

For simultaneous readings of AC or DC volts and watts. Two separate 3" square meters; built-in cord and plug for connection to line outlet; separate toggle switches for range selection. **Volts:** 0–130–260. **Watts:** 0–1500–3000, 391; 0–1000–5000, 392. **Accuracy:** ±3% of full scale. With cord, plug and manual. **$79.50**
Simpson Model 391 AC-DC Volt-Wattmeter—Net Ea.
Simpson Model 392 AC-DC Volt-Wattmeter—Similar to Model 391 except watt ranges: 0-1000-5000. Net Each. **$90.00**

MODEL 390 AC VOLT-AMP-WATTMETER

Most popular tester for measuring AC/DC volts, AC amps and AC watts on one meter. Wide coverage permits servicing nearly any appliance. Rugged design. **Volts:** 0-150-300. **Amps:** 0-3-15. **Watts:** 0–300–600–1500–3000. **Accuracy:** ±3% of full scale.
Simpson Model 390—Complete with break-in plug, test leads and manual. Net Each..... **$90.00**

MODEL 371 AC VOLTMETER

For testing line voltages applied to motors, heating equipment and other industrial uses. **Ranges:** 0-150-300-600 volts. **Accuracy:** ±3% of full scale.
Simpson Model 371—Net Each..... **$45.00**

MODEL 376 AC VOLTMETER

Rectifier type, 1000 ohms/volt. Useful where limited current occurs in circuit. Ideal as output meter when used with proper capacitor. **Ranges:** 0-5-10-25-50-100-250-500-1000 volts. **Accuracy:** ±5% of full scale.
Simpson Model 376—Net Each..... **$45.00**

MODEL 377-2 DC VOLTMETER

Resistance 1000 ohms/volt for radio servicing and industrial applications. **Ranges:** 0-1-2.5-5-10-25-50-100-250-500-1000 volts. **Accuracy:** ±3% of full scale.
Simpson Model 377-2—Net Each..... **$45.00**

MODEL 373 DC MILLIAMMETER

General purpose design for plate and screen grid measurements on tubes, etc. **Ranges:** 0-1-5-10-25-50-100-250-1000 mA. **Accuracy:** ±3% of full scale.
Simpson Model 373—Net Each..... **$45.00**

MODEL 378 AC MILLIAMMETER

Five ranges for a wide variety of testing: Transformers, vacuum tubes, etc. With current transformer built-in. **Ranges:** 0–5–25–100–250–1000 mA. **Accuracy:** ±5% of full scale.
Simpson Model 378—Net Each..... **$45.00**

MODEL 374 DC MICROAMMETER

Basic movement sensitivity, 50 μA with self-contained shunts for other ranges. Use with external resistors or multipliers as high sensitivity voltmeter at 20K ohms/volt. Can be shorted out of circuit using selector knob. **Ranges:** 0–50–100–250–500–1000 μA. **Accuracy:** ±3% of full scale.
Simpson Model 374—Net Each..... **$45.00**

MODEL 379 BATTERY TESTER

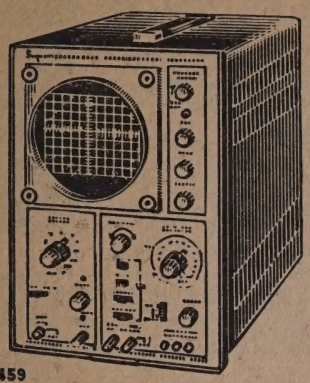
Accurate indication of all flashlight, hearing aid (mercury), transistor and portable radio batteries. **Ranges:** 0-1.5-4.5-6-7.5-9-15-22.5-30-45-67.5-90 volts.
Simpson Model 379—With test leads and manual. Net **$45.00**

MODEL 387 APPLIANCE TESTER

Millivoltmeter for fast, accurate gas unit servicing. Place probe across thermocouple terminals, test for correct value. **Accuracy:** ±3%, full-scale. **Range:** 0–10–30–100–300–1000 mV. **Size:** 3" x 5⅞" x 2½". Weight, 1½ lbs.
Simpson Model 387—Net Each..... **$47.50**

Simpson Test Equipment

INSTRUMENTS THAT STAY ACCURATE

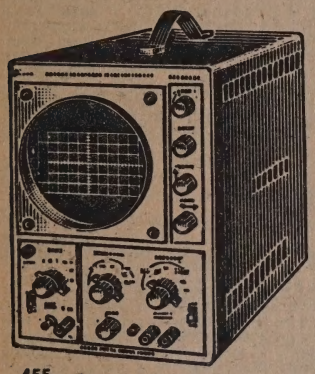


459

MODEL 459 GENERAL INDUSTRIAL 5-INCH OSCILLOSCOPE

Solid state, automatically triggered, 5″ scope ideal for the design, production and servicing of industrial communications and consumer electronic products. Illuminated 8 cm x 10 cm graticule has amplitude and vector markings. Unit accepts standard scope camera or light hood. Has P1 filter. Regulated power supplies maintain stable deflection, time base, brightness and focus. **Vertical Amplifier Bandwidth:** DC coupled, DC to 15 MHz (−3 dB); AC coupled, 2 Hz to 15 MHz (−3 dB). **Vertical Amplifier Sensitivity:** 11 calibrated steps from 10 mV/cm to V/cm (±3%). Variable gain control provides continuous coverage. **Vertical Amplifier Input Impedance:** 1 megohm ±2%, 35 pF approx. **Horizontal Amplifier Sweep Frequency Ranges:** 0.5 sec/cm to 0.2 μsec/cm in 20 calibrated steps. 5X magnifier extends sweep to 40 nsec/cm. Has additional range positions for TV-H and TV-V. **Horizontal Bandwidth:** DC coupled, DC to 1 MHz (−3 dB). **Horizontal Sensitivity:** Variable w/500 mV/cm max. **Horizontal Amplifier Input Impedance:** 200 kohm ±10%, 40 pF approx. **Calibration Voltage:** 1 kHz square wave, 5 V, 0.5 V and 50 mV peak-to-peak (±3%). **Power Source:** Line voltage, 120 VAC or 240 VAC, 50-60 Hz (±10%). **Power Required:** 90 VAC max. **Operating Temperature Range:** 0° to 40° C. **Size:** 8¾″ w. x 20″ d. x 12¼″ h. Weight, 30 lbs.

Simpson Model 459 Oscilloscope—With all front and rear panel controls, shielded input cable, line cord and operator's manual. Net Each..... **$450.00**



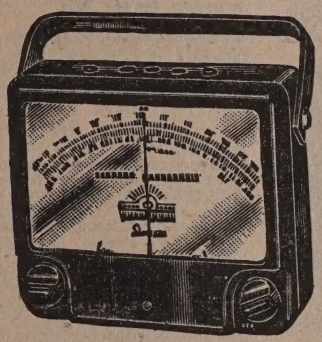
455

MODEL 455 GENERAL PURPOSE OSCILLOSCOPE

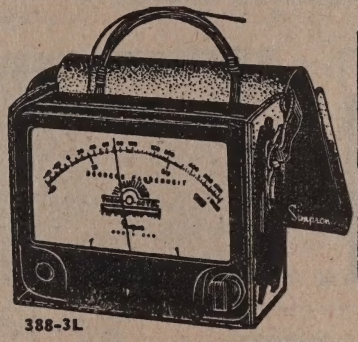
DC coupled general purpose oscilloscope with retrace blanking for color TV servicing and industrial applications. CRT measures and displays sharp waveforms with uniform intensity trace over entire viewing area in low parallax and high contrast graticule. Unit accepts scope camera, light hood and vector inputs. **Vertical Amplifier Bandwidth:** DC coupled, DC to 10 MHz (−3 dB); AC coupled, 2 Hz to 10 MHz (−3 dB). **Vertical Amplifier Sensitivity:** 9 calibrated steps from 10 mV/cm to 5 V/cm ±3%; vertical gain control provides continuous coverage. **Vertical Amplifier Input Impedance:** 1 megohm ±5%, 42 pF max. **Sweep Frequency Ranges:** 1 Hz to 200 kHz in 5 overlapping ranges. **Horizontal Amplifier Bandwidth:** DC coupled, DC to 500 kHz (−3 dB); AC coupled, 2 Hz to 500 kHz (−3 dB). **Sensitivity:** 300 mV/cm; x 1 x 10 step attenuator and fine control. **Input Impedance:** 1 megohm ±10%, 50 pF max. **Cathode Ray Tube:** 5″ round type 5 UP 1-F with 6 x 10 cm display area and 1.5 kV acceleration voltage. **Calibration Voltage:** 1 kHz square wave, 500 mV (p-p), ±5%. **Power Required:** 120/240 VAC, 50/60 Hz, as indicated on the back of instrument (operating range, 105 to 125 or 210 to 250 VAC), 100 VA max. **Intensity Modulation:** 30 V p-p. **Size:** 8″ w. x 16½″ d. x 10⅜″ h. (approx). Weight, 24 lbs. approx.

Simpson Model 455 Oscilloscope—With all front and rear panel controls, shielded input cable, 5 ft. line cord and operating manual. Net Each..... **$325.00**

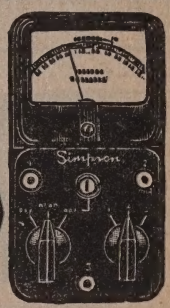
Simpson Model 07548—Low capacitance 10 to 1 probe for Model 455. Net Ea...**$17.50**



389-3L



388-3L



385-3L

MODEL 385-3L TEMPERATURE METER

Compact instrument ideal for measuring temperatures from −50° F to +70° F under conditions where fast, accurate readings are important. Thermistor sensing element. Large 3″ meter. **Accuracy:** ± 1° F, center scale; ± 2° F at ends. **Size:** 3″ x 5⅞″ x 2½″. Net Weight, 1½ lbs.

Simpson Model 385-3L—For three probes. Complete with one Model 0010 15′ thermistor type lead, and manual. Net Each..... **$55.00**

MODEL 389-3L THERM-O-METER®

Dual-range temperature tester permitting an accuracy of ± 2° F. Dial has combination Centigrade and Fahrenheit scales. **Ranges:** − 50° F to + 100° F; + 100° F to + 250° F. **Accuracy:** ± 2° F. Supplied in three-lead model only. **Size:** 7Ⅾ″x6″x2Ⅾ″. Wt., 4 lbs.

Simpson Model 389-3L—With internal battery, manual, and one Model 0010 15′ thermistor type lead; additional probes are available. Net Each..... **$105.00**

Simpson Test Equipment

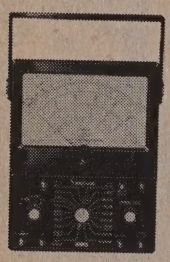
INSTRUMENTS THAT STAY ACCURATE

MODEL 257 MULTI-TESTER

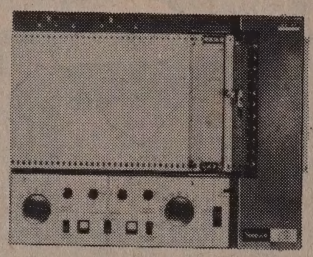
Similar to Model 256, with 100,000 ohms/volt DC sensitivity (20,000 ohms/volt AC). **Accuracy:** ±1.5% DC, ±2.5% AC. **DC Volts:** 0–0.1–0.5–2.5–10–25–100–250–1000–5000. **AC Volts:** 0–10–50–250–1000. **DC Current:** 0–10–50–250 μA; 0–1–5–25–100 mA; 0–1 amp. **DC Resistance:** Rx1 (30 ohms center scale), Rx1K, Rx100K, Rx10 meg (external 100–140 VDC supply needed). **AC Resistance:** Rx1 meg (1 meg center scale); external 100–240 VAC supply needed. **Capacitance:** 2000 pF to 5 μF (external 100–240 VAC supply needed. **Decibels:** −8 to +22, +6 to +36, +20 to +50. **Output Ranges:** 0.1 μF capacitor in series with AC voltage ranges, 10–250 VAC. **Size:** 4⅝″ w. x 3⅝″ d. x 9⅝″ h.
Simpson Model 257—With test leads, batteries and manual. Net Each..... **$95.00**

MODEL 260-6XL VOM

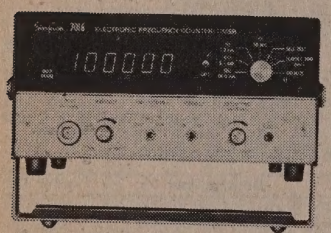
A new member of the 260 family for the special needs of the solid-state electronics industry. Has all the features of Model 260-6, plus extra ranges and features, low-power ohms capabilities, and extra shock and drop-resistant capabilities. **DC Volts (20,000 ohms/V.):** 0–0.25, 1, 2.5, 10, 25, 100, 250, 500, 1000; **AC Volts (5000 ohms/V):** 0–2.5, 10, 25, 100, 250, 500, 1000; **DC Current:** 0–50μA (250mV drop), 0–0.5 and 5mA (250mV drop), 0–5 and 50mA (252mV drop), 0–500mA (400mV drop), 0–5A (250mV drop); **AC Current:** Up to 250A with optional Model 150 Amp-Clamp Adapter; **dB Scale (1mW–600 ohms):** −20 to +10, −9 to +21, −1 to +29, +11 to +41, +19 to +49; **Resistance (conventional):** 0–1K ohms, 100K ohms, 1 meg, 10 megs (Rx1–x100–x1K–x10K) (6, 600, 6K, 60K ohm centers, respectively); **Resistance (low-power):** 0–1K ohms, 10K ohms (Rx1–x10) (20 and 200 ohm centers, respectively).
Simpson Model 260-6XL—Complete with batteries, test leads, and manual. Net Each..... **$90.00**
Simpson Model 260-XLM—With mirror scale. Net Each **93.00**
Simpson Model 260-XLP—Same as 260-XL, but features overload protection circuit. Net Each..... **$125.00**
Simpson Model 260-XLPM—With mirror scale. Net Each..... **128.00**



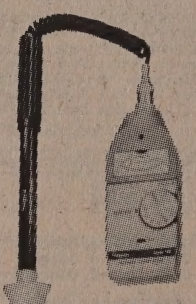
260



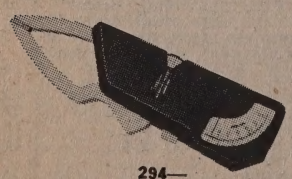
2745



7016



380



294—

MODEL 303-3XL SOLID-STATE FET VOM

A portable multimeter for field and factory electronic servicing, as well as design and component testing. IC's and LED's are combined in an all solid-state circuit for high input impedance, high sensitivity, and drift-free performance. Simplified dial places most measurements on same scale. Automatic LED "polarity" and "power on" indication. An AC charger (supplied) charges the self-contained, nickel cadmium "D" cell to provide up to 20 hrs. of continuous operation; the instrument can also be AC line operated. **AC and DC Volts (10 megohm impedance):** 0–0.03, 0.1, 0.3, 30, 100, and 300 (1000 VAC and 1000 VDC on separate jacks); **AC and DC Current:** 0–30μA, 1mA, 30mA (1A and 10A on separate jacks); **Resistance (low-power and diode ohms):** Rx1, Rx10, Rx100, Rx1K, Rx10K, Rx100K, Rx1 meg (10 ohms center scale).
Simpson Model 303-3XL—Complete with probe, test leads, battery, charger adapter, and manual. Net Each..... **$165.00**
Simpson No. 00074 HV (30KV) probe.—Net Each... **23.25**

MODELS 294, 295, 296 AMP-CLAMP METERS

A new series of lightweight instruments for troubleshooting on motors, relays, transformers, and control circuits. Load balance tests and alternating current measurements can be made without power interruption. **AC Current (all models):** 0–6, 15, 30, 60, 150, and 300A; **AC Voltage (Models 295 and 296):** 0–30, 150, 300, and 600V; **Resistance (Model 296):** 0–500 ohms (25 ohm center scale); **Size:** 10″ l. x 2.7″ w. x 1.4″ h; **Weight:** 14 oz.
Simpson Model 294—Net Each..... **$45.00**
Simpson Model 295—Complete with test leads and manual. Net Each..... **$53.00**
Simpson Model 296—Complete with test leads, battery, fuse and spare, and manual. Net Each..... **$71.50**
Simpson No. 02227 Probe and bracket—Net Each..... **2.75**
Simpson No. 02226 Carrying Case—Net Each..... **16.40**

MODEL 151 LINE SPLITTER

For use with Simpson Models 150, 294, 295 and 296 testers and other clamp-on units. Unit separates the two wires of an AC circuit for use of clamp-on meters; also provides 10X multiplication for low currents. Durable, high-impact housing withstands heavy-duty conditions.
Simpson Model 151—Complete with 2 ft. cord, 3-prong plug, and manual. Net Each..... **$7.15**

MODEL 7016 COUNTER-TIMER

An electronic frequency counter-timer for measuring frequency, elapsed time, and events. The 0.55″ planar display is easily readable. Other features include: display storage selection, automatic decimal point location, variable display time, manual reset, overrange and gate-time indications, high input impedance, and input overload protection. **Frequency:** 5 Hz to 50 MHz; **Gate time:** 10 msec. (0.1kHz resolution), 0.1 sec., 1.0 sec., 10 sec. (0.1 Hz resolution); **Accuracy:** ± 1 count ± time-base accuracy; **Elapsed Time:** 0.01 sec. to 19999.99 sec., based on 1,000,000 counts overrange; **Accuracy:** ± 1 count; **Self Test:** Internal 100kHz signal to test circuits and display.
Simpson Model 7016—With probe assembly, power cord, and manual. Net Each..... **$335.00**
Simpson Model 7016A—Same as Model 7016, but with more accurate internal oscillator. Net Each..... **$435.00**
Simpson Model 7016B—Same as Model 7016, but with BCD output. Net Each..... **$385.00**
Simpson No. 00238 Replacement Probe—Net Each.. **16.00**

MODEL 7026 ELECTRONIC COUNTER

Similar to Model 7016, but with extended measurement capabilities, such as: periods, ratios of two frequencies, time intervals, and totalizing. **Frequency:** 5 Hz to 50 MHz; **Gate Time:** 10 μsec. (0.1 MHz resolution), 100 μsec., 1 msec., 10 msec., 100 msec., 1 sec., 10 sec. (0.1 Hz resolution); **Accuracy:** ± 1 count ± time-base accuracy; **Period Display Range:** Single, 100 μsec. to 0.2 sec. Multiple, averaged, 100 msec. to 0.2 sec. Averaged, 1, 10, 100, 1000 sec.; **Resolution:** Single, 10 μsec. Multiple, averaged, 10 μsec.; **Accuracy:** ± 1 count ± time-base accuracy.
Simpson Model 7026—Complete with probe assembly, power cord, and manual. Net Each..... **$385.00**
Simpson Model 7026A—Same as Model 7026, but with more accurate internal oscillator. Net Each..... **$485.00**
Simpson Model 7026B—Same as Model 7026, but with BCD output. Net Each..... **$435.00**
Simpson No. 00238 Replacement Probe—Net Each.. **16.00**

MODEL 7020 HIGH-FREQUENCY SCALER

A solid-state scaler that will interface with Simpson Models 7016 and 7026 and other frequency counters to extend the frequency capability to 512 MHz. A front-panel switch selects direct frequency divisions of 1, 10, and 100. **Input f/1:** 10 MHz to 100 MHz, sine or square waves; **f/10:** 10 MHz to 512 MHz, square wave or 40 MHz to 512 MHz, sine wave; **f/100:** 10 MHz to 512 MHz, square wave or 40 MHz to 512 MHz, sine wave; **Sensitivity:** 50mV rms. min. to 2V rms. max., protected to 5V rms.
Simpson Model 7020—Complete with power cord, connectors and manual. Net Each..... **$450.00**

MODEL 380 MICROWAVE LEAKAGE TESTER

The Model 380 measures the amount of microwave leakage energy radiated by ovens, heaters, and other industrial equipment generating high power at 2450 MHz. The non-polarized probe permits selection of four distinct ranges for power-density measurements. The response time is variable. Built-in tripod mount. **Frequency:** 2450 MHz ± 10 MHz; **Power Density Ranges:** 0–2.5, 10, 25, and 100 mW/cm²; **Accuracy:** ± 1dB; **Response Time:** Fast–1.2 sec. max, Slow–3.0 sec. nominal; **Power Required:** Two 9 V batteries, supplied; **Size:** 8.18″ l. x 3.03″ w. x 1.87″ d.; **Weight:** less than 1 lb.
Simpson Model 380—Complete with probe, extra Styrofoam spacer, two batteries, and manual, all in carrying case. Net Each..... **$195.00**

MODEL 2745 X-Y RECORDER

The Model 2745 features full X-Y plus Y-T strip-chart recording. It is ideal for precision recording of sound-level variations in conjunction with Simpson Models 884 and 886 Sound Level Meters, with or without the Simpson Model 888 Octave Band Filter. Recording can be accomplished with ink using a felt-tip pen or inkless using a stylus and pressure-sensitive paper. Any range can be zero suppressed from 0 to 100%. The zero value can be placed anywhere on the chart for bipolar recording. **Ranges:** 1, 2, 5, 10, 20, 50 mV/cm, both axes; **Intermediate Ranges:** Sensitivity is continuously adjustable from 40 to 100% of any range selected; **Drive Speeds:** 1, 2, 4, 10, and 20 cm/sec., or 1, 2, 4, 10, and 20 min./cm.; **Power Required:** Eight 1.5 V "D" cells; **Size:** 8.08″ w. x 10.24″ d. x 3.59″ h.; **Weight:** 7.72 lbs.
Simpson Model 2745—Complete with two rolls of paper, two pads of sheets, two stylii, test leads, dust cover, batteries, and manual. Net Each..... **$1295.00**

INSTRUMENTS THAT STAY ACCURATE

MODELS 2750, 2755, 2760, 2761 AND 2762 MINIATURE STRIP CHART RECORDERS

Strip chart recorders mount in less panel space than a 4½" meter. Use specially formulated paper which requires no ink. Will record continuously for over a month at 20 mm per hour, using a single roll of chart paper. **Chart Speeds:** 20 mm (0.79") and 120 mm (4.72") per hour switch selectable. Quick-change gear boxes are available to provide other speeds. **Chart Paper:** Pressure sensitive, 2.6" wide x 50' long. **Take-Up Reel:** Built-in, automatic motor driven. **Motor Drive:** Synchronous, 3 VA, 90–160 VAC, 60 Hz. Supplied complete with two rolls of chart paper, panel mounting bracket, 60-inch three-wire line cord, test leads (Models 2761 and Model 2762) and manual. **Size:** 3¾" square by 9⅛" deep. Weight, 4 lbs. approximate.

MODEL 2750 MINIATURE CHART RECORDERS

Miniature single or dual-channel recorders available with AC and DC voltage, AC and DC current ranges; and as 0–1 mA/0–1 mA dual channel unit. **Accuracy:** ±1.5% of full scale. **Impression Rate:** 3 seconds.

Range	Net Each	Range	Net Each
0–10 DC microamps*	$211.75	0–0.4/25 DC millivolts‡	$297.00
0–50 DC microamps*	194.50	0–50 DC millivolts	178.25
0–100 DC microamps	183.50	0–5 AC amps	194.50
0–500 DC microamps	178.25	100–130 AC volts§	216.00
0–1 DC milliamps	178.25	0–150 AC volts	183.50
0–1/0–1 DC milliamps†	221.50	0–300 AC volts	183.50

*Impression rate: 6 seconds. †Dual channel; impression rate: 6 seconds; 5 times on one channel; 1 time on other channel. ‡Adjustable. §Segmental scale.

MODEL 2755 10-CHANNEL EVENT RECORDERS

Provides continuous recording of ten separate events. Records any variable that can be converted to an electrical value. **Accuracy of Recording:** 10 msec nominal pen response. **Impression Rate:** Continuous. **Power per Solenoid:** 1.2 watts except AC model, 2.2 VA.

Voltage	Voltage	Net Each
10 channels, 6 VDC	10 channels, 24 VDC	$243.00
10 channels, 12 VDC	10 channels, 115 VAC, 60 Hz	243.00
10 channels, 24 VAC, 60 Hz		243.00

SERIES 2760 SINGLE RANGE TEMPERATURE RECORDERS

Record for over a month unattended. Inkless, pressure sensitive paper. Switch selected chart speeds 20/120 mm per hour. Taut band movement is temperature compensated. Completely accurate up to 1.5% FS.

Simpson No.	Ranges	Sensor	Net Each
23100	−60° C to 0° C	Pt-100 Resis. Bulb	$205.25
23102	0 to +60° C	Pt-100 Resis. Bulb	205.25

23011	0 to +2500° F	C/A Thermocouple	216.00

MODEL 2761 TEMPERATURE RECORDER

Three built-in temperature ranges which are switch selected. **Temperature Range:** −50° F to +50° F; +50° F to +150° F; +150° F to +250° F. **Accuracy of Recording:** ±2° F over range of 0° to 120° F; ±3° F over balance of range. **Impression Rate:** 3 sec.

Simpson Model 2761 Temperature Recorder—Net Ea. **$205.20**

MODEL 2762 TEMPERATURE RECORDER

Dual channel features same range recorded on both channels, 2 inputs; two ranges switch selectable. **Temperature Range:** −40° F to +60° F; +50° F to +150° F. **Accuracy of Recording:** ±2° F. **Impression Rate:** 6 seconds; ten times on one channel, two times on the other channel.

Simpson Model 2762 Temperature Recorder—Net Ea. **$226.75**

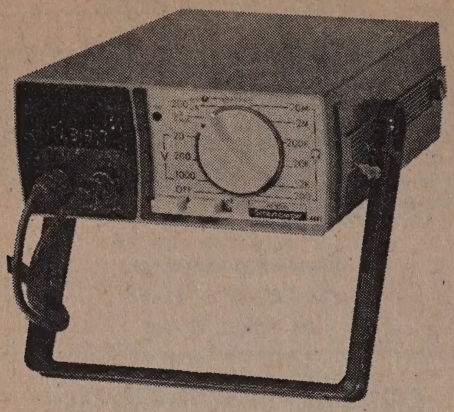
WESTON® Digital Test Instruments

MODEL 4442 DIGITAL MULTIMETER



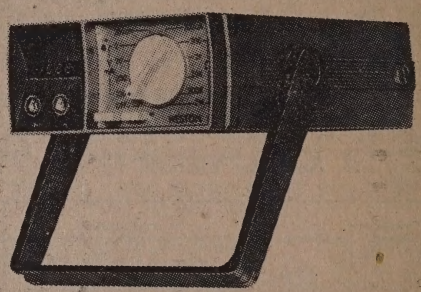
RANGES

DC Volts: 0–199.9 mV; 0–1.999–19.99–199.9–1000 volts.
AC Volts: 0–199.9 mV; 0–1.999–19.99–199.9–1000 volts.
DC Current: 0–1.99 μA; 0–1.999 mA.
AC Current: 0–199.9 μA; 0–1.999 mA.
Resistance: 0–199.9–1.999K–19.99K–199.9K–1.999M–19.99M ohms.
Conversion Rate: Approx. four per second.
Common Mode Rejection Ratio: 80 dB (approaches infinity on battery).
Normal Mode Rejection Ratio: 38 dB.
Temperature: 25° C ±3° C with guaranteed accuracy (operable from 0° to 50° C—derate accuracy).
Power Required: Four "C" size nickel cadmium cells (supplied); 115 VAC, 50–400 Hz.
Size: 5.45″ w. x 7″ d. x 2.25″ h. Weight, less than 2½ lbs.
Weston Model 4442 Digital Multimeter—Includes test probes and 117 VAC battery charger/AC converter. List Price . . . **$295.00***
Weston Model 4443 Digital Multimeter—Similar to Model 4442, but reads only DC current and voltage, and resistance. Ranges same as Model 4442. List Price **$250.00***

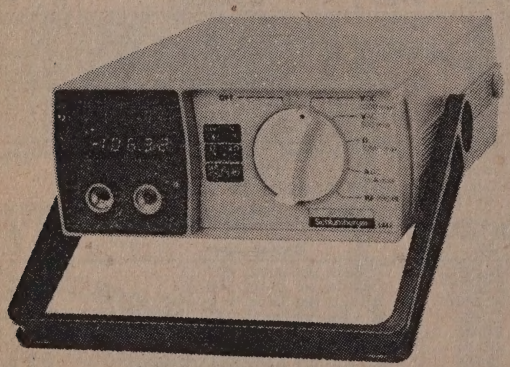
MODEL 4440 PORTABLE DIGITAL MULTIMETER

RANGES

DC Volts: 0–199.9 mV; 0–1.999–19.99–199.9–999 volts.
AC Volts: 0–199.9 mV; 0–1.999–19.99–199.9–999 volts.
DC Current: 0–199.9 μA.
AC Current: 0–199.9 μA.
Resistance: 0–199.9–1.999K–19.99K–199.9K–1.999M ohms.
Display: 1999 non-blinking; 0.19″ character size.
Conversion Rate: Approx. 4 per second.
Common Mode Rejection: 80 dB.
Normal Mode Rejection: 35 dB.
Temperature: 15° C to 35° C (10° C to 50° C with derated accuracy).
Power Required: Rechargeable or standard "C" batteries or 115 VAC, 50–400 Hz.
Size: 5.45″ w. x 7.25″ d. x 2.25″ h. Weight, less than 2½ lbs.
Weston Model 4440 Digital Multimeter—Comes with four Nicad "C" cells and battery charger. High impact molded plastic case. List Price **$269.00***



MODEL 4444 AC/DC AUTO RANGING DIGITAL MULTIMETER

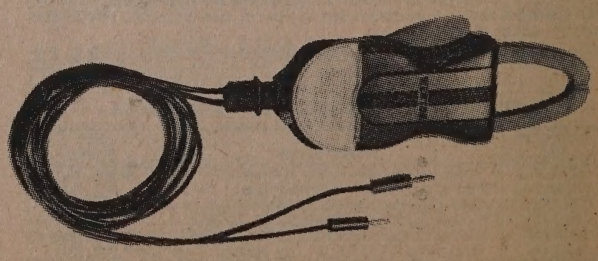


RANGES

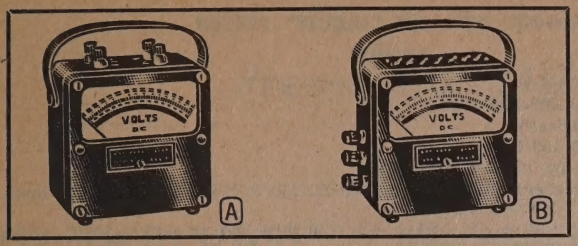
AC Volts: 0–100 mV; 0–1–10–100–500 volts.
DC Volts: 0–100 mV; 0–1–10–100–1000 volts.
DC Current: 0–10–100 μA; 0–1 mA.
Two Terminal Resistance: 0–1K–10K–100K–1M–10M ohms.
Input Sensitivity: 0–1–10–100 nA for DC current; 0–10–100 μV, 0–1–10–100 mV for all others.
Common Mode Rejection: Greater than 120 dB at DC rejection; greater than 130 dB at 60 Hz rejection.
Normal Mode Rejection: Greater than 60 dB at 60 Hz.
Readings/Second: Greater than 3/sec on DC and ohms; greater than 2/sec on AC.
Temperature Range: Operating, 0° to +45° C; storage, −30° C to +70° C.
Power Required: 117/234 VAC (10%–15%), 50/60 Hz.
Size: 5.45″ w. x 7″ d. x 2.25″ h. Shipping Weight, less than 2½ lbs.
Weston Model 4444 Digital Multimeter—Lightweight carrying case available as optional. List Price **$435.00***

CLAMP-ON AC CURRENT PROBE

The Model 9740-0275768 is a rugged, lightweight probe designed for one-hand use. For use with voltmeters having a 200 mV AC range at 1 megohm or higher impedance. Output is linear with respect to input and the probe is rated from 60–400 Hz. Output leads end in banana plugs. Accuracy is ±4% F.S. on 2 A range, ±3% F.S. on 20 A range and ±2% F.S. on 200 A range.
Weston Model 9740-0275768 Clamp-On Probe—List . . **$50.00**



★QUANTITY DISCOUNTS: LOTS OF 1-4, LIST; 5-9, —5%; 10-24, —10%; 25 UP, —25%



MODEL 931 DC INSTRUMENTS (FIG. A)

Compact, light weight and accurate within ½ of 1%. Hand calibrated mirror scales and knife-edge pointers eliminate parallax errors. Scale length 4.04". Self-shielded permanent magnet moving coil. Size, 5¼" x 5" x 3¼". Approx. Weight, 2 lbs.

CRAMER ELECTRONICS

Presents a Total Video Concept

TO INCLUDE: AIDING YOU IN THE SELECTION OF EQUIPMENT, SERVICE AND PRODUCTION FACILITIES, AS WELL AS THE DUPLICATION AND DISTRIBUTION OF VIDEO SOFTWARE.

PRODUCTION

Cramer has a fully equipped staff ready to consult with you on the selection of the proper production facility, and the creation and critiqueing of both large and small Video programs.

EQUIPMENT

As a leading distributor of video hardware, we handle all major lines of equipment, some of which are listed in this catalog. Besides the ones listed, Cramer represents approximately 75 additional Video manufacturers that supply Video tape recorders, cameras, monitors, special effects generators and a variety of switching equipment for CCTV and CATV applications. Should your interest extend beyond one of the lines listed, please contact the Cramer office in your area and they will be happy to provide additional information.

SERVICE

Due to our nationwide network of offices, we are able to tailor a service program for your particular needs beyond the manufacturer's warranty period. Cramer's toll free number, 800-225-3768, allows you to call our national service headquarters and receive immediate information to help in the resolution of any service problem.

G.S.A. REQUIREMENTS

Cramer Electronics will make available, upon request, Government Service Administration price schedules to all customers who qualify for purchasing under a G.S.A. contract number. Most manufacturers listed in this catalog are on G.S.A. and a complete listing may be obtained by calling your local Cramer sales office.

DUPLICATION

Cramer has available, a tape duplication center with a staff of professionals ready to handle any duplication requirement, whether large or small. Please call the representative in your area for more information and pricing on our duplication service.

SPECIALIZED INVENTORY

Due to the specialized nature of today's market, Cramer Electronics will provide items tailored to your specific application. Whether it be particular tape lengths or modification to standard manufacturers' line items, we would be happy to discuss your requirements.

REPLACEMENT PARTS

Cramer Electronics, being a factory authorized service facility for all major lines of video equipment, maintains a large inventory of parts to support our sales and service efforts at our part facility located at 120 Hampton Ave., Needham, Ma. 02194.

SYSTEMS AND STUDIOS

We offer a full range of video equipment, from a simple one camera security system to the most elaborate color studios. Whether you want us to do the complete job or supplement your in-house capabilities, our experienced professionals can handle the entire job from start to finish. Should you desire to implement a video system in your company for the first time, our qualified engineers, technicians and training department are available to you to help make this first step successful with the least amount of complications.

Video Tape

CROLYN® CHROMIUM DIOXIDE VIDEO TAPE
A NEW TECHNOLOGY FROM DUPONT

DuPont Crolyn® Video Tape is more than just a high energy tape. It represents a new technology in magnetic signal reproduction. Tape consists of a Mylar® Polyester base to which a chromium dioxide in the form of an easily dispersed and highly acicular pigment is carefully applied to form a tape with both high saturation, magnetization and coercivity. This tape combined with the "UMatic and compatible ¾" U Series Systems provides an ideal system for slow speed recording techniques used in this ¾" format equipment. Crolyn® Video Tape has excellent signal to noise ratio, low level of dropouts and minimum print-through. New. Shipping Weight, 2.5 lbs.

SPECIFICATIONS

Physical Properties: Coating Thickness, 0.18 mils; Base Thickness, 0.83 mils; Width, 0.75″

Magnetic Properties: Orientation, Longitudinal; Coercivity AC, 500 Oe; Flux Or, 1.50 lines; Remanence, Br, 1500 Gauss; Squareness, Br/Bs, 0.9

Tape Performance: Video S/N, 0 Passes, 54 dB CCIR Weighted; 150 Passes, 54 dB CCIR Weighted; RF Output, 0 Passes, 0 dB; 150 Passes, −2 dB; Audio Output, 0 dB; Audio Sensitivity, 0 dB; Headlife, 500–1000 hours typical

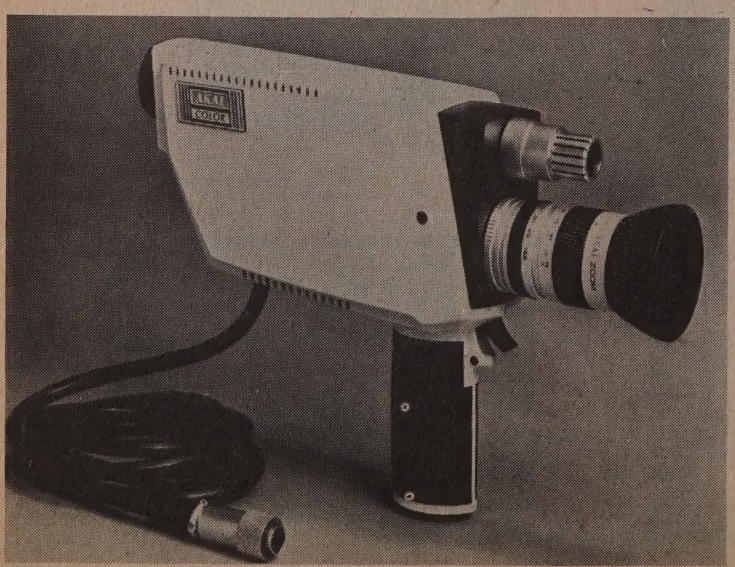
AKAI™

Video Camera

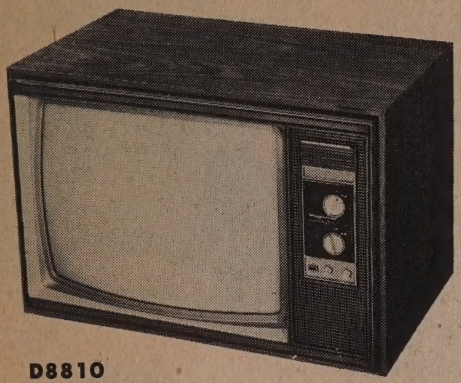


MODEL VC-150
COLOR VIDEO CAMERA

The VC-150 color video camera is the heart of the Akai VTS-150 and VTS-150B systems. Standard features include a six power zoom lens, built-in microphone, an electronic view-finder, automatic/manual aperture control and servo-iris sensitivity selector. The 2 vidicon tube system camera weighs less than 6 lbs. Unique to the Akai system, the Camera Control Unit (CCU) is an integral part of the recorder.

CALL OR WRITE YOUR NEAREST CRAMER BRANCH FOR LATEST PRICE INFORMATION.

Magnavox Video Equipment



D8810

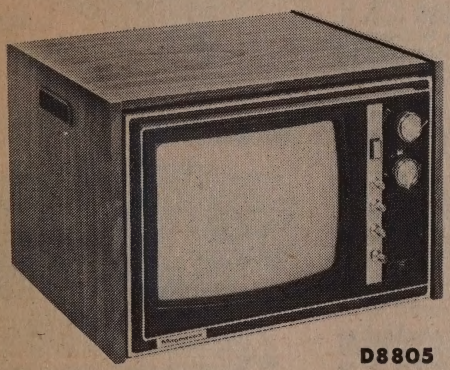
MAGNAVOX MODEL D8810 COLOR RECEIVER/MONITOR

The Model D8810 Receiver/Monitor features a 25″ diagonal (315 sq. in.) negative black matrix picture tube. Provisions are made for videotape playback or camera display; also, a standard TV receiver. Antenna inputs are 75 ohm unbalanced or 300 ohm balanced. The chassis is 100% solid state for maximum reliability and is fully transformer powered. Video input and output connections are BNC and 8-pin VTR connectors with looping input connector provided. The video input is 1 Volt P-P composite (0.3 to 2.0 V) sync negative.

Audio input and output connections are provided, phone jack and 8-pin VTR connector with looping input jack. The audio output is 3 watts rms to a 16 ohm speaker. Audio output is unaffected by receiver volume control. The color circuits are automatic and do not require setup adjustments.

The horizontal resolution for TV mode is 240 TV lines and 330 TV lines in Monitor mode.

Construction: Wood enclosure, walnut grain vinyl finish. **Power:** 108 to 132 Volts AC, 60 Hz, 2.2 amps. **Anode voltage:** 30 KVDC. **Certifications:** UL for safety, FCC and DHEW for radiation. **Dimensions:** 31⅝″ long, 24¼″ depth, 22″ high. **Weight:** 120 lbs.



D8805

MAGNAVOX MODEL D8805 PORTABLE COLOR RECEIVER/MONITOR

The Model D8805 functions as a monitor or receiver. Features a 13″ diagonal (90 sq. in.) in-line, slotted-mask picture tube. Antenna input is 75 ohm and 300 ohm. The chassis is 100% solid state, with transformer power. The video input and output connections are BNC and 8-pin VTR connector with looping input connector provided. The video input is 1 Volt P-P (0.5 to 2.0 V), sync negative. Audio input and output connections are phono jack and VTR connectors with looping input jack. The audio output is 1 watt, 3″ round speaker, 8 ohms. Most color and other adjustments are located on front panel.

Horizontal resolution is better than 240 TV lines. **Power:** 108 to 132 Volts AC, 60 Hz, 115 watts. **Certifications:** UL for safety, FCC and DHEW for radiation. **Dimensions:** 20½″ length, 17⅜″ depth, 14″ high. **Weight:** 49½ lbs.

CV400

MAGNAVOX MODEL CV-400 HAND HELD COLOR TV CAMERA

The CV-400 Hand-Held Color TV camera features a single-tube principle with the use of a single vidicon pick-up tube, in which color registration problems are eliminated. The CV-400 Color Camera also includes an electronic viewfinder and a 4:1 zoom lens (20–80 mm). The camera offers excellent stability of operation through automatic gain control, automatic chroma tracking, automatic chroma focusing and automatic dark current compensation. The only operating controls are the OFF/ON switch and normal lens controls including zoom and focus.

The video output is a composite NTSC compatible encoded, in compliance with EIA. Vertical sweep rate is 59.95 Hz, horizontal sweep rate is 15,734 Hz, interlaced 2:1, 525 lines/frame, 30 frames/second. Required illumination is 30 ft. lamberts at iris setting of f2.5.

Weight: 6.9 lbs. **Dimensions:** 5″ high, 5″ wide and 15″ long.

The processor, furnished with the CV-400 color camera, is 100% solid state with plug-in circuit boards. The cable from camera to processor is a standard 8 to 10 foot cable (mini cable 0.290 diameter; less than 1 ounce per/ft) but 50 ft or 100 ft. cables are available. **Output Impedance:** 1 volt, 75 ohms. The rear panel of processor features a switch which allows instant playback of recorded video on the camera viewfinder. **Weight:** 8.8 lbs. **Dimensions:** 3″ high, 14½″ wide, 11″ deep. **Voltage and power requirements:** 117 VAC, 60 Hz, 55 watts.

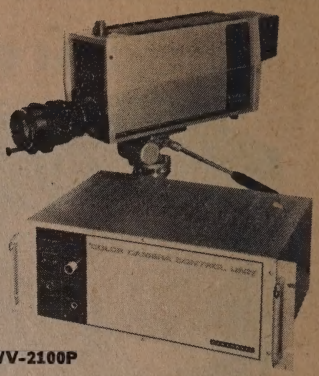
CRAMER ELECTRONICS CARRIES A COMPLETE LINE OF MAGNAVOX PRODUCTS. WRITE OR CALL YOUR NEAREST CRAMER BRANCH FOR INFORMATION OR PRICES ON PRODUCTS NOT LISTED.

PANASONIC. Video Cameras and Monitors

MODEL WV-2100P DELUXE COLOR STUDIO CAMERA

Color camera has one vidicon for luminance, another for chrominance. Simplified controls include vertical and horizontal centerings and white balance setting. Large 4½" CRT viewfinder has brightness and contrast controls. Automatic gain and automatic pedestal circuitries may also be operated manually. Includes remote Camera Control Unit which connects to camera head with a single multi-cable; contains camera controls, power on/off switch, pilot lamp, intercom jack and tally light. Rear panel has provision for subcarrier, sync, blanking, and horizontal and vertical drive UHF connectors as well as NTSC composite and non-composite video output connectors. **Scanning Standards:** 525 lines, 60 fields, 30 frames. **Required Illumination:** over 50 ft. candles min. (F2.0) 200 ft. candle standard (F2.8). **Taking Lens:** 6:1 zoom lens; F2.0 18–105 mm zoom (manual, push-rod or flexible-cable control); F 2.0 16.5–95 mm zoom (motorized). **View Finder:** 4.5" diagonal CRT. **Power Required:** 117 VAC, 60 Hz, 95 w. **Size:** Camera Head, 6.5" w. x 16" d. x 8.4" h. Control Unit, 16½" w. (19" w/angle) x 12¼" d. x 7" h. Weight, Camera Head, 22 lbs., Control Unit, 30 lbs.

Panasonic Model WV-2100 P Color Studio Camera and Camera Control Unit—



WV-2100P

MODEL WJ-1000P COLOR SYNC GENERATOR

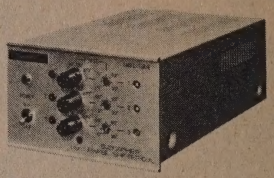
Designed for use with Panasonic's Color Studio Camera. May also be used in monochrome systems. EIA RS-330 color sync generator has frequency interleaving 3.58 MHz subcarrier and burst flag pulse signals. High reliability crystal oscillator gives exceptional time-base stability for jitter-free pulses. Available in EIA monochrome and NTSC color configurations. Has all digital circuitry. Front-panel test points are provided for easy maintenance. Mounts in 1¾" vertical rack space. **Monochrome Output:** HD, VD, Blanking, Sync. 4.0 p-p ±0.5 V, 75 ohms. **Subcarrier Output:** 2.0 V p-p, ±10% 3.579545 MHz ± 25 Hz, 75 ohms. **Pulse Rise and Decay Time:** Less than 150 nanosec. **Output Impedance:** 75 ohms ± 10%. **Burst Flag Pulse:** 4.0 V p-p ± 0.5 V, 75 ohms. **Power Required:** 117 VAC, 20 watts. **Size:** 16½" w. (19" w/angle) x 10" d. x 1¾" h. Weight, 9.3 lbs.

Panasonic Model WJ-1000P Color Sync Generator

MODEL WJ-1700P SUBCARRIER PHASE SHIFTER-DISTRIBUTION AMPLIFIER

Designed for distribution of subcarrier (3.58 MHz) signals, one input to WJ-1700P results in three identical isolated outputs, each with its own 0° to 360° phase adjustment. The input subcarrier is reformed into distortion-free outputs, each of which has a ± 6 dB gain adjustment. Fully silicon transistorized, mounts in a standard EIA rack with an accessory mounting frame. **Subcarrier Input:** 3.58 MHz 1.0 to 3.0 V p-p; 75 ohms or Hi-Z looping through UHF connectors. **Outputs:** Three, 75 ohms source terminated. **Output Level:** 2.0 V p-p ± 1.0 V. **Output Phase:** 0° to 360° adjustable for each output. **Power Required:** 117 VAC, 15 watts. **Size:** 5½" w. x 8" d. x 3½" h. Weight, 5.5 lbs.

Panasonic Model WJ-1700P Subcarrier Phase Shifter



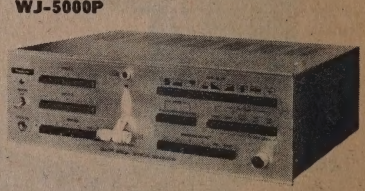
WJ-1700P

MODEL WJ-5000P COLOR SPECIAL EFFECTS GENERATOR

Color special effects generator has built-in vertical interval switcher for program output. Using an external sync generator such as WJ-1000P it synchronizes, switches, and effects inputs from up to five color CCTV cameras. Special effects include internal external key (monochrome), wipes, fade-in, fade-out, and superimpose. Has separate video busses for previewing and programming. Rugged and lightweight for use in mobile units, also adequate for studio use, the Model WJ-5000 P fits standard 19" EIA rack. **Video Input:** 0.7 V p-p non-composite only x 5/75 ohms or Hi-Z looping through UHF connectors. **Video Output:** 1.0 V p-p composite x 2/75 ohms UHF connectors. **Frequency Response:** 10 MHz ± 1.0 dB. **Signal-to-Noise Ratio:** Better than 50 dB. **Power Required:** 117 VAC, 50/60 Hz. **Size:** 16½" w. (19" w/angle) x 10⅘" d. x 5¼" h. Weight, 22 lbs.

Panasonic Model WJ-5000P Color Special Effects Generator

WJ-5000P



MODEL WV-240P CCTV CAMERA

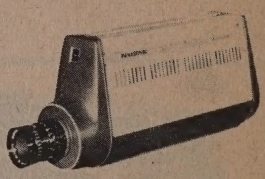
Versatile, solid state non-viewfinder CCTV camera for industrial studio and surveillance. Requires minimum illumination. Choice of sync systems: Internal random sync, external EIA 2:1 interlace, or sync generator. Automatic/manual light control, sync switch, video output, external sync input, pilot lamp, on/off switch. Beam, target and electrical focus adjustments. **Frequency Response:** 7 MHz. **Horizontal Resolution:** 550 lines. **Signal-to-Noise Ratio:** 40 dB. **Vidicon Tube:** ⅔" separate mesh vidicon. **Scanning Standards:** 525 lines/60 fields/30 frames. **Output:** 1.0 V peak-to-peak, composite/75 ohms load, no RF. **Automatic Light Compensation:** 5000 to 1. **Required Illumination:** 2 ft.-candles (20 lux) (F1.6 lens). **Lens:** F1.6, 16 mm, C-mount (no iris). **Operating Temp. Range:** +14° F to +122° F. **Power Required:** 8 watts, 117 VAC, 60 Hz. **Size:** 3¼" w. x 10" d. x 5⅝" h. Weight, 4.4 lbs.

Panasonic Model WV-240P CCTV Camera

Panasonic Model WV-200P CCTV Camera—Similar to Model WV-240P but without choice of sync systems. Sync synchronizing is random horizontal, line-locked vertical.

Panasonic Model WV-241P CCTV Camera—Similar to Model WV-240P, but also includes built-in industrial 2:1 interlace sync generator

WV-240P



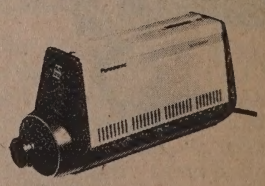
MODEL WV-260P HIGH SENSITIVITY CCTV CAMERA

Features ⅔" silicon-target vidicon camera (body only, without lens; use optional Panasonic auto iris lens); operable at low light levels (min. 0.1 foot candle). Camera designed for use in infrared light applications. Has 3 sync modes: internal random interlace, internal built-in 2:1 interlace, external 2:1 interlace. Optional remote control for beam and focus.

Panasonic Model WV-260P CCTV Camera

Panasonic Model WV-245P CCTV Camera—Same, but has ⅔" separate mesh vidicon instead of silicon-target vidicon.

WV-241P



HIGH-RESOLUTION AND STUDIO CCTV CAMERAS

Description and specifications on request.

Panasonic Model WV-380P High-Resolution Camera

Panasonic Model WV-341P Studio Camera

Panasonic Model WV-361P Studio Camera

WV-260P

MODEL CT-911E COMMERCIAL/EDUCATIONAL COLOR TV MONITOR RECEIVER

Color television monitor features "Quatrecolor" technology. Has all solid state circuitry, isolated power transformer chassis, and 3-prong power cord. Also has VHF/UHF tuner for normal color TV operation, and RF input signal for video cartridge/cassette playback. Specifications on request.

Panasonic Model CT-911E Color TV Monitor Receiver

MODEL TR-195M BLACK & WHITE CCTV MONITOR

Large screen, black and white CCTV monitor has 184 sq. inch viewing area (19" diagonal). Features all solid state circuitry. Provides UHF, RCA and 8-pin connectors for VTR playback function. Specifications on request.

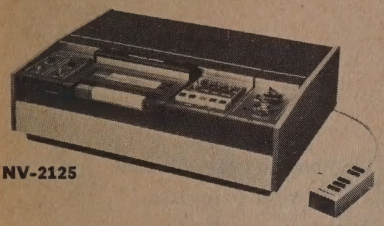
Panasonic Model TR-195M B&W CCTV Monitor

PANASONIC. COLOR AND BLACK/WHITE VIDEO RECORDERS

NV-5120

MODEL NV-5120 ½″ COLOR VIDEO CARTRIDGE RECORDERS

For record/playback on ½″ tape cartridges. Color and black and white, compatible with EIAJ #1 black and white and EIAJ ½″ color standards. Automatic tape threading, end-of-tape rewind and cartridge ejection. Patented HPF magnetic heads. Still framing, fast forward and rewind, automatic phase control circuit, audio dubbing, pre-set auto repeat. Built-in RF, channels 5 and 6. **Heads:** 2 rotary heads for video; 1 stationary for audio/control; 1 erase head for both video and audio; 1 erase head for audio dubbing. **Tape Speed:** 7½ ips. **Recording Time:** 30 min. with NV-P530 (1,200 ft.). **Frequency Response:** Audio, 50–12,000 Hz. **Signal-to-Noise Ratio:** video, more than 40 dB; audio, more than 42 dB. **Power Required:** 120 VAC, 60 Hz. **Size:** 22 1/16″ w. x 15¾″ d. x 8½″ h. Weight, 53 lbs.
Panasonic Model NV-5120 Video Cartridge Recorder
Panasonic Model NV-5125 Video Cartridge Recorder—Same as Model NV-5120, but with built-in VHF/UHF tuners for off-air recording. Weight, 55 lbs.



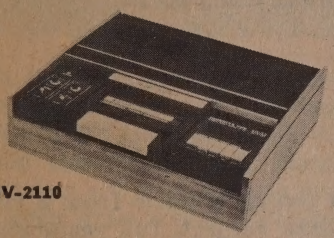
NV-2125

MODEL NV-5110 ½″ COLOR VIDEO CARTRIDGE PLAYER

Similar to Model 5120, but player only. **Heads:** 2 rotary heads for video; 1 stationary head for audio/control. **Size:** 19 1/16″ w. x 15¾″ d. x 8½″ h. Weight, 48½ lbs.
Panasonic Model NV-5110 Video Cartridge Player

MODEL NV-2120 ¾″ COLOR VIDEO CASSETTE RECORDERS

Records and plays color pictures and stereo sound from erasable magnetic tape. Ideal for home entertainment, education, training, and industrial applications. Color and black and white record/playback on compact ¾″ video cassettes. Two-track audio, audio dubbing, AGC on audio and video, automatic stop at end of tape, elevator tape loading system. Built-in RF, channels 5 and 6. **Heads:** 2 rotary heads for video; 1 stationary head for audio/control; 1 full track erase head. **Tape Speed:** 3¾ ips. **Recording Time:** 60 min. with NV-P26 (1,175 ft.). **Frequency Response:** Audio, 50–12,000 Hz. **Signal-to-Noise Ratio:** Video, more than 40 dB; audio, more than 42 dB. **Power Required:** 120 VAC, 60 Hz. **Size:** 24″ w. x 17¾″ d. x 7⅞″ h. Weight 62 lbs.
Panasonic Model NV-2120 Video Cassette Recorder
Panasonic Model NV-2125 Video Cassette Recorder—Same as Model NV-2120, but with built-in VHF/UHF tuners for off-air recording; pause/record and play control, remote control operation with optional NV-A150; timer record and playback, auto repeat, auto rewind, "auto-search" function tracks to specified program. Weight, 65 lbs.



NV-2110

MODEL NV-2110 ¾″ COLOR VIDEO CASSETTE PLAYER

Provides an economical, easily operable, and thoroughly reliable method for playing color pictures and stereo sound recorded on erasable magnetic tape. Plays directly on color or black and white home TVs or monitors. Color or black and white playback from compact ¾″ video cassettes. Complete array of controls; 2-track audio, automatic stop at end of tape, elevator tape loading system. Built-in RF, channels 5 and 6. **Heads:** video, 2 rotary heads; audio/control, 1 stationary. **Tape Speed:** 3¾ ips. **Frequency Response:** audio, 50–12,000 Hz. **Signal-to-Noise Ratio:** video, more than 40 dB; audio, more than 42 dB. **Power Required:** 120 VAC, 60 Hz. **Size:** 20 1/16″ w. x 17¾″ d. x 7⅞″ h. Weight, 54 lbs.
Panasonic Model NV-2110 Color Video Cassette Player

For information on Panasonic products not listed or latest prices write or call Cramer for a catalog.

NV-3010

MODEL NV-3010 ½″ BLACK/WHITE VIDEO TAPE PLAYER

Expertly designed tape player for classroom use has single lever control for easy operation. Can be played through conventional TV using optional RF adapter. Still framing allows study of detail. Automatic end of tape shutoff. Two rotary heads for video, 1 stationary head for audio/control. Playback time, 60 minutes with 2,400 foot reel. **Horizontal Resolution:** 300 lines. **Tape Speed:** 7½ ips. **Frequency Response:** Video, 2.5 MHz; audio, 80–10,000 Hz. **Signal-to-Noise Ratio:** 40 dB. **Impedance:** 75 ohms, video; 10K ohms, audio. **Power Required:** 117 VAC, 60 Hz. **Size:** 14 1/16″ w. x 13 3/16″ d. x 6¾″ h. Weight 27½ lbs.
Panasonic Model NV-3010 Video Tape Player

MODEL NV-3020 ½″ BLACK & WHITE VIDEO TAPE RECORDER

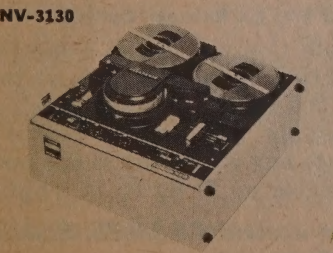
Expertly designed ½″ EIAJ #1 industry standard video tape recorder in portable case is lightweight, reliable and economical. Features rotary head drive system and standby circuit, still framing and audio dubbing. Operationally compatible with any TV camera and most monitors. Stop action, automatic and end of tape shutoff, single lever operation. RF adaptable. **Heads:** Video, 2 rotary heads; audio/control, 1 stationary head. Erase head, 1 full track; 1 for audio dubbing. **Tape Speed:** 7.5 ips. **Reel Size:** 7 inch. **Tape Width:** ½ inch. **Recording Time:** 63 min. with NV-P71 (2,400 ft.). **Horizontal Resolution:** more than 300 lines. **Frequency Response:** video, greater than 2.5 MHz; audio, 80–10,000 Hz. **Signal-to-Noise Ratio:** video, better than 40 dB; audio, better than 40 dB. **Power Required:** 117 VAC, 60 Hz. **Size:** 15⅜″ w. x 15 3/16″ d. x 6⅜″ h. Weight, 35½ lbs.
Panasonic Model NV-3020 Video Tape Recorder

NV-3020SD

MODEL NV-3130 ½″ COLOR VIDEO TAPE RECORDER WITH ELECTRONIC EDITING, SLOW MOTION PLAYBACK

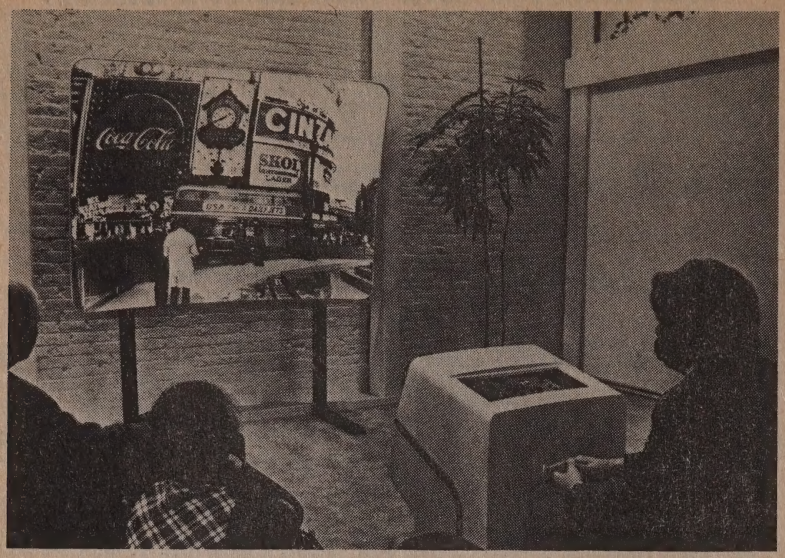
Features capstan servo electronic editing, stop action and slow motion playback. EIAJ ½″ color standard and EIAJ #1 ½″ black and white standard. Electronic editing permits instant editing of audio and video information from camera, monitor TV or prerecorded tape. Dropout/noise compensator virtually eliminates dropout. Automatic color lock control, audio dubbing. **Heads:** video, 2 rotary heads; audio/control, 1 stationary head; erase heads, 1 for both video and audio, and 1 for audio dubbing. **Tape Speed:** 7½ ips. **Tape Width:** ½ inch. **Reel Size:** 7 inch. **Recording Time:** 63 min. with NV-P71 (2,400 ft.). **Horizontal Resolution:** B/W, more than 300 lines; color, more than 240 lines. **Frequency Response:** video, greater than 2.5 MHz; audio, 80–10,000 Hz. **Signal-to-Noise Ratio:** video, B/W, better than 40 dB; audio, better than 40 dB. **Power Required:** 120 VAC, 60 Hz. **Size:** 15⅞″ w. x 16¾″ d. x 7¾″ h. Weight, 46 lbs.
Panasonic Model NV-3130 Color Video Tape Recorder
Panasonic Model NV-3020SD B/W Video Tape Recorder—Similar to Model NV-3130 except black and white only instead of color. **Power Required:** 117 VAC, 60 Hz. **Size:** 15⅜″ w. x 15 3/16″ d. x 6⅜″ h. Weight, 36 lbs.

NV-3130



MODEL NV-3040 ½″ B/W VIDEO RECORDER WITH MEMORY REWIND

Sophisticated ½″ EIAJ #1 black and white video tape recorder features feather-touch pushbutton operation and remote control capability. Memory rewind permits rewind to any pre-selected position of the tape and subsequent playback/record/dubbing. Automatic/manual control of video and audio recording levels. Still framing, audio dubbing, skew and tracking adjustment controls. Automatic end of tape shutoff. **Heads:** 2 rotary heads for video; 1 stationary head for audio/control; 2 erase heads, 1 for full track, 1 for audio dubbing. **Tape Speed:** 7½ ips. **Tape Width:** ½ inch. **Reel Size:** 7 inch. **Recording Time:** 63 min. with NV-P71 (2,400 ft.). **Horizontal Resolution:** more than 300 lines. **Frequency Response:** video, 2.0 MHz (−3 dB); audio, 80–10,000 Hz (±3 dB). **Signal-to-Noise Ratio:** video, better than 40 dB; audio, better than 40 dB. **Power Required:** 120 VAC, 60 Hz. **Size:** 15 5/16″ w. x 17⅛″ d. x 8⅞″ h. Weight, 48½ lbs.
Panasonic Model NV-3040 Video Tape Recorder



Advent Large—Screen Projection Television Video Beam 1000A

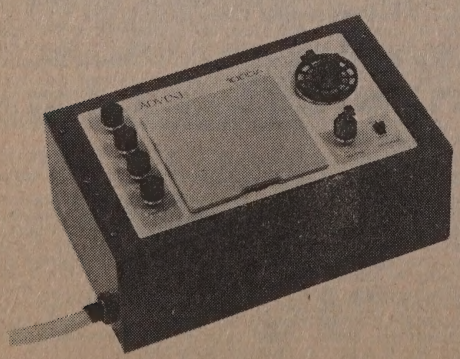
The model 1000A Advent Projection Television is a large screen projection receiver consisting of two pieces: a receiver/projection unit and a separate free-standing screen. The screen is a new highly reflective aluminum screen material measuring 4¼ ft × 5⅔ ft or 24.8 sq. ft. screen area. The attached legs give a total distance from floor to top of screen of 84 inches. Mounting brackets are available for wall mounting. The screen is slightly curved vertically.

The receiver is floor mounted, consisting of three projection tubes instead of a picture tube. The picture quality give a satisfying bright and sharp image when programming is viewed in a living room or public area with moderate background lighting. For best viewing, the background lighting must be at a minimum, since the highly reflective screen will reflect a certain amount of ambient light along with the picture, thus reducing maximum contrast. The circuitry is of the latest design to maintain good interlace and full restoration of black-level in the picture. When a sudden camera switch is made from a very light to a very dark subject, full restoration provides this detail, keeps large black (or dark) picture areas blacker, and improves contrast. Since final picture quality is dependent on reception conditions and the quality of the signal arriving at the antenna terminals, a good antenna (or connection to a good cable TV or other master antenna) is critical to realize full picture quality.

The loudspeaker is located at the front of the projector so that the sound is effectively directed back by the screen's curved surface so that it appears to originate from the screen itself.

Dimensions: Screen: 69″ wide × 52″ high; 84″ from floor to top of screen. Weight is approximately 68 lbs. (Shipping wt. 90 lbs). Projection receiver: 20⅝″ wide, 33″ high, 22″½ deep. Weight approximately 140 lbs. (Shipping wt. 176 lbs).

Power Requirements: 120 Volts AC, 60Hz, 180 watts.

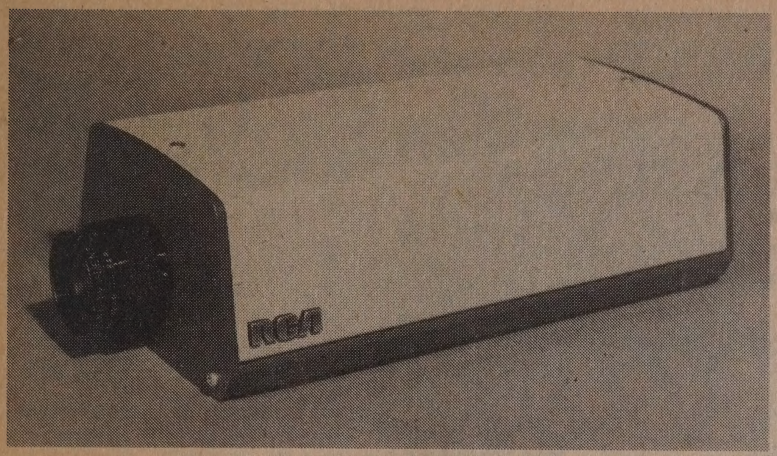


Advent Model 100 DA Remote Control

The Advent Remote Control unit is available at extra cost. Identical in performance to the regular Model 1000A, the remote control model features tuning and picture controls housed in a separate box connected to the projector unit via a cable up to 60 ft. in length.

Call or write your nearest CRAMER Branch for latest price information.

RCA Closed Circuit Cameras



Model TC1000 RCA Closed-Circuit Camera

The Model TC1000 closed-circuit camera is a general-purpose, low-cost camera which features: a ⅔" separate-mesh vidicon; All-solid-state circuitry; black clamp to maintain contrast; white clipper to prevent overdrive; ten-step gray scale; drive-loss protection by full horizontal shutdown; factory-preset controls and internal compensations to use without preliminary adjustment; all-purpose, 10,000:1 automatic light compensation; and horizontal resolution better than 500 lines. Video output: IV p-p composite, 75 ohms, can be adjusted to 1.4V. Lens mount: standard "C".

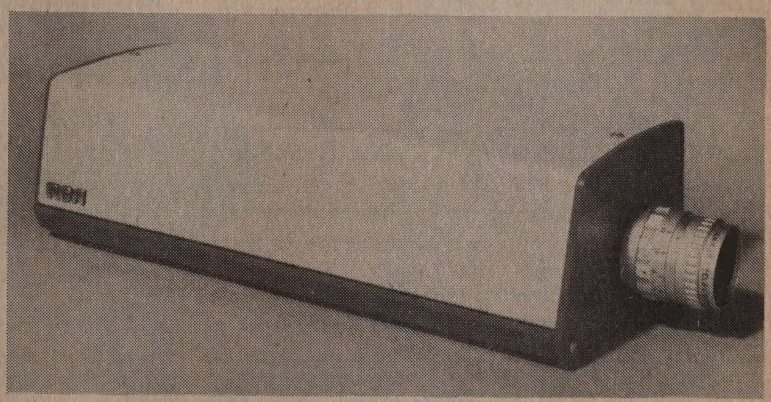
Dimensions: 9½" long, 2¾" high, 4½" wide. Weight: 3½ lbs.

Power Requirements: 120 volts AC, 60 Hz, 8 watts.

Model TC1000/02 same as TC1000 except for operation at 24 volts AC, 60 Hz, 12 watts. Can be mounted up to 1000 feet from standard bell transformer using #18 copper wire.

Model TC1000/03 same as TC1000 except for operation at 230 volts AC, 50 Hz, 8 watts.

Model TC1000/E same as TC1000 except has RF output factory set for channel 3 or 4.



Model TC1005 RCA Closed-Circuit Camera

The Model TC1005 closed-circuit camera features: all-solid-state circuits; keyed black clamp to maintain contrast; two isolated video outputs; accepts composite sync, or horizontal and vertical drives at 1V to 6V p-p; and non-reflecting beige and brown finish. Horizontal resolution is 600 lines. Automatic light compensation circuitry operates over a ratio of 40,000:1. An AGC amplifier permits use of a lower vidicon target voltage, thus reducing dark current. An internal switch changes circuitry to act on average or peak scene brightness. Video output is 1V p-p composite, adjustable to 1.4V. Sweep-loss protection utilizes full horizontal and vertical shutdown. The Model TC1005 uses a ⅔" vidicon.

Dimensions: 11¾" long, 3½" high, 5½" wide. Lens mount is the standard "C". Weight: 6 lbs. without lens.

Power Requirements: 120 volts AC, 60 Hz/ 230 Volts, 50 Hz, 20 watts. Model TC1005/01 same as TC1005 except uses one inch vidicon, with resolution of 800 lines.

Write or call your nearest CRAMER Branch for latest price information.

Scotch® BRAND Video Tapes and Accessories

SERIES 360 VIDEO TAPE

Longitudinally oriented video tape has many outstanding advantages: Heavy duty binder system, long wearing oxide, improved signal-to-noise ratio, excellent audio and video output characteristics, low dropout count, highly conductive coating, extended head life, and new back treatment prevents interlayer slippage, scratching and attraction of foreign debris.

TAPE WIND A

Scotch Number* 360-	Play Time Min.	For use with Recorders	Reel Size	Reels/ Carton	Net Each 1-9*

SERIES 461 VIDEO TAPE

High energy longitudinally oriented video tape represents a significant improvement over all other types of helical video tape. Greatly improved signal-to-noise ratio, excellent head life characteristics, time proven conductive back treatment prevents physical damage and attraction of contaminants.

TAPE WIND A

For portables (7½ ips); Sony, Panasonic, Concord, Norelco.

SERIES UCA VIDEO CASSETTES

Fully compatible with all ¾″ U-Matic video cassette systems. The "cobalt energized" high energy video tape is specially designed to withstand rigorous use. Permanent lubrication and time proven back treatment assure low head wear and maximum tape life. Video cassettes are each packed individually in either a vinyl book-style storage box (specify C114) or in a combination shipper/storage box plastic container (specify C115). Example: UC-10 packed in C114 box.

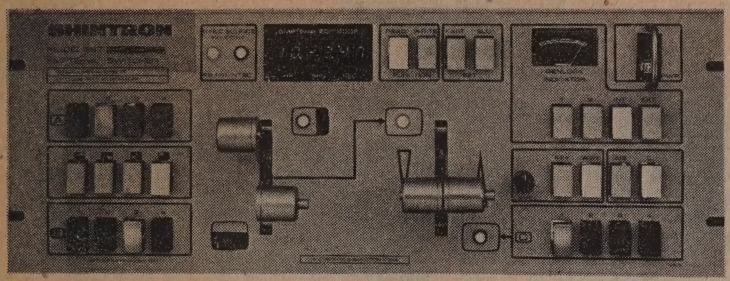
SHINTRON Video Components

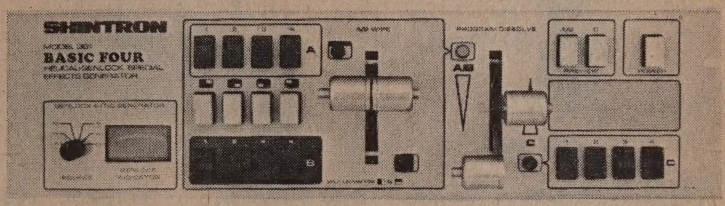
MODEL 367. CHROMATIC POST PRODUCTION SWITCHER



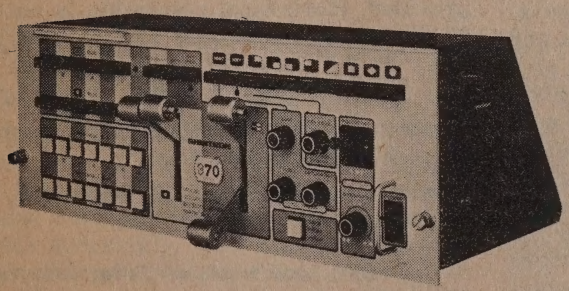
Combination of color NTSC Helical Genlock Sync Generator, a Production Switcher and SMPTE Code Generator/Reader. Universal Interface Panel for Sony and Panasonic cameras, NTDC auto detector, Genlock meter. A/B-C Bus structure. Gear reduction Lever, 7″ rack height. Data sheet DS-367.

MODEL 361. BASIC-FOUR™ SPECIAL EFFECTS GENERATOR

A professional monochrome Special Effects Generator with a built-in Helical Genlock Sync Generator. Genlock indicator, four corners and two wipes. A/B-C Bus structure. All momentary contact lighted push buttons.



MODEL 370. CHROMATIC COLOR SPECIAL EFFECTS GENERATOR



NTSC. Four corners, fade, wipe, diagonal, joystick control of circle, square, and diamond. Matting and keying. Vertical interval switching on preview and program buses. Automatic take button (preview to program) reentry bus for combination effects, and built-in colorizer. Built-in tally contacts. Gear reduction lever. 7″ rack height. Data sheet DS-370.

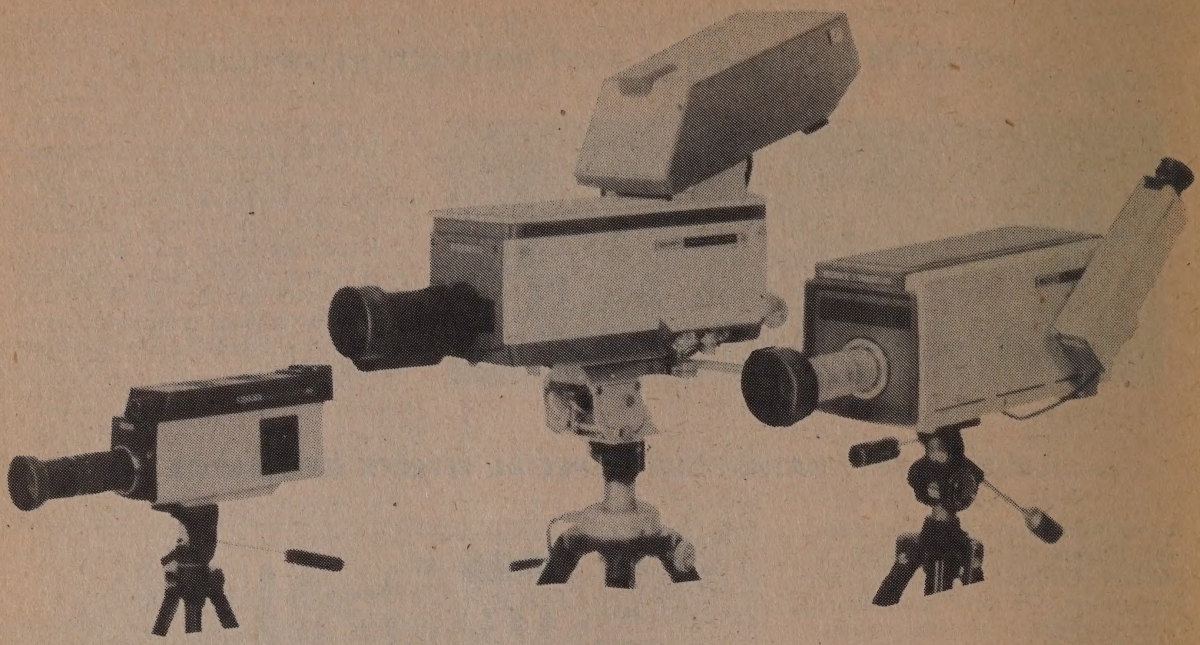
SONY® Color Video Cameras



DXC 1600 DXC 1200 DXC 1000

DXC-1600 Portable Trinicon® Color Camera

The DXC-1600 camera is a compact, lightweight, single-tube color video camera. It is highly suitable for on-the-spot recordings in your original program production, both indoors and out. The camera features no color misregistration and three-way power operation: 12 volt DC, 117 volt AC power pack and built-in rechargeable battery. It consists of a lightweight camera head and camera control unit with automatic/manual video-level control, built-in color temperature compensation filters, changeable lens (C-mount), and internal or external sync. The camera comes equipped with an f2.5 lens with zoom (18-108 mm—6X) lens. The scanning system provides 525 lines at 2:1 interlace. Horizontal resolution is better than 300 lines.

Output Signal: NTSC, 1 volt p-p, 75 ohms.

Dimensions: 7¾" wide; 6 13/16" high, 13¼" deep. Weight: 12 lbs. 9 ozs.

Power Requirements: 12VDC, 40 watts.

DXC-1200 Studio Trinicon® Color Camera

The DXC-1200 camera is designed for original TV program production and is equipped with a 5" electronic viewfinder that also functions as a waveform monitor An NTSC encoder and sync generator are integrated into one self-contained unit. The optimum illumination is 150-10,000 footcandles. The DXC-1200 features a double-action, single-knob, zoom lens control. An f1.9, 14-140 mm, cable-control zoom lens is available as an optional item. The original equipment lens is f2.5, zoom (18-180 mm) lens with an MS mount. Manual chroma-level, white balance, pedestal, and automatic/manual video level controls are provided. Horizontal resolution is better than 300 lines. The scanning system provides 525 lines at 2:1 interlace. Video Output Signal: NTSC 1 volt p-p, 75 ohms, sync negative.

Dimensions: 9 13/16" wide, 14 5/16" high, 29⅛" deep. Weight: 39 lbs. 4 ozs.

Power Requirements: 120 volts AC, 60 Hz, 65 watts.

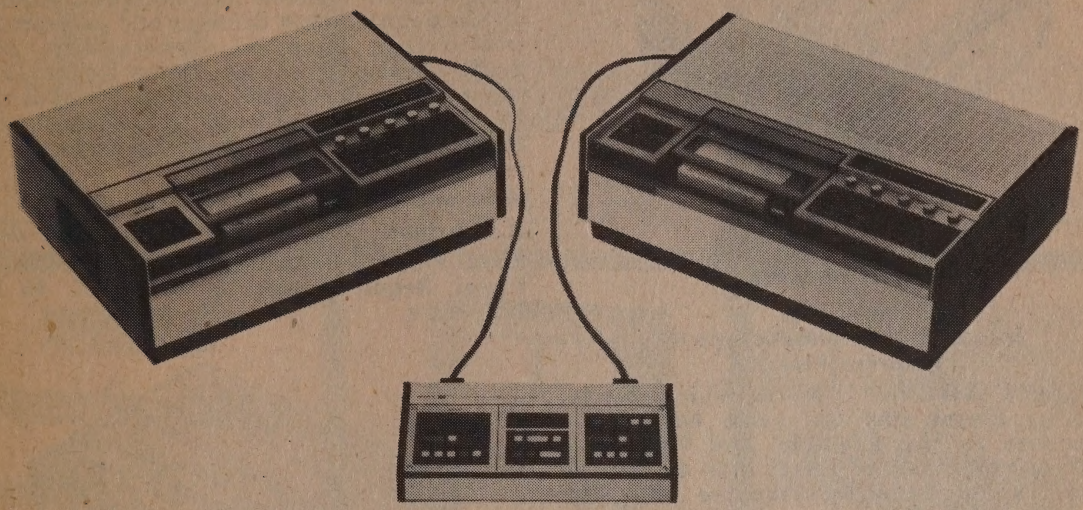
DXC-1000 Trinicon® Color Camera

The DXC-1000 camera features true color fidelity and no color misregistration over a wide range of lighting conditions and is the simplest of the Trinicon® series. It has a high quality picture and stable performance and is an ideal choice for a wide range of applications, such as in microscope and fiber scope systems. A 1.5" viewfinder is available as an option. Horizontal resolution is better than 300 lines. Optimum illumination is 150 to 10,000 footcandles. The output signal is NTSC 1.0 volt p-p, 75 ohm, sync negative. Dimensions: 7 5/16" wide, 7 11/16" high, 23 1/10" deep. Weight: 23 lbs. 6 ozs.

Power Requirements: 120 volts AC, 60 Hz, 40 watts.

Write or call your nearest CRAMER Branch for latest price information.

SONY® Cassette Record/Player



Sony Model VO-2850 U-Matic Color Video Cassette Recorder/Player

The VO-2850 offers a wide range of editing options; scenes from separate cassetts can create an entirely new program, even if they were recorded miles or months apart. New audio can be replaced without erasing the original soundtrack. Slow-motion playback and freeze controls make it easy to select edit points accurately. The VO-2850 features are: full editing capability; any combination of new video and/or audio can be added to existing program material; a separate head reads control track pulses for accurate editing; tapes are automatically rewound 5 seconds before each edit to permit the signal to stabilize before the edit is performed; memory rewind automatically returns a video cassette to its beginning, or to a specified location on the tape, and replays it from that point. The VO-2850 uses the M-Matic ¾" video cassette tape.

Video Signal System: EIA Standard, NTSC type color signal.

Video Recording System: rotary, two-head, helical scan system. Tape speed: 3¾" lps ± 0.2%. Wow and flutter: less than 0.15% rms. Video Input: 0.5V to 2.0V p-p, 75 ohm unbalanced. Video Output: 1V p-p, 75 ohm unbalanced. Horizontal resolution: monochrome, 320 lines; color, 250 lines. There are two optional units available that can be used with the VO-2850. One is the RM400 Automatic Editing Control Unit, with which two VO-2850 machines are used, one as a slave and one as a master unit, for tape editing. The other optional unit is the RM-410 Remote Control Unit, in which all VO-2850 control functions can be made from as far as 16 feet away.

Dimensions: VO-2850—25⅜" wide, 18¼" deep, 8¾" high. Weight: 77 lbs.

RM-400—15¾" wide, 7¾" deep, 1¾" high. Weight: 7 lbs. 7 ozs.

RM-410—6" wide, 6" deep, 1½" high. Weight: 3 lbs. 10 ozs.

Power Requirements: VO-2850—120 volts AC, 60 Hz, 117 watts

RM-400—Supplied by VO-2850, 6.5 watts

RM-410—Supplied by VO-2850, 0.5 watt

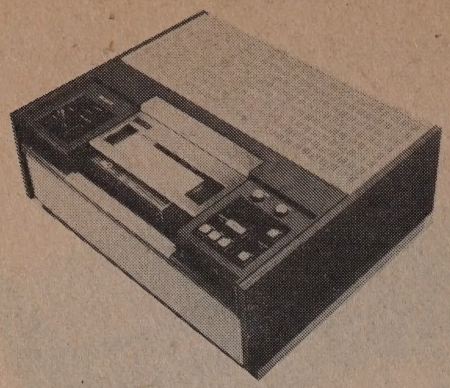
SONY® Recorders/Players



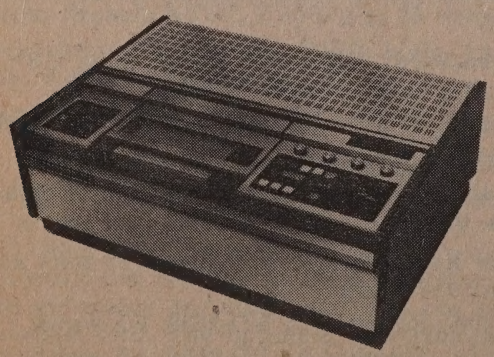
Model VP-2000

Model VO-2600 U-Matic Type II Recorder/Player

The Sony VO-2600 U-Matic Videocassette Recorder/Player has the same basic tape transport as the VO-2850 and features: signal-to-noise ratio of better than 45 dB; increased audio frequency response 50-15,000 Hz; solenoid controls; ease of operation with logic control circuits; slow-motion playback and freeze frame controls for accurate selection of edit points; pause-edit control; remote control capability; and integrated circuitry. The chroma signal system uses a converted-subcarrier, direct-recording, EIA standard NTSC type color signal. It has a new detector and tape-protection circuit, and timer operation capability. The video recording system uses rotary, two-head helical scan. Tape speed: 3¾ ips. Wow and flutter: less than 0.2% rms. Video input signal: 1.0, + 1.0-0.5 volt p-p; video output: 1.0 volt p-p; Horizontal resolution: monochrome, 320 lines; color, 240 lines

Dimensions: 23⅜" wide, 9" high, 16½" deep. Weight: 69.5 lbs.

Power Requirements: 120 volts AC, 60 Hz, 130 watts.



Model VO-2800

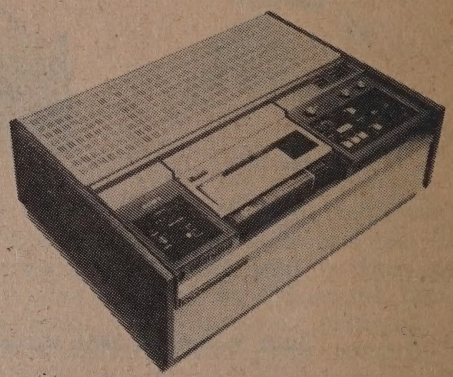
Sony Model VP-2000 U-Matic Type II Player

The Sony Model VP-2000 player features: a better signal-to-noise ratio (45 dB); increased audio frequency response (50-15,000 Hz); solenoid controls; ease of operation with logic control circuits; slow-motion playback and freeze frame controls for accurate selection of edit points; a new detector and tape-protection circuit; improved serviceability; integrated circuitry; and timer operational capability. Video signal output: 1 + 0.2 volt, 75 ohms. Horizontal resolution: monochrome, 320 lines; color, 240 lines. Tape speed: 3¾ inches/sec.

Wow and flutter: less than 0.2% rms.

Dimensions: 20⅜" wide, 9" high, 16⅜" deep. Weight: 59.5 lbs.

Power Requirements: 120 volts AC, 60 Hz, 130 watts.



Model VO-2600

Model VO-2800 U-Matic Type II Recorder/Player/Editor

The Sony Model VO-2800 features the capstan servo mechanism for noise-free, full-editing capability of adding any combination of new video and/or audio to existing program material; memory rewind which automatically returns a video cassette to its beginning or to a specified location on the tape, and replays it from that point. The VO-2800 also features playback-freeze frame controls that make it easier to select edit points accurately. The chroma signal system uses a converted-subcarrier, direct-recording, EIA Standard NTSC type color signal. The video recording system uses a rotary, two-head helical scan. Video input signal: 1V, + 1-0.5V p-p. Video output: 1.0 ± 0.2 volt p-p. Horizontal resolution: monochrome, 320 lines; color, 240 lines. Signal-to-noise ratio is better than 45 dB. Audio response; 50-15,000 Hz. Tape speed: 3¾ ips. Wow and flutter: 0.2% rms.

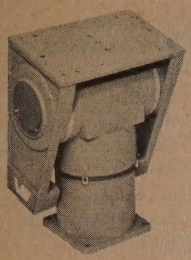
Dimensions: 23⅜" wide, 9" high, 16½" deep. Weight: 75.6 lbs.

Power Requirements: 120 volts AC, 60 Hz, 130 watts.

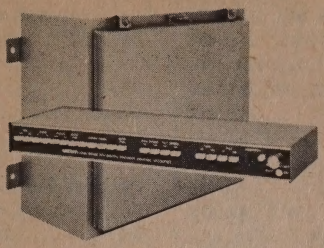
Write or call your nearest CRAMER Branch for latest price information.

VICON® means everything

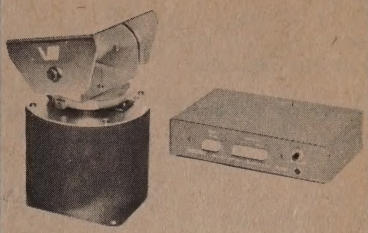
IT ALSO MEANS DOWN-THE-LINE RELIABILITY, FROM WALL BRACKETS TO PAN & TILT UNITS. VICON KNOWS, JUST AS YOU DO, THAT A CCTV SYSTEM IS ONLY AS RELIABLE AS ITS LEAST RELIABLE PIECE OF EQUIPMENT. WE STRIVE FOR SYSTEM RELIABILITY, AND SO SHOULD YOU.



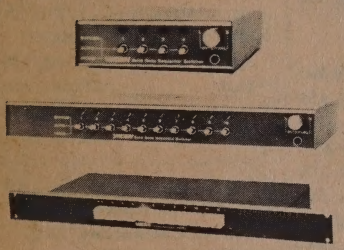
Every version of Pan and Tilt . . . Indoor, Outdoor, Light, Medium and Heavy Duty, Studio Silent, Explosion Proof, etc.



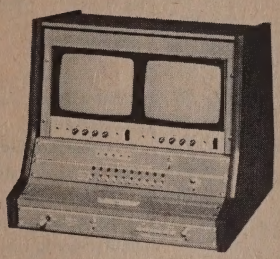
Long Distance Control through the use of Pulse Modulated Signals over simple twisted pair cabling for miles distant remote operation.



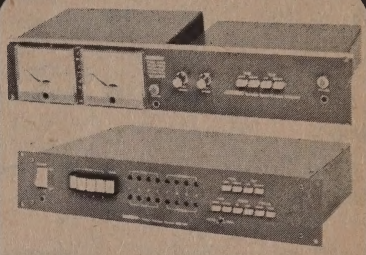
Indoor and Outdoor Scanners, with or without control, Light, Medium and Heavy Duty — all voltages.



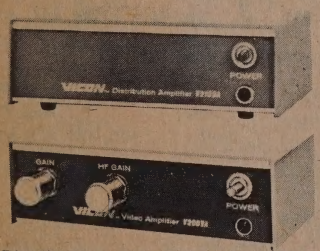
Every variety of Switcher: Manual, Illuminated, Sequential — both Local and Remote Control, Vertical Interval.



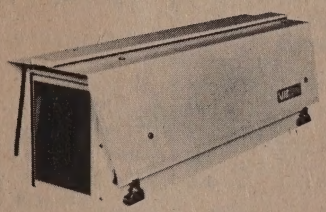
Modular Stylized Consoles, standard and custom from Small Executive Desk top to Full Systems.



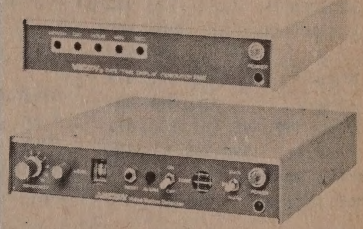
Controls of every description: Preset, Remote Setting, Auto Readout Multiple Function, etc.



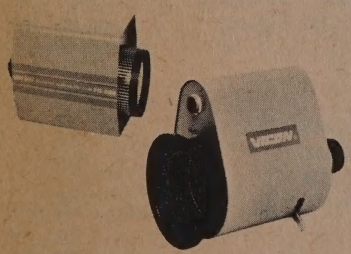
Distribution and Video Amplifiers. Relay Boxes for all cable distribution and distance compensation.



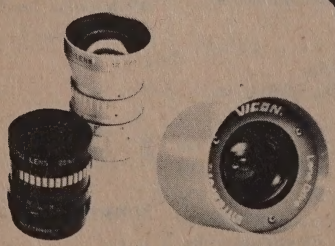
Indoor, Outdoor, Dustproof, Explosion-proof, hidden camera. Enclosures and Housings for every conceivable use.



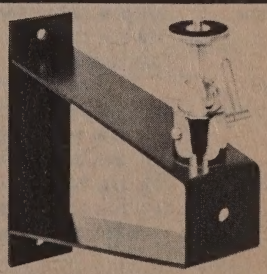
Time and Date Generators in many various versions. Image Motion Detectors.



Remote Controlled Motorized, Push-rod, Crank Driven, Cable Driven Zoom Lenses. Stock or Custom.



Fixed Focal Length Lenses, Motorized Spot and MFTM Filtered. Completely auto in addition to a wide range of Manual Lenses.



A complete line of Mounting Brackets, Pedestal or Ceiling Mounts and support hardware for all situations.

VICON® INDUSTRIES INC.

Model 3623XA, Contactless Controller. New Concept Edgewise Design.

Model 7527, ANA-LED Solid State Panel Meter. Easy to Mount and Read

cramerkit™

Cramerkit is the first microcomputer kit with enough capacity to solve real problems, and with documentation and software so simple that it can be wired and used immediately. There's enough I/O and memory capacity in each Cramerkit to operate a point-of-sale terminal, an instrument controller, a data communications interface, an industrial robot, a sophisticated game, or a complex sequencer.

Based on the leading manufacturers microprocessors, these kits also include:

- RAM (1024 eight bit bytes), expandable up to 65,536 bytes with decoding for the first 16,384 bytes.
- ROM 1024 eight bit bytes in a preprogrammed erasable chip.
- I/O 8 bidirectional eight bit wide ports with decoding for 16 included (expandable up to 512 ports).
- Support circuitry—including master clock, complete buffering, control and synchronization logic, interrupts, and DMA controls.
- Switches, LED's and hexadecimal displays.
- Interfaces for front panel switches and LED's, a teletypewriter, any RS-32 compatible terminal and cassette tapes.
- Software
- Users Manual.
- Wallchart schematic.

These complete kits are available now featuring the Intel 8080A, Motorola 6800 or T.I. TMS 8080 microprocessors. Each kit consists of nearly 200 parts, which, if purchased separately would cost up to $746.00. Cramerkits, including all parts, plus software are available for only $495.00.

Coming soon: Cramerkits featuring the AMD 9080, Mostek F8 and RCA COSMAC, as well as bipolar kits using the Intel 3001, AMD 2901, T.I. SBP 0400 and the Motorola 10800.

Call your local Cramer salesperson today for more information about the latest news on Cramerkit.
